CALIFORNIA STATE

CALIFORNIA FARMER AND JOURNAL OF USEFUL SCIENCES.

VOLUME XXXI. SAN FRANCISCO, CALIFORNIA: THURSDAY EVENING, JANUARY 21, 1869. NUMBER 1

The California Farmer AND Journal of Useful Sciences.

PUBLISHED EVERY THURSDAY EVENING.

BY WARREN & CO.

Office—No 320 Clay street (up stairs), below Battery.

SAN FRANCISCO.

TERMS OF SUBSCRIPTION.

By mail, for one year, $5; for six months, $3. For a Club of five new subscribers, a sixth copy will be sent gratis. When payments are delayed six months $1 additional per year will be charged.

To City subscribers, delivered by carrier, 12½ cents a number or $6 a year in advance.

☞ Advertisements and Subscriptions must be paid for in advance. Payments in Gold or Silver.

☞ All letters on business connected with the office should be addressed to WARREN & Co. PUBLISHERS.

San Francisco, Cal.

LIST OF AGENTS:

OUR SUBSCRIBERS can send money BY MAIL safely Register at the Post-office, and the money will come direct and sure.]

WASHINGTON'S ACCOUNT OF THE AGRICULTURAL ADVANTAGES OF THE UNITED STATES IN 1796.

AN ACCOUNT OF THE CIRCUMSTANCES *which induced Sir* JOHN SINCLAIR *to apply to General* WASHINGTON *for information respecting the several States of North America in the year* 1796. — EDINBURGH May, 10, 1821.

"At the commencement of the year 1796, the aspect of public affairs in Great Britain became of the gloomiest description. Such was the success of the arms of France, and such the terror which they inspired, that the Continent seemed to be completely subdued; while the affairs of Great Britain itself were so unsuccessfully conducted as to give rise to the most serious apprehensions, in the minds of many, that it could not much longer continue the contest. The Minister who then governed this country (the Right Honorable William Pitt) was endowed with extraordinary talents and almost unequaled powers of eloquence. He was much better calculated, however, to shine in a popular assembly than to conduct a war, *more especially in conjunction with other States*, whom it was necessary to manage, to conciliate, and to rouse to the greatest possible exertions. He had not, himself, acquired any knowledge of foreign nations, and he would not listen to the communications of those who wished to give him true information respecting their characters and views—how far they might be depended on; and what they were capable of effecting. For some years I had been in habits of great intimacy with him, during which period every suggestion transmitted by me for his consideration was almost uniformly attended to. But latterly, from an inordinate confidence in his own resources, an unwillingness to listen to *disagreable truths*, (which an independent character felt it his duty to state, when any occasion required it,) and a dislike to those who would not be completely *subservient to him* on all occasions, he all at once altered so much his style of behavior toward me, that our connection together was dissolved.

"At that period of time, anybody who did not believe in the *infallibility* of William Pitt, was considered a species of public enemy. Disgusted with a nation which had thus submitted itself to the control of one individual, whom I considered in the light of a personal enemy, and seeing but little prospect that the country would be extricated from the difficulties in which it was involved, unless a different system was pursued, which was not very probable, I naturally thought it necessary to look out for an asylum for myself and family, where we might live at a distance from the calamities of Europe, which seemed more likely to increase than to diminish. I was thence induced to apply to a most respectable correspondent, (the President of the United States) to know what part of America was the most desirable place of residence for a British emigrant.

"This short narrative will explain to the reader the circumstance which led General Washington to transmit to me the following account of the several States of America. Owing to the difficulty however, of removing a numerous family, and unwillingness to quit a country for which I had naturally a strong predilection, and whose commercial interests and agricultural prosperity I still hoped it might be in my power to promote, the plan of emigration to America, was, after much deliberation relinquished. This was attended with fortunate consequences to the country. The Minister was induced to adopt a measure recommended by me—that of issueing two millions of Exchequer bills, by the loan of which the commercial interest was saved from almost general bankruptcy—and soon afterward he supported with his influence the plan of instituting *'a Board of Agriculture'* moved by me in the House of Commons, where it met with considerable opposition, but whose establishment (to which the support of the Minister materially contributed) I trust will form an important era in the history of the first of arts.

"It is only necessary to add that, by various accidents, neither the original copy nor the duplicate of the subjoined letter reached me; but fortunately, *'a triplicate'* was sent, which safely arrived. It was accompanied by a letter in General Washington's hand-writing, which I thought it proper to have engraved, 'That with an account of the United States of America, drawn up by that great statesman, every public spirited native of America might have it in his power not only to possess himself, but to bequeath to his posterity *'the Autograph'* of the founder of American independence, and of one who is justly ranked among the greatest and most illustrious characters the world has hitherto produced.'"

JOHN SINCLAIR.
Born 10th May, 1754.

PHILADELPHIA, 10 Dec'r. 1796.

Sir: Enclosed is the copy of a letter which I had the honor to write you by a ship called the Suffolk,—it unfortunately, as I have just been informed, was captured by the French.—as none of my letters ever get out of their hand, I have, that I may not appear inattentive to the honor of your correspondence forwarded a copy of it.—With great esteem and respect,

I am Sir
Yr most obed't and
Very h'ble Servant
G. WASHINGTON.

SIR JOHN SINCLAIR, Bar't.
White Hall, London.

LETTER FROM HIS EXCELLENCY GENERAL WASHINGTON, *to the Right Honorable Sir* JOHN SINCLAIR, *Baronet, containing an account of the Several States of America, as they appeared calculated for the residence of a British emigrant, in the year* 1796.

(Triplicate.] PHILADELPHIA, 11th Dec., 1796.

Sir: The near view which you have of the Revolution in France, and of the political state of things in Europe, especially those of Great Britain; has enabled you to form a judgment, with so much more accuracy than I could do, of the probable result of the perturbated state of the countries which compose that quarter of the globe, and of the principal actors on that theatre, that it would be presumptuous in me at the distance of 3,000 miles, to give an opinion relatively to either men or measures; and therefore I will proceed to the information required in your private letter of the 11th of September, which I will give from the best knowledge I possess, and with the candor you have a right to expect from me.

The United States, as you well know, are very extensive—more than 1,500 miles between the north-eastern and south-western extremities—all parts of which from the sea-board to the Apalachian mountains (which divide the eastern from the western waters) are entirely settled, though not as compactly as they are capable of, and settlements are rapidly progressing beyond them.

Within so great a space, you are not to be told that there is a great variety of climates; and you will readily suppose, too, that there are all sorts of land differently improved and of various prices, according to the quality of the soil; its contiguity to, or remoteness from navigation. the nature of improvements; and other local circumstances.—These premises, however, are only sufficient for the formation of a general opinion, for there are material deviations, as I shall mention hereafter.

In the New England States, and to Pennsylvania inclusively, landed property is more divided than it is in the states south of them. The farms are smaller, the buildings and other improvements generally better, and of consequence the population is greater. But then the climate, especially to the eastward of the Hudson river is cold, the winters long, consuming a great part of the summer's labor in support of their stocks during the winter. Nevertheless, it is a country abounding in grass, and sells much fine beef, besides exporting many horses to the West Indies. A mildew or blight, (I am speaking now of the New England States particularly,) prevents them from raising wheat adequate for their own consumption; and of other grains they export but little or none, fish being their staple. They live well, notwithstanding, and are a happy people. Their numbers are not augmented by foreign emigrants, yet from their circumscribed limits, compact situation, and natural population, they are filling the western parts of the State of New York, and the country on the Ohio with their own surplussage.

New Jersey is a small State, and all parts of it, except the south-western, are pleasant, healthy, and productive of all kinds of grain, etc. Being surrounded on two sides by New York, and on the other two by the Delaware River and the Atlantic it has no land of its own to supply the surplus of its population; of course their emigrations are principally toward the Ohio.

Pennsylvania is a large state, and from the policy of its founder, and of the Government since, and especially from the celebrity of Philadelphia, has become the general receptacle of foreigners from all countries, and of all descriptions, many of whom soon take an active part in the politics of the State. and coming over full of prejudices against their own Governments—some against all Governments—you will be enabled, without any comment of mine, to draw your own inference of their conduct.

Delaware is a very small State, the greater part of which lies low, and is supposed to be unhealthy. The eastern shore of Maryland is similar thereto. The lands in both however, are good.

But the western parts of the last mentioned State, and of Virginia, quite to the line of North Carolina, above tide water, and more especially above the Blue Mountains, are similar to those in Pennsylvania between the Susquehanna and Potomac Rivers, in soil, climate and productions, and in my opinion, will be considered, if it is not considered so already, as the garden of America; for as much as it lies between the two extremes of heat and cold, partaking in a degree of the advantages of both, without feeling much the inconveniences of either, and with truth it may be said, is among the most fertile lands in America, east of the Apalachian Mountains.

The uplands of North and South Carolina and Georgia are not dissimilar in soil, but as they approach the lower lattitudes, are less congenial to wheat, and are supposed to be proportionately unhealthy. Toward the sea-board of all the Southern States, (and the further south the more so,) the country is low, sandy, and unhealthy; for which reason I shall say little concerning them; for as I should not choose to be an inhabitant of them myself, I ought not to say anything that would induce others to be so.

To be continued.

Home Correspondence.

SILK CULTURE.

LOS ANGELES, CAL., Jan. 15th, 1869.

Dear Farmer:—Some time has now elapsed since my last to you. In that I promised to write you soon concerning matters of Agriculture, etc., and now that the smoke of the *Political Battle* has cleared away, and the people have confirmed their *"Grant,"* I hope therefore that the weapons of war may be beaten into plow shares, or some other useful *Agricultural* implements, that will bring peace and plenty to our much injured country. Hoping for a glorious future, we turn to to-day's prospects for southern California, especially Los Angelos Co., the *Italy* of America. Some of the *Farmer* readers may call this boasting—so it is; the people of Los Angeles County can boast of the finest climate in the world known to civization. There has been from time to time, and from different correspondents a great deal in its favor, yet a great deal more remains untold concerning its undeveloped Agricultural and Mineral resources, and if it was generally understood in the Atlantic States, especially the Northern and Western, and even the Northern portion of California. that Southern California posessed superior advantages in many particulars, the emigration would be ten to only one now, where lands are plenty and cheap, and the industrious man can with a few hundred dollars, make himself a comfortable home, in a clime not to be excelled, no, not found on any other portion of God's green earth. But then, everybody who has ever been here, knows this to be true.

Now about the Silk and Mulberry's, you know that is *our* hobby, and nothing fo—gy in that you know. That part or branch of Agriculture is commencing to assume gigantic proportions. There are several large plantations being planted near this City, from which millions of the little *Silk makers* will produce the golden fibre. All other branches of Agriculture are in a flourishing condition; the plow is busy in turning up the rich soil of our valley, and hundreds of broad acres are now being planted and sown. There was never better prospects for this part of the country. A reasonable quantity of rain has fallen in a reasonable time, yet we are in need of crying, as did "Oliver Twist."

We are having beautiful weather—everything is prospering; the city is rapidly improving, notwithstanding the great scarcity of lumber, having not half a supply for the city, saying nothing of the county improvements. We will for a time, say *Adios*, by adding that we send you in this letter two subscriptions, for the good *"Old Farmer,"* with a promise of sending a few more of the same whenever we can pick them up. Every farmer should read it.

Yours,
DR. DEWITT C. FRANKLIN.

INQUIRY ABOUT CALIFORNIA.

[We give the following letter just received by us from Orange county, New York, in order to show how great is the want of information among the people even of the EMPIRE STATE; yet one would suppose that the "Great Dairy County" of New York would be better posted about California, as they are supplying us with their butter. Our reply is below.—ED. F.]

ORANGE COUNTY, N. Y., Dec. 29, 1868.

Editor California Farmer:—

Having, through the kindness of the Editors of the *American Agriculturist*, obtained a copy of your valuable paper, I take advantage of the knowledge of your address thus gained, to enquire of you about the price of farming lands, in the region called by Gen. J. C. Fremont, the valley of San José, and described by him as "taken into connection with the valley of San Juan—a continuous plain fifty-five miles long, and one to twenty wide, opening into smaller valleys among the hills.' Of course I could not expect a detailed account of prices of land in every nook and cranny of this valley, but if you could give me some idea of the range of prices, I should esteem it as a great favor, as we are thinking of following the Star of Empire, and would like to have all possible information beforehand. Are prices of land, produce, etc., in California quoted in gold, or rather, is gold the regular currency? Please answer by mail, for which I enclose postage, and oblige, Very respectfully yours.

P. S.—Is the aforementioned valley considered healthy or the reverse, as Gen. Fremont speaks of "mosses on the trunks of trees, an indication of much humidity in the climate."

REPLY.

As our correspondent does not seem at all posted in California matters, especially in her agricultural resources and developments, we would advise him to obtain the "California Farmer" regularly, and read, as he can, letters from all sections of our State, (see letters from Los Angeles and Santa Barbara, in this number.) From these and continuous letters he would be able to gather sufficient data to guide him in making up his mind to come to our golden land.

Land in the districts named vary from $3 to $100 per acre, according to their location. Lands distant from the central points, generally $3 to $10. The prices of everything is based on "Gold Currency," that being our standard.

As to the healthfulness of our climate, there is nothing to surpass it on God's fair earth.

THE GOODRICH POTATOE.

From all sources we receive the most flattering accounts of this "Noble Potatoe." That it is a very early potatoe no one can doubt; although it has never yet been tried as early as it should, for we are satisfied we could have *three crops* per year. Two crops have been grown very successfully.—One of our growers writes us of date January 11; from "Eden Valley," and says—

"I have 15 lbs planted now, 6 or 7 inches high, and 25 lbs just out of the ground; and I have 40 lbs more to plant to morrow. I planted them all in rows 4 feet apart and 9 inches in the row, *single eyes.*"

Their plan is excellent, say we, as planting at different dates will thoroughly test the best time of planting and ripening. ED. F.]

Another correspondent from Newcastle, Jan. 18, says, in regard to the "Goodrich:"—

"I planted them 3 feet apart each way, from 2 to 3 eyes to the hill. They had no extra manure, nor extra care. I dug them in July, weighed them and had 222 lbs; I was very well satisfied. We have tried them and found them, my wife says, *perfect.* I shall plant some this week."

[In both these cases this stock was raised from very small parcels of seed, had of us last season. ED.]

NUMBER ONE.

We ask of our friends and patrons to review this our Number One of our Sixteenth years labor, and tell us if we have faltered in our efforts, though grown old in service.

We ask attention to the varied matter selected for their pleasure and benefit, and especially to the several letters of our correspondents, those upon Silk Culture and the settling up of our State.

The correspondence of George Washington of which we speak in another place we know will be read with interest.

OUR ADVERTISERS.

We feel we have reason to be proud of the advertising patronage bestowed upon this journal.—We seek only *first class* advertisers and receive no others. Those who look over our columns will recognize only those whose business add to the prosperity and general welfare of our State—of these we have as will be seen, some of the largest and best advertisements ever given to any journal, and the *largest* in any journal on the *Pacific Coast*—for such advertisers we cheerfully labor, and to such we are grateful for their patronag.

Agriculture.

BESSIE'S DILEMMA.

BY MARY KYLE DALLAS.

The cows in the farmyard know me,
Dapple, and Doll, and Dun,
And when at the garden-gate I stand,
To greet me the watch-dogs run,
"Everything loves you here," said he;
And I knew his meaning—oh dear me!

He is tall, this sturdy farmer,
His hair is a beach-nut brown,
Freckled with gold in the sunlight,
I have never seen him frown.
"I'm sure to be kind to my wife," said he;
I knew why he said it—oh dear me!

Peaches grow in his orchard,
Red, and Russet, and Gold,
You would think snow lay in the meadow,
When he loosens his white sheepfold.
"I don't know a better dairy," said he,
"Than my wife will boast of."—Oh, dear me!

One could dream of a life Arcadian,
As a farmer's wife, I think,
When the cattle stand in summer,
Mid-leg in the brook to drink;
And the strawberries red in the grass I see,
And the birds in the branches sing hymns to me.

But this peach-cheeked, blue-eyed farmer,
Honest and good, I know,
Could he live out a pastoral poem?
Nothing but time could show.
And the unloved, lonely wives I see,
Are so worn and pitiful!—Oh, dear me!

Does any man love forever?
Does any man have time
To keep wedding bells a-ringing
Through life with the same sweet chime?
Do poets live up to their dreams that you see,
Better than farmers? Oh, dear me!

SAN FRANCISCO CLIMATE.

[We copy from the Pacific Medical and Surgical Journal the following article which we esteem highly important to make widely known, as it explains in brief what so few understand.

It is a well known fact, that every county in our State is full of beauty and the climate of each has a thousand charms—each and every resident claim their own counties to be the best; and we know all have much to make them appear so in reality. We also copy two valuable items from the same journal on the prevailing epidemic as important just now. ED. F.]

"Why should we deride people abroad for their ignorance of California matters, when men of good general intelligence who have resided here fifteen or twenty years are quite as ignorant in regard to some things which they ought to know? What proportion of our old citizens, for instance, could give to a stranger correct ideas of the climate, especially as to its local peculiarities? You meet an old resident of Marysville and fill your note book with memoranda of the weather in that quarter. You do the same as to Stockton, Los Angeles, Santa Barbara, and so forth, discovering always that each place enjoys the finest climate in the world. To confirm your record, you make the round of a new set of informers. But alas! every man tells a different story from his fellow resident, agreeing only in the general conclusion that the atmosphere of his home is elysian. The rural suburbs of San Francisco furnish a hundred localities in each of which the sea breeze of summer is a mere zephyr. Across the Bay, every neighborhood—almost every "ranch"—has a climate of its own, more blessed than any other.—In Oakland, the question has assumed a practical aspect—certain officials of that ambitious village have announced publicly that small-pox patients are sent there, or are likely to be sent there, from San Francisco, in consequence of the superior climate, Every well informed man knows, or should know, that the climate of San Francisco, in the winter season, is the best climate in the State, unless that of the most southern counties be excepted. The wind and mist from the ocean, chilling and harsh from May to October, are entirely wanting at this time, while the "northers" which sweep over the State are scarcely felt on the peninsula, and the southerly stormwinds are much lighter here than in most other localities.—In other words, San Francisco has no sea winds in winter, and is out of reach of land winds. As to temperature, that of the day varies but little in winter, in the valley regions of northern and middle California, while the nights are warmer on the peninsula of the metropolis, than elsewhere. In the summer months, from April to October exclusive, Oakland has a much more pleasant climate than San Francisco, though other parts of Alameda County, removed from the jaws of the Golden Gate, have a better climate than Oakland. In the other months of the year, from November to March exclusive, San Francisco is more free from wind and frost, and has a more agreeable climate in general than the regions east of the Bay."

We must go out of ourselves to be ourselves in any lofty sense. No man can truly call that his own which he has not himself made his own; none are really happy who have not earned their happiness by self sacrifice.

Good advice to young people—before you marry, be sure of a house wherein to tarry.

TIM BUNKER ON THE EIGHT HOUR LAW.

BIG FERMENT IN HOOKERTOWN.

MR. EDITOR.—We have been having considerable doings up here lately, and as you wanted me to keep you posted on Connecticut news in general, and Hookertown in particular, I send you some notes I took on the Eight Hour Convention. It was got up by Cicero Smith, and a few of the fellows that work with him, when they do anything, which is not often.

Big posters were stuck up on all the sign posts in town, calling up mechanics and working people in general to meet in the town hall and assert their rights, just as if somebody had been trying to take away their rights. There was a full house. Shadtown was well represented by the fishermen, and the White Oaks turned out strong. Kier Frink and the coal men came down in their carts, and Hokertown street has not seen such a collection of broken down wagons, and gaunt, rawboned horses, in many a day. It reminded one of the early days of the war, when they were holding big meetings to drum up recruits.

Judge Loring was appointed chairman, and Cicero Smith introduced a long string of resolutions, recommending eight hours as a legal day's work, and pledging the meeting for no man that was not in favor of an eight hour law. He said the time had come for the heavy burdens of labor to be lifted from the working classes that they now did all the work, got poor pay, and had to live in humble abodes, on scant fare, and endure all the ills of poverty. They were ground down by capital to the lowest depths, and had no time for the cultivation of their minds, and for social enjoyments. He hoped to see the day when the men who did the work should have the money, and the fine houses, and the fast horses, and enjoy themselves like human beings. He was in favor of paying the laborer as much for his eight hours as he now received for ten, and if that was not enough, he would go as far as the fartherest in relieving his wants, and meeting his wishes.—The only true foundation for a State was to glorify labor.

Seth Twiggs said he should like the latter part of the gentlemen's speech, better if he would illustrate it in his life. If anybody got one hour's work out of Smith, it would be so much clear gain. "There is as many as two ways of glorifying labor. One is to make stump speeches to working people, and the other is to pitch in and work yourself." He thought a man who held a plow, or chopped wood all day, honored labor enough site better than a man who was everlastingly talking about work and doing nothing. He didn't value the working of the jaws near so much as some other parts of the body.

Uncle Jotham Sperrowgrass said he didn't know as he understood this eight hour movement, but as far as he did, he didn't think much of it. "It ain't anything new. It was tried over on the Island more than forty years ago. There was a set of fellows trying to get rid of work, and they come nearer to saying what they meant than folks did now. They wanted to devide up property equally all around, and said nothing about working for it. When I was a boy, folks who got ahead any, used to get up early in the morning and work as long as they could see, and milk the cows in the dark. If they got the chores done by nine o'clock and got ready for bed, they did pretty well. They hadn't much time to feel abused and talk about their rights. The main pint was to get a living and get ahead in the world. They may have carried work a little too far, but arter all, they were first rate people, and better neighbors I never expect to find in this world." It seemed to him that the question was whether folks should work and thrive, or try to get a living without work. For one, he was in favor of work, and if he could find anything to do that paid, he should not be particular about the hours.

George Washington Tucker said he was glad there was somebody to consider poor folks. He had always worked hard and had nothing to show for it. He never owned a foot of land, and could never expect to without some change of times. He wanted more pay and less work, and he thought the eight hour plan the best one that had ever been tried for the relief of poor folks.

Jake Frink said he was a good deal bothered about the question. "Heaven knows I've had work enough to git along. I've been trying to pay for my farm these thirty years, and hain't made it eout yit. And I've worked like a dog a good part of the time. But how working eight hours instead of twelve is gwine to help me, I can't exactly see. I rather guess there would be less corn in my bin, and pork in my cellar in the fall, than there is now. I have to hire some help in summer, and if a man quits in the middle of the arternoon, and leaves me to git up the hay and and grain, I don't see how I'm gwine to be benefitted. It looks considerable like a humbug. I bo't some patent manure one't."

Dea. Little said he didn't like the looks of this question. "They tried the same thing in Sodom, and it didn't work well. The land was rich and produced big crops, and they had nothing to do but look on and see 'em grow. They come very near getting rid o' work, and took to serving the devil so that no decent man could live among them." Work was a good thing for sinners, and he never expected to live without it. He thought if his friend Tucker would pull harder at the hoe-handle, and not so much at the bottle, he would be able to own land and a house, and to be quite comfortable. Idleness clothed a man in rags in Solomon's time, and he didn't expect to see a lazy man's wardrobe improve any in our day. "If you want anything, work for it, and if you work long enough and hard enough, you are pretty sure to get it."

Rev. Mr. Spooner, said he was troubled about the moral aspects of this movement. It was nothing new that men tried to escape the curse of toil. Nothing has called forth more ingenuity, but the curse still remains, and he doubted if man would ever be able to repeal the law, "Six days shalt thou labor." Eight hours was not a day's work under this law, whatever the civil statute might make it. The average length of the day was about twelve hours. Men were able to work more than eight hours, and did generally without injury to health, and with much advantage to their fortunes. That was pretty good evidence that they ought to work more. Some people he supposed, worked too long and too hard, but there was a far larger number who were ruined by idleness and the vices that grow out of it. He thought the great want of the country was more labor.—If this measure was made a practical thing, it would take one-fifth from all the labor in the country, and that meant when he come to sift it down, a deduction of one-fifth from every man's income. It was labor that gave value to capital. Men who had money could not loan it unless its use could be made productive by labor. The country was not ready for any such reduction of production and of income. The agitation of the question he thought was michievous, and would only tend to embarrass the relations of capital and labor.

Last sunday Mr. Spooner preach a Sermon from St. Paul: "Neither did we eat any man's bread for nought, but wrought with labor and travail, night and day, that we might not be chargeable to any of you," in which he laid out the eight hour law in its grave clothes. Paul was a gentleman and believed in paying his way, which the eight hour folks don't. If we are going to have anything besides victuals and clothes, we've got to work more than eight hours for it. Quitting work in the middle of the arternoon in haying time won't go down. Even Jake Frink can see the bearing of that nonsense.

Yours to cammand,
TIMOTHY BUNKER, ESQ.

Hookertown, June 15th, 1867.

TO GET RID OF RATS.

SIR: Perhaps the following, from a good source, will be acceptable to such of your readers as are troubled with rats: Cover a common barrel with stiff, stout paper, tying the edge around the barrel; place a board so that the rats may have easy access to the top; sprinkle cheese parings or other "feed" for the rats on the paper for several days, until they begin to believe they have a right to their daily rations from this source. Then place in the bottom of the barrel a piece of quartz about six or seven inches high, filling with water until only enough of it projects above the water for one rat to lodge upon. Now replace the paper, first cutting a cross in the middle, and the first rat that comes on the barrel-top goes through into the water and climbs on the rock. The paper comes back to its place, and the second rat follows the first. Then begins a fight for the possession of the dry place on the stone, the noise of which attracts the rest, who share the same fate. The second method is recommended by a servant who was "experienced." She took a small quantity of old Bourbon whiskey, made it sweet with sugar, crumbled in bread enough for the crowd, and set the dish in the cellar. A few hours after she went down, and found several rats gloriously fuddled, engaged throwing potatoe parings, and hauling one another up to drink. These were easily disposed of; and those not killed left the premises immediately, suffering from a severe headache.

Yours,
Bulimba, August 15. J. J.

IMPORTANCE OF CULTIVATION.—At a late meeting of the Alton (Ill.) Horticultural Society, E. A. Riehl, in the course of a lecture on soils and orchards, made the following remarks:

Were a beginner to ask my advice on this subject, I would say to him, prepare your ground well and thoroughly, if you can, and then give good, thorough and constant cultivation; but, if you must be slack in any thing, let it be in the preparation of the land. I would far rather take raw land that has been grubbed and broken in the common manner, and plant my trees without any other preparation, and then give good, thorough cultivation, than to have land prepared in the best and most thorough manner, and then give such cultivation as orchards generally receive.

Perhaps some one take what I call thorough cultivation? By thorough cultivation I mean working the soil so that it shall be free from weeds, and mellow, all the time from early spring up to about September; any manner of cultivation that will give those conditions, I call thorough cultivation, and it will answer my purpose whether a crop is grown on the ground or not; or, whether by mulching or by any other manner, give us these conditions, and trees and plants will grow and be fruitful, whether the soil has been deeply prepared or not; and, on the other hand, thorough preparation will avail nothing unless followed up with thorough cultivation.

A FEW GOLDEN TRUTHS.

BY HENRY WARD BEECHER.

LOVE'S MESSENGERS.—"A beautiful mother sits in her house and says, "Mary go down to that dwelling, and carry this food. Julia, go down to the dwelling on the other side of the street, and carry this tea and this sugar. Charles, take this money to that man; I promised to pay his rent James, take this clothing down to that woman; she is sadly in need of it. Elizabeth, take this book to that child." Elizabeth, and Mary, and Julia, and Charles, and James, are so many names of the messengers sent on these various errands of mercy; but the mother was back of them all, and sent them all.

"Now the soul has its mother, Love, and she says to Conscience, "Here, do such and such things;" to Veneration, 'Here, do such and such things;' and to reason, 'Here, do such and such things;' and Conscience and Veneration and Reason, and all the other faculties, run to do as they are bid; but it is the mother, Love, that sends them. They all represent her and perform her errands. Though each one walks with a seperate name, Love sits behind them, and they obey her mandates.

MAKING RULES FOR OTHERS.—It is not selfishness in themselves, but selfishness in others, that men hate. Every man wants his wife, his children, and his neighbors to love him supremely. Everybody thinks that everybody else ought to keep their temper. He is the only one that has a right to indulge in ill-temper. Every man draws the reigns tight in regard to other people, but allows himself the widest latitude,

TROUBLES SHOULD EXALT US.—You can imagine thistle-down so light that when you run after it, your running motion would drive it away from you, and that the more you tried to catch it the faster it would fly from your grasp. And it should be with every man, that when he is chased with troubles, they chasing, shall raise him higher and higher."

RELIGION NOT TO BE LOCKED UP.—Do you suppose that religion is like a bird in a cage, and that you can lock it up in the church, and that the keeper will take care of it, and feed it, and have it ready to sing for you whenever you choose to come here and listen to it? Is that your idea of religion? Very well, then, your Bible and mine are different. We read different translations!"

PROTECT THE NOBLE HORSE.

There is one infallible truth constantly to be obtained, of the cruelty of the use of the check-rein and of its injurious effects, though we believe very few persons are aware of it. Whenever a horse has been worked with a tight check-rein, the corners of his mouth become *raw, inflame, fester*, and eventually the mouth becomes *enlarged on each side*, in some cases to the extent of *two* inches. Even before the bit has produced these visible effects, if the corner of the mouth under the bit be touched the animal will flinch as from hot iron. Let this be a sign with every master and servant. To what are these enlargements attributable? What causes them? Nothing but the friction of the bit in the efforts of the horse to get up to his work. How dreadful to see a horse heavy laden, his neck bent in a perfect curve—his mouth wide open—his eyes ready to start out of their sockets. The ignorant, though, *perhaps*, not cruelly disposed driver, looks on with admiration to see how *handsome* his horse appears, and imagines that the tossing head, open mouth, and gnashing teeth, are signs of game and strength; whilst, on the contrary, they are the most unequivocal evidences of distress and agony. Let any one test the truth of this by loosening the check-rein, and he will immediately find the horse go *faster*, keep his mouth shut, and his head in one steady horizontal position. Draught horses frequently exhibit the most painful examples of the cruelty of using a tight check-rein. Whether at work or standing they will often be found in continual torment—tossing their heads, or resting the weight of them on the bit, and so drawing back the corners of their mouths so as nearly to split the ligatures. At work, instead of going on steadily, they bob their heads, feeling the check at every step they take. A short time since the writer stopped a wagon to look at the mouth of the shaft horse—he found the mouth actually cut open by the bit at least two inches on each side: the wagoner said "I know'd it sure; *'cis the fair wear of the 'rn!*" The man was open to conviction, and upon the cause of this dreadful punishment being shown, he altered the rein.

The propensity to back, if not actually caused, is much increased by the check rein. In ascending a hill the freest horse may be compelled to stop and refuse to exert himself, knowing that he can put forth no more strength until the head is loose. A short time since the writer saw a crowd collected looking at a coal cart, full laden, drawn by an immense horse. The street is of moderate ascent and the horse had stopped just below the top of the hill; The driver turned the horse round down the hill, then up, and with his helpmate humanely assisted by pushing. The horse, without being flogged or spoken to, went on steadily with his heavy load, to about the place he before stopped at, and again gave up; he was sweating much and appeared to be a good *game* horse. The writer went up to the driver and advised him to unhook the check rein. The man said "it's no use, I have turned him round three times." The writer said he must be a good horse to take the load three times, and pressed him to unhook the rein. The man replied "he will fall down." The writer coaxed him to try. The rein was unhooked and immediately the horse took the load from the spot where he stood. The man said, "well I would not have believed that." It is not uncommon for considerate drivers to unhook their horses at the foot of a hill, which is very strong proof of the folly of using the check-rein at all. It has been, and may be again advanced as a plea for its retention, that a horse after having been used to a rein will miss it and so be liable to fall if he trips after it is taken off. A trial will prove that this is not the result. A check rein is fixed to the falling horse *falls with him*—it cannot save him; it keeps a horse from seeing and avoiding stones and other impediments; it is a hindrance, not a help; an injury, not a benefit. It cannot be supposed that a horse stumbles willingly; therefore to punish him for it, as is too often done, is wrong, and only adds to his fears.

To the ladies, the Society appeals with earnestness, knowing full well how pained they would be were they conscious of the horse's agony which causes that unceasing motion of the head which they have, doubtless, at times observed. Could these speechless sufferers answer the inquiry, "Why do you continually toss your heads while standing in harness? Why do you stretch open your mouths, shake your heads, and gnash your teeth? Why do you turn your heads back towards your sides, as if you were looking at the carriage?—they would answer: All this is done to get relief from the agony we are enduring, by having our heads kept erect and our necks bent by tight check-reins.—*From Pub. of Royal Society of London.*

Miscellaneous.

TRUE'S

IMPROVED

POTATO PLANTER

This is, undoubtedly, one of the most valuable machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of Men in Planting Time

Makes its own furrow, cuts the potato in such slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly and does all this as fast as a horse can walk over ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all spring and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attention to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it.

Particulars and Catalogues can be had at our office

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a handsome return for labor and capital can be made from.

WARREN & CO.

EARLY GOODRICH POTATO

Important to Market Gardeners and the Agricultural Public.

The Undersigned, having growing and tested the above Potato for two seasons, have no hesitation in pronouncing it far superior to any other grown on the coast, for an early Potato, and now offer it for sale. It is very early (from three to four weeks earlier than any other) good size, white skin, smooth eyes, white flesh, superior table qualities, and very productive.

BY F. H. NEWMAN.

rone thou thy words, the thoughts control
That o'er thee swell and throng;
hey will condense within thy soul,
And change to purpose strong.

at he who lets his feelings run
In soft luxurious flow,
hrinks when hard service must be done,
And faints at every woe.

'aith's meanest deed more favor bears,
Where hearts and wills are weigh'd,
han brightest transports, choicest prayers,
Which bloom their hour and fade.

ANTIQUITY OF THE SILK-WORM.

annot see any reason to doubt but that the worm had its original within the sixth day of orld's creation, on which day the species of nd insects, quadrupeds, etc., were created, as acred penman informs us—(*Gen., chap. i,* c —"And God said, let the earth bring forth the creature after his kind, cattle, and creeping , and beast of the earth after his kind: and it o. But whether the antediluvians had dis- ed any knowledge of this noble insect, the er of its spinning its web, and its usefulness ankind for clothing, etc., does not appear.— er is it certainly known at what time after ood, or by what nation, they were first taken e of. It is by some attributed to Noah, that st discovered the use of these wonderful crea- , and propagated them in China, where he is osed to have settled after the flood, and be- a husbandman in those parts, and by some ought to be Fobi, their first king. Others end that the knowledge and propagation of the worm were as early made known to the Per- by the sons of Noah, or their posterity. Be as it will, it is certain that both these nations the knowledge of silk very early, and were irst that propagated silk, and reaped the pro- nd benefit of it many hundred years before other country; for the first time that any was brought into Greece was after Alexander Great, had conquered Persia, and about 300 before the birth of our Saviour; which is t 2000 years since the knowledge of it in those s. And from thence it came into Italy, in the rlebing time of the Roman Empire. But it a long time very dear in all those western s, as being weight for weight of equal value gold,—a pound of one costing a pound of the r. Persia was the only place which Euro- s frequented for the sake of their silk; and it rtain that the Persians took care for many dred years to keep their manufactures to them- es, not permitting the silk-worms to be carried of Persia, or any persons to pass from thence the west who were skilled in managing them. made them in Europe to be so ignorant as to k that silk grew on the tops of trees, as cotton. o that by this may be seen how ignorant the opeans were as to the knowledge of the pro- tion of silk, and remained so until the time of tinian, the Emperor; the reign of which empe- began A. D. 526. He, looking on it as a great dship that the subjects of his empire should this manufacture of the Persians at so dear a , in order to put an end to this imposition. ent two monks into India (understanding that re was plenty of silk in those parts) to learn re how the silken trade was managed, and on ir return to bring with them, if it was possible e procured, some of the species, whether veg- ble or animal, from which the silk was produc- that so he might set up the manufacture in his n dominions. These monks, when they return- told him that the silk was produced by an ect, which could not be brought so long a rney alive. But understanding from them that eggs might; and that from them the creatures ght be propagated, he sent them back a second e to bring him some of those eggs, who, having ected what they went about, brought to Constan- ople great quantities of those eggs, which they sented to the emperor; enclosed in a roll or n of paper, with instructions how to breed, rish, and draw silk from the said creatures, ich was received with great applause and ad- ration; and from them have been propagated all silk-worms and their silk in Europe.

TRANSFORMATIONS OF THE SILK WORM.

The first is from an egg of the bigness of a mus- d seed, of a liver color, to a worm or catter- lar of a pale cream color inclining to white, th one small dark circle on each side upon every nt, and two half circles on its back, having six t—viz., three on each side near the head, and holders—viz., four on each side near the mid- of the body, and one small one on each side ar the tail. During this form it undergoes con- antly four sicknesses, each lasting about three ys, wherein it feeds not at all, but grows thicker, orter, and clearer, and at each sickness changes skin.

The second change is from a worm to an aurelia chrysalis, of the same color as the egg, having e shape of a small plum, whereunto it is trans- rmed after its spinning time, in which state it shut up in hot countries for fourteen or fifteen ys, in more temperate ones eighteen or twenty ys, without any food known to us, during which me this insect leaves two coats, both that of a rm, when it is changed into an aurelia, and that an aurelia when it becomes a moth in its silk case or bottom. (Case, silk-bottom, cod, ball, &c., are only different names for one and the same thing.

The third transformation is from an aurelia to a moth, coming out of its case with a head, legs, wings, horns, &c., for which passage it makes way by a whitish water it casts upon the silk, which moistening, and thereby putrifying it, the new creature eats its way out through the sharp end of the case by a hole as big as itself. There is found no excrement in the case, but only the two skins just mentioned. This last change into a moth is the perfection of this insect. Soon after the male and female moths are come out of their cases they couple, and continue coupled for eight or ten hours; the male having spent himself, falleth down, and in a short time after dieth, and the female, having first laid her eggs, shareth the same fate. The eggs, when they are first laid, are of a pale yellow, but in a few days change into a liver color. And, what is wonderful: these eggs are kept ten months in the year as a dead thing, taking life again in their season.—*English Antiquarian.*

GRAPE VINES.

Learn How Grapes are Grown

IN THE EASTERN STATES.

LEARN HOW TO GROW

Small Fruits:

Raspberries,
Blackberries,
Strawberries,
Currants,
Gooseberries, etc.

Many *New Varieties* have, within a few years been brought out, which far surpasses the old varieties; such, among Raspberries, are the

Clark, which we place at the head of the list of tried varieties;

Davison's Thornless Black Cap, an entirely thornless black Raspberry, of very distinct habits of growth. Excellent fruit;

Prosser, a competitor for the position the Clark has taken. Stands dry Summers well;

Philadelphia, most productive

Doolittle Black Cap, extensively planted for field cultivation;

Cattawissa, good flavor, red; bears two crops annually. Have seen it with ripe berries and blossoms at the time of our first snows, about November 20.

AND MANY OTHER VARIETIES.

Among *Strawberries,* the *New Varieties* are

Charles Downing,
Dr. Nicaise,
Nicanor,
Durand, etc.

All these varieties are described in the New Edition of our

"Manual of Grape and Small Fruit Culture."

This is a neat little Pamphlet, containing full instruction how to cultivate all these different varieties of Small Fruits. It contains full descriptions of the New Blackberries,

WILSON'S EARLY and KITTATINNY,

together with a new White or Cream-colored variety, which will be brought out this fall. Also,

HOW TO GROW BLACKBERRY PLANTS.

Last Fall we disposed of over 250,000 Blackberry Root Cuttings. We have heard of but few instances where they did not grow. We sent thousands of them to customers, by mail, as an experiment, to prove they could be sent safely as far as California. We sent a package to Colonel Warren of the "California Farmer."

Our Pamphlet, containing Price List of our stock of Plants and Cuttings, can be obtained by calling at the office of the California Farmer, or by addressing Col. Warren, Editor California Farmer, San Francisco, Cal.

We have 50 acres devoted to the culture of Small Fruits not all cultivated yet; 20 acres in Strawberries; 14 acres in Raspberries; 7 acres in Blackberries; 2 acres in Grapes.

WARREN & CO., *California Farmer Office,* are appointed Special Agents for our Nursery Stock, where orders can be left to secure them to customers this season. Orders should be sent at once.

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE.

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, a grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit, is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

Farmer Office 320 Clay street, San Francis

VALUABLE PLANTS FOR SALE.

☞ **Persons who are desirous of securing a few** very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

For every club of Twenty, and $100, Agricultural Books valued at . . . 30 00

For every club of Fifty, and $250, Agricultural Books valued at 75 00

Thus securing to a Farmer, or a Farmer's Club, the nucleus of a good Library—The Books to be at our lowest advertised Gold prices.

Every Farming District in our State could by co-operating with us secure a large and valuable Library, without any other cost save a little labor and co-operation to extend the FARMER'S circulation.

To any Lady who will secure us Ten subscribers, and $50, we will send Magazines or Floral Books to the value of $15 00

For Twenty subscribers, and $100, we will send Books and Magazines, or a Sewing Machine valued at 35 00

For a club of Forty, and $200, we will send a "Howe," or a "Florence" Sewing Machine valued at 65 00

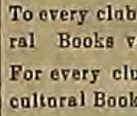
Each and every Premium to be at regular Gold Prices, and the Premium to be selected by the winner.

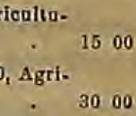
We hope these offers will be so appreciated that we shall have the earnest co-operation of many friends, and to all who shall interest themselves we shall be ready to fully remunerate their kindness.

Sample copies will be sent, when desired, to those who wish to canvass among their friends.

Address **COL. WARREN, Editor.**

or WARREN & CO., Publishers.





Horticultural Premiums

New Vines and Plants.

With a desire to extend the cultivation of the *New* and *Rare Varieties* of the *Raspberry, Blackberry,* and *Strawberry,* we offer the following

PREMIUMS:

For every new subscriber and $5 two plants of the Thornless Raspberry, and two plants of the Kittatinny Blackberry.

For two new subscribers and $10 we will give two plants each named above and one dozen plants of the Jucunda Strawberry.

For four subscribers and $20 four plants each of the Raspberry and Blackberry, one dozen of the Strawberry, and two Doolittle Blackcap Raspberry.

For five subscribers and $25 the same premiums as for four and four plants of the Doolittle Blackcap Raspberry.

For a club of ten and $50 we will give one dozen Davison's Thornless Raspberry, one dozen Kittatinny Blackberry, half a dozen Doolittle Blackberry and fifty Jucunda Strawberry.

These premiums will enable beginners to secure these new and rare plants, which are now worth their weight in silver.

Those who send now can also secure our November and December numbers of the *Farmer* and the entire year of 1869

WARREN & CO.

Country Homes Wanted.

There is wanted at this time, several **Homes in the Country,** in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale,* or to lease for a term of years, can find the parties that will suit them if they communicate with this office immediately.

None but good bona fide sellers need apply, as the parties requiring these places have the means to carry out all their agreements. Address the FARMER OFFICE.

BOUND VOLUMES FARMER.

☞ **Volumes of the "California Farmer" for** The last EIGHT YEARS, uniformly bound, can be had at the Farmer Office at $8 per Volume.

These Eight Volumes contain more useful matter touchin the practical workings of Agriculture as adapted to California Culture than any Book or Books Extant, as they comprise hundreds of Experiments, Letters and Essays upon the Culture of Cotton, Rice, Coffee and Tobacco; Grapes, Strawberries, and all other Fruits, with the Culture of Hops, Castor Beans, Flax, Hemp, &c. and the Whole series of Essays L. Prevost on Silk Culture, from early beginning.

This set of Volumes would be a Library of itself and invaluable to the Cultivator of the Soil.

Orders sent to Farmer Office will be promptly attended to.

The California Farmer.

SAN FRANCISCO:
THURSDAY EVENING.....JANUARY 21, 1869.

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production : Grains, Grasses Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms; Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for *one* insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so

Send for Sample Papers and get up a club, Address
PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office.

THE PHOTOSCOPIC TABLE COMPANY.

THE NEW INVENTION of this Company is known as the ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION of this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changible pictures, arranged to suit the wishes an desires of each owner of the table,

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

The Company have opened a Suit of Rooms for Exhibition and sale of the PHOTOSCOPIC TABLE at the corner of St. Marks Place, No. 23 KEARNY St, west side, up stairs, to which they cordially invite the public to examine them. 32 1

New Currants.

THE GONDUIN RED.

FARMER OFFICE.

AUZERAIS HOUSE,

SANTA CLARA STREET,

San Jose, Cal.

J. M. STAPLES, PROP'R.
—ALSO—

LAKE HOUSE,

DELMAR AVENUE,
SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,
31-1 Proprietor of the Auzerais House.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print our next issue on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a our office, or addressing EDITOR FARMER.

OUR GREETING.

With our opening Volume, we rejoice to know OUR COUNTRY is in a most prosperous condition, and marching on to still more greatness. Our own State, GOLDEN CALIFORNIA, was never so prosperous as at the present time, in each and all the great interests that make up a prosperous State.

Our principal Cities and our largest Towns, are prospering beyond any previous time, and every interest is increasing in a high degree. Our Farmers are *most prosperous*, for they are now the Lords of the Soil, and the Magnates of the Land. We rejoice in this general prosperity of our people.

What can we say to our patrons in this opening number of our *New Volume?*

What promise shall we make for our SIXTEENTH YEAR?

Shall we say that we will be more *devoted* to the cause we have espoused, that we will give more time or means to our work?

Shall we say we can or will give more of bodily strength, that is spent in pursuit of our enterprize; or of *mind* that is bent to it night and day, or shall we devote more *means* to the work?

Should this be demanded of us, we must say we *cannot do it*, for our work has had of us all there was of mind, body and estate for the last *fifteen years*, and those who know us best, know this to be true, therefore all we can say, and all we need say now is, we will do all we can to retain among our Patrons and Friends, those who have worked with us, many of them, during these many, many years.

While we review these years that are gone, there are memories that come to us both pleasant and sad. It is pleasant, and a source of sincere gratification to know so many whom we knew when our enterprize was started, "still live', and still walk in the pleasant paths of life and prosperity, and sadness arises when we recall many who were, but are not.

FIFTEEN YEARS makes wonderful changes in all the relations and circumstances of life and business, and when we look back and recall the days when we launched our little barque "THE CALIFORNIA FARMER," we hardly dared hope for it the long life it has lived, yet thanks to that Supreme Being who has given us life, and strength to labor on, amid many trials and difficulties, we have triumphed and enter upon our SIXTEENTH YEAR with cheerful hopes of walking many years still with our kind Patrons and Friends, to whom we tender our most sincere gratitude for their many acts of kindness and attention to us these many years, from those who have proved themselves *real* friends.

"Friends my soul with joy remembers!
How like quivering flames they start,
When I fan the living embers,
On the hearth-stone of my heart."

We, therefore, can only repeat our determination to make the CALIFORNIA FARMER still the Herald of that great cause which has now made itself felt in all the vital interests which make our State now so very prosperous.

We ask of all our kind friends their continued, cooperation with us, and their generous support of our Journal for which they shall have our warmest gratitude. We also say to the *Brethren of the Press* from whom we have often had a kindly word, we tender them our thanks for the kindly past, and wish them one and all, a full share of prosperity, in their several spheres of labor, ever wishing prosperity to all.

THE AGE OF POWER.

This may indeed be called "The Age of Power," for when we recall the rapid and widely extending territory of these United States, and the new fields of enterprize opening up from the wide and distant portions of China and Japan, brought near to us by Lines of Steamers, and connecting with the Great Pacific Rail Road that sweeps up and over the Sierra Nevada mountains as easily as a chalk plays upon our hill-sides. When these links of Commerce are thus rapidly uniting and bringing all distant places to our very doors, and when we see almost all kinds of labor changed from human toil to that of machinery, and each kind of labor more perfect, then we can truly say that this is the "Age of Power."

The near approach of the completion of the Great Rail-way that shall unite the Atlantic and the Pacific shores, by bands of iron, will be an event the like of which the world never dreamed of before, and an event which will mark an era in, not only the history of the United States, but of the World, changing the business relations of nations, and opening up new scenes and new enterprizes not yet dreamed of by man.

Whatever great event may transpire, or however great may be the credit that may be given to all other circumstances or parties that hasten on these events, one thing is certain, that to CALIFORNIA belongs the honor of hastening on the most auspicious day now near at hand, and to the wonderful energy and spirit which has been displayed by the President and Directors of the Central Pacific Rail Road, there is certainly due them a high meed of praise, for the stimulus which their labors have given to all other similar enterprizes connected with this great route, and other enterprizes to develope our State. The road is now over 500 miles completed, and will soon be at Salt Lake, and in all probability, the Grand Event: the joining of hands of *the Atlantic and Pacific* will take place early in May next.

What an event! This triumph will be indeed proof that this is the AGE OF POWER.

EXTRA COPIES.

We shall send out a large number of extra copies to those who are not yet enrolled upon our "Farmer List," hoping they may kindly favor us with their names as subscribers, believing they will *receive* more than they give, for we cannot but believe that every cultivator of the earth, and every raiser of stock, will always find sufficient to repay them many times the cost of this Journal.—Our Free Contributions of Seeds annually to our Patrons will more than pay the cost.

IMMENSE CULTIVATION.

From what we see and know from our own personal observation while traveling, and from the information we are receiving daily from our correspondents in every part of the State, as well as from other sections of this coast, the amount of lands put under cultivation this year will not only be immense and without a precedent, but beyond the conception of those who claim to be generally well posted.

The great success of the grain cultivation the past year, the large, general average crops over the entire State, the high price of our grain in Eastern and foreign markets, always ranking higher than other grains, and the same estimation being placed upon our Flour—these considerations have induced many thousands of persons not previously engaged in cultivation, to enter into farming on a large scale, as a mere matter of speculation, and for this purpose they have taken up thousands and tens of thousands of acres of land never yet before touched by the plow in every section of our State, while our farmers who have already been long engaged in grain growing, satisfied with the result of last year, are themselves stimulated to still greater efforts. They are enlarging their borders; they are either buying more land with their last years profits, or leasing large tracts, and thus the combined efforts of these permanent farmers, and speculating farmers, we can add a very large number of new comers who have selected lands specially adapted for grain growing, and these lands are now to a very great extent, plowed and planted, even beyond calculation; and go where we will, in any and every direction, valley, hill-side, and mountain even, the plow has been or is at work now turning up the soil to be kissed by the sunlight ere the seed shall be dropped into its warm bosom, there to be nourished and brought to perfection.

No careful observer can travel over this State without being satisfied that this is true. Hill-sides and hill tops to the very summit are being brought under the dominion of that *Sword of the Earth*, that divides limb from limb, and particle from particle, and prepares it for that "Baptismal Font" which shall fulfill its destiny; for the commandment which went from God to man in early creation, is to be fulfilled now upon millions of acres on this coast never before touched by man.

"Thou shalt till the earth, and subdue it."

HARVESTING MACHINERY.

We invite the special attention of our "Grain Raisers" to the new *advertisement* of Harvesting Implements which appears in our present issue.

MESS. TREADWELL & Co., the oldest and longest established on the Pacific Shore, showed by their *Illustrated* advertisement; their famed machine and their Card tells of its peculiar merits. It appears this week in two styles, one upon the *front page* and one in their Card inside. In addition to this machine this extensive establishment have a stock of Agricultural Implements, both in quantity and quality that are not surpassed by any house in the United States, as a visit to their Warehouse in this city, and at Sacramento and Marysville will fully prove.

MESS. WEBSTER BRO'S, STOCKTON.—This firm as will be seen by their large advertisement in our columns give full proof that they are prepared to meet the wants of the grain growers and farmers in the Great Valley above us. Mess. W. & Bro's. have an immense stock of the most superior implements, many of them their own invention by *Patent Right*, and they by their great energy and enterprize have have built up and prepared for themselves a vast business of an enduring character. Their Card in our columns speaks for them, and an immense business shows them fully prepared.

MESS. M. C. HAWLEY & Co., San Francisco, announce the present week their opening business for the harvest season, and tell their patrons they too are prepared for the GREAT HARVEST OF 1869.

Mess. M. C. Hawley & Co. are the successors of W. N. Hawley & Co., and now located at their new and spacious Warehouse on Front Street, three stories high, are opening a stock of Harvesting Implements which they claim they can show to their patrons with much satisfaction and pride, and they give in their present new advertisement an illustration of their *Pet Implement* the "*Buckeye*," to which they call the special attention of their patrons and friends over the State.

We think our grain harvesters will find implements this season that among these three popular Houses must not only suit them, but give entire satisfaction to every purchaser.

THE PLOWMAN.

Never has a country, new or old, seen such activity among the plowmen, nor even such furrows turned up to the sun as has been seen in California within the last few weeks. What would the farmers of the East say to see the furrows of our grain planters one, two, and three miles long "straight" as an arrow, and to see ten, twenty, forty, or one hundred sets of plows in our own grand vallies all at work at the same time, some single owners having forty "Gang Plows," two, four, or six plows each at work. Let our Eastern farmers come here and we will show them such plowing scenes as they never *dreamed* of before.—Where our farmers are preparing the soil, for the seed, on farms of 300, and 500 acres each, or 2000 to 10,000 acres, this is what we call *plowing*.

THE AUZERAIS HOUSE, SAN JOSE.—We call special attention to the card of the Proprietor of this very popular Hotel. It will be seen that a new feature is to be added for the comfort of Travelers. No Hotel in this State is more complete or better kept than the Auzerais Hotel of San Jose.

THE WEATHER.—The present warm and delicious weather is what may be called a "weather-breeder;" for all who have observed the winter season of California will remember that when we have such a series of warm and genial days in the wintry months, it is always followed by rain; so look out for a good storm within a few days.

BIRTH DAYS.

These are *Periods of time* which mark the important epoch in individual or national life—periods that should in almost all cases be kept in perpetual memory, like the birth of our nation, the 4th of July. Since our last issue some notable public days have occurred—the 8th of January, the battle of New Orleans, yet it was hardly remembered, yet it had an important bearing on this country, and was a *birth-day* to new impulses and crowning victories.

JAN. 11th—the birth-day of John Quincy Adams, a President of the United States, whose life was marked by great deeds and great consequences flowed from them.

JAN. 17th—the birth-day of Benjamin Franklin, another truly great man whose life and deeds, whose words and saying are scattered through the history of our land, doing great good to all.

Linked with the memery of this day comes to us the sad remembrance of a Dear Boy—our *first-born*—whose birth-day was the same, the 17th and who bore the Name of this great man; and although the loved one perished beneath the ice long years since, the day never comes to us that we do not see his cold lifeless form as we saw it taken from the river, clad in his skates and smiling beautifully even in the cold embrace of death.

At such recollections a Father can be permitted to speak of the loved whose whole life was one of the most devoted Obedience and Affection to parents and kindred, and whose life for fourteen years was without a blemish. The Memory of such a child though hard to loose, will ever be recalled with affection, and tears will drop upon the shrine of those who, like him, were pure and good.

WASHINGTON ON AGRICULTURE.

We think we could present no better "New Year's" offering to our readers in this the opening number of our New Volume, and the commencing of a New Year, s labor, than to lay before them the words of the "*Immortal Washington*," written in the early days of our country's history, and the earliest voice that was uttered in behalf of the *Cause of Agriculture*. These letters now published, that of Washington, and that of the distinguished Sir John Sinclair will show the condition of the United States near *three-quarters* of a century ago, and will show such a contrast with its present extended territory and its wonderfully increased prosperity as to make these letters of still greater interest. This valuable letter of Washington's bears the proof of his devotion to his country in every sentence, and will serve as a lesson to the youth of our land to study his exalted character.

The cultivator of the soil should treasure this letter and preserve it, read and re-read that it may teach him to *love a calling* that was the choice of *Washington*—an occupation that *he* esteemed the most interesting and important that could be followed by man.

We can only publish half of Washington's reply in this number, but shall continue it in our next with more valuable matter from Washington's Letters.

THE LOVED ONES OF HOME.

We call special attention to the new advertisement of the "Photoscopic Table Company" which appears in our present number, announcing the opening of their *Exhibition Rooms* on Kearny street. It will be remembered that the Tables were exhibited at the late "Machanics Fair" in the "Upper Gallery," and attracted much attention—crowds filling the rooms every day and evening. This invention we esteem one of the most valuable and complete yet conceived for the purpose of gathering all "The Loved Ones of Home" in a *life-like group*, and giving to them the appearance of actual life. Nothing has ever before been invented that ever approached it. Family groups of five, ten, or twenty, and "Troops of Friends" can be made to meet, that seem a living reality. We earnestly invite all to visit the rooms who desire to witness a beautiful invention. Mr. Mills the artist is always at the rooms to explain this wonderful invention.

WHITE PINE FEVER.

That there is an epidemic more sweeping and more universal than the SMALL POX, there can be no doubt. Let the careful citizen hear the conversation and see the preparation for this *Sterile Region* and any one can see the People are *White Pine mad*.

When in San Jose, lately, we took up the San Jose *Mercury* and there read what the Editor said. He advised all not to be in a hurry, it was an inclement place, and bade them wait till spring.—This was good advice, so we thought we would call in and chat with this good counselling Editor, so we called and inquired for the Editor, learned with astonishment that *he* had gone to *White Pine* Surely, thought we, it is easier to Preach than to Practice, and we turned away to muse on "human frailty."

THE NEW CALIFORNIA THEATRE.—This splendid Temple of the Drama was opened to the public on the 18th, when one of the largest audiences ever yet in our theatres greeted the Dramatic Debut. Mess. Barrett & McCullough have done themselves great credit and honor in the completion of such a theatre—perfect and beautiful in all its parts, and to be as they announce personally, a Theatre of a high order, where nothing shall mar the sensibilities of the educated and refined.

The opening night was crowned with complete success—the Treasury counting near $2,500 for the proprietors. We always rejoice at well-doing, and shall speak hereafter from a closer observation.

MADAME JAFFA'S CONCERT.—The Concert which this eminent artist had announced for the 18th, was postponed on account of *other artists* and their engagements, very much to the regret of Madame J. and her friends. The Concert however, is announced for the 28th, when it is to be hoped she will be greeted with a very full house, as so deserving an artist ever should be.

Acknowledgements.

Articles Received at the California Farmer Exhibition Rooms, No 320 Clay Street.

Books Received. We have the following *new publications* from the Publishing House of Messrs. A. Roman & Co.

Disease of Sheep. This is a new book from Henry Clok, a professional Veterinary Surgeon, giving a history of the various diseases in Sheep, and remedies for the same. A valuable book for Sheep raisers. The work also has an Essay on 'Cattle epidemics.' At this time this is an important subject as it will be seen there is danger of the cattle disease coming to California by the way of "crossing the plains.

No Baby in the House.—This is a story book for children, by Clara G. Dolliver, and published by A. Roman & Co.—a California book, and one of real interest to young ones, recounting in a pleasant manner how advantageous a "baby in the house" always will be. Many pretty stories in the book.

"Comic Recitations," by Jerome Barton. A series of humorous dialogues, recitations in prose and poetry, with laughable speeches &c.

Amatuer Theatricals.—This book is a sketch of Fairy Tale Drama, being a collection of plays for Drawing Room performances. The book by Miss S, A. Frost, Dick and Fitzgerald Publishers, N. York.

The above are all for sale by A. Roman & Co.

Pacific Coast Almanac. This is the "Year book of Facts" for 1869, just published by Henry G. Langley, Esq., our popular Directory publisher.

Mr. Langley has indeed made a most interesting and valuable publication. This work, containing as it does all that important series of information in relation to our National, State, and City Governments, and the Institutions under these Governments of which the reader would desire information as important in all departments of business. Mr. Langley deserves great credit for placing so much valuable information in so small a book.

Air Treatment of Wine. We have received a pamphlet on this subject from R. d'Heureuse, Esq., being a patent way of curing Wine by "Air Treatment," in fermentation, germentation, and curing of organic substances.

Mr. d'Heureuse claims for his discovery an entire new principle by which Wines can be purified in a very brief time. It has been highly spoken of, and approved by several Wine dealers.

Magazines Received. The California Medical Gazette for January, has been sent us. This publication continues to improve, giving new and valuable information upon medical matters near home.

The present number contains Essays upon the "Miasmatic Diseases of California" and upon the Small Pox and other important subjects.

The Carolina Farmer, a monthly magazine published at Wilmington, North Carolina, by W. H. Bernard Esq., Editor and Proprietor. We hail this magazine with a peculiar interest and feeling, as it recalls from the chambers of memory, scenes of years long ago which were of thrilling interest to us.

We were a resident of Wilmington long years ago, when a large portion of that place lay a heap of smouldering ruins from a devastating fire. We had escaped death by the sea upon the fearful shoals of Cape Hatteras, only to pass the danger of the yellow fever at Wilmington. Yet we were spared, and these scenes, trials and exposure, were again recalled fresh to our memory as we opened the Carolina Farmer.

We shall always welcome it and speak of it in full hereafter, perhaps with some incidents of those early days.

Beautiful Flowers We have received the beautifully *illustrated* catalogue and Floral guide of James Vick, Esq., the well known and popular Florist of Rochester, New York. This is a handsome volume of about 100 pages, giving full lists of choice flower seeds and directions for the planting of all kinds of flower seeds, roots, etc., and each leading flower is finely pictured in the book. Mr. Vick says in an introductory: "I seek to scatter choice flowers all over our country, *to add beauty to the beautiful.*" A noble desire and Mr. Vick has done this many long years.

We presented one of these little souvenirs to a Lady well skilled in Floriculture, and this Lady said it was one of the most valuable floral guides she had ever seen—"a Gem of a book."

We are pleased to call particular attention to so valuable a volume as it reflects great credit upon Mr. Vick, who as a Printer, Publisher, and Editor, and as a most successful Florist, has done honor to each and every department over which he has presided for more than twenty-five years.

Apples and Pears. We are indebted to B. S. Fox Esq., for a box of Pears and Apples of superior kinds, from his Nursery. We received them in admirable order as they came from his "Fruit House," finely preserved in all their freshness.

California Brandy, N. Carriger Esq., sent us a handsome sample, a liberal sized Demijohn of Brandy made by him. We are confident from the opinion expressed by competent judges, that this Brandy is far superior to a large portion of the Liquors imported from Europe, this being made from the new Wine in its purest state without drugs or doctoring of any kind.

California Champagne. We have received from I. Landsberger Esq., Wine Merchant on Jackson St., samples of his Champagne Wine made the present week, and in its new and fresh condition. Yet this Wine from its excellence in style and pureness of preparation is vastly superior to the great majority of imported Champagne, and especially to some California Champagne which is very deleterious. The Champagne Wine of this house bears a high reputation and is deserving of the "Gold Medal", which it deservedly won at the late State Fair.

Agricultural Implements. New Advertisements.

To the Farmers of California:

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurace we have of a Successful Planting Season, by reason of abundant rains, we know that the acreage will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or 'Haine's Gearing,' or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so con structed that after the Harvest Season is over they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRASHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid, Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Thrashing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

30-24 **STOCKTON, SAN JOAQUIN COUNTY.**

THE KIRBY LARGE MOWER.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down again when smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way, for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with a great strain, and be very liable to break.

THIS MACHINE HAS NO EQUAL IN DIFFICULT CUTTING.

It has an INDEPENDENT ACTION by Means of a Joint in the Frame, instead of the Moving Bar, so that the Knife is always Kept in Line with the Gearing.

It is Easy Draft for Two Horses, and can Cut Heavier LODGED GRAIN without Clogging than any other Machine on the Pacific Coast.

This Machine is the same as the Combined in every particular, only the Reaping Attachment is left off, and parties buying it can afterwards buy the whole or any part of the Reaping Apparatus from the Common Reel to the Self-Rake.

This large KIRBY MOWER is the only mower that has an independent action, and can use a reel when mowing, especially in windy weather. It can be bought as a Mower, with or without a reel.

In soft, sandy, sediment land, the lifter-wheel, on account of the narrowness of its rim, will sink in quite deeply. In this case a WIDE BAND should be provided and slipped on it, which will prevent the difficulty. The wheel as it is, will run very well on hard ground. These bands with all the Extra parts, will be kept Constantly on Hand, to supply all the calls of purchasers.

As a machine for clipping mustard, or cutting back grain that grows too fast, the Kirby Mower possesses advantages over all other Mowers from the fact that IT CAN CUT AT ANY HEIGHT from the ground, and work equally well and free under all circumstances

When you order EXTRAS for this Machine, always state the NUMBER ON THE PART WANTED corresponding with the number on the plates on the list, and also GIVE THE NAME of the part when there is no number on it.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose).

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINTS of your guards LOW by means of the forward bolt in the pole where it bolts to the machine. IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL.

Be sure to keep TILL THE NUTS TIGHT and the JOURNALS WELL OILED, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the JOINT TIGHT WHERE THE PITMAN CONNECTS WITH THE KNIFE, and then your machine will work well without trouble or expense.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

GERRISH'S SUBMERGED DOUBLE-ACTING FORCE PUMPS.

Patented by J. A. Morrell, Oct. 29, 1867.

The Cheapest, Simplest, and most Durable Force Pump In the World!

It is guaranteed not to get out of order; it challenges all competition, and has the recommendation of all practical Engineers and Machinists.

MANUFACTURED AND FOR SALE BY

LINFORTH, KELLOGG & RAIL,

IMPORTERS AND JOBBERS OF

Agricultural Implements and Mining Tools,

Nos. 3 and 5 Front street, San Francisco.

[30 3m]

Farmers, Attention!

Flax-Seed and Castor Oil Beans Wanted.

We want 1500 Tons Flax-seed, and from the experiments made the past year, it has proved a very remunerative crop, the yield being from

One to Two Thousand Pounds per Acre.

The price for the past year has been 4c per pound. We also wish to purchase large quantities of

Castor Beans,

for which cash will be paid on delivery.

PACIFIC LINSEED OIL AND LEAD WORKS,
30-23 King St. San Francisco.

GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

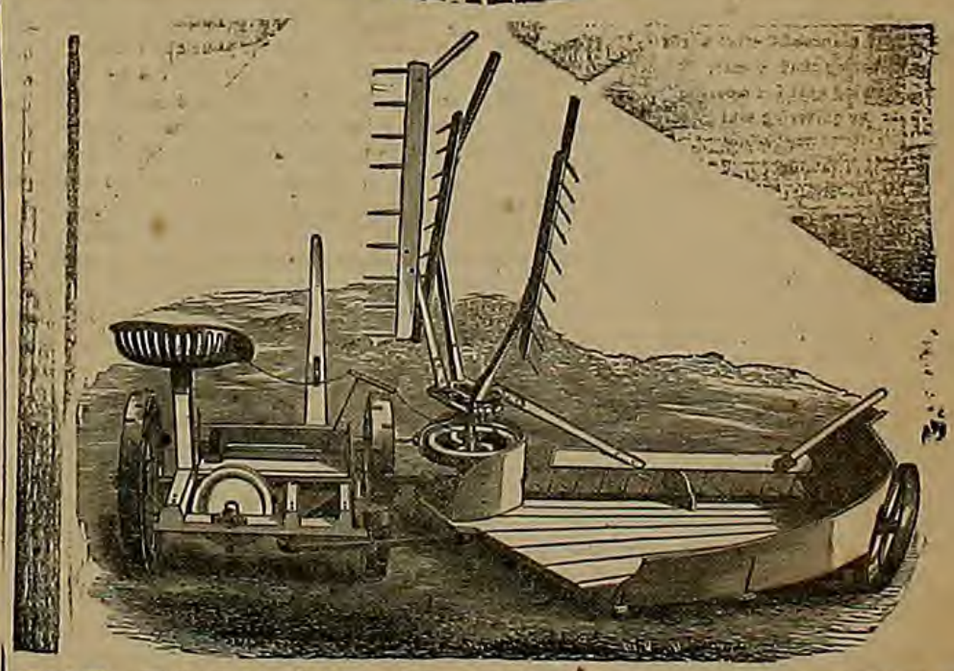
None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.

M. C. HAWLEY & CO., 108 FRONT ST., SAN FRANCISCO.

BUCKEYE Mower, Reaper, AND SELF RAKER

NEW YORK. SAN FRANCISCO. PORTLAND.



THE BUCKEYE IS THE BEST MOWER.

The Buckeye is the Best Reaper.

THE BUCKEYE IS THE BEST SELF-RAKING REAPER.

MARCUS C. HAWLEY & CO.,

108 & 110 Front St., San Francisco,

SOLE AGENS FOR THE

BUCKEYE MOWER AND REAPER.

We offer the BUCKEYE SELF-RAKING REAPER to Farmers with the utmost confidence, knowing they are Superior to any Self-Raking Reaper yet invented.

A large number were sold last year, and the universal testimony was, that not one man in ten could rake off grain equal to the Buckeye Self-Raker.

SOLE AGENTS FOR C. AULTMAN & CO.'S

CELEBRATED SWEEPSTAKES THRASHER.

ALSO, THE GENUINE

HAINES' HEADER,

Manufactured at Pekin, Illinois. Also

Home Miscellany.

WORDS.

BY ANNA SHIPTON.

Oh never say a careless word
Hath not the power to pain,
The shaft may ope some hidden wound
That closes not again.
Weigh well those light winged messengers—
God marks thy heedless word,
And with it too the fallen tear,
The heart-pang that it stirred.

Words! what are words? An idle breath
That floateth lightly by,
Smiles on the lip that utters them
In tones of melody.
Yet have they strength to wound or bless,
Lightly as they are flung;
Still writ upon some human heart,
Told by an angel's tongue.

Words! what are words? A simple word
Hath spell's to call the tears
That long have lain a seal'd fount
Unclosed for many years.
Back from the unseen sepulcre
A word hath summoned forth
A form that had its place no more
Among the things of earth.

Words! heed them well; some whispered ones
Have yet the power to fling
A shadow on the brow, the soul
In agony to wring—
A name forbidden or forgot
That sometimes, unawares,
Murmurs upon our trembling lips,
And mingles in our prayers.

Oh words, sweet words, a blessing comes
Softly from kindly lips,
Tender, endearing tones, that lift
The spirit's dear eclipse.
Oh, are there not some cherished tones
Deep in the heart enshrined?
Uttered but once, they passed and left
A track of light behind.

Words! what are words? Ah! knowest thou not
The household name of love;
A thousand tender memories
That float their graves above;
Long buried by the world's cold tread,
Yet mid the crowd they rise,
And smile as angel's guests would smile,
With gentle, earnest eyes.

Thou hast been blest if words ne'er bent
Thy head in anguish low,
To hide the trembling lip, the tear
That harsh words caused to flow,
Striving in vain to mask the pain
Veiled by thy silent pride,
A faint smile on thy blanched lip,
That strove the pain to hide.

But oh! more blest if memory brings
No record of the past,
Where angry glance and cruel words
Their withering shadow cast;
Where glistening eyes fell mournfully,
When on the quivering soul
Those bitter words went echoing,
Like the loud thunders roll.

By God's eternal dwelling place,
Those words went floating by;
And still the echo wanders on
Throughout eternity;
And whispering yet within thy heart
The "still small voice" is heard,
And thou shalt cry, "O, God, forgive
My heedless, bitter word!"

THE WIFE.

Once let a woman be sure she is precious to her husband—not useful, nor valuable, not convenient simply, but lovely and beloved—let her be the recipient of his polite and hearty attention; let her feel that her care and love are noticed, appreciated and returned; let her opinion be asked, her approval sought, her judgment respected in matters with which she is cognizant; in short, let her only be loved, honored and cherished in fulfillment of the marriage vow, and she will be to her husband, children, and society a well-spring of pleasure. She will bear pain, and toil, and anxiety, for her husband's love is to her a tower and fortress. Shielded and sheltered therein, adversity will have lost its sting. She may suffer, but sympathy will dull the edge of sorrow. A house with love in it—and by love I mean love expressed in words, and looks, and deeds—(for I have not one spark of faith in love that never crops out,) is to a house without love, as a person to a machine; one is life, the other is mechanism. The unloved woman may have bread just as light, a house just as tidy as the other, but the latter has a spring of beauty about her, a joyousness, an aggressive, penetrating, and pervading brightness, to which the former is a stranger. The deep happiness in her heart shines out in her face.—She gleams over it. She is full of devices and plots, and sweet surprises for her husband and family. She has never done with the romance and poetry of life. She, herself, is a lyric poem, setting herself to all pure and gracious melodies. Humble household ways and duties have for her a golden significance. The prize make her calling high, and the end sanctifies the means. "Love is heaven, and heaven is love."—*Henry Ward Beecher.*

"There is a ruling passion in every mind; and when every other consideration has lost its power, this ruling passion retains its influence."

BABY LIFE.

[We take the following sketch of "Baby Life," by Mrs. Katie J. Jackson, from the "Laws of Life," as care is required for the little seedling plant, that it may become a fruitful tree, so care is required for the little immortal seedling, and Mrs. Jackson's sketch is truly a valuable guide to that end. Ed. F.]

I found the subject of babies is an inexhaustible, as well as a delightful one. Many topics have been suggested to me by letters of inquiry concerning different phases of baby life, and many more topics have presented themselves to me because of a sweet baby presence in our own household. Foremost among them is

QUIETNESS.

Dear mothers, let the baby-life of your children be peaceful and *quiet*. I know full well the many "disturbers of the peace" who stand at the nursery door ready for action—good souls they are too, who with the kindest hearts in the world are intent on mischief.

Brother Jack happens along and must coax a laugh out of the sleepy baby by a series of pokes under the ribs. Uncle Ned must have his turn at him, and send him tossing up in the air. Kate must go into ecstacies over him, and end by trotting him "off to Boston." Numerous aunts, uncles and cousins have their claims on him, and must all "take the baby" and twist him, and poke and pinch and caress him. Then comes the neighbors—good, worthy neighbors too, who must prove their friendship for you by handling your baby, and praising him, and kissing him, and chuckling his dimpled chin. Next are the neighbors' children—nice little boys and girls—who come and plead to "see the baby," and who view him with childish interest, from the little smooth white head and blue eyes to the pink toe tips, measuring his littleness with wonder in their eyes. And then follows the irresistable temptation to touch him; to pat his cheek, and to tickle the bottoms of his rosy feet "just a little bit." And so the infant life spins on, full of small excitements and disturbances which keep his nervous system in constant strain and action, so that when a new visitor comes in to see him, and frolic with him, he is ready at first sight to spring and jump and flutter, like a little dancing-jack. If babies could only be labeled, as are choice articles at fairs, with "hands off," what a deal of crying and sickness and soothing syrups would be saved.

I know it is rather hard for mothers to run the risk of seeming rude and uncourteous by denying their visitors access to the baby, and liberty to play with and excite him, but it is far better to summon courage to say no to your friends (giving them of course your reasons) than to allow them to trespass upon the needed quiet of your baby's life. Yet if you feel that he must be exhibited to visitors occasionally, by all means let the exhibition take place in the *forenoon* when he is fresh and vigorous from a night's sleep, and can better afford to edify company by laughing and crowing. Then after dinner shut down the nursery gates and bar them closely, that no outside influence may steal in to "molest or make him afraid." Let the sunshine and fresh air be his afternoon guests. Let him lie on a bed, or on a corfortable spread upon the carpet, and gaze about him on pictures, on sunlight and shadow, and let him yawn and dream and coo to himself and doze and *grow bodily*; or, if possible, dress him warmly and take him out for a ride in the open air. You need not fear that such treatment will make your child stupid. As the years go on he will show all the greater power and capacity both of body and intellect if you do not give him over to dissipation in the way of nervous excitements while in his infancy. Our busy, bustling, hurrying, intense American life develops the smartness and brilliancy and nervousness of a human being quite fast enough, even if that human being has not been subjected to a forcing process while in the cradle.

It is a sad but very evident fact that the children of American parents are a very fragile and sensitive class. With large and unnaturally active brains, and weak delicate bodies—often the seat of inherited disease—their chance for health is small at best. Could they have the placid temperament and vigorous constitution with which most of the German and Irish babies in our country are favored, they could much better bear the constant handling, and the many little dissipations and excitements to which their infancy is subjected.

I think the members of a household are apt to be a little selfish in their treatment of the household baby. He is such a dear little plaything.—He makes such delightful amusement for you, you almost grow into the belief that baby came into this world for the entertainment of the family.—Their innocent eyes, and soft cheeks, and sweet lips, and winning ways are well nigh irresistable, and I own that it requires great self-denial to keep hands off from the little ones whenever one comes into their presence. Yet amid all the temptations let us keep in mind the serious fact that babies have their needs and rights, and—dear mothers and fathers and sisters and brothers—let the spirit of peace and quietness brood over them.

The man who considers that the home duties of a woman are inferior to the political work of a man, must be either a bachelor or blind. The very highest qualities of the heart and intellect may be exercised by a mother, a sister, or an elder daughter, in watching over the physical, mental, and moral growth of the children in her care.—Heroic patience, a vigilance that never tires, an adaptation of means to the end, a careful study of individual traits, a keen psychological insight, may all find ample room for exercise within the four walls of even an humble home.

Write your name by kindness, love, and mercy on the hearts of the thousands you come in contact with, and you will never be forgotten. Your name, your deeds, will be as legible on the hearts you leave behind as the stars on the brow of evening.

GREAT TRUTHS.

By Channing.

One great and most difficult [illegible]al being beings, is, to derive constant aid from society without taking its yoke; to open our minds to the thoughts, reasonings, and persuasions of others, and yet to hold fast the sacred right of private judgment; to receive impulses from our fellow-beings, and yet to act from our own souls; to sympathize with others, and yet determine our feelings; to act with others, and yet to follow our own consciences; to unite social deference and self-dominion; to join moral self-subsistence with social dependence; to respect others without losing self respect; to love our friends and reverence our superiors, whilst our supreme homage is given to that moral perfection which no friend and no superior has realized, and which, if faithfully pursued, will often demand separation from all around us. Such is our great work as social beings, and, to perform it, we should look habitually to Jesus Christ, who was distinguished by nothing more than by moral independence, than by resisting and overcoming the world.

The grandeur of man's nature turns to insignificance all outward distinctions. His powers of intellect, of conscience, of love, of knowing God, of perceiving the beautiful, of acting on his own mind, on outward nature, and on his fellow-creatures,—these are glorious prerogatives. Through the vulgar error of undervaluing what is common, we are apt, indeed, to pass these by as of little worth. But as in the outward creation, so in the soul, the common is the most precious. Science and art may invent splendid modes of illuminating the apartments of the opulent; but these are all poor and worthless, compared with the common light which the sun sends into all our windows, which he pours freely, impartially over hill and valley, which kindles daily the eastern and western sky; and so the common lights of reason, and conscience, and love, are of more worth and dignity than the rare endowments which give celebrity to a few.

It is strange that laboring men do not think more of the vast usefulness of their toils, and take a benevolent pleasure in them on this account.—One would think that a carpenter or mason, on passing a house which he had reared, would say to himself, "This work of mine is giving comfort and enjoyment every day and every hour to a family, and will continue to be a kindly shelter, a domestic gathering-place, an abode of affection, for a century or more after I sleep in the dust;" and ought not a generous satisfaction to spring up at the thought?

Men's reasonings on practical subjects are not cold, logical processes, standing seperate in the mind, but are carried on in intimate connection with their prevalent feelings and modes of thought. Generally speaking, that, and that only, is truth to a man which accords with the common tone of his mind, with the mass of his impressions, with the results of his experience, with his measure of intellectual development, and especially with those deep convictions and biases which constitute what we call character.

Social order is better preserved by liberty than by restraint. A community which should open a great variety of spheres to its members, so that all might find free scope for their powers, would need little array of force for restraint. Liberty would prove the best peace-officer. The social order of New England, without a soldier, and almost without a police, bears loud witness to its truth.

The individual is not made for the state, so much as the state for the individual. A man is not created for political relations as his highest end, but for indefinite spiritual progress, and is placed in political relations as the means of his progress. The human soul is greater, more sacred, than the state, and must never be sacrificed to it.

One of the great evils of society is, that men occupied perpetually with petty details, want general truths, want broad and fixed principles.—Hence many not wicked, are unstable, habitually inconsistent, as if they were overgrown children, rather than men.

We hear much at present of efforts to spread the gospel. But Christianity is gaining more by the removal of degrading errors, than it would by armies of missionaries who should carry with them a corrupted form of the religion.

Diseases Produced by Vaccination.—An Impression prevails that much injury is liable to result from the use of vaccine virus taken from unhealthy subjects, and that such virus is in common use among medical men. This impression, by deterring persons from being vaccinated, has occasioned many deaths from small-pox during the present epidemic. The diseases mostly dreaded as propagated by vaccination are syphilis, scrofula and cancer. That scrofula and cancer can *not* be produced in this way, is the belief of physicians every where, almost without individual exceptions. That syphilis *may* be propagated, many authors admit, whilst they limit the possibility to the first stage. But it is so easy to avoid such virus that a physician must be either a blockhead or a knave to employ it. We say nothing of nurses, grannies, cooks, hostlers, and other respectable experts, who give and receive intense satisfaction by poisoning people's arms with any thing they can pick up under the name of vaccine. Vaccination has suffered much discredit from this source; not so much that persons have been injured by their operations, but because a sore arm so produced has been regarded as a protection against small-pox, when it had no more effect than a common boil. We believe that our citizens may trust themselves in all confidence to the hands of any respectable physican in the matter of vaccination.

Second Attacks of Small-Pox.—It is no new thing for variola to attack persons a second time. Jenner refers to seventeen such cases among the nobility of England, more than half a century since. Upwards of two hundred such cases were reported in London in 1851. In Wirtemburg 143 cases were recorded, of which 28 died. The proportion after inoculation is still larger. One instance is on record of five children having been inoculated with small-pox, successfully, four of whom subsequently contracted the disease, which was fatal to one of the number. An English surgeon is mentioned as having always an attack of small-pox after attending a patient with the disease.—*Medical and Surgical Journal.*

GOD IS LOVE.

"To me this is the profoundest of all truths, that the whole of the life of God is the sacrifice of self. God is Love; love is sacrifice—to give rather than to receive—the blessedness of self-giving. If the life of God were not such, it would be a falsehood to say that God is Love; for, even in our human nature, that which seeks to enjoy all, instead of giving all, is known by a very different name from that of love."

A Great man's intellect is like glass—it admits light as well as reflects it.

The real man is one who always finds excuses for others, but never excuses himself.

Talents are nurtured best in solitude, but character, in life's tempestuous sea.—*Goethe.*

The way to gain a good reputation is to endeavor to be what you desire to appear.—*Socrates.*

Every man is a volume, if you know how to read him.

Great effort from great motives is the best definition of a happy life.

We saw the other day at Thurlo's picture store a parchment dating back to A. D. 1268, just six hundred years ago. It was the coat of arms and family record of the Chutes. It contained every name, in the direct line, from Lord Taunton, the founder of the family, to the present day, embracing twenty-four generations, and gave a history of the origin of the arms, and the titles, offices, and the civil and military services of the different members of the family, together with a representation of the arms of twenty other families with whom they intermarried. Among the public men were Rob. Chute, Baron of the Exchequer in the reign of Henry VI., Edward, High Sheriff under Elizabeth, and Chattower, Speaker of Cromwell's Parliament.—*Newburyport Herald.*

Santa Clara College, S. J.

SANTA CLARA, CAL.

Conducted by the Fathers of the Society of Jesus.

THE EIGHTEENTH ANNUAL SESSION OF THIS INstitution will commence on THURSDAY, August 27th, 1868.

TERMS—Tuition in the Classical and Scientific Departments; Boarding and Lodging; Washing and Mending of articles; School Stationery; Medical Attendance and Medicines; Fuel, Light, Baths, etc., per session of ten months, ... $35

For further information apply to the President of Santa Clara College, Santa Clara, Cal., or to Rev. A. Maraschi, S. J., St. Ignatius Church, Market street, between Fourth and Fifth, San Francisco.

34-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal; its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to

HENRY E. CHILD,
30-22 41 Park Row, New York.

PACIFIC ANATOMICAL MUSEUM,

....AND....

GALLERY OF NATURAL HISTORY AND SCIENCE,

Eureka Theatre, Montgomery Street.

This truly elaborate and magnificent collection of all that is strange, wonderful and curious in Science, Natural History, and Art, is now open to the public.

Extensive embellishments and improvements have been made. The additions will include an immense collection in Botany, Ichthyology, and Entomology.

COMPARATIVE, FLORAL, AND BOTANICAL ANATOMY will be largely illustrated, and form a leading feature of the institution. Every exertion has been used to render this superb collection the most INSTRUCTIVE, AGREEABLE, and USEFUL IN THE WORLD.

INSECT AND ANIMAL LIFE will be beautifully displayed and the celebrated Du Chaillu GORILLA, which was exhibited ALIVE in Paris, has been added to the already vast collection of Human and Comparative Anatomy.

Open daily from 9 A. M. to 5 and 7 to 9 P. M. Sundays from 29x1

A PRINCELY RESIDENCE

IN THE COUNTRY

FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the Farmer. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO.

Miscellany.

AN AGRICULTURAL ADDRESS

Delivered before the Minnesota State Agricultural Society, at the State Fair at Minneapolis, September 30, 1868.

[We take pleasure in giving a portion of the most admirable address of Col. D A. Robertson, and regret we could not give the address entire.—There are many features in this address of a thoroughly practical bearing, which all Farmers should regard, and we trust it will be duly estimated.—We give the closing portion of the address, as the first part relates to that region of country only.—Ed. F.]

THE PREJUDICE AGAINST SCIENCE IN AGRICULTURE PASSING AWAY.

The old prejudice among farmers against scientific instruction and book knowledge applied to their labors is happily passing away. But in consequence of the scientific quackery of some, and the careless or incompetent editing of many agricultural periodicals by others, and the lack of discriminating ability among many farmers, more than from any other cause, the prejudice against scientific agriculture and book farming still survives to some extent. There are, however, beyond all question, books of priceless value on the practice of agriculture, written not by professional book makers—beware of these—but by successful, practical farmers For example, those of Stephens, Buel, Mechi, and others, and also Thaer Leibig and Johnson, the fathers of scientific agriculture. No farmer could make a better investment of money than in the purchase of the works of these authors, if he would only consult and study them, for which he has abundant time during our winter months. As Mr Mechi says, the want of scientific instruction has been the great cause of inadequate improvement in farming, compared with other useful pursuits.

It is cheering to observe how rapidly the prejudice against science in farming is passing away, and how encouragingly the desire for increased knowledge and associative effort is growing up in the rural mind. As the fogs of the valley are dissipated before the first rays of the sun, so does this prejudice vanish before the rising popular intelligence of the age in which we live.

It is true that the men of science only, would go hungry if the practical farmer did not raise food for them to eat, and that all the books in the world without actual practice, equal to an apprenticeship in the working part of the business, could never make a successful farmer of any man, no matter how learned. Muscle and mind, science and art, must be conjoined, or in partnership, to produce the most profitable results.

WHAT SCIENTIFIC MEN HAVE DONE FOR FARMERS.

And it is true that nearly all the improvements that have been made in methods of agriculture, and in its labor saving implements and machines, have been the product of the thought, study and experiments of scientific men, few of whom had ever learned even so much as to sow, plow or reap.

From the sickle to the cradle and then to the reaper, from the foot of the muzzled ox to the flail, and next to the thrashing machine; from dependence upon the fitful winds for cleaning grain, to the fanning mill; from the crooked stick to the wooden mould board, and then to the iron plow; from the wooden to the iron spade; were each and all immense strides in agricultural improvement; yet, it is no more true than strange that each of these improvements was accepted by farmers with reluctance, and not introduced into general use without great persuasion and difficulty.

In American farming capital and labor are more generally united in the same person than in any other department of productive industry, and it is this fact more than any other which secures self respect, true dignity, virtue and independence in the labors of our husbandry, and makes a knowledge of positive science so important to our farmers. The term positive science is understood to mean simply a knowledge of the laws of nature, which, in the physical world around them, farmers have a constant opportunity to observe, study and learn. Such learning, in the school of nature is the best of educations. It is the learning which trains the senses and the mind to habits of observation and logical deduction. The discovery of one law of nature leads to that of another, and becomes a clue which, once laid hold of, makes the way through the otherwise incomprehensible labyrinths of human knowledge easy and pleasant. Science, instead of mystifying, simplifies and explains. From the teachings of science the farmer, for example, first learned that the improvement of heavy clay lands requires draining and an admixture of sand; and that sandy lands require lime or an admixture of ordinary clay or marl; that grass lands are doubled in productive value by the application of plaster (gypsum).

The globe we inhabit is one grand laboratory. Within and upon its surface there is constant chemical action. The earthquake and volcano reveal the existence of forces awfully sublime, working within; while upon the surface is displayed to the eye of science, a great variety of chemical combinations, in the soils we cultivate, which analysis shows is composed of disintegrated rocks and decayed vegetable and animal matter, which receive from the rays of the sun, and from the atmosphere, from the vapors and gases it absorbs, the vital cause of germination and growth of seeds and plants.

The peculiar vegetation and natural rotation of trees and plants in the wild forests and fields; and the effects of chemical action upon the soil, the constituent elements of which only the science of chemistry satisfactorily explains, make some knowledge of this science of great value to the practical farmer, enabling him to determine in advance the proper adaptation of crops to soils, and the means, mechanical and chemical, whereby defects in his soils may be more easily and cheaply remedied. He thus learns that the earth is an organic thing, subject to derangement and disease, and that it sometimes needs medication. Every green house propagator understands this. The stomach of your land may become sour, and then, like your own stomach in the same condition, may need, for immediate relief, the application of an alkali, as lime for example; perhaps also a cathartic in the shape of drainage, to carry off the accumulated and stagnant fluids. We get this kind of information from books on agricultural chemistry, which any school boy can understand. Is not such science worth knowing?

A CHEMICAL ANECDOTE.

There is an anecdote in point related of an old farmer. He was a husbandman of the old school, and he had grown rich, not by the help of study and "new fangled" science, which was all Greek to him, and, apparently, as useless, but by dint of constant hard work, and begrudging, penurious economy. He had a son that so bankered after learning that the old man thought the only chance to put him in the way of making a living, was to send him to college to receive an education that would qualify him to become a doctor, lawyer or preacher, the only professions which the old gentleman supposed required an education above reading, writing and cyphering. The young novitiate for professional honors, when on a visit home during college vacation, happened to hear his father remark that a certain part of his farm did not pay for cultivation. "Lime it, father," said the college boy. "Lime it!" exclaimed the old farmer, impatiently. "Yes, father," responded the son, "that is just what it needs." "Well, well," rejoined the irate father, "this is coming to a pretty pass. You, who have not done a stroke of work on the farm for three years, to come here and attempt to teach me how to farm. That's the respect I get for all it has cost me to keep you in college." The boy begged pardon for the offense, but by tact and persuasion at last induced the old man to try the experiment of liming his sour land. The argument of large crops which followed the experiment convinced the old gentleman that science would pay. He was ever after ready to profit by the acquirements of his educated son.

WHEN THEY WANT TO LEARN.

So it is with others. When convinced of the value of science in farming, they are ready and anxious to learn. In this way, one intelligent, practical farmer is enabled to become the educator of his whole neighborhood.

The extent of improvement already made by science in the productiveness and profits of farming, where science is applied with intelligence, is amazing. It has doubled, more than quadrupled, the value of land. It has raised the production of wheat in England from nine bushels, the old maximum, to fifty bushels per acre.

In no other pursuit does proficiency demand the aid of so many sciences as agriculture. The principles of chemistry, botany, geology, entomology, animal physiology, mechanics and hydraulics, are employed by the husbandman in his daily labors, either ignorantly or intelligently, so that a knowledge of their elements is of actual money value to him. We may have rude farming without science, as we may have common roads, bridges and log cabins, but in every step toward improvement, whether we know it or not, the lamp of science must be our light and guide.

ABOUT KILLING AND SAVING LAND.

Any boor can scratch bountiful crops out of our virgin Minnesota soil, without skill or proper implement; for, like the original gold gulches of California, it contains the fertilizing riches of all preceding time; but greedy crops soon exhaust the best soils, and then greater capital and better methods will be required to make tillage remunerative. But the true policy is to husband our resources from the beginning and to adopt a system that will maintain the original fertility of our farms, which we will find to be our most profitable system of husbandry.

SAVE THE WOMEN.

Husbandmen of Minnesota! Whilst you are constantly on the alert to relieve yourselves from drudgery by the use of improved implements and labor-saving machines, whereby you are enabled to enjoy much leisure time, forget not your duty to the wives and daughters of husbandry, who during the livelong year care for you, and affectionately toil for your comfort.

Be mindful ever of their great need of labor saving implements, and all available conveniences of the household; and of more rest and recreation. Be glad to indulge them in the requirements of womanly taste and refinement; in their love for the beautiful and the good in nature and art; and in their delights of neat, well appointed homesteads, surrounded with grassy lawns, fruits and flowers.

Thus will you preserve their health, cheerfulness and comely attractions, and promote the happiness of the family and your own.

Far better is it to spend money for such enjoyments, than go without them for the purchase of lands not needed for cultivation, the price of which, in part at least, is wrung from the life-blood of the patient, drudging housewife.

Surely our good housewives deserve a better fate. I quote on this subject the following verses, quaint and true, of a fine old English poet:

"Take weapon away, of what force is a man?
Take housewife from husband, what is he than?
As lovers desireth together to dwell,
So husbandry loveth good housewifery well.
Though husbandry seemeth to bring in the gains,
Yet housewifery labors seem equal in pains.
Some respite to husbands the weather may send,
But housewives' affairs have never an end.
As true as thy faith,
Thus housewifery saith.
I serve for a day, for a week, for a year,
For lifetime, forever, while man dwelleth here;
For richer, for poorer, from north to the south,
For honest, for hard-head, for dainty of mouth,
For wed and unwedded, in sickness and health,
For all that well liveth, in good commonwealth,
For city, for country, for court and for cart,
To quiet the head and to comfort the heart."

THE PLEASURES OF FARMING.

Who so fortunate in all that makes life desirable as the independent farmer, of education and thorough acquaintance with husbandry, whose tastes have never been perverted by the seductions of city life. He is surely the best and happiest of men. Gen. Washington, on retiring from the Presidency, in a letter to Sir Arthur Young, says: "The more I am acquainted with agricultural affairs, the better am I pleased with them; insomuch that I can nowhere find so great satisfaction as in their innocent pursuits."

WHY FARMERS SHOULD BE THOROUGHLY ORGANIZED.

With the exception of husbandry, every money making interest in this our age of money, is thoroughly organized, and ever ready for aggressive or defensive action, as the occasion may require, whether in legislative halls, in boards of direction, or in the market place.

Our farmers are the most important working population of the country, and produce three fourths of its productive wealth. Out of their toil and products are directly or indirectly obtained most of the taxes, and yet they are at the mercy of all other interests. A projected measure that would transfer millions from the profits of agriculture into other's hands may be resolved upon by half a dozen wealthy gentlemen of elegant enterprise, seated in a private parlor, or around a board of direction, without exciting any more concern among our farmers than if the subject matter related to China or Japan.

The reason is our farming populations are cut up into isolated fragments, and are beaten in detail, in politics and everything else.

Such facts as have been adduced show the importance and necessity of organized societies of farmers, like the new order, the Patrons of Husbandry, with frequent meetings and wide extended fraternity for collecting and disseminating valuable information, and for mutual instruction and defence. Unlike the rural peasantry of Europe, our farmers own the land they cultivate. They are capitalists, freeholders, citizens and rulers of the state and nation. They are, or ought to be men of thought, reading and useful knowledge, as well as of manual work.

All other interests are armed and constantly on a war footing. Among the powerful nations of Europe, when one arms, all must arm. So it is in all communities. When every interest is cared for, when every interest is prepared for defense, all are cared for. Then there is justice, equity, peace and prosperity for all.

Going to Europe is so common now-a-days that the flourish of trumpets in the newspapers, which heralds the departure of some political or sole-leather grandee, seems absurd. Europe won't know when they reach her shores, nor miss them when they come back.

While the Radicals are giving the negro the ballot, they are giving the poor Indian the bullet. Why will not the ballot elevate the redskin as well as the blackskin?

A COMPLETE TRIUMPH!

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry: thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H. & L.

is on the red cover of the package.

Depot, 320 Jackson Street,

For storage, apply at the Warehouse to

THOMAS H. DOUGLAS, Storekeeper and Wharfinger.

Or to I. FRIEDLANDER, 112 California street.

Railroad Lands.

CENTRAL PACIFIC RAILROAD, LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

[Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, January 21.

Grain, &c

Our Grain Market this week shows evident signs that the producers begin to see the mistake they have made in holding on to their that our producers will bear in mind carefully what the various Journals that claim to be the "Friends of the Farmer" have counselled them the past season. We regret most truly that our hard working Farmers should be led astray widely by the counsel of the Sacramento *Union* and the Stockton *Independent*, who have advisthem to "hold for high rates."

Those Journals that have so counselled have cost our Farmers and the State *millions of dollars loss*, and we have now in our Warehouses and with our Farmers, in large amounts and smaller lots, MILLIONS of sacks of grain, which, unless we have a new demand from unexpected quarters, or our Farmers will come down in the rate so it can be sent abroad, even forced upon the eastern or foreign markets, must remain on hand to clog the market at the opening of the season for a new crop.

This Journal has, as our producers well know, counselled them steadily to "sell their grain," and realize the reward for their labor; and we know this counsel to be the only true counsel, and well would it have been if this advice had been more generally heeded. Had the present surplus stock been sent out of the State, we should have added some three to five millions of dollars to the State, a goodly portion of which would have gone directly into the pockets of the producer, who will now carry over his grain to add to the immense stock that will be raised the present year.

We hope this year's lessons will teach wisdom for the future.

The markets for Wheat and Flour are both declining; but little grain going abroad, and so little is the demand for Flour that some of our leading mills have ceased grinding as prices rule very low

Shipping is abundant and freights low, and if our producers would strike bravely and put down the price a little, scores of ships would load with grain and thus relieve the market, although on some of the grain shipped speculators have met with very severe losses of late.

Barley is in demand, and Oats also, at full prices.—Hay brings good prices. Potatoes and Onions are plenty and low.

The Butter Market has had a fall. Cheese steady in price.

Apples and Oranges are the only fruits plenty. A large lot of the former, some 4000 boxes, arriving and selling at low prices.

For general prices of produces ee market rates below.

Wheat California, ₱ 100 lbs	$1 50	@	1 60

Retail Prices in the Fruit Market.

Dull and gloomy is our Fruit Market. With the exception of Pine-apples and Bananas, we have nothing worthy of note. Good Pears are extremely scarce, so also Grapes. Apples in some cases are fine and decent, but of the large, coarse kinds, which are not at all suited for the dessert table. We would strongly recommend our orchardists to secure the "American Fruit Culturist" and make themselves acquainted with all the best varieties of Pears, Apples, &c., &c., so as to have a supply of the choicest the season throughout.

Bananas, per bunch	3 00	@	5 00

Retail Prices in the Vegetable Market.

At this period, this department far surpasses in beauty and appearance, its more luscious and gay sister, the fruit department. There is not a market in the world that can vie with ours at this season of the year, for we have an abundance of every delicate variety of vegetable and salad, and at prices unprecedentedly low, and such is the increased demands for these articles that our markets are becoming far too small for even vegetables and fruit alone. It is true that some of our spirited capitalists are increasing and improving the various retail depots, but in such narrow and confined ideas that no sooner is one finished than it becomes too small for the purpose it was intended. To meet the wants of the people, we must have markets covering acres of ground and not patches here and there. Two or three monster, center markets would be more effective than scores of small ones, and would pay better for the investment.

POULTRY AND GAME.

Our Poultry and Game Market is more than abundantly supplied with every necessary. The various stands literally groan under the weight of the enormous quantities of fat Turkies, Ducks, Chickens, etc. Business as a rule with the various dealers is a little below par.

MEATS.

Our Butcheries are well supplied with meats of excellent quality, for which there is an increasing demand. The bright cold weather apparently sharpens our appetites, and creates a desire for warm and animal food. All the excitement of holidays being over, our butchers are settling down into their usual routine of supplying the wants of their customers. Ther are doing a capital business and at good paying prices.

DAIRY—BUTTER, CHEESE, EGGS ETC.

It will be observed that a considerable reduction has take place in this department, since our last publication. Eggs, the universal favorite and the most delicate of all dishes, approximating to the substantiality of animal food, can now be had at more moderate rates, and we say that the time is not far distant when they will be even far lower in price than at present. Twenty to thirty-five cents per dozen will well pay for all trouble connected with the producing of this article. Other triticles connected with the dairy will also be in proporaion.

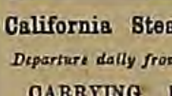
STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS



Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

Jan. 14—MONTANA, Capt. A. West, connecting with RISING STAR, Capt King.
Jan. 22—CONSTITUTION, Capt. Wm. H. Hudson, connecting with HENRY CHAUNCEY, Capt. Conner.
Jan. 30—GOLDEN CITY, Capt. Wm. F. Lapidge, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

oc4 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings, Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, until further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger trains will leave Sacramento at 6:30 A. M. Colfax at 9:50 A. M., Reno at 4:14 P. M., Winnemucca at at 3:20 A. M., and arrives at Argenti at 8:25 A. M.

Going West.

Passenger train leaves Argenti at 10:10 A. M., Winnemucca at 3:20 P. M., Reno at 3:40 A. M., Colfax at 9:50 A. M.; arriving at Sacramento at 1 P. M.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6:30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermit, Silver City, Owyhee, and all points in Idaho Territory.

And at Argenti with Overland Stages for Austin, Salt Lake City, and the Atlantic States.

C. CROCKER,
General Superintendent

GOLDEN EAGLE HOTEL.

Corner Seventh and K streets, SACRAMENTO.

THIS HOTEL IS OFFERED TO THE PUBLIC AS a "Home for Families," and for the Traveler.

The Proprietor has spared neither expense or care to make his Hotel one that shall always be acceptable and pleasant to all that may favor him with a call.

With ample accommodations by means of spacious Suites of Rooms for Families, and by recent enlarged accommodations, he is confident that visitors will always be satisfied and feel at Home.

Particular attention will always be paid to the comfortableness of the apartments, by well ventilated Rooms, clean Beds and Bedding, and strict attention to the wants of Boarders; while the TABLES will be provided with the very best the season affords.

CARRIAGES, to and from the Hotel to the Railroad Cars and Steamers, at all times, Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR

Jebb's Patent Churn.

This admirable Churn—one of the best yet invented—and which was pronounced

THE BEST CHURN EXHIBITED AT THE LATE STATE FAIR,

and to which was awarded by the Committee

THE FIRST PREMIUM,

is now offered for sale to the Trade, or at Retail, in lot to suit purchasers at the

CALIFORNIA FARMER OFFICE.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuges now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered. and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take neith Vermifuge nor Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG, PA.,

DR. M'LANE'S CELEBRATED LIVER PILLS,

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER and BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physican, requires that some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the powers of the Stomach, Bowels, Brain, and the whole Nervous System, shows its vast and vital importance to human health. When the Liver is seriously diseased, it in fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has so close a connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character, that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal atrocity, or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Menses, Deranged State of the Bowels, Irritable and Vindictive feelings and Passions from trifling and inadequate causes of which we afterwards feel ashamed; last, though not least, more than three-fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a sinfulsensation of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet are cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercises would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms attend the disease; but cases have occurred when few of them existed yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow their use. The Liver Pills may be used where purging simply is necessary. As an anti-bilious purgative they are inferior to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult, the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous train of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked. And even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed, and with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure semi-circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip, occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or furred tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently tinged with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual "providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause." In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water every morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten, give a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: DR. McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by

FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills, or one of Vermifuge on receipt of forty cents in Government Stamps.

WASHINGTON'S ACCOUNT OF THE AGRICULTURAL ADVANTAGES OF THE UNITED STATES IN 1796.

LETTER FROM HIS EXCELLENCY GENERAL WASHINGTON, *to the Right Honorable Sir* JOHN SINCLAIR, *Baronet, containing an account of the Several States of America, as they appeared calculated for the residence of a British emigrant, in the year* 1796.

(continued from last week.)

This general description is furnished that you may be able to form an idea of that *part* of the United States which would be most congenial to your inclination. To pronounce with any degree of precision what lands could be obtained for in the parts I have enumerated, is next to impossible, for the reasons I have before assigned; but upon pretty good data it may be said that those in Pennsylvania are higher than those in Maryland, (and I believe in any other State,) declining in price as you go southerly, until the rice swamps of South Carolina and Georgia are met with, and those are as much above the medium in price as they are below it in health. I understand however, that from 30 to 40 dollars per acre, (I fix on dollars because they apply equally to *all* the States, and because their relative value to sterling is well understood) may be denominated the medium price in the vicinity of the Susquehanna, in the State of Pennsylvania; from 20 to 30 on the Potomac, in what is called the valley—that is, lying between the North Mountain and the Blue Mountain, which are the richest lands we have, and less, as I have noticed before, as you proceed southerly. But what may appear singular, and was alluded to in the former part of this letter, the lands in the parts of which I am now speaking; on and contiguous to tide water, (with local exceptions) are in lower estimation than those which are above and more remote from navigation. The causes, however, are apparent—1. The land is better; 2. Higher and more healthy; 3. They are chiefly, if not altogether in the occupation of farmers; 4. From a combination of all of them, purchasers are attracted, and of consequence the price rises in proportion to the demand.

The rise in the value of landed property, in this country has been progressive ever since my attention has been turned to the subject, (now more than 40 years,) but for the last three or four of that period it has increased beyond all calculation; owing in part to the attachment to, and the confidence which the people are beginning to place in their form of Government, and to the prosperity of the country from a variety of concurring causes—none more than to the late high prices of its produce.

From what I have said, you will have perceived that the present prices of land in Pennsylvania are higher than they are in Maryland and Virginia, although they are not of superior quality. Two reasons have already been assigned for this: first that in the settled part of it the land is divided into smaller farms, and more improved: and secondly, being in a greater degree than any other the receptacle of emigrants, these receive the first impressions in Philadelphia, and rarely look beyond the limits of the State; but besides these, two other causes not a little operative may be added, namely, that until Congress passed general laws, relative to naturalization and citizenship, foreigners found it easier to obtain the privileges announced to them in that State than elsewhere and because there are laws here for the gradual abolition of slavery, which neither of the two States above mentioned have at present, but which nothing is more certain than that they must have and at a period not remote.

Notwitstanding these obstacles, and although I may incur the charge of partiality in hazarding such an opinion, at *this time*, I do not hesitate to pronounce that the lands on the waters of Potomac will in a few years be in greater demand and in higher estimation than in any other part of the United States. But as I ought not to advance this doctrine without assigning reasons for it, I will request you to examine a general map of the United States, and the following facts will strike you at first view; That they lie in the most temperate latitude of the United States; that the main river runs in a direct course to the expanded part of the western country, and approximates nearer to the principal branches of the Ohio, than any other eastern water, and of course must become a great, if not (under all circumstances) the best highway into that region; that the upper seaport of the Potomac is considerably nearer to a large portion of the State of Pennsylvania than that portion is to Philadelphia, besides accommodating the settlers thereof with inland navigation for more than 200 miles; that the amazing extent of tide navigation afforded by the bay and rivers of Chesapeake has scarcely a parallel. When to these are added, that a site at the junction of the inland and tide navigations of that river is chosen for the permanent seat of the General Government, and is in rapid preparation for its reception; that the inland navigation of the river is nearly completed to the extent above mentioned; that its lateral branches are capable of great improvement at a small expense, through the most fertile parts of Virginia, in a southerly direction, and crossing Maryland and extending into Pennsylvania in a northerly one, through which (independent of what may come from the western country,) an immensity of produce will be water-borne, thereby making the Federal city the great emporium of the United States—I say when these things are taken into consideration, I am under no apprehension of having the opinion I have given relative to the value of land on the Potomac controverted by impartial men.

There are farms always and everywhere for sale; if, therefore, events should induce you to cast an eye toward America, there need be no apprehension of your being accommodated to your liking; and if I could be made useful to you therein, you might command my services with the greatest of freedom.

Within full view of Mount Vernon, separated therefrom by water only, is one of the most beautiful seats on the river, for sale, but of greater magnitude than you seem to have contemplated—It is called Belvoir, and did belong to George William Fairfax, Esq., who, was he living, would now be Baron of Cameron, as his younger brother in this country (George William dying without issue) at present is, though he does not take on himself the title.

This seat was the residence of the above named gentleman before he went to England, and was accommodated with very good buildings, which were burned soon after he left them. There are near 2,000 acres of land belonging to the tract, surrounded in a manner by water. The Mansion house stood on high and commanding ground.—The soil is not of the first quality, but a considerble part of it lying level may with proper management, be profitably cultivated. There are some small tenements on the estate, but the greater part thereof is wood. At present it belongs to Ferdinando Fairfax, son of Bryan Fairfax, the gentleman who will not, as I said before, take upon himself the title of Baron of Cameron. A year or two ago the price he fixed on the land was (as I have been informed) 33⅓ dollars per acre; whether not getting that sum, or whether he is no longer disposed to sell it, I am unable with precission to say; for I have heard nothing concerning his intentions lately.

With respect to the tenements I have offered to let, appertaining to my Mount Vernon estate, I can give no better description of them and of their appurtenances, that what is contained in the printed advertisement herewith inclosed; but, that you may have a more distinct view of the farms, and their relative situation to the mansion-house, a sketch from actual survey is also inclosed; annexed to which I have given you, from memory, the relative situation and form of the seat at Belvoir.

The terms on which I had authorized the superintendent of my concerns at Mount Vernon to lease the farms there, are also inclosed; which, with the other papers and the general information herein detailed, will throw all the light I am enabled to give you upon the subject of your inquiry. To have such a tenant as Sir John Sinclair, however desirable it might be, is an honor I dare not hope for; and to alienate any part of the fee-simple estate of Mount Vernon is a measure I am not inclined to do, as all the farms are connected and parts of a whole.

With very great esteem and respect I have the honor to be, Sir, your most obedient and obliged humble servant, GEORGE WASHINGTON.

P. S. As I shall have an opportunity in the course of the present Session of Congress to converse with members thereof from different States, and different parts of each State, I will write you a supplementary account, if essential information should be obtained in addition to, or corrective of, what is given you in the aforegoing sheets.

IMPROVEMENT IN THE SOUTH.

[We give the following sketch "from the Macon (Ga) Journal and Messenger Dec 16th and we gladly give this sketch for it shows clearly that our Southern Brethern are awaking to their true condition and taking hold with manliness with the living realities around them, and are determined to act bravely and nobly and win a true independence, we rejoice to announce their success and prosperity as here recorded by themselves,—ED FARMER.]

Notwithstanding all our losses and the "tight times" we have been tiding over for two or three years past, our condition may not untruthfully, at the present writing, be described as above. We have had to start from the stump, and toiled along with many slips and flounders, and backsets, but we are on tolerably firm ground at last, financially. We mean by this, that what we have made this year is in hands, and freeer than ever before, from pre engagements on account of incidental debts. We don't owe much, and what we do owe, we can pay without much straining of pocket nerves, and suptracting from needed and useful improvements. If our political ills were in as fair a way, we could count, with great hopefulness, on a rosy future. Give us peace in politics, and our pockets would soon overflow. It looks as if there was some doubt about our being allowed to go on as we have begun, but we hope for the best. Nothing under the sun but anarchy, or the most infamous mis-government, can prevent our prospering. We are a hardier, more active, more energetic people than ever; and we have learned some very useful lessons we did not know before, We are not bound, as formerly, to do one of two things with our surplus earnings—buy more land, or more negroes. Our changed condition has opened new fields for investment, investments, too, that not only pay but are permanent, filling the pockets and gladdening the eye as well. We have learned all these things by hard, sometimes very bitter experience, but we have no cause for complaint with the results as put down to our credit for this year's work. What are these results? Briefly stated, we may say, that enough grain has been produced in the South the present year to feed its whole population, either in the shape of breadstuffs or an equivalent of beef and bacon. Beyond this it is estimated that there will be a surplus for sale, consisting of say two million and a half bales of cotton, one hundred and twenty thousand hogsheads of sugar, together with liberal crops of tobacco, rice, and considerable quantities of other marketable products, all of which, it is supposed, will amount to the aggregate value of three hundred million dollars. Pretty good that. And we believe, too, that the proceeds of this snug sum total, will, more than that of any other planting season, go to build up an active and profitable home trade, to promoting every safe home enterprise, and garnering up all the constituents that give elegance and comfort to home life. We believe that the country, in its natural and artificial features, will have more to show for it than in any former year in its history, and that our people, in their homes, their habits, and their business pursuits, will all reflect the blessings and advantages shining forth from the New Era upon which we seem about to enter.

—So mote it be.

WHITE CHILI POTATO.

L. D. Scott Esq, of Huron Ohio of the celebrated Potatoe Farm, whose card appears in this number, send us a history of the 'Chili, Potato" which now promises to be a valuabl evariety, we shall have samples of this, and many other kinds, a list of which can always be found at our office.

The White Chili was raised in 1856 by the late Rev. Chauncey E, Goodrich, of Utica New York. It is the third generation in a direct line from an imported Chili," is a late variety of most admirable growth, the tops being very bushy and standing perfectly erect all through the season, Tuber, quite large, nearly round, skin white and smoothe eyes not large nor deeply set, flesh white, fine grained, cooks very dry and mealy; quality *best*; is very solid and keeps without rotting or shriveling; is a very productive and valuable kind; certainly worthy of a trial all through the South and California; the white Chili does not mature fully at Utica, and its value for a more Southern Latitude could only be guessed at. The originator, however says in his note, he thinks it would do well in New Jersey and Southern Ohio.

This Potato will soon be for sale at the Farmer office.

THE DIFFERENCE.—A wife sets articles to rights, while an editor writes articles to set.

WALKING HORSES.

We call special attention to what a writer in the *Farmers' Home Journal* said on this subject, If we had more such walkers and less such trotters, we think our Farmers, would find great gain thereby.

•The best gait a good horse ever had for every day use is a good walk. It is a gait that not one in ten possesses. Colts are not trained to walk in all of the Eastern States. Young America wants more speed. Kentucky has more good walking horses than any other State, for there, horseback traveling has long been in fashion for men and women, over a country, where muddy roads at times render any other gait impossible, and so horses have been bred for the saddle and trained to a walking gait. This is also the case in all the Western States, and perhaps might have been so in New England when our grandmothers rode to meeting on a pillion behind our grandfathers. But one-horse wagons have put horseback riding out of fashion, and now a good walking horse is more rare than one that can trot a mile in 2.40.

At the Springfield (Mass.) Horse Show of 1868 the writer was one of the committee to award prizes to best walking horses. Out of seventeen entered, the committee found but one which was considered a first-rate walker. This was a Sorrell mare; which walked five miles an hour with ease. Two others were fair walkers, and the rest, knew no gate that could be called walking, At the New York State Fair the same state of facts was again developed. A letter from Wisconsin says; "I think horses trained to walk fast would be a greater benefit to our farmers in general, than fast trotters, as almost all of their work has to be done with a walk." I once knew a man in Massachusetts, who before the railroad were built, kept from two to four teams at work on the road, and never allowed them to trot at all, and made the distance in quicker time than his neighbors, who made their horses trot at every convenient place. He said that when a horse commenced to walk after a trot, he walked much slower than his common gait, if he kept on a walk, and thereby lost more than he gained. Will farmers think of this, and pay more attention to walking horses?

THE EARTH'S GRATITUDE.

EDITORS SOUTHERN CULTIVATOR;—The sin of ingratitude has been universally detested; but that sin will never be charged upon Mother Earth.

She can justly charge it home upon her guilty children, but she is pure. Her ungrateful children press sorely upon her, but she only "groans and travails in pain," under their harsh treatment, and for the least favor, she shows her gratitude. Feed a poor, starving horse, cow or pig—they cannot speak, but they express their gratitude in improved looks, labor and otherwise.

Feed poor, impoverished Earth, and the results are more patent.

Give Mother Earth a tongue, and let her express her gratitude. You give her some food, clothing and drink, and what is her response: "Thank you, my children—when I was hungry you fed me, and I will feed you; when I was naked, you clothed me, and I will clothe you; and when I was thirsty, you gave me drink, and you shall never thirst for things of mine." And who can accuse her of non compliance in an hundred fold?

Nor is she fastidious in her food. Give her the excrements that are under your feet, in your way, and offensive to your nostrils, and she will reward you bountifully. Throw upon her face all the rakings and scrapings of your yards, barns, stables and lots, and she will not be offended, but will smile upon you gratefully, and will fill your stomachs and pockets with her good things. Turn into her bosom the grass, weeds and stubble of your fields, and she will utter a grateful response that will make Gaunt Despair smile.

Neither is she a glutton, True, she could eat a great deal, and would pay you good interest upon a large amount; but such is her gratitude and beneficence, that she will thank, you, and pay well for small favors.

Reader, look to your interest, and tell me who is guilty of the base sin of ingratitude?

BETH. IN SOUTHERN CULTIVATOR.

SAN JOAQUIN CULTIVATION.

I suppose you would like to hear something of this much talked of Valley. Well the crops so far are very fine and doing well everywhere, and if we get the yield of wheat and barley this year, that we did last, I think, will be very appropriately named, Eden Valley. Such is the name given to this valley. There was a large lot of summer fallowing put in before the rains, and since then every team and plough in the valley has been running. The most of the farmers intend putting in wheat and barley until the 15th of Febuary next, after which they will go in heavy on the Summer fallowing, It would be hard to find one quarter of a section in this valley, that did not have grain ground in it now, or either preparing for a crop. There wont be a ten acre lot left unplowed by spring in this whole Valley. The amount of grain being planted is incredibable

I remain yours. W. G. D.

AMERICAN PRODUCE.

From Alex. S. Macrae's Liverpool Weekly Produce Statement, Wednesday, 23rd December, 1868.

AMERICAN VS. CANADIAN FLOUR.—Why should American sell *as a rule* at much *less* money than Canadian? Simply because the former rarely finds its way *direct* from the miller to the British consumer—is perhaps months knocking about in the stores of United States seaports, and consequently, cannot compare in excellency of condition with the Canadian. The very freshness of the barrel seems "finish" to the flour, and the Canadians brand with legible care and special significance as to address, so that wherever *that* quality finds favour, *that* miller is advertised by it to his very home. Thus, particular brands get called for, and every miller possesses within himself the means of founding a European reputation, of more value than ever an American one, with the power of pitting the one against the other. Western brands *ought not* to be selling at 24s to 26s 6d (7¼ to 9 dollars), while Canadian commands 27s to 29s (8¼ to 9 dollars) per barrel, *but such is the fact*, the latter saving besides *five* to *ten per cent in expenses*, by a direct alliance with British consumers!

AMERICAN HAY, AND THE BRITISH GOVERNMENT.—It is to be hoped that an early circular will announce, the abolition of the "prohibitory order" of the late Privy Council, limiting the consumption of American Hay "to horses," on account of the cattle disease in the United States.

The Hon. Reverdy Johnson, the American Ambassador, writes, 15th instant, "that he saw Lord Stanley about it on the 25th September last—that he was then unsuccessful, but that he will bring it again under the notice of the present government." The Right Hon. John Bright, our new President of the Board of Trade, also writes, 21st instant, "that the matter will be considered."

BARLEY.—One of the most extraordinary features of this season is the rush of barley from Great Britain to the United States! It appears that American distillers, more especially those of Chicago, have suddenly discovered the superiority of our growth, and we are shipping, from the *1st of this month to the present date* some 120,000 bushels, against *not a single bushel* this time last year! If any evidence was wanted of the constant necessity of Americans and English to *try and reciprocate* produce, it is here successfully afforded. The value of British barley for malting purposes is 6s to 6s 9d per bushel of 60lbs.

COATES, BROS' WOOL CIRCULAR,

PHILADELPHIA, Jan. 1st., 1869.

The wool business in December was very moderate, and although the market has been quiet, yet we note that the amount of sales compares very favorably with last and previous years. The demand, though not very large, has been steady, being confined to the actual wants of manufacturers, and prices have ruled very firm. This fact taken in connection with a tightness of the money market not often equalled, and the failure of some large New York Houses, induces holders to believe that prices will be higher when confidence is fully restored, and money can be readily had for the general requirements of trade. There is comparatively little wool held back in the country or Western cities, and as the bulk of the stock in the Eastern marts is all paid for and very little held by those who wish to realize to meet obligations there has consequently been no pressure to sell, and great firmness has prevailed in the face of a comparatively dull market.

Low and medium wools are very scarce, and command relatively higher prices than the finer grades, which are in larger stocks; but as the machinery of the country has been turned to these descriptions we may expect to see a more active inquiry; and, when it becomes apparent that there will not probably be any surplus to carry over the new clip, competition will very materially enhance the value of the fine wools, and they will take the same course as the low grades, assuming their relative value in the scale of prices.

The sales for the month, of Domestic Fleeces and pulled, foot up about 1,612,500 pounds, within the range of 50 to 60 for Fleeces, and 42 to 47 for Pulled.

Agriculture.

THE MAIDEN'S CHOICE.

Oh give me the life of a farmers wife,
In the fields and woods so bright,
'Mong the singing birds and the lowing herds,
And the clover blossoms white;
The note of the morning's heavenward lark,
Is the music sweet to me;
And the dewy flowers in the early hours,
The gems I love to see.

Oh! give me the breeze from the waving trees,
The murmur of summer leaves;
And the swallow's song as he skims along,
Or twitters beneath the eaves;
The plowman's shout, as he is turning out
His team, at set of sun,
Or his merry "good night," by the fire-flies light,
When his daily work is done.

And give me the root and the luscious fruit,
My own hands rear for food;
And the bread so light, and the honey white,
And the milk so pure and good!
For sweet the mead of labor is,
When the heart is strong and true,
And blessing will come to the hearth and home,
If our best we bravely do.

EDUCATION FOR FARMERS.

It is a great mistake to suppose that farmers do not need to be educated. Progress is sure in this direction, as in all others, but it seems slow. The farmer without an education sinks to a mere drudge and can never hope to attain an equal position in society with other professions; and he may boast as he will, but he cannot make his farm produce like the intelligent, well-read man, who studies agriculture as a science.

The uneducated farmer wonders why his sons and daughters are so anxious to leave the farm, to choose other occupations. The reason, my friend is obvious; for your sons cannot plod on with you. If you persist in keeping them a century behind the times. Young men and women, of all trades and professions, are perfecting themselves in their various callings—attending sientific lectures, reading scientific books, studying improvements in every department of labor; and marking their progress in respectability, usefulness and worth.

To the intelligent gentleman, the farm holds out far more delightful inducements than any trade. He enters the profession with a desire and a determination to elevate it, and he succeeds too, just in proportion to his general culture. Opportunities for agricultural training are open over the whole country, and parents would do well to place in the hands of their sons scientific books and papers, if they wish them to remain on the farm; also give them an opportunity to attend a course of lectures on agriculture.

Your children would soon look with altered eyes upon the farm life; and what a different aspect would many a farm-house wear! Throw about your children all these helps and encouragements to service—so reasonable, so delightful, so profitable—if you would have your farms blossom like the rose, and your homes and hearts bask in the sunshine of happiness and prosperity.—*Country Gentleman.*

BRAN AND COTTON SEED MEAL FOR MILCH COWS.

Plain bran or ship stuff, says the *Stock Journal*, is one of the very best kinds of food to increase the milk. It is not fattening. A steer could not be fattened on bran alone, and a cow, if fed on the best of hay and bran alone, might fall off in yield, unless her strength and condition were kept up by Indian meal or stronger food. If there were anything in which there would seem to be no strength, it is bran, the mere hull of wheat. It is not stimulating like brewers' grains, and can certainly do no harm, if it does no good; and yet any farmer who will make the experiment, will find—or, at least we have found—that a cow being otherwise kept in a proper condition, her yield of milk will be very considerably increased by giving her twice a day a feed of pure bran. The fact is patent, although we are not able to explain it. If there is any one article, which, while keeping up the health and strength of the cow, will also increase the supply of rich, healthy milk, in our experience, it is cotton seed cake meal. We have found this to have great effect on the milk secreting organs. The cows at first do not seem to relish it, and it should be mixed with some other seed, but they soon come to like it, and we have never seen any bad effects in any way.

[We can add from many well authenticated facts in our possession, that the *Linseed Oil Cake Meal*, is one of the very best articles for stock feed ever known; and the most experienced stock men of Europe show this by the use they make of this kind of feed. Our own stock men too, in California are beginning to be wise in this respect.—We are glad to know this.—Ed. F.]

Sweet Earn.—A lad in Ireland recently found under the flooring of a room in which he was working, a mass of honey weighing over 120lb., the fruit of many years industry of the busy insects. The proper precautions having been taken, the monster honeycomb was made secure by the fortunate finder.

"There shall be the early, and the latter rain.'

CHICORY.

This article is now one of importance to our State, and it is being grown to some extent on the Sacramento, River where there are quite Extensive grounds devoted to its culture, and the preparation of it for market. It is to be hoped that there will be an increased attention paid to its culture for it must certainly become an article, of large demand in coming years.

We find in our Exchanges from Melbourne that there is considerable attention paid to it there, where it is an article of large value.

This crop is not the difficult one to grow which many people imagine; any one who can successfully grow parsneps or carrots can grow chicory. The land must, in the first instance, be trench-ploughed, if broken up and well pulverised to the depth of twenty inches so much the better. As with mangolds, the manure ought to be thoroughly incorporated with the soil, and if applied previous to ploughing, this object can be well effected through the action of the cultivator, which is the best implement a farmer can have for preparing his land for all root crops after ploughing. Roots are not nearly so liable to "fork" when the land and manure are perfectly worked together: it is when the latter lies in pieces, and when the tilth is not sufficiently fine that the roots when taken up are the reverse of straight and clean. The small hand drills now in use upon many farms are well adapted for sowing chicory seed, so long as they can be narrowed to about fifteen inches between the rows. After the ground has undergone the required operations, the tilth as fine as implements can make it, and finished off with the roller, an expert will be able to drill as straight as is nessary for the introduction and use of the horse hoe so soon as the young plants appear. Thinning out should be attended to as soon as the lines of plants can be discerned, or almost as soon, for the plants quickly strike very deep, and if cut off by the hoe near the surface, or "between wind and water," as it is termed, there is just a posibility of the plant showing itself again above ground. Many persons prefer a long narrow garden trowel to single out with, and they think it necessary to insure the perfect removal of the young plant; but this precaution is uncalled for if the singling out be attended to at the proper time, and that time is after the first horse hoeing, and when the rows can be easily discerned. The permanent plants may be left at nine inches apart. Chicory will require the horse hoe as much as any other root crops, and in ground which has been occupied by this root over one season, more so; chicory is not unlike horse-radish in one characteristic—the least piece of root left in the ground will eventually show itself above ground; it is most determined and persevering in this respect. and an old chicory ground is always constantly being overrun with plants, which the horse-hoe only can cope with. For this reason this crop is never placed as one under the rotation system. The plot of ground chosen for it must be entirely given up to it until the owner determines to lay it down in grasses. The after culture of this root is similar to that given to other like crops. The hoe is the principal tool required, and the better the tilth before sowing, the less need for hoeing after, a shilling an acre expended in encouraging and afterwards destroying weeds previous to sowing most crops, saves the expenditure of five times the amount during the maturing or aftergrowth of them. We very seldom give our lands intended for root crops the necessary first dressings, a single ploughing, maybe, double harrowing, then drill and finish off with a light harrowing; such is only playing at farming, but it is the system too frequently adopted by many of our occupiers.

Ramie or China Grass.—In answer to a recent inquiry, we gave a summary of some of the statements made by those who have been concerned in introducing this plant in our Southern States.—Mr. Alex. S. Macrae, Produce Broker, Liverpool, England, now sends us his weekly circular of Nov. 25th, which speaks of its value in glowing terms. Mr. M. evidently over-rates the scale on which the Ramie has thus far been produced in this country; we are not aware that it is yet "growing wild" on our Southern plains—but, if his expectations are realized as to its value and the demand which must arise for it, there can be no doubt that its production will be greatly stimulated, and that it will become a most valuable article of export. He speaks of it as "yielding a fibre so textile, yet so beautiful withal, that it can be treated to rival silk and to supersede the finest cotton." He promises farther information hereafter, which we trust we may receive, and meantime quote the substance of his present statements. Ramie, says Mr. M., is—

"Neither unlike Jute or Hemp, but with a bolder, crisper, yet more pliable fibre. To be got up in a proper way (I speak of the *raw* material,) it should be dried, *when the green becomes white.*—The value in the green state is £35 to £40 per ton of 2,240 lbs.—white, £50 per ton—dressed, for mixing with Cotton and Silk, £280 to £300 per ton. Any Americans who have visited this side the last year or two, may have seen our ladies wearing for morning and walking dresses, what *might appear* to be a splendid French lavender silk! American ladies, however, would not fail to observe that, though beautiful to the eye, it lacked the inherent value of silk to the touch, though superior in every way to cotton. Did any one of these American visitors know, that this silk-like material owed its base to their own soil—that it was chiefly made from Ramie or China grass—and is no other in Europe than the *imitated*, and so called 'Japanese. Silk?'"

Fear is implanted in us as a preservative from evil; but its duty, like other passions, is not to overbear reason but to assist it, nor should it be suffered to tyrannise in the imagination, to raise phantoms of horror, or beset life with supernumerary distresses.

Plow deep while sluggards sleep.

Agricultural Implements. New Advertisements.

To the armers of California:

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, by reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid, Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

30-24 STOCKTON, SAN JOAQUIN COUNTY.

Miscellaneous.

TRUE'S

IMPROVED

POTATO PLANTER.

This is, undoubtedly, one of the most valuable machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 10 Men in Planting Time,

Makes its own furrow, cuts the potato in such slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly and does all this as fast as a horse can walk over the ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all summer and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very crisis of time," and gives leisure to its owner for attention to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with

Particulars and Catalogues can be had at our office

Valuable Patents FOR SALE.

We invite the attention of energetic Mechanics to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a handsome return for labor and capital can be made from.

WARREN & CO.

EARLY GOODRICH POTATO

Important to Market Gardeners and the Agricultural Public.

The Undersigned, having growing and tested the above Potato for two seasons, have no hesitation in announcing it far superior to any other grown on this coast, for an early Potato, and now offer it for sale. It is very early (from three to four weeks earlier than any other) good size, white skin, smooth eyes, white flesh, superior table quality, and very productive.

L. F. or F. SANDERSON, San Jose, Cal.

Agents in San Francisco—GRIFFITH & ELLIS, 225 Washington street, one door below Front; and SILVESTER, No. 317 Washington street.

To Take Charge of a Place

A young man with some capital (from $500 to $1,000) can hear of a good opportunity to take charge of a place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

None but a steady and industrious young man need apply.

The applicant must be able and willing to work, and have a love and taste for rural life. To such a one a good chance can be given.

30-20 Care of FARMER Office.

Horticulture.

CULTURE OF THE CRANBERRY.

VARIETIES, MODE OF CULTURE, ETC.

The raising of Cranberries is engrossing the attention of very many cultivators, and a few facts in regard to their culture, etc., in answer to many inquiries, may be of interest to those who wish to raise them for their own use and for market. In order to insure success, the preparation and culture should be thorough. In different sections of the country different modes are successfully adopted.

THE SOIL BEST ADAPTED.

Is low, moist land; no matter how poor the soil, destitute of organic matter, and covered with bogs,—or on muck or peat swamps, the top of which can be removed to the compost heap—then covered with three to five inches of sand, after being well drained, so that the water will be 12 to 18 inches below the surface. If they are planted directly on muck or peat, they are apt to make too rank a growth,—sometimes 10 or 12 feet in length, and cover the ground with a mat three or four inches thick, and as the fruit grows on the ends of the shoots, the rank growth throws out but few buds; but if sanded over, the shoots are of short growth, and the plants become rooted and throw out stronger fruit buds. The sand also tends to prevent the growth of weeds, wild grass etc., and is easier cultivated, and keeps the ground loose around the plants. As the fruit and vine draw their nourishment from air and water, they do not need manure, or anything to stimulate their growth. They will grow on almost any soil, (*except dry sand or clay*) that can be worked with a plow, or on garden soil not too dry, and produce a fair crop on such land. Where small plots are planted, saw dust, tan, or anything that retains moisture, spread on the top of the ground, is beneficial, but on upland generally they will not do as well as on moist lands. They also grow well on the borders of streams and ditches.

THE VARIETIES.

There are three varieties, the Cherry, Bugle and Bell, generally cultivated. The Large Round Cherry, are late—not prolific bearers—and do best on quite damp soil. The Bugle is quite handsome, not as late as the Cherry, and not as prolific as the Bell, which is most generally planted. It is early and prolific, and is the kind usually sold as Cape Cod Cranberries. It is also the kind sold by some dealers as Upland; but there are none strictly so.

PLANTING AND CULTURE.

When the ground is well prepared, lay it out as you would for planting cabbage, strawberry or other plants, using a pointed stick or dibble to make a hole four or five inches deep, in which you place the plant, press the dirt around it and the root and stem will soon start to grow. The remainder of the vines may be layered in the ground leaving the shoots or stems above. The vines covered will take root and much sooner cover the ground. Another plan adopted by many, is to take the vines up without roots; often six or eight feet in length, which they cut up and sow in drills or lay the vine down and cover with dirt.

10,000 is sufficient to plant an acre, two feet apart each way; but if the vine above ground is layered as proposed above, the two feet between each plant will be filled at once. If planted this distance apart they can be cultivated with a horse hoe or cultivator to keep out the grass and weeds. After two or three years cultivation they will take care of themselves. If wanted in small patches or in gardens, they can be set a foot apart and will cover the ground much sooner. They can be planted at almost any season of the year. Where land for cultivating Cranberries can be overflowed it is desirable, and I might say almost indispensable. It keeps them back in the spring until after frost from the first to the middle of May, and if dry when the fruit is setting, it can be let on for a day or two. But where there is no overflow I am satisfied that they can be planted out in early spring on until July, as well as fall.

Every family can have their garden patch, and in dryish soil, grass, meadow muck tan, or sawdust around the plant, will be beneficial to retain moisture. They are highly ornamental in pots, the fruit hanging on the plant until the blossom appears for the next crop. They often bear a few berries the first year, and increase every year.

CALIFORNIA.

Few people have an idea of the extent of California. The State is 700 miles long, about 200 wide. San Francisco and Sacramento together have a population of about 170,000, leaving about 300,000 population for this vast area of country—as large as all New England and New York and Pennsylvania together—an area large enough and rich enough to sustain a population of 30 000,000. It would make a large-sized European kingdom. The State will have 13,000,000 bushels of wheat to spare, which will bring in from $18,000,000 to $20,000,000. The wool clip is larger than ever before. The vintage promises to be the best ever gathered. Twenty-five million grape vines are in bearing, and new vineyards are the order of the day. The State has just begun its net-work of railroad, soon to be connected by the long spider thread across the continent. The development of the State promises to be more rapid during the coming months than ever before.—*Eastern Exchange.*

NEW YORK.

Our New York House, under the name of

WILSON, MORROW & CHAMBERLIN,

will open in New York City about the first of November ext, and will have the exclusive agency of our

WINES AND LIQUORS

in all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

MESSRS. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed We will make liberal Cash Advances on Merchandise consigned to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco

WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required.—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurius Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet 30-12.

GARDEN GROUNDS LAID OUT,

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance.* We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

IN THE EASTERN STATES.

LEARN HOW TO GROW

Small Fruits:

Raspberries,
Blackberries,
Strawberries,
Currants,
Gooseberries, etc.

Many *New Varieties* have, within a few years been brought out, which far surpasses the old varieties; such, among Raspberries, are the

Clark, which we place at the head of the list of tried varieties;

Davison's Thornless Black Cap, an entirely thornless black Raspberry, of very distinct habits of growth. Excellent fruit;

Prosser, a competitor for the position the Clark has taken. Stands dry Summers well;

Philadelphia, most productive

Doolittle Black Cap, extensively planted for field cultivation;

Cattawissa, good flavor, red; bears two crops annually. Have seen it with ripe berries and blossoms at the time of our first snows, about November 20.

AND MANY OTHER VARIETIES.

Among *Strawberries*, the *New Varieties* are

Charles Downing,
Dr. Nicaise,
Nicanor,
Durand, etc.

All these varieties are described in the New Edition of our

"Manual of Grape and Small Fruit Culture."

The a neat little Pamphlet, containing full instruction how cultivate all these different varieties of Small Fruits. It contains full descriptions of the New Blackberries,

WILSON'S EARLY and KITTATINNY,

together with a new White or Cream-colored variety, which will be brought out this fall. Also,

HOW TO GROW BLACKBERRY PLANTS.

Last Fall we disposed of over 250,000 Blackberry Root Cuttings. We have heard of but few instances where they did not grow. We sent thousands of them to customers, by mail, as an experiment, to prove they could be sent safely as as California. We sent a package to Colonel Warren of the "California Farmer."

Our Pamphlet, containing Price List of our stock of Plants and Cuttings, can be obtained by calling at the office of the California Farmer, or by addressing Col. Warren, Editor California Farmer, San Francisco, Cal.

We have 50 acres devoted to the culture of Small Fruits, not all cultivated yet; 20 acres in Strawberries; 14 acres in Raspberries; 7 acres in Blackberries; 2 acres in Grapes.

WARREN & CO., *California Farmer Office*, are appointed Special Agents for our Nursery Stock, where orders can be left to secure them to customers this season. Orders should be sent at once.

J. H. FOSTER,

New Advertisements.

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co., Farmer Office.

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868 JOHN GAGE

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, a grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.
Farmer Office 320 Clay street, San Francis

VALUABLE PLANTS FOR SALE.

☞ **Persons who are desirous of securing a few** very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

These premiums will enable beginners to secure these new and rare plants, which are now worth their weight in silver.

Those who send now can also secure our November and December numbers of the *Farmer* and the entire year of 1869

WARREN & CO.

Country Homes Wanted.

There is wanted at this time, several **Homes in the Country,** in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 30 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will suit them if they communicate with this office immediately.

None but good bona fide sellers need apply, as the parties requiring these places have the means to carry out all their agreements. Address the FARMER OFFICE.

BOUND VOLUMES FARMER.

☞ **Volumes of the "California Farmer" for**

The last EIGHT YEARS, uniformly bound, can be had at the Farmer Office at $3 per Volume.

These Eight Volumes contain more useful matter touchin the practical workings of Agriculture as adapted to California Culture than any Book or Books Extant, as they comprise hundreds of Experiments, Letters and Essays upon the Culture of Cotton, Rice, Coffee and Tobacco; Grapes, Strawberries, and all other Fruits, with the Culture of Hops, Castor Beans, Flax, Hemp, &c. and the Whole series of Essays L. Prevost on Silk Culture, from early beginning.

This set of Volumes would be a Library of itself and invaluable to the Cultivator of the Soil.

Orders sent to Farmer Office will be promptly attended to

The California Farmer.

SAN FRANCISCO:
THURSDAY EVENING.....JANUARY 28, 1869.

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all productive Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms; Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facia* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office

Prang's Beautiful Chromos.

Those who wish to see these most beautiful pictures and who wish to order the same, can see a large collection of them at the

"FARMER OFFICE."

Those which are advertised by these Art Publishers, can nearly all be seen at our office, as we have received copies, and they are, indeed, beautiful pictures. We have them on sale. WARREN & CO.,
Farmer Office.

Country Homes Wanted.

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will [illegible] them if they communicate with this office immediately.

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a our office, or addressing EDITOR FARMER

THE LATE RAINS.

"Far up the blue sky, a fair rainbow unroll'd
Its soft tinted pinions of purple and gold.
'Twas born in a moment, yet, quick as its birth,
It had stretched to the uttermost ends of the earth,
And, fair as an Angel, it floated as free,
With a wing on the earth, and a wing on the sea."

The words of that beautiful Poem "The Rainbow," by the gifted Western Poetess, "Amelia," has never been surpassed for sublimity and beauty by any Poet known.

The late abundant rains which have blessed the earth and made the hearts of our Farmers glad with praise, have in repeated instances, been accompanied with bright and lustrous Rainbows.—To us these beautiful heralds seem to speak a promise of a most abundant season, and while they are typical in sacred history of Gods promise to bring no more *floods* to destroy the earth, they come to us as typical also of God's promise that we *shall have* the early and the late rain.

These late rains, so steady and continuous, have placed beyond a doubt the assurance of an abundant harvest the present year, as from the most reliable sources, from our oldest Farmers, we are continually informed that they have never before known such a season of promise, and never before has the grain crop been so well or extensively planted as the present season; and never before has its appearance and growth in January equaled the present year.

These beautiful Rainbows have by their repeated appearance, seemed to inspire the cultivators for the future years, for even now thousands of plows are at work all over the State, turning up the soil, and preparing the 'fallow land' for the years of '69—70. This is well. Now is the time to press on, for every acre of ground that is well and deeply plowed now, and left fallow for the next year, is superior to land *not* plowed by more than *forty per cent.*

While we rejoice with those that rejoice for these glorious rains, we at the same time cannot but see that this 'blessed rain' must seriously effect the *treasury* of those farmers who, taking the advice of the "Sacramento Union," "Stockton Independent," and a few other papers that counselled them to *hold their grain*, have now to mourn this false counsel, which cost them so dear, and cost our State a loss of nearly *five millions of dollars.*

The vast good these rains will do cannot be told in dollars and cents, for our farmers must study for themselves the *seasons as they change*, for changing, ours most assuredly is, and so this JOURNAL has for years predicted; and those who will but observe that the more widely our territory is cultivated and built up, just so certain will our climate change from a dry arid waste, to a humid, fruitful and healthful land, giving us rains and sunshine, lightning and thunder to purify the air, and with the Rainbows of good promise every month in the year.

SILK MANUFACTURIES.

Some two weeks since we were in San Jose, and feeling a deep interest in this, to be very IMPORTANT INTEREST of our State, we paid a visit to the residence of the Pioneer, Prevost, and also to Pioneer Manufacturers, the Newman Brothers.

We found our friend Prevost surrounded by a *fortification of letters and papers*, a regular embankment of Silk materials, written and printed, and what gave us great pleasure was to see how happy this energetic friend of this cause was while thus surrounded with letters and papers from all sections of the State, and from all the Silk Districts of the old world.

We knew *we were welcome*, and soon we were cheered by gratifying information of the success of Silk Culture over our entire State. Mr. Prevost kindly showed us his large collection of cocoons, a REAL MUSEUM of this interest, being samples of every known kind of cocoons, many of the new foreign varieties, being greatly improved from the original stock, by crossing, and our genial climate.

Our visit was very gratifying to us, adding to our own strong confidence a further assurance of a grand future for this enterprise.

We visited the SILK FACTORY, of Newman and Brother, and there we were also highly pleased, for after many and perplexing trials to which this interest has been subjected in its infancy, we feared that so much delay, and so many trials, might check the zeal of these earnest Pioneers in this manufacture, but we are glad to say we were *encouraged* at what we saw,

We found the Looms in running order, the rich and glossy Silk steadily rolling up its increasing folds as it is daily manufactured, for the *shuttle is at work now* constantly, and one of the Brothers is now on his travels among the growers of cocoons, making his arrangements for his supply for the manufactory.

We were very agreeably surprised when we saw the very large collection of Silk machinery of the best and most approved kind, there in the factory, ready to be put up just as soon as the plans are completed for large operations, enough machinery as Mr. Newman informs us, to employ one hundred and fifty persons in spinning.

After the original plans had been changed, and the former company dissolved, the land, 30 acres, and the building and present machinery, is now under control of the Newman Bros., and it is to be hoped that their plans may be wisely and successfully carried out, and by another year our citizens see the fruit of their labors more completely prosperous. Surely we wish them and the cause great success.

Fear is implanted in us as a preservative from evil; but its duty, like other passions, is not to overbear reason but to assist it, nor should it be suffered to tyrannize in the imagination, to raise phantoms of horror, or beset life with supernumerary distresses.

HAPPY FESTIVAL OF CHILDREN.

One of the happiest places to go to always, is to a group of "Little Children," especially when they are engaged in acting out the mimic life of Men and Women, for children will naturally put more of *truth* into *their* acting, than men and women. Christ said: "Suffer little children to come unto me, for of such is the Kingdom of Heaven." How well the "Blessed Saviour" knew where to find Sincerity, Truth and Innocence, and how well he *loved little children.*

How happy the words of Mrs. Lydia Maria Childs, "There are three, things of which we shall have an abundance in Heaven, Music, Flowers, and little Children." And who that has a loving, human heart, that has one spark only of Divinity about them, does not know and feel that to be surrounded with Music, Flowers, and *little Children*, does indeed make a little Heaven, always! We love Heaven,—and we have enjoyed one recently, and it was a little Heaven—of Happiness

It was our good fortune and pleasure to attend the exhibition of the *little pupils* of the private Academy of Mrs. Sutherland, on Taylor St, where for two evenings the able and accomplished Principal and Teacher, with their beautiful pupils, they enjoyed scenes of real pleasure surrounded by their Parents and Friends, who found (as their little ones acted out characters,) more real pleasure than is ever found elsewhere.

Mrs. Sutherland, their kind and indulgent teacher had arranged for them a "Pet Theatre" and there they had free scope to *act their part upon the Stage.*

The play was "Beauty and the Beast," and several of the characters were sustained with more grace than we have seen manifested by adults upin our City Theatres,

We give a brief sketch of the doings of this pleasant affair.

A Prologue was very prettily spoken by Miss. Mary Boyd, as an introductory.

FAIRIES

Queen of Roses,.....Miss. Minnie Lindea.
Red Rose,.....Miss Hela Mix.
Wild Rose.....
Pink Rose.....Miss Mamie Coghill.
Yellow Rose,.....Miss Mary Boyd
Zephyr, (Standard bearer).....Master Chauncey White.
Zephyr, (Grand Marshal).....Master Harry Linden.

MORTALS.

Beauty,.....Miss Miranda Rosenfield.
Dressalinda,.....Miss Flora White.
Marygolda,.....Miss Louisa King.
Sir Old Gate Pump,.....Miss Eva Waldron.
Beast, Prince Ozon,.....
John Quill,.....Master Charlie Linden.

Between the scenes there was several pieces of of music on the Piano.

Aqua Sorel Quadrilles, (duet.),—Airs from Norma, and the Bird Waltz, by Miss Ida Rosenfield, and Elfin Waltz, by Miss Flora White. The musical performances were highly creditable for such young pupils, and gave great pleasure and satisfaction to all present.

The character of the "Queen of Roses," was sustained in a superior manner by the beautiful little Queen, Minnie, She looked and acted a Fairy indeed, and the part of John Quill was performed by Master Charlie Linden, in a manner that would have won applause for full grown actors. The other actors did well and won much applause. "Hear my Prayer, was sung by Miss Ida Rosenfield very sweetly, and for so young a pupil, most admirably.

The whole scene was one of the highest gratification, and reflected the highest credit upon the accomplished Lady who had so carefully and kindly educated these happy children in this pleasant amusement, and admirably educated them in all their other studies which are connected with the school.

Parents who desire an excellent Private School for little ones should learn of this place on Taylor Street, Mrs. Sutherlands.

LAND RUINED BY SORRELL.

We have frequently letters addressed to us, and inquiries made of us personally, upon the subject of *Sorrell*, a noxious weed, or so considered by many which when it once gains the ascendency, will root out all other vegetation, and take complete possession of the soil, which well under the control of this pestiferous *weed*, becomes a barren or worthless waste, or what is the same, a sterile, acrid and useless plain, where nothing else will grow until this noxious sorrell is completely extirminated.

This sorrell comes upon the land like a *thief in the night*. It finds the sentinels off duty, and it takes possession of the premises, and like the thief takes all it can get, and when farmers see sorrell show itself upon their land and they fail to grapple with it and root it out at once, and *thoroughly too*, it will soon be master.

This sorrell makes it appearance whenever land has been long skined, or only plowed or cultivated a few inches deep. Such a cultivation or rather *skimming* the soil causes it to become *sour* and acrid, the alkali and sour substances filling the substratum, which becomes choked and clammy, and thus renders it full of all noxious liquids which, by reason of its compactness, has what in a human would be called a "sour stomach," and upon such a soil only noxious weeds, or grass that feeds on such food will ever grow, and it is upon such a soil this sorrell is found.

There is sometimes a local atmospheric cause for the spread of this offensive weed. Lands exposed to the saline mists from the sea, or from winds coming constantly from seaward; yet this never causes it so certainly as the system of poor cultivation.

The tears of beauty, are like light clouds floating over a heaven of stars, bedimming them for a moment that they may shine with greater lustre than before.

CALIFORNIA FRUIT.

Some time in November last, we packed for some friends, several boxes of Fruit of choice kinds, and also samples of some of the best wines of our State, to go to New York so as to reach there for *Christmas*. By last mail we received among our Exchanges, the Yonkers Statesman, which thus speaks of this fruit.

"A friend in San Francisco has been kind enough to forward us some specimens of fruit.

A long voyage of 24 days through the tropics, added to being landed here the cold day before Christmas, gave it a severe ordeal. It, notwithstanding, came out in fair order, and as far as tried proves of good flavor. Some of the large specimens are still to be seen at this office. The Black Pear of Worcester is immense. The largest measures 15 inches at the base, 20 inches over all, in height is 8 inches, and weighs three pounds. Leeds Bros. have made a cast of it.—The apples are fine specimens, particularly the Jemeliske and Yellow Pippin. There were also some fine specimens of Pomegranates, which are novelties in this section, not to mention some Wilson's old port from Lake Vineyard, of 1858; Catawba from Eldorado Wine Co., of 1864, and Isabella from Strenzel's celebrated Alhambra Vineyards. In another near we can look for Wine and Fruit, including the finest grapes and strawberries, in the greatest abundance, by the Union Pacific Railroad.

The Pears named above we had from the Mission of San Jose, from E. L. Beard, Esq., the same tree from which the famous 4 lb Pear was taken, and which we sent to Rev. Dr. Bellows, in 1864. The Apples were from the Orchard of B. F. Fox, Esq., of San Jose. The Pomegranates came from the Alhambra Gardens. We anticipate reports from other articles sent, soon.

The wines speak for themselves, and purer and better cannot be found in New York or elsewhere. We shall send them Fruit when the Railroad is finished, and such Fruit as they have never yet seen, for we shall not send it through the tropics, nor on a voyage of *twenty four days*, but leave off the twenty, and say four days, and as fresh as if from the Orchards of the Jerseys.—ED F.]

TAKING UP TREES.

The following relative to taking up trees for transplanting, accords with the views we have often expressed, but they cannot be repeated too often: they were given at a recent meeting of agriculturists at New Haven.

"An enormous amount of money is lost to tree purchasers from rude and unskillful taking up. Trees are often torn up by the roots, as if the trunk and branches were the one thing necessary, and the roots superfluous. The proper way is, to open a trench on each side of the tree with a common spade, *keeping the edge towards the tree*, so as not to cross a root. These trenches should be far enough from the tree to avoid the main roots, and deep enough to go below all except the tap root, which may be cut off. This being done, the tree may be pulled up with its roots entire."

[There is another very important thing for tree and plant purchasers to remember, and that is, never to buy such *things* of *Pedlars* or *stands* and *retail places* where they are exposed for sale, unless it be at the *agencies of the grower*, and where they can be had fresh from the nursery.

Many of the trees and plants, are exposed at these places for weeks before they are sold, and then the fibrous roots are so badly dried up, that *one half* of *them* will die, or if they live, never can be good vigorous and healthy plants.

Purchasers should go to *headquarters*, buy only of nurserymen direct, or of persons that by their experience can prove they understand their business. Ed F.

A GRAND SIDE OF LEATHER

California always *can* exhibit the largest and best products, and even if she does not actually produce them, they will find their way here for this is the place for all great and good things.

We were invited to call at the well known Saddlery Warehouse of Mess. Main and Winchester, to look at a side of leather, that was indeed *worth seeing*. It is true it was brought from the Empire State, but *this State* was where it could be fully appreciated, and for size, placed with our Big Trees, Mountains, and Waterfalls.

This side of Leather contained 135 square feet, the animal from which it was taken weighed 3,379 lbs. The Ox was raised in Orange County, New York, and created a great deal of interest, both alive, and by his hide afterwards, for this is believed to be the largest and heaviest hide ever tanned.

The warehouse of this well known firm is of itself a Museum of Importance to all who need Saddlery or Harness wares, for there is no establishment in the United States more complete, than that of Mess. Main and Winchester of our city.

THE SAN FRANCISCO HERALD.

We have received this Journal bearing upon its very front, the well known face of earlier days in San Francisco Journalism. The Herald looks in form and appearance and all its general phase, like the Herald" of long syne, only as we must say, *much improved.*

The Herald *now* professes to be an INDEPENDENT JOURNAL, and as such with its talented and accomplished Editor, it must and will be welcomed and patronized liberally, as its colums already show it will receive patronage and a liberal share of the buisness of our City and State. The general style, of the Herald, its excellent Typographical appearance, its well selected matter, and the able editorals of the Editor of whom it can be said without disparagament to the talents of others, one of the ablest Editors of our State, these united, must make the Herald a profitable and most acceptable Journal to all.

Most sincerely, do we wish success to the Herald, as it enters the arena for Public favor.

Plow deep while sluggards sleep.

Editor's Chair,

We call attention to the closing part of W[ashington's] ington's reply to Hon. John Sinclair comm[unication] last week. If the spirit of the Immortal Wa[shington] ton can look down upon our widely ex[tended] Territory, he would glory in our present [prosperity] ness. We shall soon continue more of Wa[shington's] ton's Letters.

The brief note from our Correspondent W. [illegible] D., of Eden Valley, shows how wide is the c[ultivation] tivation this year. It is but one of a thousa[nd] reports now coming from all quarters

We have more to say on "Sorrell" next wee[k] Several letters, and books, with parcels, receiv[ed] too late for us to notice this week.

We have a letter on Silk Culture from Mr. Bry[ant] ster which will appear next week.

CONTINUED RAINS.—CROAKERS.

What will the croakers about a "dry seas[on] do now for items? Wonder if they cannot chan[ge] their tune and say the rains will *rot the see[d] planted grains!* But no, this would not do, [for] such grain is. 6, 8. or 12 inches high, and beyo[nd] such a calamity, perhaps they can say, it w[ill] cause the grain to grow too rank, and it w[ill] lodge and not head out well, but this will not [do] as the very substantial growth at the present m[o]ment, indicates great health to the growing cr[op]. But what *can* these croakers do? We know [of] but one way for them to find relief, and that is[,] do as Judas did, who often betrayed, (for the croakers *have* betrayed the true interest of [the] grain-grower), they can go out and *hang the[m]selves*, for never have we known such wild, [false] and mad statements relative to the Grain Mar[ket] and the weather, as have been made by seve[ral] Journals, that *should have known better.* Can [the] Farmers forgive such betrayers?

CENTRAL PACIFIC RAIL ROAD.

The rapid advancement of this great enterpr[ise] to its completion, is awaking a remarkable deg[ree] of interest in all the Eastern States, and in E[u]rope, not only among a large class of emigran[ts] but also among the merchants, manufactur[ers] mechanics and commercial men generally.

By a reference to the Time Table of the s[ta]tions, along the line of this Rail Road, it w[ill] be seen how rapidly the lime is opening a va[st] extent of territory never yet before accessible [for] the purposes of settlement, land too of the be[st] quality, and tracts of country that tell in tho[usands] and millions of acres of soil that will produ[ce] more than the Gold fields of California.

THE STORM.—In our last week's issue it will recollected, that we called the attention of readers to the *weather*, and expressed our c[on]dence that *a storm was year*, We predicated [our] belief from our experience and observation, [that] had almost always found that three or four [such] warm and beautiful days, with the warm haz[y] atmosphere which was observed the last we[ek] and which every evening changed to a peculi[ar] cold and chilly air, that such weather was [al]riably followed by heavy rains, or by storm[s] some severity, and we then hinted to our reade[rs] that "they might look out for the storm," and [for] the heavy rains since, and the appearance no[w] we think before we again see clear weather of [any] duration, we shall have what will be admitted [to] be a *real storm.*

RAIL ROAD LANDS.

Those Emigrants, who arrive and want G[ood] LAND, with GOOD TITLE, and land that [will] certainly improve in value every year, sh[ould] by all means, go to the LAND office of the CEN[TRAL] PACIFIC, RAIL ROAD, at Sacramento, and see [the] *Maps* and charts of large and valuable tracts [now] for sale at liberal prices, and on liberal ter[ms] B. B. Redding, Esq. the selling agent of [the] company is always at the office, to explain [and] show purchasers the various tracts for sale [by] the company.

We know these lands must very steadily [im]prove in value, and that contiguous to the ro[ad] always offers a ready market, for all the *produ[ce]* that is offered, and that may be grown upon [the] land.

FAMILY GROCERIES.—We have occasionally call the attention of house-keepers to the well known establishment of Mess. Bowen & Broth[er] Family Grocers, on the Corner of Montgom[ery] and California Streets.

We now call the attention of families in [the] country to this establishment, and when they [in] this city they should by all means call and see [it] of the best and most complete assortments Family Stores, ever yet shown in the State.

Ira Collins is the owner of a farm in Sono[ma] county, California, which had suffered seriou[sly] from drought. Only by digging a very deep [well] a supply of water barely sufficient for the [use] the family could be obtained. Since the [earth] quake, however, the water has risen to the top [of] the well, and some sixty acres of land on the [farm] will have to be ditched and drained before a [crop] can be put in.

So says our eastern exchange, what say the Sonoma folks?

A Reading Community San Francisco may [be] said with truth to be a *reading community*, for [be]sides all the usual literary Books, its Libra[ries] &c, there are now published in the City, *Score and ten* newspapers and magazines, [or] one for every five hundred persons, babies [and] all.

The more we do, the more we can do; the [more] busy we are the more leisure we have, and the old maxim—"He hath no leisure who [does] not."

A thousand parties of pleasure do not [leave] recollection worth that of one good action.

Acknowledgements.

Books Received.—We have from K. P. Kidder, Esq., of Burlington, Vt., his new book, "The Secrets of Bee Keeping," being a practical treatise on "Bee Culture," and "Bee Management," and giving the natural history of the Bee—its Anatomy and Physiology, and the different species that constitute a colony. A valuable and truly practical little book.

Agricultural Reports.—We have from the Department at Washington, a parcel of the Agricultural Reports for 1866. This work is advancing every year in value and general interest. We shall soon receive copies of '67, for our friends and readers of the Farmer.

We acknowledge also letters of interest from Hon. Horace Capron, Commissioner, which shall have our best attention, and we shall look with interest for the promised parcels.

Publications Ahead. We acknowledge *advance proof sheets* of G. P. Rowell & Co's American Newspaper Directory. This will be a valuable work, containing a complete list of all the Newspapers published in the United States, together with Canada and the British Colonies. The work will contain from 3 to 400 pages, making a very valuable volume, and will be forwarded bound up in cloth handsomely, at $5 per volume. Messrs. G. P. Rowell & Co., are the most extensive Newspaper Advertising Agents in the United States.—Their Directory will also contain a list of all the Cities and Towns in all those regions where a Newspaper is published. This work will be invaluable, and we shall speak in detail the moment we receive the volume.

Missouri Agriculturist. We have received No. 1. Vol. 1. of the "Central Union Agriculturist", and "Missouri Valley Farmer," a monthly Journal of the same size and style of the American Agriculturist of Orange Judd & Co., save that it is not embellished with cuts like the latter, nor has it that superior style of the "Judd Monthly," yet it is a valuable publication and shows great merit as a Journal. We hope it will be duly esteemed and appreciated. It is published by Jeremiah Behm, who is Editor and Publisher.

Once a Month. This is a neat little volume of some two hundred pages. A new work just issued by T. S. Arthur & Son, Philadelphia. This may be properly called a Happy Magazine, full of all that class of stories that are not only interesting, and attractive; but of a good moral tendency.—Just what might have been expected of Arthur & Sons. The February number is most excellent, and we wish this new work complete success.

The "Starling Progressive Papers". This is a splendid work and by the subjects named, Man, Woman, Children, Angels, and the Globe, treats of things new and strange to many. Published by W. D. Reichner, Philadelphia.

The White Banner. This is another Journal of Progressive Philosophy. These publications seem to increase rapidly, and yet from all we can glean many valuable truths, for we *seek for Pearls*, always.

Report of the Surveyor General. We have received the volume of the Statistical Reports of the Surveyor General of California for 1867 for which we return our compliments.

We are indebted to A. C. Lawrence of Lawrenceville, for a parcel of the true *Concord Grape*, grown from the original stock he received from E. W. Bull Esq., of Concord, Mass, the *originator* of this most excellent grape. We return thanks for the parcel kindly sent us.

Agricultural Jokes.—The Ohio *Farmer* gets off the following:

Large horses are generally most admired by farmers; but farmers are most admired who *pony* up.

Prosperity is generally based upon knowledge and industry; the swine will always get most that *nose* most.

Farmers are like fowls; neither will get full crops without industry.

Because a man who attends a flock of sheep is a sheep-herd, makes it no reason that a man who keeps cows should be a *cow-ard*.

We like to see a farmer increase the growth of useful plants and shrubs around his home, but do not like to see him use rails, poles and boards to *prop-a gate* with,

---

The total amount of tobacco produced throughout the world is estimated as follows: Asia, 309,900,000; Europe, 281,844,500; America, 248, 280,,500; Africa, 24,300,600; Australia, 714, 000; making in all, 995,039,000 pounds.

AUZERAIS HOUSE,

SANTA CLARA STREET,

San Jose, Cal.

J. M. STAPLES, PROP'R.

—ALSO—

LAKE HOUSE,

DELMAR AVENUE,

SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,

31-1 Proprietor of the Auzerais House.

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co.,

Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

Thornless Raspberries.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The Thornless raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. John Gage

From the American Horticultural Annual, for 1868 page 102:

"Davison's Thornless.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, a grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicates, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are propagated from tips, making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety.

WARREN & Co.

Farmer Office 320 Clay street, San Francis

IMPORTANT TO NURSERYMEN, GARDENERS, AND AMATEUR FLORISTS.

We beg to announce the arrival of the choicest and best assorted collection of

RARE SEEDS,

ever received on this coast. They have been selected with the greatest care, from the first houses in Europe, and are comprised of

EVERGREEN, AND DECIDUOUS TREES AND SHRUBS, RARE AND BEAUTIFUL PERENIALS, BIENNIALS, ANNUALS, ETC.;

also, new and choice Vegetables; the assortment is worthy the attention of all who admire the beautiful; and also the particular attention of gardeners who are anxious to secure something rare and new in the Vegetable kingdom.

We shall send them out in small parcels or individual packets, so that many may have the chance of securing the collection. Orders executed in rotation, and carefully packed for mailing any distance.

Persons remitting us five dollars, will have collections of seeds sent them, worth intrinsically double the amount.

WARREN & CO.,

Farmer Office, 320 *Clay St.*, San Francisco.

New Strawberries, Raspberries, Grapes &c.

We have just received an invoice of New Strawberries, Raspberries, Blackberries, &c., to which we call the special attention of all who desire the Newest and Choicest Vines and plants known. The following varieties received:

Blackberries—THE KITTATINY. WILSON'S EARLY.

Raspberries—DAVIDSON'S THORNLESS. DOOLITTLE BLACK CAP.

Strawberries—DR NICAISE, nine to the pound. GOLDEN QUEEN, magnificent. GREEN PROLIFIC, rare.

New Grapes—TEN VARIETIES New Grapes.

As the amount of these new and rare things is limited, early orders only will secure them. Address

WARREN & CO

Farmer Office

Horticultural Premium

New Vines and Plants.

With a desire to extend the cultivation of the *New* and *Rare Varieties* of the *Raspberry, Blackberry*, and *Strawberry*, we offer the following

PREMIUMS:

For every new subscriber and $5 two plants of the Thornless Raspberry, and two plants of the Kittatinny Blackberr

For two new subscribers and $10 we will give two plan each named above and one dozen plants of the Jucunda Strawberry.

For four subscribers and $20 four plants each of the Raspberry and Blackberry, one dozen of the Strawberry, and two Doolittle Blackcap Raspberry.

For five subscribers and $25 the same premiums as for four and four plants of the Doolittle Blackcap Raspberry.

For a club of ten and $50 we will give one dozen Daviso Thornless Raspberry, one dozen Kittatinny Blackberry, ha dozen Doolittle Blackberry and fifty Jucunda Strawberry.

These premiums will enable beginners to secure these new and rare plants, which are now worth their weight in silver.

Those who send now can also secure our November and December numbers of the *Farmer* and the entire year of 1869

WARREN & CO.

THE KIRBY LARGE MOWER.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down again when smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way, for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with a great strain, and be very liable to break.

THIS MACHINE HAS NO EQUAL IN DIFFICULT CUTTING.

It has an INDEPENDENT ACTION by Means of a Joint in the Frame, instead of the Moving Bar, so that the Knife is always Kept in Line ith the Gearing.

It is Easy Draft for Two Horses, and can Cut Heavier LODGED GRAIN without Clogging than any other Machine on the Pacific Coast.

This Machine is the same as the Combined in every particular, only the Reaping Attachment is left off, and parties buying it can afterwards buy the whole or any part of the Reaping Apparatus from the Common Reel to the Self-Rake.

This large KIRBY MOWER is the only mower that has an independent action, and can use a reel when mowing, especially in windy weather. It can be bought as a Mower, with or without a reel.

In soft, sandy, sediment land, the lifter-wheel, on account of the narrowness of its rim, will sink in quite deeply. In this case a WIDE BAND should be provided and slipped on it, which will prevent the difficulty. The wheel as it is, will run very well on hard ground. These bands with all the Extra parts, will be kept Constantly on Hand, to supply all the calls of purchasers.

As a machine for clipping mustard, or cutting back grain that grows too fast, the Kirby Mower possesses advantages over all other Mowers from the fact that IT CAN CUT AT ANY HEIGHT from the ground, and work equally well and free under all circumstances

When you order EXTRAS for this Machine, always state the NUMBER ON THE PART WANTED corresponding with the number on the plates on the list, and also GIVE THE NAME of the part when there is no number on it.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose).

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINT of your guards LOW by means of the forward bolt in the pole where it bolts to the machine. IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL

Be sure to keep TLL THE NTTS TIGHT and the JOURNALS WELL OILED, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the JOINT TIGHT WHERE THE PITMAN CONNECTS WITH THE KNIFE, and then your machine will work well without trouble or expense.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

30-22—no1

THE PHOTOSCOPIC TABLE COMPANY.

THE NEW INVENTION of this Company is known as the Anthrophotoscopic, or "Photoscopic Table," designed to give a Life effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION of this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group Families entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changible pictures, arranged to suit the wishes an desires of each owner of the table,

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

The Company have opened a Suit of Rooms for Exhibition and sale of the Photoscopic Table at the corner of St. Marks Place, No. 23 KEARNY St., west side, up stairs, to which they cordially invite the public to examine them. 32-1

Home Miscellany.

I THINK OF THEE.'

I think of thee when Morning springs'
From Sleep, with plumage bathed in dew;
And like a young bird lifts her wings
Of gladness on the welkin blue.
And when at noon the breath of love
O'er flower and stream is wandering free,
And sent in music from the grove—
I think of thee—I think of thee!

I think of thee, when soft and wide
The evening spreads her robe of light,
And like a young and timid bride,
Sits blushing in the arms of Night.
And when the moon's sweet crescent springs
To light o'er heaven's deep, waveless sea,
And stars are forth like blessed things—
I think of thee—I think of thee!

INFLUENCE OF DIET UPON MOTHER'S MILK.

Dr. Subotin, of Petersburg, (*Vierteljahrschrft f. d. Prakt.* No· xxv., 1868), has instituted a series of experiments in regard to the influence of diet upon the quantity and quality of mother's milk, and his conclusions are as follows:

I. That the daily yield of milk is increased by animal food, and is diminished by a diet of vegetables. A marked diminution of the milk, and, when persisted in, an entire suppression, is shown when food of a fatty nature has been given only.

II. The relative proportions of the elements which compose the milk are influenced by the character of the food. The amount of solid matter is increased by an animal diet, and the fatty material is shown by this increase, The increase of these substances in the milk is absolute, not relative; animal food increases the daily amount of the milk secretion. There is scarcely as appreciable change of the proportion of the albuminous and saline ingredients. Bensch supposed that the saccharine matter of the milk was reduced by the use of an animal diet, but it is found not to be so. The experiments of Drs. Bensch, Playfair, and others, that the fatty constituents of the milk are increased by vegetable food, and by an animal diet diminished, are not confirmed by him. The solid properties of the milk, especially the butyracious, are but relatively increased, and at the same time a decrease in the sugar is shown.

III. From these observations it would seem that the fatty matter of the milk is created, for the most part, from albumen.—*Medical Record.*

CRIMINAL ABORTION.

It is not our purpose to write an article on the criminality of abortion, in a moral point of view. People may believe what they choose about future punishment for crimes committed in this world, and may use any sophistry that pleases them to prove to themselves that they will escape. What we are specially interested in is, that public opinion is fast coming up to the point—that the well being of society demands the enforcement of the laws against abortion,

There is not a State in the Union but what has passed laws punishing the offense with imprisonment in the penitentiary; but for many years these laws have not been enforced. Now, we are glad to say they are being enforced, and we believe it to be the duty of everyone to aid in this direction.

The temptation thrown in the way of the physician is sometimes very great, and to the young man who is struggling for a livelihood and for friends, it seems hard to resist, especially when his sympathies are appealed to. But it should be resisted, for only in obedience to right and law can permanent success be obtained.

Our old-school friends would like to throw the odium of the crime upon those they are pleased to term *irregulars*, but the facts are, that they furnish their due proportion to the list. What we want is a united effort for the arrest of the practice of abortion, and for the punishment of those who are guilty, without reference to school or creed.

These thoughts have been suggested by the recent conviction in our city, of one Dr· D· A. Ross, for producing an abortion upon the person of Georgianna Ridgeway. The sentence was seven years in the penitentiary, which, as he is now some sixty years old, is equivalent to sentence for life. —*Elec. Med. Journal.*

WHAT SHALL THAT BOY DO?—Who will tell? The boy who reads this, what will he do? When he becomes a man will he do manly things? Will he read and so be intelligent? Will he bring the powers of mind and body into exercise, and so be useful and healthful and strong? Will he pray and be pious, good—of a noble and virtuous soul? Will he write and so be graceful in speech, ready in communication, and of strong influence? Say my boy, what are you going to do? What you like to do now, you will be very likely to do by and by. Do you swear now? Do you cheat, deceive, lie, steal? Do you do dishonorable things? Are you disrespectful to, or do you disobey your parents and teachers? Remember the *boy* makes the *man*. *If the boy is bad, the man will be.* Fix it in your mind which way you will be.

How, like the shadow upon the dial. thought is ever returning to the place of beginning—where we first began to live, where we first began to love; to the homestead and the trysting-place, the playground and the grave yard!

DEAD LETTERS.

Of all the official work done at Washington none is regarded with more interest by the transient visitor than the Dead Letter Office. Here sit some fifteen or twenty gentlemen (for it is a fact disgraceful to humanity that females cannot be employed, so many obscene letters poison the mails) continually engaged in opening the four or five millions of letters that annually find their way there. More than 15,000 letters are daily emptied on their desks, asking to be opened. When the letter is found to have valuable contents, those contents are endorsed upon it, and the letter returned to the envelope. A record is made of all such letters, and they are at once returned to their writers, without return postage. So perfect are the arrangements that it is hardly possible that a valuable dead letter, which has once reached the office, should fail of revisiting the writer, if it is in the power of the department to discover him.

During the past year 36,000 letters; inclosing $141.234, were received at this office, and nearly 29,000 of them, containing $130,620, were restored to their owners. But besides those money letters, there were 21,000 dead letters, containing bills of exchange and other valuable matter, appraised at over $5,000,000; over 49,000 containing photographs, jewelry, etc., and 97,000 containing stamps and articles of small value; nearly all of them were returned to the original writers, and the reason why any of these letters fail of being returned is not the fault of the department but of the writers, who either send an unsigned, letter, or who will subscribe herself "your loving Susie," or "your affectionate Adie;" and as Government knows no first names, all such letters are consigned to the chopping box and then to the paper mill, to reappear as white paper.

Since writing thus far, I have once more visited the Dead Letter Office—a visit that always gives pleasure and gratifies curiosity· Here I saw clerks taking $500 a day out of the letters so profusely scattered over their desks, and among the various articles recently taken out of their envelopes I noticed the following: Slippers, valentines, a duck's head, thermometers, false teeth, pistols, mittens, fern leaves, false hair, laces, paper collars, epaulets, horns, pipes, watchcases, hoops, albums, dolls, (one of them two feet high; it must have required a monster envelope!) butterflies, mats, medicines, silver goblets of full size, ear-rings, butterknives, spoons, gold and silver watches, (very little gold or silver about them, however,) shells, purses, soap, sugar, tea, coffee, bows and arrows, books, pictures, a box of cigars, a bottle of Jamaica ginger, a squrrel's tail, prisms, combs, boxes, &c.—*Hours at Home.*

BOYS WHO SMOKE.

Dr. Decaisne, (*Bull. Gen. de Therap.*) in the conrse of investigations on the influence of tobacco on the circulation, has been struck with the large number of boys, aged from nine to fifteen years, who smoke; and has been led to inquire into the connection of this habit with impairment of the general health. He has observed 38 boys, aged from 9 to 15, who smoke more or less. Of these distinct symptoms were present in 27. In 22 there were various disorders of the circulation —*bruit de souffle* in the neck, palpitation, disorders of the digestion, slowness of intellect, and a more or less marked taste for strong drink. In 3, the pulse was intermittent. In 8, there was found on examination more or less marked dimunition of the red corpuscles; in 12, there was rather frequent epistaxis; 10 had disturbed sleep; and 4 had slight ulcerations of the mucus membrane of the mouth' which disappeared on ceasing from the use of tobacco for some days. In children who are very well nourished, the disorder was, in general less marked. As to the ages, 8 of the boys were from 9 to 15 years old; 10 from 15 to 16.—The duration of the habit of smoking was: in 11 from six months to a year; and in 16 more than two years. The ordinary treatment of anæmia in general produced no effect as long as the smoking was continued; but when this was desisted from, health was soon perfectly restored, if there were no organic disease.—*Brit. Med. Journal.*

"LOOK TO THE GOD OF YOUR FATHERS."

Henry Ward Beecher, in a recent sermon, discoursed thus in regard to the fair sex: "Maidens, look to the God of your fathers. If there be any one in this world who cannot afford not to be a Christian, it is a woman. If there be any one whose beauty fades as a flower, and whose grace needs the sustenance of the ineffable; if there be any one whose power is in beauty, in purity, in goodness, it is a woman. If there beany one more than another upon whom blight falls more rudely; if there be any one more than another who is more burdened with grief, or more wrung with sorrow, it is a woman that is not a Christian. The ladder between her soul and God is not half so long as that between our souls and God. God made woman to be better than man; and the perversion is in proportion when she is worse."

SILENT INFLUENCE.

Albert Barnes says:—"It is a bubbling stream that flows gentle; the little rivulet which runs day and night by the farm-house? that is useful, rather than the swollen flood or roaring cataract. Niagara excites our wonder, and we stand amazed at the power and greatness of God there, as he pours it from the hollow of his hand; but one Nigara is enough for the continent or the world, while the same world requires thousands and ten thousands of silver fountains, and gently flowing rivulets that water every farm and meadow, and every garden, and shall flow on every day and night, with their gentle, quiet beauty. So with the acts of our lives. It is not by great deeds, like those of the martyrs, that good is to be done, but by the daily and quiet virtues of life, the Christian temper, the good qualities of relatives and friends.

Home Correspondence.

CARPENTERIA, Santa Barbara County, Cal., Jan. 6, 1869.

To the Readers of the Farmer:

The old readers of the California *Farmer* will perceive that an old correspondent is addressing them. Now is the time to secure homes in Lower California. The emigration is large already, but can well afford to be larger. The climate is mild, soil rich and productive. Vegetables and fruit do well here, as do many kinds of grain. The Spaniards are plenty about here, but let Americans come in with plenty of money, and they will no doubt sell and be gone.

The land near San Louis Obispo presents a sad appearance, on account of the bones of animals that perished in the dry season; but it was a great blessing to the country to rid the land of so much stock that was useless. When a man will cultivate his land, and raise just a small surplus of stock, and keep those well, then he will benefit his race. There is not enough raised on the road from here to San Jose to supply the wants of the traveller. In many places there is not a fruit tree growing, and yet some of the inhabitants have lived there for years.

There are places well watered and timbered that might grow enough for home consumption, and some to spare; then the traveler or stranger coming to sojourn among them would be well supplied, and money would be plenty and more evenly distributed.

It grieves me when I see houses with nothing of beauty around them, and children playing in the sand· No wonder our population hate farming, and men go to the gaming table and saloons for comfort. But this is not what I want to say. It is, come, Eastern, Western, Northern and Southern friends, and make "Homes of Beauty" in California.

We need you, and you need us. ROSA.

LANDS DOWN SOUTH.

NEW TOWN· SAN DIEGO·
Jan'y. 13th 1869.

Dear, Friend Farmer. I seem almost ashamed to write you after such a time has elapsed since I left Town, but you compell me by your kindness remiting me the paper for which receive my best thanks. And now for my reasons and excuses for not writing ere this. First for some time after my arrival I was sick. Secondly I have not been able to get a place to suit me, the farmings lands here being in patches and grants, which are mostly held by Speculators at which we considér very high prices, so I have been following my old occupation. Still I will now try and fill up this letter with as much matter as I can.

San Diego is favored with, I think, the finest climate that man can desire. Its harbor is beautiful to behold, perfectly land-locked. The back country is hilly and mountainous, many gulches and canons, and here and there a valley, The Cohn Ranch or Grant being the largest, said to contain some 100,000 acres. This is held by Speculators at prices varying from 'good to bad 5. 10. and 20 dollars per acre. The next large Grant is held by Kimball, & Bro's of your Town. He has some six or seven miles lying along the Bay but how far back I cannot tell. That part near the water he has cut up into small lots, five, ten acre & the ten acre lots he ask 250$ for, this grant is some five miles from the New Town, the Cohn about 18 miles. The mission valley land are good and I hear soon to be sold. This climate will grow anything but the soil I think mostly light and I fear poor, the dry seasons I think to· make failures as there is no water for errigation. We have two Towns one the old, the other new. The New Town lies directly opposite the Bay gently sloping to the water, the pleasantest site I ever saw. It is being built up as fast as lumber can be procured, each steamer bringing us an increase of population, some for health, some for work or business, and some in search of homes. We have no fogs nor winds. I wish I could get some lands to plant the seeds, then I think I could tell you something extra, but now my thoughts have all run out, and I must close. With kind regards, I am

Yours truly,
W. G. G.

SOUND SLEEP.

Any man who can bound out of bed as soon as he wakes of a mid-winter's morning is worth something; no fear of his not making his way through the world creditably, because he has the elements of a promptitude. decision and energy, which guarantee success. To invalids we make a comfortable suggestion worth knowing. If you have force of will enough to keep you from taking a second nap—and it is the "*second nap*" which makes its baneful influence felt on multitudes—it is better for you to lie awhile and think about it, until that feeling of weariness passes out of the limbs which you so commonly feel. But to sleep soundly, and to feel rested and refreshed when you wake up of a morning, four things are essential—

1. Go to bed with feet thoroughly dry and warm.

2. Take nothing for supper but some cold bread and butter and a single cup of weak warm tea of any kind.

3. Avoid over fatigue of body.

4. For the hour preceding bedtime, dismiss every engrossing anbject from the mind, and let it be employed about something soothing and enlivening in cheerful thankfulness.

—*Hall's Journal of Health.*

RUSSIA· with an eye to the health of the rising generation, forbids the manufacture or sale of colored sweetmeats. If every nation should do the same there would not be recorded *one third of the deaths of little children under five years.*

A thousand parties of pleasure do not leave a recollection worth that of one good action.

Santa Clara College, S. J.

SANTA CLARA, CAL.

Conducted by the Fathers of the Society of Jesus.

THE EIGHTEENTH ANNUAL SESSION OF THIS INstitution will commence on THURSDAY, August 27th, 1868

TERMS—Tuition in the Classical and Scientific Departments; Boarding and Lodging; Washing and Mending of articles; School Stationery; Medical Attendance and Medicines; Fuel, Light, Baths, etc., per session of ten months,.....$35

94-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights o labor, It has the best agricultural department of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal: its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world,

Such a paper, offering premiums of Sewing Machines, Dictionaries, Applet on's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to

HENRY E. CHILD,

A PRINCELY RESIDENCE

IN THE COUNTRY

FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden with all manner of luscious fruits, and when with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO.

Miscellany.

GONE! GONE! GONE!

A DIRGE FOR ONE BELIEVED DEAD.

Gone—gone—gone—
Gone to his dreamless sleep!
And spirits of the brave,
Watching o'er his lone grave,
Weep—weep— weep.

* * * * *

Mourn—mourn—mourn,
Mother, to sorrow long wed!
For o'er the mighty deep,
Where the brave coldly sleep,
Thy warrior son lies dead.

Lone—lone—lone,
In thine own far Island home,
Ere thy life's task is done,
Oft with the setting sun,
O'er the sea thy thoughts will roam.

* * * * *

Sound—sound—sound,
The trumpet, while the thousands die!
Madly forcing his way,
Through the blood-dashing spray,
He beareth our banner on high!

Woe—woe—woe!
Like a thought he has sunk to rest.
Slow they bear him away,
In stern martial array,
The flag and the sword on his breast.
High—high—high
High in the temple of fame,
The poet's fadeless wreath,
And the soldier's sheath
Are engraven above his name.

Long—long—long,
As time to the earth shall belong,
The sad wind o'er the surge,
Shall chant a mournful dirge,
To this peerless child of song.

Gone—gone—gone!
Gone to his dreamless sleep;
And spirits of the brave,
Watching o'er his lone grave,
Weep—weep—weep.

THE ORIGINATOR OF CHAMPAGNE.

Notwithstanding its great celebrity, champagne is the youngest as well as the liviest of wines.—As you journey from Strasbourg to Paris, you pass within a mile of Reims, the little village of Hautvillers standing above the vine-clad hills of Marme. Here is an ancient monestary, in which lived a joyous monk, Don Perignon by name, who, one hundred and fifty years ago gave the world the invention of champagne. On account of his many virtues, in which an accurate taste and a clear head were conspicuous, he took charge of the broad sunny vineyards of the abbey, and had the control of the cellers of the establishment.

Even as a blind old man, his taste distinguished between different kinds of grapes, and, according to an old chronicle, he would give wise instruction concerning them, saying: "that the wine of one grape must be married by the wine of another." His powerful mind also conceived the happy idea that the insertion of a cork in a bottle might more effectually answer the purpose which had hitherto been obtained by the primative stopper of a bunch of flax soaked in oil. He had already raised the vinous renown of his monestary to a great height, when by a lucky chance, he hit upon the invention of the effervessing wine known as champagne. The jovial monks kept the secret as long as they could, but at length it transpired, and the new wine in due course adorned the suppers of the Regent and Louis Quinze.

THE SUN.—The announcement has just been made to the Royal Astronomical Society of England of the discovery, by means of the spectroscope, of a hitherto unknown envelope of gaseous matter surrounding that body, of a thickness of seven or eight thousand miles. Its precise composition has not yet been determined, but will, probably, before long, be ascertained. At the same time, Mr. Huggins, who has made so many important discoveries in reference to the composition of the heavenly bodies, by means of the spectroscope. presented a communication stating that, at least one comet contains carbon in a state of ignition.

A VALUABLE LIBRARY of books in reference to the history of the Pacific Coast of the United States, it is reported, has for the last three years been in the course of formation by a gentleman of San Francisco. The history of the Early Discovery of Upper and Lower California, Western Mexico. Oregon, British Columbia and Alaska is amply supplied by works in English, French, Spanish and German. The collection numbers over three thousand volumes, and is said to be the largest and best in the world.

POINTS OF A GOOD COW.

She's long in her face, she's fine in her horn,
She'll quickly get fat without cake or corn,
She's clean in her jaw, and full in her chine,
She's heavy in flank and wide in her loin.

She's broad in her rib, and long in her rump,
A straight and flat back, with never a hump;
She's wide in her hips, and calm in her eyes,
She's fine in her shoulders and thin in her thighs.

She's light in her neck, and small in her tail,
She's wide in her breast, and good at the pail,
She's fine in her bone, and silky of skin,
She's a grazier's without, and a butcher' swithin.

A NEW CATTLE DISEASE.—A new cattle disease has appeared in England. The symptoms are dulness, increasing to extreme prostration, difficult breathing, small and frequent evacuations, colorless urine, membrane of the mouth discolored and ulcerated as in the cattle plague, pulse weak but not rapid, and the temperature does not rise. The disease is not inflamatory, and post mortem examinations show that the blood has been poisoned.

AGRICULTURAL COLLEGES.

We give the following list of Agricultural colleges in this country which receive aid from the Government grants, their present condition, location, endowment, number of pupils, course of instruction, expense of tuition, etc.

Sheffield Scientific School of Yale College, at New Haven, Conn.—Acres, scrip, 180,000; endowment $160,000; pupils, 1867-9, 130; cost of tuition per annum, $125, and $75 for chemical apparatus; time, three years. Course of study—English, chemistry, mechanics, civil engineering, mining and metallurgy, agriculture, natural history and geology, French and German, etc. Number of volumes in the Library, 73,000.

Agricultural College, Amherst, Mass.—Acres, scrip, 360,000; endowment, $116,000; cost of tuition per annum, $36; time, four years. Course of study—Algebra, geometry, anatomy, botany, French, German, agriculture, chemistry, horticulture, philosophy, etc.

Institute of Technology, Boston, Mass. Endowment, $480,000; pupils 1867-8, 170; time, four years. Course of study—English, mathematics, chemistry, astronomy, surveying; modern languages, mechanical engineering, building and architecture, science, literature and tactics.

College of Agriculture and mechanic arts, Hanover, N. H—Acres, scrip, 150,000; endowment, $80,000; time, four years. Course of study—various branches of applied science.

University and State Agricultural College, Burlington, Vt.—Acres, scrip, 150,000; cost of tuition, $15 per term, $40 for chemical apparatus; time, three or four years. Course of study—Algebra. chemistry, drawing, French, German, natural history, minerals, metallurgy, and engineering.

College of Agriculture and the Mechanical Arts. Orono, Me—Acres, scrip, 210,000; endowment, $104,500. Course of study—Marine Architecture; etc.

Scientific Department of Brown University, Providence, R. I.—Acres, Scrip, 120,000; endowment $50,000. Opened Sept. 1., 1868.

Agricultural College, Cornell University, Ithica N. Y.—Acres, scrip, 990,000; endowments, $1,000,000; not opened; cost of tuition per annum, $30; time, four years. Course of study—Agriculture, mechanic arts, civil engineering, military engineering and tactics. mining and practical geology, history, social and political science, modern and ancient languages.

Agricultural College, Centre county, Penn.—Acres, scrip, 820,000; endowment $286,000; cost of tuition per annum, $50, and board $80. Course of study—General science, agriculture, mechanical and civil engineering, metallurgy, minerology, mining, literature, military instruction.

Agricultural college, near Lansing, Mich.—Acres, scrip, 240,000; pupils, 1867-8, 97; cost of tuition per annum, $20, and board $150. Course of study,—English, mathematics, agriculture, literature, natural history, physics, rhetoric, civil engineering, landscape gardening, philosophy, French.

Agricultural College. Prince George County, Md—Acres, scrip, 210,000; endowment, $101,253; pupils, 1867-8, 11; cost of tuition per annum, $75, and board $225. Course of study—Chemistry, natural philosophy, physical geography, minerology, geology, ancient and modern languages, agriculture, mathematics. Number of volumes in the Library, 1,600.

College of Arts, State University, Madison, Wis.—Acres, scrip, 286,000; endowment, $300,000; cost of tuition per annum, $24. Course of study—Mathematics. German, French, Latin, rhetoric, horticulture, astronomy, logic, and theology.

Agricultural College, Morgantown, Va.—Acres, scrip, 150,000; endowment, $137,046; pupils, 1867-8, 138.

State Agricultural and Mechanical Arts College, New Brunswick, N. J.—Acres, scrip, 210,000; pupils 1867-3, 26; cost of tuition per annum, $83, and $15. Course of study—Civil engineering and mechanics' chemistry, agriculture, architecture, natural history, astronomy and navigation, French and German.

Agricultural and Mechanical College, Lexington, Ky.—Acres, scrip, 330,000; endowment, $164,960; pupils 1967-8 190; cost of tuition per annum, 300 free, others $30. Course of study—English, French, Spanish, German, Italian; other departments as above not commenced, no detril given.

State Agricultural College, Manhattan, Kansas. Acres, scrip, 90,000; endowment, $500,000. Free except melodeon and piano; board $4. Course of study—Classics, agriculture, military tactics, mechanics.

State Industrial University, Ill.—Acres, scrip, 470,000; cost of tuition per annum $20. Course of study—Agriculture and science, as above.

"Circular of the Illinois Industrial University." We learn from this Circular that this Institute opened its doors for the first annual course of Agricultural Lectures and Discussions January 12th, to continue four days each, of two weeks. To this course *no charge* is made; the course is free. It will be one of the highest interest. The Institution is prosperous.

Agricultural, Mining and Mechanical Arts College, Oakland, Cal.—Acres, scrip, 150,000. Not commenced, no detail given.

IN FRANCE a steam carriage for towing boats and barges in rivers and on canals has been invented. It was tried a few days back on the River Oise' and was found to answer perfectly. Running on the towing paths, it makes both ascents and decents, and turns as easily as horses do.

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market. an see that their trade mark,

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. This three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer on the wharf or landing places.

[Corrected Weekly, by Editor Farmer.]

San Francisco, January 22.

Grain, &c

The Grain Market this week must surely convince our grain growers that *low rates* must now rule for a long time to come.

The *low rates* in Europe, and the *low rates* in New York, and in every market abroad, should most assuredly be satisfactory evidence that the *day of high rates* is past for this State. When we say the day of high rates is past, we mean 2c. 2½c. and 3c., for these rates have been *fictitious*. Often it was the result of speculation, and many that paid these rates were *loosers*, as have been those who, the present year, have paid 1,85 to $2,00 per cental, as the returns of shipments now coming on will fully prove, and we mistake very much, if we do not see and hear of *several* who will wish they had never been *let into the ring of Speculators*.

Grain growing in California is now assuming a *gigantic attitude*, and it will be carried on in a more systematic and strictly business way than ever before. The growing of Wheat particularly, will be made a matter of dollars and cents, and the business will be conducted in the same manner as other branches of business. It will be *figured down to a dot*,—men will engage in Grain growing systematically and will see *how low it can be raised*, and go to work to grow wheat, and put it on the market when grown, and sell it at the then ruling rates. Their plan will be *to sell*, get the best rates they can at *harvest*, and pocket the profits, whatever they may be.

There can be no question but this will be the case, for California is bound to be the *Granary of the World*. California is bound to be the Baltic and the Bosphorus of the World, and when the Central Pacific Rail Road shall be completed, and the great "Humbolt" country is opened up with its millions of acres of wheat lands, and these are added to the sixty millions of *California lands not yet cultivated*, wheat growing will then be a business that no man of the present year can dream of, for the Steam Plow and the Steam Power to harvest and clean our grain, will show that California Wheat can be raised and placed ready for market, not only at the low price of 25c. per bushel, as stated by the well known Amasa Walker of Massachusetts, but it can and will be grown at a cost of *one bit per bushel*, as the *actual* cost of plowing and planting and harvesting the same, and added to this the cost of sacks, interest on land, etc, *twenty five cents*, will be the outside cost of raising wheat in California, by those who thoroughly understand the raising of wheat on a large scale, as the business will be conducted in future years for shipping purposes.

Retail Prices in the Fruit Market.

During the past week we have had little or nothing in our Fruit department to tempt the appetite beyond a few rosy cheeked Apples, and is has been difficult to make up a respectable dessert to place before our friends. Well may strangers who are continually arriving say how is this? The Garden of the World not producing a greater variety of fruit, and not having a better supply the year throughout. Our eastern folks will soon outstrip our Orchardists, unless a little more caution is taken in the selection of the best varieties of Fruits.

Retail Prices in the Vegetable Market.

Vegetables alone seem to be improved with the wet season, sometimes not in appearances, but in quality. During the last few days almost every variety of salad and vegetables has become more crisp and palatable, more particularly Celery and Cabages, the former being the best of salads, and the latter one of the most useful and favorite vegetables, and in this climate a few hours very materially changes the nature of a vegetable.

Fish

Our Fish market has been but poorly supplied with Fish of first-class quality during the past week. It is true Herrings have been pretty abundant, so also Smelts. Sea Bass and Lobsters none, which of course, is something strange at this period of the year. Sea Bass we always have considered the staple variety during the winter months, but this season matters have changed. Salmon is a trifle lower in price, in consequence of their being a better supply.

Poultry and Game.

The late rainy weather has had a wonderful effect on the wholesale prices in this department. We presume it is in consequence of the roads being overflooded, consequently communication with our markets is in a great measure intercepted. There is a good chance now for our Ranchmen to make a few extra dollars.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. A. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

Jan. 14—MONTANA, Capt. A. West, connecting with RISING STAR, Capt King.

Jan. 22—CONSTITUTION, Capt. Wm. H. Hudson, connecting with HENRY CHAUNCEY, Capt. Conner.

Jan. 30—GOLDEN CITY, Capt. Wm. F. Lapidge, connecting with ARIZONA, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—If desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock, noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se4 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings. Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, until further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger trains will leave Sacramento at 6:30 A. M. Colfax at 9:50 A. M., Reno at 4:14 P. M., Winnemucca at at 3:20 A. M., and arrives at Argenti at 8:25 A. M.

Going West.

Passenger train leaves Argenti at 10:10 A. M., Winnemucca at 3:20 P. M., Reno at 3:40 A. M., Colfax at 9:50 A. M., arriving at Sacramento at 1 P. M.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6:30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermit, Silver City, Owyhee, and all points n Idaho Territory.

And at Argenti with Overland Stages for Austin, Salt Lake City, and the Atlantic States.

C. CROCKER,
General Superintendent

GOLDEN EAGLE HOTEL.

Corner Seventh and K streets, SACRAMENTO.

THIS HOTEL IS OFFERED TO THE PUBLIC AS a "Home for Families," and for the Traveler.

The Proprietor has spared neither expense or care to make his Hotel one that shall always be acceptable and pleasant to all that may favor him with a call.

With ample accommodations by means of spacious Suites of Rooms for Families, and by recent enlarged accommodations, he is confident that visitors will always be satisfied and feel at Home.

Particular attention will always be paid to the comfortableness of the apartments, by well ventilated Rooms, clean Beds and Bedding, and strict attention to the wants of Boarders; while the TABLES will be provided with the very best the season affords.

Carriages, to and from the Hotel to the Railroad Cars and Steamers, at all times. Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR

THE NAPA HOTEL,

CORNER FIRST AND MAIN STREETS,

Napa City.

THIS HOTEL HAS BEEN MUCH ENLARGED d improved, and can now offer superior advantages the Traveller or Permanent Boarder who desires a omfortable, quiet, cleanly home.

Particular pains have been taken by the Proprietor to make this Hotel airy and healthy, so that his patrons may enjoy themselves.

Travelers to the Geysers, Calistoga, and the beautiful country around, will find at this Hotel every facility, by reason of its convenience to the railway cars, stages, etc, while Horses, Carriages, etc., are at command at a moment's notice.

☞ Public patronage respectfully solicited.

18 JOHN HOGAN, Proprietor.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine 'Dr. McLANE'S Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuges now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take neither Vermifuge nor Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG, PA.,

DR. M'LANE'S CELEBRATED LIVER PILLS,

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER or BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the West and South, where, in the majority of cases, the patient is not within the reach of a regular physican, requires that some remedy should be provided, that would not in the least impair the constitution, and yet be safe and effectual. That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It has been our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced. That they have been so tested, and that the result has been in every respect favorable, we call thousands to witness who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS are not held forth or recommended, (like most of the popular medicines of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected with a deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is designed to perform, and on the regular execution of which depends not only the general health of the body but the power of the Stomach, Bowels, Brain, and the whole Nervous System, shows its vast and vital importance to human health. When the Liver is seriously diseased, it in fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has so close connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful character that it misleads more physicians, even of great eminence, than any other vital organ. The intimate connection which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal atrocity or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long been convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Menses, Deranged State of the Bowels, Irritable and Vindictive feelings and Passions from trifling and inadequate causes of which we afterwards feel ashamed; last, though not least, more than three-fourths of the diseases enumerated under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increasing on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a sinfulness of having left undone something which ought to have been done. A slight dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled; his feet are cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercises would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts everything. Several of the above symptoms attend the disease; but cases have occurred when few of them existed yet examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when taken with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not purge two or three times by next morning, take one or two more; but a slight breakfast should invariably follow their use. The Liver Pills may be used where purging simply is necessary. As an anti-bilious purgative they are inferior to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangements of the Stomach

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than those consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an adult, the cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient is an infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some other cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous train of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too frequently happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids defiance to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked. Even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled without loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-handed, with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure or livid circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or foul tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently streaked with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by hiccough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPENDED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual, providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being the cause. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water on morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten years a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have been forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows:—McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIETORS. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the name stamped on the lid of the box, in red wax.

Prepared only by

FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLane's Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

REMARKS ON HYBRIDIZATION.

BY HON. MARSHALL P. WILDER, PRESIDENT OF AMERICAN POMOLOGICAL SOCIETY.

Impressed by the remark of Dr. Lindley, quoted in my article on hybridization, may we not say, how vast and grand is the domain of nature? The very thought of it is overwhelming; and when we consider the undefined and possible powers of the human mind, who shall set bounds to what can be accomplished by the hand of man in the cross-fertilization and improvement of plants?

Starting from a standpoint that all organized beings are resolvable to a few simple forms, it is impossible, with our present state of knowledge or of facts, to define the precise limits where an expression of nature begins or ends, so that what naturalists have called genera and species are but dictionary terms, which enables us to classify them in some convenient manner for the study and invention of the human mind. Botanists have so ingeniously arranged species and genera as to furnish an almost entire series of forms, from the original to its most outward semblance and have, not unfrequently attempted to supply a lost link which science had failed to discover. Thus we endeavor to give a description of those variations in the plant world, which are so constantly coming to our notice under cultivation or *domestication.*

Plants which seem, in a sexual sense, to be repugnant to each other, may be brought closer by changing effects of culture, produced by artificial soils, temperature and moisture; so much so, as to alter the size, structure, seed, and character of the plant. These deviations sometimes appear like distinct and new creations; and, although they may sometimes be traced back to a common type, they are evidences of what can be done by the hand of man.

Although not in connection with hybridization, we may note, in support of what I have written, that the effects of this culture are seen in the innumerable new plants derived from sports—being no more or less than the results of unnatural or uncongenial culture. Thus we have other sports of plants made into varieties by "fixing the graft"—that is, grafting off the sporting branches, and thus perpetuating it.

And, just here, let me say, that these sports or aberrations, when grafted off, become less liable to sport again than the flowers of the mother plant. In those sports taken from the Camellia Mrs. Abby Wilder, I have two self colored sports which have, by this process of grafting, become true and permanent varieties. Although the flowers of the mother plant are white, with a pink stripe, one of the sports thus taken off (Grace Sherwin Wilder), is a deep blush, several shades darker than Camellia Lady Hume; the other (Abbie Tryphosa Wilder) is of a clear pure rose color, and both are as perfect in form as the old Double white, and as true and persistent in color, not having varied at all during a period of more than ten years.

And what may we not expect, in the way of aberration, in structure, color, etc. Who would have thought that, from the single Scarlet Pelargonium, we should have derived the new double d. Gloire de Nancy? Or that, after twenty years' trial, the Pelargonium hederæfolium at last consented to be impregnated with P. zonale?

From such incidents, and there are many, it may not be deemed rash or visionary to have tried the Gloriosa superba on the Lilium lancifolium.

Home Correspondence.

FROM A VALUED CORRESPONDENT.

From the Silver Country.

White Pine, Feb., 1st 1869.

Col Warren, Dear Sir:—In Vol xxxi, No 1, of the Farmer, you ask your friends and patrons to" review this Number One of your Sixteenth years labor, and *tell* you if you have faltered in your efforts" etc. As I am too far away to give an oral response to your very appropriate request, permit me to put my thoughts and opinions on paper, the Farmer requires no puffing," at this present day, to reccommend it to an enlightened public. That it long since attained a first class reputation among the Journals of the Pacific Coast, and as an Agricultural paper is second to none published in the older states, is a fact too well established to need any flattering encomiums at the hands of its patrons or correspondents, I trust many will express the pleasure and the profit they have derived from its columns, and say "well done" if that were necessary to its encouragement, and farther progress, I well remember it, as it was fifteen years ago, when, neither Editor, nor reader," hardly dared hope for it the long life it has lived."

Is there any one Journal on the Pacific Coast that can boast of having, neither changed hands, nor Editors, in all these years? I think not! And the patrons of to day will rejoice to know that the trials and difficulties incident to a Pioneer Journal, have passed away and remembered only as a troubled dream. The Farmer never stood so high, or enjoyed a more enviable position than now Though mainly devoted to the Agricultural interests of California, there is scarcely a class of individuals that *may* not be benefited by it. Its Literary Department embraces choice selections from the old and modern writers, and many really good things from original correspondents. His numerous subscribers will congratulate Col. Warren that his new volume is commenced under such favorable auspices and wish for his paper on its sweet sixteenth birth day, many years of prosperity.

I am a little surprised to see that the Farmer speaks of this great Eldorado! as a *cold sterile region* void of any comforts or pleasures. That was a good hit though, that you gave the Editor of the San Jose Mercury. It is true the rooms are a little *crowded* here and *one* bed is made to hold a dozen, but for creature comforts there is no lack, Talk about the cold weather,! why its perfectly splendid, now if you were here, we could treat you to a capital sleigh ride, or you might go on a coasting frolic with boys and girls of larger growth. Think of that, when you are enveloped in a cloud of agueish fog, or shaking in your boots, with fear. Earthquakes; we have no very extensive Libraries as yet, but Newspapers and Magazines without stint. The Bay-papers and the Sac. Union, are liberally patronized, read, and reread until worn out. One of the most interesting features in the Union, is the letters of "Ridinghood." Dear little Ridinghood, hope she will excuse the word *dear* but it just slipped from the nib of my pen before I knew it. Strangers as we are, I admire her writings, and through them, have ventured to admire her. I imagine her to be one of those dear domestic bodies, whom I would like to know better. One, whom I would like to draw my chair close beside, and have a long social chat with; about things past, present and to come, we would not talk of White Pine," "chlorides," "sulphurets," "dips,"," "drifts," or any of that *nonsense*, of which she complains of hearing too much already, and with which one here soon becomes satiated. But I imagine one would have to live as secluded from the world, as did "Undine" with the same old anchorite for protection, on a lonely Isle far away in mid Ocean, not to hear of White Pine. The men on change, talk it, the women in the parlors, talk it, The boys in the street talk it, and are forever "loading for." White Pine." The little urchins on the carpet are piling up freight, and filling their miniature wagons with all sorts of rubbish, and make believe passengers, and shouting "hurrah for White Pine," If the little go cart happens to topple over, with excess of baggage or passengers, one will exclaim "There I told you so, if we played going to White Pine," And so it will be, I presume, for years to come. The great Mecca of the western world!

Yes, there is something in a name" and the charming *nome de plume* behind which she hides her real name, so gracefully and so persistently makes us in spite of our modesty wish to know more of the little "Ridinghood," whose letters, help to while away many an hour which might be spent less profitably. They have lighted up the old cabins, and like the lamp of the Genii irradiates all upon which their beams fall, making every thing look beautiful and golden. Her pen so wonderfully adapted to "descriptive pelces," gave such a glowing account of the christmas carol, of the ten thousand young bugleists, tooting their horns, each on a different key, and the serenading of old John, until he was obliged to shut up shop, that I'm half inclined to allude (incidentally) to the *horns* indulged in, on that day in Treasure City. But after due deliberation, have concluded to defer a description of that part of our holiday festivities. In one of her little sketches she says she "wishes some of those White Pine millionaires were obliged to give her *just one foot* in some of their rich mines. Tell her for me please, that there is many a lone miner away up here in this great Babel, who would, with the greatest pleasure give her *two feet*-provided she would not object to a few small incumbrances, as part and parcel thereof. For instance two toil hardened hands, a warm honest heart, an adobe cabin eight by ten, a pine table, two camp stools, and a dutch oven. The etceteras, are not many. But stop you may say "you are modest with a vengance," and" going into particulars," might be left for that "cozy chat" you just now spoke of, well we often get lonely, and like to draw kindred spirits around us in imagination, if not in reality, and so I hope she and you will pardon the presumption of,

A Prospector.

Eastern Correspondence.

FLAX CULTURE.

Attention is called to the following letter received by a manufacturer of this city, which we publish for general information.

Webster, Mass., Dec. 30, 1868.

To ——

Dear Sir: Yours of the 12th inst came to hand to day.

I enclose samples of American Flax grown in New York State which is worth 21½ cents per lb. I do not know enough about your soil and climate but judge from reports of the growth of wheat, that it must be well adapted to growing flax.—Both of these influence the worth of the fibre, which should be long and strong, and at the same time soft, to spin well.

The best brake is made in New York City, by Sanford and Malloy. The rentching knives are made by Eddy, Dyer & Co., Greenwich, N. Y.—

No better method of getting out flax has ever been found, than that used in New York and Canada, where they use the above mentioned brake and rentching knives. The fibre when rentched, should be pressed in bundles of from 60 to 80 lbs and sacked for shipment.

Please advise me if proper inducements and what, would be held out to a person acquainted with flax fibre. to go to you State, to engage in the business, and if the climate is moist enough to mature the fibre? I fear it is too dry, and at the same time, too fine for maturing the seed.

Please say how far from your city it is raised, and if you have streams on which to place mills for renching.

I will get from New York a pamphlet treating on the methods of raising and curing flax, and send to you.

Will you please give me the price of coal in your city, and the prospect, in your judgment, for using the fibre there. In the neighborhood where the flax is raised, is there a good command of help as this will be necessary in time of weeding, as well as of pulling and curing the flax.

I have written to Mr. Perkins, of the firm of Perkins & Flint, in regard to flax, he having been engaged in buying wool for my brothers and thought it might be an object to engage in flax also.

Please advise me on above at an early day and oblige, yours very truly, H. H. S.

Reply.

With the letter came a sample of superior Flax, grown in New York, and which can be seen at our Rooms as a sample of what constitutes *good flax!*

In answer to the inquiries of the writer, we will say: There will undoubtedly be encouragement for who are skilled in this work, and as to our climate, we are *moist* enough (just now), and we know we can mature as fine seed here as in any part of the World.

Flax can be raised in all our valleys and plains, and we have *water power* and steam power enough to run a thousand manufactories, and all the needed streams of water for rotting or renching the fibre.

Coal can be had for manufacturing purposes, from $6 to 10 per ton (California), and foreign coals from 16 to $20.

There can always be had plenty of labor the "Johns"—Chinese labor—at low rates. They are employed chiefly in the manufactories and on our farms.

We trust this answer will be satisfactory.—Ed. F.]

Ole Bull will give his third Grand Concert at Steinway Hall, on Tuesday evening next, Jan 12th when he will be assisted by Miss, J. W. Barton, Mr. Gustavus F. Hall, and Mr. James H. Wilson. The renowned violinist, will undoubtedly attract his usual brilliant audience, and win his accustomed honors of enthusiatic encores.

GOOD GARDENERS.

Of course every one understands that he who knows his business is the cheapest man to employ; yet when we look around us and see "gardening" *done*, we often wonder if this good principle is ever acted on in this branch of the public waste. We suppose the reason is that the great public know nothing whatever of gardening practically; hence, a man is a man, and it would seem that the only thing to be done in making a first-class selection, is to higgle about the wages.

We are very sorry for the sake of gardening that something cannot be done to distinguish the really gardeners from the bad ones. As it is at present, too many good gardeners feel that the chance of any man, irrespective of his abilities, getting a situation, is as good as another that rather than compete with brazen-face impudence they leave the profession for other fields. Hence it becomes exceedingly difficult to find good gardeners for good places at the time they are needed; and many gentlemen really capable of appreciating a good one, have to take so many poor ones, that they tire of gardening as a to troublesome luxury,

We happened to see a remarkable contrast recently between two gardeners in different places lifting large trees. It so happened that in both instances the ground had been filled up several feet, and the trees had to be elevated to the new surface. There was not much difference in the size of the trees,—about 3 or 4 feet in circumference, and 25 to 30 feet high.

In one case the "gardener" and six men, and had accomplished a great deal of grubbing about the roots. He had erected a tall triangle of very heavy timbers, expensively bolted together for the occasion, and with block and tackle had all hands tugging away at the rope to see "if she would'nt stir yet." The other gardener had but two men. He had dug a circle all round the tree three feet below the surface, and wide enough to work well. By the aid of a digging fork he very soon had the tree undermined and balanced on a slender column of earth. By the aid of a rope fast to the top of the tree, the latter with its ball of roots was easily drawn over to one side. A little earth was then thrown under, and then drawn back, so as to lean over on the contrary side, then more earth thrown under, and the tree drawn back again. This zigzag mode of leaning over, and gradually filling under was continued until the tree was *self-raised*, as it were, to the surface. In less than one day the job was finished, costing, we are quite sure, less than $5. When we saw the other the day was far spent, and it had not yet "riz." Our calculation was that some thirty dollars would be spent before the job was finished, with slim chances of life afterwards.

We have no doubt the same relative capacity for business is exemplified in all the gardening of both these men. The one is better worth $2000 a year than the other is worth $200, yet we believe both these men have about the same wages The good one is more appreciated than the latter would be. If the place were vacant, the latter would have as good a chance for it at any other one.

It is clear the only remedy for this state of things, is for gentlemen to inform themselves a little more as to what constitutes a good gardner. They already know that the best is by all odds the cheapest. When they are able to distinguish the genuide from the counterfeit, a great step towards true gardening will be made.—*Gardeners Monthly.*

THE GREAT CITY.

The growth of Chicago during the past year has been remarkable. 7,202 buildings, worth $25,000,000, have been or are nearly completed. Of these, 35 are churches, costing $1,700,000; 20 are school houses, costing $300.000; 1,000 are stores, worth $13,000,000; and 6,500 are residences valued at $9,000,000. Thirty miles of water pipe have been put down, making a total of 200 miles in the city. Twenty-one miles of Nicolson pavement have been laid. There were 458 divorce suits commenced during the year—by husbands, 176; by wives, 282. The number of divorces granted was 345. There were 442 fires during the year, involving a loss of $3,086,436, covered by an insurance of $2,520,384; of the loss, $2.275, 480 occurred in January—mostly in the great fire of the 28th, and the burning of Farwell Hall.

Tunnel Under the Chicago River.—We notice that "The Washington street Tunnel" under the Chicago river, connecting the south and west divisions of the city by a solid and permanent roadway, has just been completed, and was opened to the public New Year's Day. The contract price was $328,500. The length of the work is about 1,605 feet; of the retaining walls of the open approach on the west side about 320 feet, and 265 feet on the east side. The length of the main archway, or covered way, is 936 feet. There are three archways leading through the tunnel; one is for foot passengers, and two for teams and horses.

Alex S. Macrae's Liverpool Weekly Produce Statement, Wednesday, 6th January, 1869

TRANSATLANTIC COMMERCIAL CHARGES.

It is to be hoped that the economical example set by the Post-office, Atlantic cable, steam ships, sailing vessel and other authorities, in submitting to an honest competition and reduction of rates, will not be lost upon the business men, transatlantically engaged between the United States and Great Britain; and that the year 1869 will sensibly increase that new determined spirit, to reciprocate *more* commercial transactions, at a *much* less cost.

The charge of 4 and 5 per cent commission, with sometimes a brokerage added of ½ or 1 per cent, *on produce that can be consigned by one steamer and remitted for by the next*, is simply iniquitous, and if to that a guarantee commision is added also, must be fatal to most operations. Besides there is 2½ per cent discount, which discount however should obviate any guarantee, inasmuch as *all produce*, without any exception, is sold, *"Cash in 14 days, before delivery if required."* This clause is printed on *every* contract.

Again, 4 and 5 per cent for the execution of orders on either side is equally excessive, where cash is given or security is in hand, for the redemption of that order.

These enormous rates, with necessary concomitant charges, in plain parlance, *kill* business and cannot be endured; being a profit in themselves for which the most enterprising men, would be glad to contract and dispose of all their operations.

The States of Europe are each reciprocating business for a charge of 2 per cent, and they possess not one tithe of the facilities that America and England possess! With almost daily steamers and posts—with an hourly cable and language the same—transactions should, and must be without limit; and to insure and assist that desired state of things, economy *must* take the place of what one day or other, will look very like extortion!

ALEX. S. MACRAE, OIL AND PRODUCE BROKER, LIVERPOOL, ENGLAND.

A Grand Musical Affair.—Gilmore proposes to give next June in a grand pavilion, erected upon Boston common, a three day festival, in which one thousand instrumentalists and twenty thousand singers will take part, drawing the performers and the audiences from all parts of the United States and Canada, with cheap excursion trains, arranged from Upper Canada to extreme Texas border.

American Artists Abroad.—The Pecuniary success of many of the American artists at Florence is so considerable, that they are able to furnish themselves with the best accomodations. Mr. Ball has built a fine large house and studio in the plesant new quarter outside the Roman gate; and Mr. Powers has also, a handsome cottage in the same neighborhood.

Jerome Thompson is now engaged upon a large picture; the subject is taken from Longfellow's poem of "Hiawatha" and the scenery of Minnesota.

Essex, Mass., has a little girl three years old, who plays over two hundred pieces on the piano. She ought to be in the back yard making mud-pies.

Agriculture.

SILK CNLTURE.

SAN GABRIEL, Dec. 19th, 1868.

E. N. STRODT, ESQ.—Dear Sir: You must excuse my long delay in answering your favor dated November 28th, as I have been absent from home part of the time. As some of your inquiries are answered in my article entitled "Silk Culture," in Los Angelos county, I send you a copy of the same.

I see in the Times some comments on my statements concerning the superiority of the Southern counties for Silk Culture, in which the writer seems to infer that the Southern part of the State cannot raise the Morus Alba or the Morus Multicaulis. This is a mistake as both varieties are growing here in great perfection. In what I stated concerning my experiments with the different varieties of mulberry, I would be understood as saying, that the Morus Multicaulis is much easier grown from cuttings, which all writers acknowledge, and though I failed in raising the Morus Alba from seed, other parties met with very fair success. Mr. Garey, of Los Angelos, raised from seed the past season, 50,000 trees, besides the few raised from cuttings made a remarkable growth for that variety. But it should be remembered, that we have experienced the worst possible season all over the State for the planting of cuttings However, the Times is pretty near the truth when expressing the opinion that different soils may be adapted to different varieties, and that the Morus Multicaulis grown at the South may produce as good silk as the Morus Alba grown at the North, soil and climate would have been more correct.

The Morus Multicaulis has a more porous leaf than other varieties, and so in wet climates, owing to the absorbtion of moisture, is not considered as good feed for the worms, but surely this can be no objection in a climate free from rain for six months in the year. My own opinion is that at the North, the coast counties owing to the prevalence of fog, is better adopted to the Morus Alba or Morus Maretta Mulberry, but it should be generally understood that we have here none, or very little of the coast fog. I should come to the conclusion that the northern counties were not adapted to the Morus Multicaulis, were it not for the statement of I. N. Hoag of Sacramento who says that in his vicinity good cocoons have been mostly from worms fed entirely on this variety of Mulberry.

Our preference for the Morus Multicaulis is owing to the greater certainty of its growth from cuttings, its very quick growth and speedy renewal of its foliage the first season, which enables us to feed five times as many worms as we could feed from any other variety. This is a greater consideration to persons of small means commencing business. From this variety we can gather the leaves seven or eight times' it appearing to grow all the faster for the operation, whilst from the Morus Alba twice gathering its leaves, seems about as much as it will stand. However, I would discourage none from planting the other varieties if they are in circumstances to wait a year longer as I know they are excellent for the worms, though they need not expect a large amount of food from them for the worms for the first season, and those planting the Morus Multicaulis, would do well to plant some of the other kinds.

The Times quotes in opposition to my statements the experiments of two eminent Silk Culturists, L. Prevost, the Pioneer, and W. M. Haynie of Sacramento. Now I wish it distinctly understood that none bow with greater defference to the revered name *Louis Prevost*, and that it would be to me the cause of the deepest regret if my statements should prove at variance with the experience or expressed opinions of that eminent Pioneer in Silk Culture. But I am confident there is no real difference in our statements, if the difference of soil and climate are taken into consideration, and that none would be better pleased than the Pioneer in Silk Culture if we of the Southern counties should demonstrate, that in our section of the country, by planting the Morus Multicaulis we can produce good Silk, and at the same time, show results the first season which would take several years to accomplish with any other variety of Mulberry. My cocoons exhibited at the different fairs attracted much attention for their large size and excellent quality, as did others sent from this county, that were fed on the Morus Multicaulis.

Whilst claiming for Los Agelos county some advantages, I would not be understood as underrating other sections of the State. Far from it, as I know all parts of it are good for Silk Culture, and we shall want it all for the Mulberry trees that are to be planted all over our great Silk State. I have no doubt but that the Sacramento Valley, with its fine soil and climate will become in time, one vast Mulberry plantation, and as with us, the land not adapted to the Mulberry may be considered the exception, and the climate unsurpassed. I expect to see it the leading interest of the county and also of the State. Though not engaged extensively in the business this season, I am making preparations to engage in it on a large scale the ensuing year, having engaged for the purpose of a cocoonary, a large adobe building close by; measuring 125 feet in length, by 25 feet in width and some 15 feet in height, this will afford room for 2,000,000 worms. You enquire concerning the profits of silk culture; in reply I would state, an acre planted with mulberry trees when two years of age, planted nursery form, will produce about 60,000 lb of leaves, for our purpose say 42,000 lbs; now as 20 lbs of leaves will make a pound of cocoons, this would give 2,000 lbs of cocoons, which at the market price of one dollar and a half a pound, would amount to $3,000; now for the cost, by adopting Mr. Prevosts method of feeding with branches, one hand can attend to one hundred thousand worms and it takes 300 cocoons to make a pound, 600,000 worms would make 2,000 lbs of cocoons and would require six men for one month and a half, say $40 per month; for board and wages, this comes to $60 dollars for six men, would amount to $360, which deducted from $3,000 leaves the nett profit per acre $2,640, by employing chinese the cost would be much less As I have stated in the article I send you, by turning the best proportion of the cocoons into eggs, it is my opinion that the above, if not a greater amount of profit may be realized the first year; but in order to maintain our present high reputation for silk worm eggs, we must be careful as I have said, not to attempt to feed more worms than we have room for, and to be careful to preserve none but good cocoons for this purpose, besides which we must provide an abundance of food for the worms; better have a few thousand trees to spare than fall short one hundred. Hoping to her from you soon, I subscribe myself

Respectfully yours,
Albert Brewster.

AGRICULTURAL ITEMS.

Georgia and Tennessee, it is said, will have 10,000 000 bushels of corn for export this season.

A car has left Boston laden with freight for a firm in Salt Lake City, It will go through without breaking bulk a distance of 2'398 miles,

The latest fancy potato story is told of a man in Hubbardton, Vt, who bought one eye of a No, 4 potato for $20, and raised from it this season potatoes that he sold for $750, and has three left.—Eight were bought by one man for $400.

The Rural World says that the very best success with land that we have ever seen, was with low swampy soil. Worthless apparently, only to grow coarse grasses and weeds. It was ditched, plowed and thoroughly cultivated, and a wealth was developed which made it lasting and productive almost beyond account. There are many such swamps.

The largest kitchen in the world is that of Liebig's Extract of Meat Co's. establishment at Fray Beneos, on the River Uraguay South America. The building covers an area of 20,000 square feet. In one hall there are 4 meat-cutters, which can dispose of 200 bullocks each per hour. There are 12 "Digerators," in which the meat is boiled by steam. They can hold altogether 144,000 lbs. of beef. About 80 oxen per hour are slaughtered for this immense establishment.

USE FOR COAL ASHES.—A careful farmer in Ohio writes, that he has used coal-ashes for twenty years as a compost for the droppings in his poultry yard. White and red ashes contain about four per cent. of soluble alumina. By sifting dry coal-ashes every morning under his roosts, he obtains at the end of the year, a ton or more of material as rich as guano. The coal ash should be kept perfectly dry, In that condition it is as good as gypsum as an absorbent.

WHEAT CLUBS.—The Dixie Farmer states that in many localities in the South, farmers are forming what they style, "Wheat Clubs," in which each member pays a certain amount of money, to be appropriated as a premium for the best acre of wheat, harvested in 1869, and each member pledges himself to compete for the premium. The idea is a capital one, and we hope to see it extensively adopted.

FENCE CORNERS.—The Canada Farmer hopes that an implement will be invented specially adapted to the cultivation of the land up to the fences, as it is there where the weeds do most abound and are generally unmolested. We suppose that the gang-plow is the implement needed, and any portion of which it cannot reach, the spade or grubbing hoe would answer effectually.

We know a first class farmer who took a great pride in his profession, who cultivated his fence corners, or rather land that the plow would not reach along the fences, in grass, and he assures us that the product met all expenses, and his fields suffered very little from weeds, We have found that good farmers have a way of getting at the weeds along their fences or anywhere else.—*Germantown Telegraph.*

DEATH OF C. N. BEMENT.

Caleb N. Bement, widely known as a writer on agricultural topics, and especially of late years on subjects connected with poultry raising, died at his residence in Poughkeepsie, Dec. 22d, in the 78th year of his age. Hereafter we shall give a fuller notice of his life and writings, and may now say that after having battled during a long life with a greater proportion of ill-fortune than belongs to the lot of most men, Mr. B. had preserved in the evening of his years; such a degree of interest in active affairs and of equanamity in temper, that few would have realized his age or suspected the difficulties through which he had passed.—*Country Gentleman.*

ANECDOTE OF FREDERICK THE GREAT.—A sergeant of the Lifeguards, very vain, but possessed of much bravery, wore a watch chain, to which he had fastened a musket ball, being too poor to buy a watch. The King, hearing of it, wished to expose him to ridicule. Stepping up to the soldier, he said: "Sergeant, you must have been economical, for I see you wear a watch. Mine tells me is is five o'clock; how much is yours?" The soldier, guessing the intention of the King, but nothing daunted, immediately drew forth the ball, saying: "Your Majesty, my watch is neither five nor six o'clock, but tells me, as I look at it, that I must be ever ready to die for your Majesty." "Here, my friend," added the King much moved, "take this, to know the precise hour also in which to die for me;" at the same time giving him his own watch studded with jewels.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, by reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

30-24 **STOCKTON, SAN JOAQUIN COUNTY.**

Miscellaneous.

TRUE'S

IMPROVED

POTATO PLANTER

This is, undoubtedly, one of the most valuable [machines, adapted to Agricultural purposes] ever introduced.

It Saves the Labor of Men in Planting Time

Makes its own furrow, cuts the potato in such slices as the farmer may prefer; drops these pieces the most perfect regularity, and covers them perfe and does all this as fast as a horse can walk over ground that can be plowed

No intelligent farmer can fail to see that an ment with which one man can, with the aid of a plant six acres of potatos in a day, is of inestim value; because the days in which PLANTING can erly be done are very few, while he has all SPR and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER fro other machines. It affords its aid "in the very of time," and gives leisure to its owner for attend to his other spring work, which would otherwise overwork him or be left undone.

The undersigned have the sale of this Grand Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Im ment, and a good Mechanic can make a fortune w

Particulars and Catalogues can be had at our o

Horticulture.

THE PRESERVATION OF WINE.

Vine culture, and the manufacture of native wines, have assumed very considerable proportions in the United States within ten years past. From St. Louis and Cincinnatti the noble science of the grape has spread far beyond the borders of Missouri and Ohio, nestled among the hills of Pennsylvania; scaled the rocky borders of the Hudson, and garlanded with vineyards the lovely shores of our Northern lakes in New York. It is now finding new and beautiful homes in Virginia, Georgia, and the Carolinas. Illinois, too, has stepped into the arena, and sends us her quota of excellent Catawba and Isabella, along with her fine cider, perry and beer.

California, since ever we have heard of her, has produced delicious wine grapes, and the old Spanish missions were but outposts; in the culture that they originated, to an army of vine-growers, who are even now, occupying every "corner of vantage" on the slopes that look Southward over the margin of the Pacific, and wreathing the sunny mountain sides with clusters of golden and purple fruit that Italy, in all her luxuriance, cannot surpass. "California wines" are highly esteemed as well as widely familiar in all our seaboard cities, and the fuelletonists of Paris, who are finished *gurmets* have not disdained to speak of them with favor.

Yoder such auspices, our cultivators are even entertaining the hope that, ere long, they may be enabled to reciprocate the commercial favors that the Eastern Continent has so long bestowed upon us, in their vintage, by sending the American "pure juice of the grape" thither in quantity. The novelty of the thing has hitherto been the chief reliance of the limited shipments of our wines that have been sent abroad, but they have been so well received as to encourage growers on this side to believe that could they protect their product from damages by the sea voyage, they could find a ready market for whole cargoes of it, not only in Great Brittain and the rest of Northern Europe, but even in some wine-growing countries farther South. The very same consideration has impeded the export of the more delicate French, German and Italian wines in their purity to distant regions, and the great problem with traders everywhere has been how to make their wines pass the Ocean in perfect condition.

The claim of a French experimenter, M. Pastuer, to have solved this problem by scalding the wine, is so emphatically sustained by the foreign scientific papers that we feel justified in mentioning it to our readers.

The French Minister designated a committee to examine the results of Pasteur's experiments, not only in his own labratory, but in the establishments of the various wine-growers and venders, and finally in reference to a supply placed on board one of the national vessels. The committee were so highly satisfied with the result that they formally decided to make three grand official test experiments with wine scalded in their presence, according to Pasteur's method. These trials consist in sending one lot on a national ship to circumnavigate the Globe; another to the coast of Africa, and a third lot to Cochin China. The wines will thus be subjected to voyages of various lengths in many varieties of climate, and, should they pass the ordeal, the improvement cannot fail to be generally and gratefully accepted. The advantage to commerce and to the health of thousands can hardly be overestimated, while those who believe that the general introduction of pure wine as a beverage would be the best practical cure for the abuse of ardent spirits would rejoice at it, especially upon reflection that the culture thus stimulated was helping to beautify and enrich their country.

It is stated that with the proper apparatus, simple enough in itself, the great and the small proprietor alike may, for the expense of four cents a hectoliter, make their wines fit to be carried in prime condition to any part of the world.

We shall note the further discussion of this excellent improvement and give our readers the benefit of the knowledge that it has been adopted or rejected. While awaiting the final decision, some enterprising American viniculturist will, no doubt take the hint and devise a plan of his own.

At this moment we need all our resources, and we do not deem it impossible that a year, not distant on the wheel of time, may find the ships that bear our corn in such abundrat cargoes to distant lands, varying their rich burthen with American "oil and wine" as perfect as the best that have been wafted for many ages over the waters of the Arabian Gulf and along the Tyrrhene Sea.—*N. Y. Mercantile Journal.*

THE SIXTH SENSE.

Bouchut argues admirably in his pamphlet on "The Soul and the Vital Sense," in favor of a sixth or *inner* sense, as distinguished from the five *outer* senses; and Leibnitz, Descartes and Bossuet among the philosophers, and Gerdy, Leput, Peisle, the physicians, and Bouillier and Lemeine, physiologists have agreed with him in that notion. This sense is the consciousness of physical existence and of its needs and dangers. It is the soul keeping the body informed and forewarned in a degree corresponding with the strength of the organs at its disposition. This sense is intensely developed in some human beings, just as their are some men whose sight, hearing, ect., are better than those of other people.

THE DAHLIA.

This showy autumnal flower seems to have been neglected by our cultivators within a few years. We do not see at our Exhibitions, the grand display of flowers which, a few years ago, added so much to the beauty and interest of every autumnal show. Other new and more recently introduced flowers, like the double zinnia, gladiolus and Japan lily, &c., appear to have taken possession of the fancy, and the dahlia has been overlooked or neglected. They are not in the fashion. Similar inattention to the dahlia has also been prevalent amoug the English cultivators, until the last year or two, when they appear to have attracted more notice, and awakening something of the enthusiasm of former days. Thanks to a few eminent cultivators, such as Messers. Turner, Rawlings, Keynes and Fellows, who have yearly raised very superb varieties—for their skill in its culture, and annual displays which have kept alive an interest in the dahlia, now again to become prominent as in years past.

No real lover of flowers can deny that the dahlia is an important addition to every garden, and for exhibition purposes it holds a conspicuous place. Twelve or twenty-four beautiful blooms always attract attention, and are not surpassed for symmetry or brilliancy of color by any other flower of its season. The aster, the zinnia, and the gladiolus, are superb flowers, but for perfection of form must yield to the dahlia.

Probably one cause of neglect has been the uncertainty of a good bloom. We have experienced this ourselves, and know the disappointment and vexation, after a whole summer's care to find the blossoms deficient. This was however, in some degree owing to the character of the plants. These, in former years, when a new sort was multiplied rapidly, were often so week that no culture could wholly remove the injury they had sustained. Then again, a dry season is highly prejudicial to a plant which likes as much moisture as the dahlia; and when once the plants have suffered no after treatment can bring them into a vigorous blooming condition. All these objections had their influence in counteracting the taste for the dahlia, and turning attention to other flowers.

It is not to be denied that the dahlia requires good management to obtain a fine display of perfect blossoms; and without good plants—a rich, deep soil—plenty of water, and judicious pruning, they cannot be obtained. The amateur or cultivator who wishes for a good show of flowers for the decoration of the garden, need not be so particular; but when grown for exhibition purposes, the treatment must be such as the plants require.

The new class of Pompone or Lilliputian varieties has added a new feature to the dahlia. The varieties are now numerous, and some of them remarkably beautiful. Their neater habit of growth and smaller foliage render them less bulky, and they occupy less space in the border than the old kinds. Add to this their greater profusion of blossom, and their value for bouquets, and the Lilliputians must claim a prominent position among garden flowers.—*Hovey Magazine.*

Lost Time.—Let man pass an evening in vacant idleness, or even in reading some silly tale, and compare the state of his mind when he goes to sleep or gets up the next morning with its state some other day when he has spent a few hours in going through the proofs by facts and reasoning, of some of the great doctrines of natural science learning truths wholly new to him, and satisfying himself by careful examination of the ground on on which known truths rest, so as to be not only acquainted with the doctrines of themselves, but able to show why he believes them, and to prove before others that they are true; he will find as great a difference as can exist in the same being the difference between looking back upon time unprofitably wasted, and time spent in self-improvement; he will feel himself in one case listless and dissatisfied, in the other comfortable and happy; in the one case if he did not appear to himself bumbled, at least will not have earned any claim to his own respect; in the other case he will enjoy a proud conciousness of having by his own exertions, become a wiser, and therefore a more exalted nature.—*Lord Brougham.*

THE HUMAN SKIN.

Few discoveries in science are more wonderful than the revelations that the microscope gives us concerning the delicate integument that covers our own bodies. Kolliker, the anatomist, states that there are from 400 to 600 respiratory glands in every square inch of the surface on the back, the cheeks and the lower extremities. The skin of the forehead has them in the rate of 1,100, while the sole of the foot and the palm of the hand possess 2,700. The total number on a human surface of ordinary size is between *two and three millions.* If all the little tubes and channels that compose them were placed end to end, they would reach around the Earth's satellite? After this knowledge, who can fail to perceive the necessity of keeping these streets and lanes and alleys of our outer life clear of defilement? Who will depreciate soap and water?

The Coat of mail of a Savage.—The *Morning Star* brought from Micronesia the dress worn in war by a chief of Apaiang, one of the islands of that group. It is made of the fibre of the cocoanut, very ingeniously and strongly woven. It did not however, in the case of its wearer, suffice to protect him, for he came to his death from a spear, which pierced through the armor.

American Pomological.— Hon. M. P. Wilder, President of this Society, informs us that he has appointed Sept. 15, 1869, for the next session of the association in Philadelphia. This society is now in its 20th year, having been the first National Pomological Society established in the world, and affording an example subsequently followed by the British Pomological, the Royal Belgian and other National societies of Europe. Its past sessions have been held in New-York, Philadelphia, Boston, Cincinnati, Rochester and St. Louis.

IN THE EASTERN STATES.

LEARN HOW TO GROW

Small Fruits:

Raspberries,
Blackberries,
Strawberries,
Currants,
Gooseberries, etc.

Many *New Varieties* have, within a few years been brought out, which far surpasses the old varieties; such, among Raspberries, are the

Clark, which we place at the head of the list of tried varieties;

Davison's Thornless Black Cap, an entirely thornless black Raspberry, of very distinct habits of growth. Excellent fruit;

Prosser, a competitor for the position the Clark has taken. Stands dry Summers well;

Philadelphia, most productive

Doolittle Black Cap, extensively planted for field cultivation;

Cattawissa, good flavor, red; bears two crops annually. Have seen it with ripe berries and blossoms at the time of our first snows, about November 20.

AND MANY OTHER VARIETIES.

Among *Strawberries,* the *New Varieties* are

Charles Downing,
Dr. Nicaise,
Nicanor,
Durand, etc.

All these varieties are described in the New Edition of our

"Manual of Grape and Small Fruit Culture."

Th a neat little Pamphlet, containing full instruction how cultivate all these different varieties of Small Fruits. It contains full descriptions of the New Blackberries,

WILSON'S EARLY and KITTATINNY,

together with a new White or Cream-colored variety, which will be brought out this fall. Also,

HOW TO GROW BLACKBERRY PLANTS.

Last Fall we disposed of over 250,000 Blackberry Root Cuttings. We have heard of but few instances where they did not grow. We sent thousands of them to customers, by mail, as an experiment, to prove they could be sent safely as as California. We sent a package to Colonel Warren of the "California Farmer."

Our Pamphlet, containing Price List of our stock of Plants and Cuttings, can be obtained by calling at the office of the California Farmer, or by addressing Col. Warren, Editor California Farmer, San Francisco, Cal.

We have 50 acres devoted to the culture of Small Fruits not all cultivated yet; 20 acres in Strawberries; 14 acres in Raspberries; 7 acres in Blackberries; 2 acres in Grapes.

WARREN & CO., *California Farmer Office,* are appointed Special Agents for our Nursery Stock, where orders can be left to secure them to customers this season. Orders should be sent at once.

New Advertisements.

IT DON'T SCRATCH YOU,
Or Tear Your Clothes.
DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

Thornless Raspberries.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The Thornless raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. John Gage

From the American Horticultural Annual, for 1868 page 102:

"Davison's Thornless.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are **propagated from tips** making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.
Farmer Office 320 Clay street, San Francis

IMPORTANT TO NURSERYMEN, GARDENERS, AND AMATEUR FLORISTS.

We beg to announce the arrival of the choicest and best assorted collection of

RARE SEEDS,

ever received on this coast. They have been selected with the greatest care, from the first houses in Europe, and are comprised of

EVERGREEN, AND DECIDUOUS TREES AND SHRUBS, RARE AND BEAUTIFUL PERENIALS, BIENNIALS, ANNUALS, ETC.;

also, new and choice Vegetables; the assortment is worthy the attention of all who admire the beautiful; and also the particular attention of gardeners who are anxious to secure something rare and new in the Vegetable kingdom.

We shall send them out in small parcels or individual packets, so that many may have the chance of securing the collection. Orders executed in rotation, and carefully packed for mailing any distance.

Persons remitting us five dollars, will have collections of seeds sent them, worth intrinsically double the amount.

WARREN & CO.,
Farmer Office, 320 *Clay St.*, San Francisco.

VALUABLE PLANTS FOR SALE.

☞ **Persons who are desirous of securing a few** very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,
tf Farmer Office.

VICK'S
Floral Guide for 1869.

The first edition of *One Hundred Thousand of Vick's Illustrated Catalogue of Seeds* and *Guide in the Flower Garden* is now published. It makes a work of 100 pages, beautifully illustrated, with about 150 Fine Wood Engravings of Flowers and Vegetables, and an

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facie* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office

Prang's Beautiful Chromos.

o wish to see these most beautiful pictures and who wish to order the same, can see a large collection of them at the

"FARMER OFFICE."

Those which are advertised by these Art Publishers, can nearly all be seen at our office, as we have received copies, and they are, indeed, beautiful pictures. We have them on sale. WARREN & CO.,
Farmer Office.

Country Homes Wanted.

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will them if they communicate with this office immediately

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a our office, or addressing EDITOR FARMER.

ABOUT HONEY BEES.

As this is the season when the Honey Bee in California will begin his work, it is important that those who are engaged in the bee business, should have all the information they can obtain we therefore give them a little information which may be of value to some; this we gather from the experience of K. P. Kidder Esp., who has recently sent us his little Bee Book, called the "Secret of Bee Keeping," of which we spoke a short time since. Mr. Kidder professes to be well versed in the secrets of Bees and claims to be a true apiarian.

WHAT CONSTITUTES A SWARM OF BEES.

No definite number of bees constitutes a swarm or colony. Three kinds of bees are necessary to form a perfect colony. A Queen Worker, and Drones; or requisite for the last, a fertile Queen by which they may be propagated.

If these are present a handfull of bees would be a swarm, if there were thirty thousand it would be but a swarm.

The following table taken from Kay's treatise may be useful to many in deciding from appearance, both by weight and measure, between large and small stocks.

15,000 Bees constitute a modern swarm.
25,000 " " a good swarm.
30,000 " " a large swarm.

I have seen in some colonies just before swarming, 40,000 and 50,000

	lbs.	oz.	pwt.
100 drones weigh	—	1	—
290 workers weigh	—	1	—
4640 workers weigh	—	1	—
1830 workers, a pint in measure	—	6	5
3660 workers, a quart in measure	—	12	10
450 workers, about one gill in measure	1		10

Should this calculation be made upon bees when gorged with honey, it would make a difference probably of one-third in weight. We aver this table is not far from correct. It is very necessary to take into account the state of the bees at the time when the calculation is made; if they are alive they weigh less than when dead, and also if weighed immediately after they have emigrated from the mother hive, as they are then loaded down with honey and farina. This calculation was made when the bees were in their natural state alive. This will allow the apiarian to make to make a pretty close calculation upon the number of bees his hive contains; when he sees them in clusters or heaps. (Dry measure is here made use of.)

A good swarm of bees should weigh from five to eight pounds and measure four quarts at least at the close of the honey season.

Each of these three kinds of bees perform distinct and separate offices in every prosperous colony.

LOCALITY OF AN APIARY AND ITS ARRANGEMENT.--This is an important consideration with the bee-master. While every rural home is favored with a suitable place in which a few swarms of bees can be profitably kept, a serious neglect in choosing such place is many times a disadvantage to the owner. Perhaps a few hints to the novice will not be inappropriate in this little work. First, let the place be on dry soil, and if convenient, in some quiet spot away from the busy routine of the domestic circle, It should be shaded by trees to relieve the little occupants from the scorching rays of a burning sun and shield them from too much exposure to strong winds. The best bee-house that was ever used is the shade of a tree and a good hive.

The hives should always face the southeast if possible, as by so doing your bees get the morning sun, and fewer storms come from that direction to beat against the front part of the hives. Let it be located where they can be readily seen in swarming time from some door or window, from the kitchen if possible, that the women may give the alarm in case of swarming. The grass should be kept short by occasional cutting, as it is more convenient to get around amongst the bees and their is not so much liability of their being lost by falling into the grass. All ant hills in the immediate neighborhood of vincinity of the Apiary should be destroyed. Spider webs and the like should be kept away from the hives.

I would recommend the planting of trees where you are not already favored with them, and setting one or two hives under each tree, always avoiding the setting of bees in a bee-house or room eqcepting to obtain larger quantities of honey by so doing, as there is no place like the open air for bees while collecting honey. The inconveniences of a room speak decidedl against any uch arrangement. The bees and honey are got at with difficulty. Many times the bees build their combs upon the outside of the hives where free access to the room is given them, making it unsafe and even hazardous to attempt to manage them. While they are more likely to be infested with millers, ants, spiders, &c, the inconvenience of removing surplus honey, old combs, or in fact, to have any control over them is almost impossible.

Where persons are not favored with a situation like the one described above, select the most appropriate place you can, approaching as nearly as possible to our description; and if you can find no better place, put them in the attic or some room, and give them egress and ingress to the hive by placing it at some window, giving the bees access out underneath. Sometimes bees do remarkably well in rooms, but we object if a better place can be found. Localities for bee pasturage vary much in regard to their value for saccharine deposits. Sections of country where the Alder, Maple, Hickory, Basswood, Whitewood and Chestnut grow, are better than where Pine, Hemlock, Tamarack, Spruce and Cedar are the prevailing timber. Valleys are preferable to hills or mountains, as bees with a heavy load of honey can fly down hill easier than they can fly up. They will thrive better where cattle are kept than where sheep are pastured. The vast prairies of the West are destined to be the "El Dorado" for bees and honey; perhaps no country in the world of the same extent possesses such a variety of honey-producing flowers, from spring till fall, as do those magnificent natural Prairies of the West.

Their few wants may easily be supplied by the willing hand of man.

MADE-UP LIQUORS.

We call the special attention of the wine manufacturers of this State to the following article Which must affect their interest, for it is a notorious fact, that not only in New York, Boston and Philadelphia, are those poisonious compounds sold as *California Wines*, but here in our own city also, and in all the Country towns and Cities, and those of our Wine Makers, who pride themselves on making good and pure wines should take immediate steps to Expose those who palm off those vile compounds as *Wine*.

That spurious Wines are made we know and we know too the matrials of which they are compounded. Of this we shall speak in our next fully.

We know we have *Good and pure Wines* in California, and wines that can be relied on and such wine houses, as we always take pleasure in calling attention to in this Journal, wines too that can be sent abroad with credit, as will be seen by the notices which appeared recentlyin our columns of *Fruits* and *Wines* abroad.

We can always refer with pride to such *Wine Houses* as I. Landsberger! B. D. Wilson & Co., and G. Grozinger. These dealers labor to make a reputation for good and pure Wines, and at these houses the very best wine houses can always be found.

The New York *Commonwealth*, in an article on the poisonous made up liquors so much in use as a beverage in these days, and the frightful effects arising therefrom, says: One is impressed to seek a reason for the numbers of murders and sudden deaths which are now so frequently reported, and in doing so there is one frightful source to which to trace the cause of the evil, and that is the amount of made-up and poisoned liquors now sold to the public as a beverage. In a very large majority of the cases of murder reported, the murderer has been found to be laboring under a species of insanity, produced by the firey poison of a made-up stuff called liquors. At any corner you may find a compounder of poisons, and it is too tempting a business to be easily prevented.—Ten dollars' worth of strichnine or other poisonous drugs will impart to a barrel of beer double the strength of that value of hops, and with the present skill in chemical preparations, hardly a gallon of pure liquor is necessary to produce thousands of gallons. The city is flooded with these poisons, called by all sorts of names. The best brands of champagne are wholly produced in this country in such perfect imitations, that the genuine cannot be detected, if perchance a bottle should be mixed with it. The California wines offered for sale are very large, but the made-up manufacture of certain establishments in this city So with other wines and liquors. Nor are these exaggereted statements; they can be verified any day by the assessors of internal revenue, and the examination of the liquor. But, can nothing be done to stop this wholesale poisoning of the community? Most every man who takes a glass of wine become a possible murderer, an insane homicide? The evil is one which can not be overlooked.

SPECIAL NOTICES.

Farms to Lease—We ask all new comers to our shores, and all others who wish a "Homestead," and wish to earn it with earnest labor, to read the advertisement of SAMUEL BRANNAN ESQ., who makes very liberal offers of small and large tracts on the most liberal terms. Here is a chance for those who are really earnest, honest workers, to make for themselves a "Home."

The American Exchange.—The long established and well known and popular Hotel is now so well and liberally patronized, that the Proprietor will soon be called upon to enlarge his borders as he has not room for all who would crowd upon him were his Hotel twice the size.

Mr. Sargent of the American Exchange has made that Hotel by his courtesy, and attention to the wants of his patrons one of the most popular in our City.

We call the attention of all *Flax Growers* to the card of Messrs. Heynemann & Co, who desire to make contracts for flax straw for the Cotton Mills at Clinton. It is now an established fact that our Farmers will be supplied this year with bags for their Grain at a low figure, and a portion of these made from California material too.

TO ORCHARDISTS.

A grand chance will be offered to an orchardist who desires to engage in RAISING FRUIT on a large scale for exportation over the Rail Road east. A large and valuable orchard, covering over *forty acres* with the best kind of fruit bearing treet, where an income of over TEN THOUSAND DOLLARS per year can be relied upon. Is now offered for sale by reason of present owner changing his business. None need apply without ample means, as there is room for a large and permanent profit.—Apply to the *Editor of the Farmer*.

A very fine and large Mansion house of modern style nearly new and very handsomely furnished with large Barn and Stables, Carriage house and Shed, Fruit house and all other buildings needed together with suitable Teams and Tools to carry on the place,

The mansion is surrounded by splendid shade and ornamental trees and fine finished avenues leading from the public road to the Residence.—This estate is one of the most desirable that has been offered for sale for years, and for a gentleman who desires a place ready to hand, has no superior in our State.

ABOUT SORRELL AGAIN,

So many inquiries are made of us about this WEED that we herewith give its BOTANICAL history including those similar weeds of the same class, the "Docks" which infest our lands, if allowed to seed.

We gather this history from the best sources, Loudon, Lindley and Scientific works.

There are *thirty eight* varieties of Dock and Sorrell, only three known as the sorrell that abound with us. *Rumex acetosa*, or common sorrell of Britain, *Rumex acetosella*, or sheep's sorrell, and *Rumex scutatus*, or French sorrell. To these we add *Oxyria acida* or mountain sorrel. Each of the most noted we sketch according to their several properties.

We hardly expect our farmers are aware of the number and variety of these pests which will infest their land if once *seeded in*. The common sorrell of which we recently spoke, will always increase if land is allowed to run to waste for want of *cultivation*. The appearance of *sorrell* is proof that the land has a *sour stomach*, and must be changed.

Rumex. A name given by the Latins to a root of thorn.

R. patientia (so called from the slowness of its operation as a medicine) and *sanguineus*, were formerly used as spinage plants, The former is still used on the continent, and mashed with a small proportion of of R. acetosa or scutata, makes a very good spinage.

R. *Crispus* has a fusiform yellow root, which, taken in a recent state, and bruised and made into an ointment or decoction. is said to cure the itch.

R. *obtusifolius* is a domestic weed of the worst description; it is found in every country in Europe, but almost confined to cultivated grounds or rubbish, rickyards, neglected gardens, and places used as retiring grounds by men or cattle. It is never found on poor or wet-bottomed land. It is refused by cattle; but the leaves were formerly used for wrapping around butter and cream cheese; and the roots, along with those of R. acutus, by the dyers, In powder, the roots of most docks are said to be one of the best articles for cleaning the teeth. The leaves of all of them are considered laxative rather than otherwise.

R. *acetosa* has long been cultivated in gardens for its leaves as spinage and salad; but R. scutatus is much more delicate. The Lapirnders use the leaves of the R. acetosa to turn their milk sour; in Ireland they are eaten with fish and other alkalescent food. The root is powerfully astringent, and considered antiscorbutic; dried and boiled it gives out a beautiful red color. All domestic cattle eat this and most other species of the genus.

R. *acetocella*, where it abounds naturally, is a certain indication of poor, gravelly, irony soil.

R. *alpinus*, monk's or bastard's rhubarb, was formerly used as true rhubarb, but in larger doses.

The different species of Rumex attract the cultivators attention as weeds more powerfully than as culinary, medicinal and dying plants. The sorts vulgarly knows as docks produce a large quantity of seeds, and ripen them rapidly and perfectly. Fortunately they are heavy and not carried to a great distance from the parent; but almost every one grows, and once a year old they are tedious and expensive to eradicate. The first season they may be destroyed by hoeing, but when the tap root is established, unless it be wholly eradicated by the weeding, or dock-hoed, or spade, the ground cannot be considered as cleared. Any part of the root left will generate buds and send them to the surface, and if the plough or spade cut a root into pieces an inch long, each piece will grow, whether near the surface or buried to some depth. The less careful agriculturist often receives dock-seeds with his grass seeds, brought from the stable-keepers and not properly cleaned; these come up the first year, and establish themselves along with the clover unobserved. The second year they flower, and if the crop is not early cut the seed ripens, and in using the hay is either mixed with the litter of the stable or with the hay seeds, to be again carried to the field, Such as purchase town manure cannot avoid receiving dock-seeds; but they may destroy them by fermenting the manure well before using it; others who desire to get rid and keep clear of this weed, should be most particular in their choice of seeds of every kind, especially of grass-seeds; should weed them out as soon as discovered; and for such as remain till the second year, they may be pulled by hand when in the flower stalk, and during or after a day's rain. (See *Encyc. Agr.* art. *Peren. Weeds*.

Oxyria. From a Greek word signifying acid, in allusion to the qualities of its leaves, The plant is one of those singular individuals which has the character of two distinct genera, and yet is referable to neither. Wahlenburg made it a Rheum, Linnaeus a Rumex, Mr. Brown what it now is. It was formerly used as a salad.

A MONUMENT TO PRESIDENT LINCOLN.—A grand colossal monument to the late President Lincoln is to be erected in Florence, Italy. It will contain one hundred statues, and it will cost over two hundred thousand dollars.

The allegorical figures, "Colonial Times" and "Bill of Rights," in real bronze, for the Washington monument in Richmond, are nearly completed, and they will cost ten thousand dollars in gold.

THE CALIFORIA EARTHQUAKES.—Some malicious wags have said. earthquakes were occasioned by the trembling of the soil at the approach of two or three well known speculators of unbridled capacity, who have lately gone out thither to rummage for gold."

This is what our New York exchanges say of us in California. Such being the fact there should be *daily earthquakes on California Street.*

A NEW GRAPE DISEASE IN FRANCE.—M. Bazille, presented a memoir to the French Academy on August 3rd, detailing a new disease which he says is likely to prove more disastrous than the famous vine mildew. This new enemy is not a fungus, but a minute *aphide*, which he calls a *Rhizobius*, and which forms yellow parasitic patches on the roots of the grape vine.

We acknowledge several parcels of the *famous* Farmers Club" *Sweet Corn* from J. B. Olcutt Esq this corn is now established on *the very best sweet corn in our land.*

Editor's Chair,

We take especial pleasure and pride in calling the attention of the *Readers of the Farmer*, to a very kind and acceptable letter from *White Pine* or the *Silver Country*. We do so because we recognize and gladly welcome an old and highly esteemed correspondent of the early years of the Farmer, and many of our old subscribers will recognize the writer under the *new name* even, and will hope to find letters often from the same source.

We would call the name of our old friend if it would not be a breach of etiquette, but we will wait and hope soon to receive another letter with this familiar and honored Nome de plume.

For the very kind manner in which this Journal is complimented we have but one word to reply, GRATITUDE, The letter is a treasure and the many friends of the writer will hail it with pleasure.

The letter on our *ag. column* on *Silk Culture* will be found of much interest, coming as it does from one of so much practical knowledge,

The letter on Flax Culture should receive attention, as this *product* will receive a large share of attention this year.

Santa Clara Manufacturers. A sketch of the industry of *Santa Clara*, which has been laid over some weeks, will be in our next issue.

Beet Root Sugar. An article on this subject with statistical fact will appear in our next.

Acknowledgements.

Books and Magazines.—The making of Books there is no end," So it seems, for we are receiving every mail, more than we can find time to analyze. We can only speak of the most meritorious.

The Overland Monthly.—This SPLENDID HOME MONTHLY should take the precedence among our people, for it is a magazine worthy of a liberal and generous patronage and every subscriber will realize many the value of its cost, it is in reality worth a dozen of the trashy periodicals that flood the land.

The credit of our own State demands that this monthly should have an honorable testimonial from our own people, that they will duly appreciate our *native talent* and home productions of the mind.

Messrs A. Roman & Co. have done noble in placing before our people, a montly which is a credit to our State, both in the style of its publication and the character of the matter within its pages, which we know to be of a superior order and subjects too, that should interest our entire people. A. Roman & Co. recieve subscriptions only $4 per year.

The Missionary Herald.—This well known Herald of "Foreign missionary enterprise," is now in its *sixty-fifth volume*, the No. 1 of this volume before us and its familiar face we gladly greet. What a glorious work the Herald has accomplished. The armies and navies of kingdoms and nations, may have conquered with their power, territories, and won kingdoms, but the cost was *blood*, and the sacrifice was *life*.

The Missionary Herald and its host of laborers in the "Gospel Field," have done more than armies or navies, for they have won manp souls for Heaven by redeeming men from ignorance and crime, and without the sacrifice of *blood* or sacrifice of any kind save *self* and *self-interest*, and that should ever be laid upon the altar of that faith which alone can redeem the world from *Ignorance, Crime, Sin, War* and calamity of every kind. We shall look with hope to see the "Missionary Herald" find a place in the dwellings of many of the people of our State.

The cost of the "Missionary Herald" is but *one dollar* per year, and can be had by sending to Missionary House, 33 Pemberton square, Boston Mass. Let every proffesing christian, invest a dollar in this work and it will be sure to bear a large *paying interest.*

Harpers Magazines.—These renowned Magazines come to us regularly, and still continue to improve. The Monthly is worth its weight in gold for its intrinsic merit, it is a library of itself. The *Weekly* one of the *best illustrated* Journals of the day—a fit and exellent companion to the monthly—and the *Bazar* a very appropritate, ornamental accompaniment to them both; the *Bazar* is designed for the mother, wife and daughters more particularly as this a book of fashions, This should be had by all who wish a library in a few works.

Onward: This is the *new* Mayne Reid Magazine" a handsome illustrated Magazine of 64 pages and issued in very handsome style its typography is superior, and the matter in the volume of a high literary character Capt. Mayne Reid, an Author of known celebrity and the Magazine gives evidence of a purpose to make it one of superior merit.

Messrs Hudson and Menot of New York, Advertising Agents, send us their their annual Circular containing the Directory of the Newspapers of the Pacific Coast. A very neat and well designed little book and excellent as a directory, but as our Newspaper list changes so rapidly, the firm will be obliged to issue one semi-yearly to make it reliable.

Catalogues, &c We have received the seed catalogues. (new issue) of Mess. Thorburn & Co seedsmen of N. Y. also.

Catlaogue of John Vanderbuilt & Bro. Fulton N. Y. also.

Washington Street Nursery. of Gates. Selover Willard & Co. Geneva N. Y. also,

The Circular with skatch of the new "Marengo crab apple. from the nursery of C. Andrews Marengo. Illinois.

Wines and Wine making this subject will appear next week.

LANDS

FOR SALE OR TO LEASE.

IN NAPA VALLEY.

IN THE VICINITY OF CALISTOGA.

ON THE

LINE OF THE RAIL ROAD

Within three and a half hours from San Francisso.

THE UNDERSI GNED WILL LEASE FROM TEN to Thirty Acres of CHOICE VINEYARD LANDS, to competent parties, for the term of Four Years, they planting the same in Vines and cultivating them during the said term. At the expiration of the term.

ONE HALF OF THE VINEYARD

Will be deeded the Lessor for services.

ALSO, TO LEASE,

Four Thousand Three Hundred

Acres of Grazing and Grain Land, eight miles from Marysville, on the Yuba river 2,000 acres under fence on very advantages terms.

—ALSO—

A farm of three thousand Acres of Grazing Lands,

Twenty-five miles from Sacramento City, on the Feather River, 1,500 acres under fence.

—ALSO—

A FARM IN NAPA VALLEY

Of 260 acres, on the most reasonable terms and credit.

Small tracts for Residences

At and near Calistoga, for sale—One two, and three years credit.

Apply to S. BRANNAN,
432 Montgomery Street,
31 3 Third floor.

FLAX STAW WANTED.

THE

OAKLAND COTTON MILL

is prepared to buy

FLAX STRAW

—DELIVERY AT PRESENT OR NEXT SEASON.—

Apply for further particulars to

HENEYMAUN & CO.
No. 5 Sansome St. San Francisco.

31 3.

AUZERAIS HOUSE,

SANTA CLARA STREET,

San Jose, Cal.

J. M. STAPLES, PROP'R.

—ALSO—

LAKE HOUSE,

DELMAR AVENUE,

SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story.

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most attractive place of resort. Parties wishing said board will please apply to J. M. STAPLES,
31-1 Proprietor of the Auzerais House.

VICK'S Floral Guide for 1869.

The first edition of *One Hundred Thousand of Vick's Illustrated Catalogue of Seeds* and *Guide in the Flower Garden* is now published. It makes a work of 100 pages, beautifully illustrated, with about 500 Fine Wood Engravings of Flowers and Vegetables, and an

ELEGANT COLORED PLATE,

A BOUQUET OF FLOWERS.

It is the most beautiful, as well as the most instructive Floral Guide published, giving plain and thorough directions for the

CULTURE OF FLOWERS AND VEGETABLES.

The Floral Guide is published for the benefit of my customers, to whom it is sent free without application, but will be forwarded to all who apply, by mail, for Ten Cents, which is not half the cost. Address

30-22-4t JAMES VICK, Rochester, N. Y.

Horticultural Premium

New Vines and Plants.

With a desire to extend the cultivation of the *New* and *Rare Varieties* of the *Raspberry, Blackberry,* and *Strawberry,* we offer the following

PREMIUMS:

For every new subscriber and $5 two plants of the Thornless Raspberry, and two plants of the Kittatinny Blackberr

For two new subscribers and $10 we will give two plan each named above and one dozen plants of the Jucunda Strawberry.

For four subscribers and $20 four plants each of the Ra pberry and Blackberry, one dozen of the Strawberry, and two Doolittle Blackcap Raspberry.

For five subscribers and $25 the same premiums as for four and four plants of the Doolittle Blackcap Raspberry.

For a club of ten and $50 we will give one dozen Davison Thornless Raspberry, one dozen Kittatinny Blackberry, ha dozen Doolittle Blackberry and fifty Jucunda Strawberry.

These premiums will enable beginners to secure these new and rare plants, which are now worth their weight in silver.

Subscribers can also secure our November and December numbers of the *Farmer* and the entire year of 1869

WARREN & CO.

13 FIRST PREMIUMS.

RECEIVED IN 1867 & 1868.

FOR THE BEST

WHITE AND RED WINES.

Gold Medal Awarded

BY THE STATE AGRICULTURAL SOCIETY, 1867-8

and Silver Medal

BY THE MECHANICS FAIR, 1868.

A. L. CHAMBERLIN

Wilson, Morrow & Chamberlin,

Wine and Commission Merchants

NEW YORK.

Our New York House, under the name of
WILSON, MORROW & CHAMBERLIN,
will open in New York City about the first of November ext, and will have the exclusive agency of our

WINES AND LIQUORS

in all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

MESSRS. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed. We will make liberal Cash Advances on Merchandise consigned to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco

WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required.—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates.

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD
WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurious Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet 30-12.

GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR AN *ORANGE PLANTATION,*
Can obtain SUPERIOR SEED at the

FARMER OFFICE.

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance.* We have several small *Bank Checks sent us,* which proved *worthless,* the names of the *Drawers* are placed on our *Black List,* and will be published unless soon redeemed.

THE KIRBY LARGE MOWER.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down again when smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way, for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with a great strain, and be very liable to break.

THIS MACHINE HAS NO EQUAL IN DIFFICULT CUTTING.

It has an INDEPENDENT ACTION by Means of a Joint in the Frame, instead of the Moving Bar, so that the Knife is always Kept in Line with the Gearing.

It is Easy Dratt for Two Horses, and can Cut Heavier LODGED GRAIN without Clogging than any other Machine on the Pacific Coast.

This Machine is the same as the Combined in every particular, only the Reaping Attachment is left off, and parties buying it can afterwards buy the whole or any part of the Reaping Apparatus from the Common Reel to the Self-Rake.

This large KIRBY MOWER is the only mower that has an independent action, and can use a reel when mowing, especially in windy weather. It can be bought as a Mower, with or without a reel.

In soft, sandy, sediment land, the lifter-wheel, on account of the narrowness of its rim, will sink in quite deeply. In this case a WIDE BAND should be provided and slipped on it, which will prevent the difficulty. The wheel as it is, will run very well on hard ground. These bands with all the Extra parts, will be kept Constantly on Hand, to supply all the calls of purchasers.

As a machine for clipping mustard, or cutting back grain that grows too fast, the Kirby Mower possesses advantages over all other Mowers from the fact that IT CAN CUT AT ANY HEIGHT from the ground, and work equally well and free under all circumstances.

When you order EXTRAS for this Machine, always state the NUMBER ON THE PART WANTED corresponding with the number on the plates on the list, and also GIVE THE NAME of the part when there is no number on it.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose).

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINT of your guards LOW by means of the forward bolt in the pole where it bolts to the machine. IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL.

Be sure to keep TLL THE NTTS TIGHT and the JOURNALS WELL OILED, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the JOINT TIGHT WHERE THE PITMAN CONNECTS WITH THE KNIFE, and then your machine will work well without trouble or expense.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

30-22—no1

THE PHOTOSCOPIC TABLE COMPANY.

THE NEW INVENTION of this Company is known as the ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION of this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changible pictures, arranged to suit the wishes an desires of each owner of the table,

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

The Company have opened a Suit of Rooms for Exhibition and sale of the PHOTOSCOPIC TABLE at the corner of St. Marks Place, No. 23 KEARNY St., west side, up stairs, to which they cordially invite the public to examine them. 32-1

Home Miscellany.

HAST THOU A CARE?

ELLEN M. H. GATES.

Hast thou a care whose pressure dread
Expels sweet slumber from thy bed?
To thy Redeemer take that care
And change anxiety to prayer.

Hast thou a hope from which thy heart
Would feel it almost death to part?
Entreat the Lord that hope to crown,
Or give the strength to lay it down.

Hast thou a friend whose image dear
May prove an idol worshipped here?
Implore the Lord that naught may be
A shadow between Heaven and thee.

Whate'er the care that breaks thy rest—
Whate'er the wish that swells thy breast—
Spread before God that wish, that care,
And change anxiety to prayer.

LOVE'S GUERDON.

BY JEFFREY H. BOYLE.

CHAPTER I.—THE WAGER

"Oh, that I was a man!" sighed the pretty daughter of old Calico, the retired dealer in muslins and mantuas. "I wish I was a man," and closing her music book, she leaned the loveliest face in Cincinnati upon a hand so *petite* yet graceful, that Praxiteles would have forgotten the *painter* in the *man*, and instead of transferring its counterfeit to the dull canvas, have pencilled it upon the living heart.

Her cousin Harry heard the querulous exclamation; but his attention was absorbed in framing certain mystical combinations, as the blaze of the coal occasionally gave them to his view; so he said nothing, although the speaker seemed to expect an answer.

'*Cousin*, cousin Harry, I say!" exclaimed the spoiled beauty, stamping a foot of Chinese proportion upon the rich Brussels, "you are positively stupid to night! Here I have been talking to you, yet you pay no attention; thinking of the lost Pleiad or the sophistries of Thales, for aught I know!"

'My dear Agnes," replied the gentleman, "what do you wish!"

'I wish I was a man!"

'Do you?" quietly responded her cousin, at the same time stirring the fire in the grate: it was the last night of the dying year, and the keen blast howled fiercely, the requiem of the passing fragment of a century.

'I do indeed" was the reply of Agnes, "for I feel that woman is deprived of all those opportunities of becoming great, of doing good and benefitting mankind, which are so lavishly strewn in the paths of favored manhood. We are shut out from all agency in the government of men; we may be fired with ambition, but despotic custom has deprived us of the right to assert our claims with the slightest chance of a hearing! Pray, what chance have our sex of piling a fabric of honor and fame, of accelerating the march of knowledge, or curbing the progress of vice!"

This speech came from the cherry lips of sweet Seventeen, yet my readers must not condemn her; ambition is a God-like attribute, and burns as brightly upon the altar of woman as it does upon the shrine of manhood. Woman can exercise her powers in the tented field, the cabinet, and the hall of debate as well as in the social circle. Witness Joan of Arc, Elizabeth of England, and Fanny Darusmont. Woman has a right to be ambitious, especially of the ambition of doing good.

'You can do much, my sweet cousin," answered her hearer—"to your sex is given power to mould the plastic mind that it may acknowledge the truths of virtue and receive those sound inculcations which, implanted early, becomes the guiding principles of the man, strengthening with the advance of years."

A cloud of vexation passed the brow of the listening maiden, and with the rash confidence of youth, she denied the premises laid down by the speaker.

A smile, rarely seen upon the grave face of Harry Harrington, illumined his countenance, as drawing his chair to the side of the pouting Agness he thus continued his exordium, or, rather, altered its direction.

'You well know, dear Agnes, of the strong desire entertained by your father for our immediate union—nay, now do not get angry, but listen!—You have bid me wait till another year shall have passed—to this agreement I seriously object, but am willing to rest the question upon the issue of an adventure, which will at the same time prove to you that in deeds of virtue, philanthropy and kindly influence to the human race, your sex have decided superiority over ours."

Agnes looked seriously into the face of her companion to see whether he was not jesting with her, but reading there the same calm, serious features that marked his general demeanor, she bent her eyes to the ground, and laughed. "You may laugh," continued her cousin, "but listen—I will undertake to prove to you all I have asserted—ay, more! Yourself shall admit that I have conquered. If I do this, my guerdon shall be an immediate union. If I do not, harsh as your imperious doom of delay is, I will bow submissively. Do you agree?"

'I do, I do," laughed the merry girl, "and I know I shall win!"

The bell was touched—the servant summoned to bring her mistress' roquelaire and furs, and Harry Harrington, with Agness upon his arm, sallied forth in quest of proofs which were to decide this singular wager.

CHAPTER II.—THE HOVEL.

The demon of the storm was abroad in his wrath as the pair wended their way along the snow-covered streets of Cincinnati. The ice in the Ohio heaved and tumbled with a hoarse, dull sound as the passing waters sluggishly lifted the vast bodies of ice, one upon another. The wintry heavens were starless—moonless; and the snow falling in flakes upon the person of Agnes made her half regret her willing acquiescence in the strange freak of her cousin lover.

Yet was the little world of this Athens of the West busy in its way. The *paves* were lined with groups of young and old; the one anticipating with their season; the others, somewhat affected by the merry voices and careless aspirings of those around them, were hastening to purchase the gifts which childhood is very willing to attribute to the generosity of Santa Claus. The stores were in the blaze of their holiday array, and toy and trinket, book and bauble were temptingly displayed to the gaze of the multitude gathered there to purchase.

What a mercurial, easily cheated world we live in! Youth pleased with trifles, age descending from its gravity, finds enjoyment in filling up the requisitions of childhood. All are gay, all forgetful that they are standing upon the spot where *was* an important landmark in the circumscribed voyage of life! Hope, that ever-attendand visitant, looks eagle-eyed from the grave of the dead to the cradle of the new year, and whispers to the mourner that with the past has departed his sorrow; that brighter, happier days come with the advancing future. Experience, judgment! the monitors of reality, come but to be chased away before the laugh of the blue-eyed tempter.

Agnes pressed more closely to the arm of her companion as the rush of the rejoicing passengers obstructed their progress. Harrington seemed not to notice what was passing around him; buried in thought, he neither glanced at the world on the pave, nor the vociferous mirth of the sleighers, who, in their egg-shells, flew over the bosom of the yielding snow. Agnes inquired where he was going, but without returning any answer, he turned down one of those suspicious lanes which his companion had frequently noticed, but never passed through, and pausing before a wretched cabin, knocked upon the time rent pannels of the door.

Awe-struck and wondering, the timid girl offered no inquiry, but threw a hasty glance over the exterior of the building. It was one of those log-houses still to be seen in the by-ways of our western cities. Decay had done its work upon it, and whatever comfort it may have once possessed was now destroyed. The windows were stuffed with rags, and the sounds of pain came upon the ear, as the door was slowly opened through which she and her companion entered.

Why describe the interior of the dwelling where Want is lord, and Misery has taken up its abode? —Yet Agnes, versed as she was in the details furnished by others, was sickened at the display of human wretchedness that met her vision as she stepped within an apartment which she felt was indeed a habitation of misery. Upon a couch by the embers of a waning fire was stretched a woman apparently in the grasp of the King of Terrors. Several children, young and squalid, were weeping on their knees by the side of the dying; and the tears swelled in the eyes of Agnes as she heard their sobs and felt their misery. A further look brought a blush of shame to the cheek of the gazer, for by the fire, making a warm draught to give the sufferer, was one whom Agnes well remembered having made the *butt* of her merriment.

This minister of mercy was Miss A——, who belonged to that despised body called spinsters, and whenever the rich daughter of Calico had observed the faded features and humble dress of the retiring Miss A——, she had made them the subject of ridcule among her young and equally thoughtless companions. Now was the spinster's triumph, for the heart of Agnes bowed to the superiority of her whom she had formerly contemned.

Without noticing the pair, who stood contemplating the scene with sad emotions, this voluntary attendant on misery proceeded with her task of charity. A heavy groan from the dying woman called her to the bed-side, and she saw that all earthly aid would be of no avail. The damps of death were thickly gathering upon the brow of the sufferer and the film closing over the eye told that that hour was at hand.

'My children," murmured the dying parent, the mother triumphing even in that dark moment, "what will become of my helpless babes!"

'I will protect them," said Miss A——, "I will be to them in the stead of the mother they have lost."

'And I," said Harrington, stepping forward in the presence of the spinster, "will share with you in your glorious—your noble work. Let me, too, be an agent in clothing the orphan and giving bread to the motherless."

'I also will assist," sobbed the spirit-softened Agnes. "Dear Miss A——, pardon the past, and make me your pupil in the cause of holy charity."

'God forever bless you for your kindness to my little ones," hoarsely whispered the dying woman. "I have always placed my trust in the Friend of the Widow, and the Father of the fatherless, and he has raised me up many friends; my children"—the words died upon her lips, her last look was upon her offspring, and pressing the hand of Miss A——to her heart, she passed away from the theatre of her many sufferings.

CHAPTER III.—THE FAMILY GROUP.

'One more visit, dear Agnes," said Harrington, as he drew the arm of Agnes within his own, and left the spot where death had been busy; "we have seen what women do to soothe the dying pillow and temper sorrow with the tear of mercy. Let us now go to a brighter evidence of woman's usefulness."

Agnes replied not, the event of the night had quelled the rash confidence in herself with which she started, and with passive obedience that augured well for the fruition of her cousin's hopes, she allowed him to take her where he pleased.

'Do you remember George H.?" asked Harrington of his cousin, as they came again upon Main street.

'George H. the drunkard, whose wife and children, were obliged to leave him in consequence of his intemperate habits?"

'The very same," answered the gentleman; "we are going now to his house," and so saying he rang the bell of a large, handsome edifice, and a servant promptly obeyed the summons.

A few moments sufficed to seat them before a cheerful fire in an elegantly furnished apartment, that contrasted well with the chamber they had so lately quitted.

Agnes had known Mrs. H. some five years before, a heart-broken, wretched woman, who seemed traveling rapidly to that refuge for human sorrow, the grave; *now*, she saw her the quiet, happy matron, her countenance saddened with the traces of *past* care, but an air of serenity and Christian thankfulness showing that the *present* was without alloy. Her husband, *the drunkard that was*, welcomed them with an air of easy politeness, and discourses fluently upon the current topics of the day, while several children were poring with happy, beaming looks upon the pages of the Inspired Volume, which it was evident the father had been reading to his family.

'Can it be possible" thought Agnes, "that this is reality!"

Her cousin seemed to read her thoughts, and he smiled as, turning to their hosts, he mentioned the wager.

'My young friend,' observed H., addressing Agnes, 'you know not, you cannot know the vast difference between the desire to do good and the fact of its accomplishment. It is not in the saloon, the gay circle, or the fashionable route that the energies of your sex are called into requisition; yet women can, nay, does more to sweeten the cup of human life than man in his purest moment dreams of. I am a living witness of woman's usefulness;'—he paused and looking fondly on his wife, resumed, 'Four years ago, and I was an outcast from the esteem of my friends, the victim of fell, untameable passions. She whom I had vowed to protect and cherish, was exposed to want, and driven forth to seek an asylum, other than the one which I had turned into a den of dissipation and vice. You see me now—the cause of it is the energy, the Christian fortitude, the ceaseless prayers of her who clung to my ruined fortunes, after all had abandoned me. She bade me look at her children, but the wine cup had a stronger voice, and I went on until disease prostrated me upon a bed of pain. Then it was that she conquered. Through the long months of my illness she toiled to get bread for me, all unworthy as I was, and I arose from that couch of repentance an altered, because a thinking man. She had been the 'still small voice' to lure me from my follies. She had taught me to look upon myself as a creature born for higher purposes, and then while the wife was before me, she brought our little household around, and bade them kneel before me. The past with all its madness came over me like a spirit's voice, and the misery I was inflicting upon others made me take that resolution, which, under God's favor I will never alter, to live for her who had regenerated me, to live for my children."

The gratified wife, gratified less at hearing a recital of her well earned praises, than delighted with the tone of her husband's determination as to his future course, smiled tearfully upon him while he took her hand and clasped it in his own.

Agnes was affected with the scene; here was indeed woman's triumph, immeasurably beyond any that the victorious field of the conquerer may present, or the annals of political pre-eminence afford. Nobody's business is lifeless in the pathway of woman's triumph, no bleeding sensibilities, no thirst for dominion marks her course.—Her weapon is virtue; bending to circumstances, yet rising superior to difficulty. Her battle-field is the human heart, and she instils into it sound principles, bidding the wanderer to return, and pointing out the advantages of reformation.

Agnes left the mansion of George H. no longer discontented with her woman's estate, and Harry Harrington, as they entered the parlor where Agnes had uttered her wish that she was a man, felt in his own mind that the wager was not very doubtful.

CHAPTER IV.—THE LETTER.

"*Married, on the 10th of January* 183—, HENRY HARRINGTON, *Esq., to* Miss AGNES, *daughter of Cadwallader Calico, Esq., all of Cincinnati.*"

There is something excessively provoking in the air of impertinent happiness assumed by a newly tied Benedict, which but ill accords with a bachelor's views of the miseries consequent upon marriage.

Harry Harrington looked thus as on the evening of the eleventh of January, he sat by the fire, stirring it abstractedly, while a lady with whom the reader is somewhat acquainted, was seated at the table busily engaged in penning a letter.

As it is important that my readers should be acquainted with the character of this missive, I transcribe it.

"Yes my dear Julia, I am married. I that vowed never to submit myself to the conjugal yoke, am yoked at last. Well, I am not very sorry, for Harry is a good soul, and doubtless will let me have my own way!—But, Julia, I have seen much of late to make me serious. I never knew until recently how much good we can do for our fellow creatures. How plain is the line of woman's duty, and how awful are her responsibilities. Her world is not among the strifes of politics, faction, and selfish trade; but she may be great even in relieving the wants of the afflicted, healing the wounds that sharp necessity has opened, and pouring the oil of consolation into the bosom laboring in the agonies of death. She is looked to as a guide by the young, as a solace by the aged, and woe upon her, if, neglecting her charge, she devote that time to a round of fashionable follies which should be spent in administering charity, or attending to her private duties. If she have children—"

'Very well thought of,' said a voice behind, and looking around she found Harrington coolly perusing her letter.

'Really Mr. Harrington, what right have you to read my private correspondence?'

'The right of a husband, my dear, and permit me to say that your sentiments do you great honor.

'I am glad you think so, dear Harry.'

'But you must not think that I will let you have your own way, remarked the complacent husband.

Agnes smiled, but there was mischief in that smile.

NOTE TO THE READER.—The author has but one word to say in conclusion. To his lady reader he would recommend the sketch of Miss. A——. Homely as her character may seem drawn by the rough hand, yet it is a beautiful conception; and woman, beautiful and pure as she seems when gliding down the dance, or enthralling the soul with sweet sounds as she bends over the harp, is far more lovely when visiting the couch of pain, and ministering to the wants of the stricken.

The wife of George H. is no draft upon the imagination—Intemperance, powerful as it is, may be driven out before the voice of conjugal entreaty; and love, warmed into new life, gather at the fireside and gladden the hearts of a household, if women do but use that influence which is peculiarly their own. Be not ambitious of worldly honors,

Seek to do good, but aim not to be great
A woman's noblest station is retreat:
"Her fairest virtues fly at public sight,
Domestic worth—that shuns too strong a light."

Santa Clara College, S. J.

SANTA CLARA, CAL.

Conducted by the Fathers of the Society of Jesus.

THE EIGHTEENTH ANNUAL SESSION OF THIS INstitution will commence on THURSDAY, August 27th, 1868.

TERMS—Tuition in the Classical and Scientific Departments; Boarding and Lodging; Washing and Mending of articles; School Stationery; Medical Attendance and Medicines; Fuel, Light, Baths, etc., per session of ten months,.....$35

For further information apply to the President of Santa Clara College, Santa Clara, Cal., or to Rev. A. Maraschi, S. J., St. Ignatius Church, Market street, between Fourth and Fifth, San Francisco.

24-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal; its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to

HENRY E. CHILD,
30-22 41 Park Row, New York.

A PRINCELY RESIDENCE

IN THE COUNTRY.

FOR SALE

To any wealthy person who desires to retire from the drudgery of a business life in the city and enter upon a newer and better and higher life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place we have had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only because of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and with a judicious care and management, the cost of the place could be returned again in a few years *by its productions*, can learn of the opportunity by applying to the Editor of the Farmer. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco at Gold Value, will be received in part payment, and *Statistical proof given* to show the real increase annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO.

Miscellany.

SCANDAL LANE.

BY MRS. M. A. KIDDER.

It is not on the signboard, Sir,
  Go search both far and wide;
Or in the town directory,
  Tne map or railroad guide;
And if you pump your neighbor, Sir,
  You pump alas! in vain,
For no one e'er acknowledged yet
  He lived in Scandal Lane.

It is a fearful neighborhood,
  So secret and so sly;
Although the tenants oftentimes
  Include the rich and high,
I'm told they're even cannibals,
  And when they dine or sup,
By way of change they'll turn about,
  And eat each other up!

They much prefer the youthful, Sir,
  The beautiful and rare;
They grind up character and all,
  And call it wholesome fare.
And should the helpless victim wince,
  They heed not cries of pain;
These very bloody cannibals,
  That live in Scandal Lane.

If you should chance to dine with them,
  Pray never be deceived,
When they seem most like bosom friends,
  They're least to be believed.
Their claws are sheathed in velvet, Sir,
  Their teeth are hid by smiles,
And woe betide the innocent
  Who falls beneath their wiles,

When they have singled out their prey,
  They make a cat-like spring;
Or hug them like a serpent, are
  They plant the fatal sting,
And then they wash their guilty hands,
  But don't efface the stain.
These very greedy candibals,
  That live in Maiden Lane.

CARBOLIC ACID.

This powerful article is one of the disinfectants which has been so strongly recommended by Medical men in our city, during the prevalence of the pestilential Small-pox. We give the following article from the N. Y. Mercantile Journal, upon the very dileterious and almost fatal effect of its use, and place *these facts* side by side with the other and many statements which have led our people into errors that has caused the sacrifice of many lives.

We know of many cases where the *free use of Carbolic acid*, as recommended by our Physicians, have led to almost fatal results as described by the article we annex, as to its effect on the human system.

"This powerful remedy has proved itself to be far more potent than was first anticipated; and its applicability to many diseases, which, at the outset was not suspected, has been fully demonstrated. We have counted no less than eighteen different diseases in which it has been used with decided benefit, and its antiseptic qualities render it a most valuable agent for embalming, preserving wood, raw hides· anatomical and zoological specimens, as well as a powerful disinfectant for hospitals, fever wards, etc. It is now, however, although the fact is well known to chemists and physicians, not generally known by the public at large, that carbolic acid is a deadly poison, acting according to Professor Pinkham, with scarcely less power and rapidity than strychnine, and fully equal to oxalic acid in energy and fatality. Indeed, a much smaller dose of carbolic acid will destroy life than of oxalic acid.

It appears to have two distinct effects when taken in poisonous doses. Before its absorption into the circulation, it acts as an irritant, corroding the tissues, and producing inflamation; coagulating the albuminous portions of the tissues, and comporting itself in most part like other strong caustic solutions· Vomiting, however, a common symptom of corrosive poisoning, is not likely to occur, being prevented by spasmodic contraction of the œsophagus. At the same time that strong solutions are far more corrosive in this action than weak ones, they are perhaps, less fatal, as their effect upon the tissues renders absorption less rapid. As soon as absorption takes place, the patient is seized with giddiness, headache, trembling, convulsions, delirium, insensibility, stertorious breathing, succeeded by prostration and death. The insensibility is a very marked symptom; in fact, this may take place, followed by prostration and death almost immediately, from a large dose, the system in such cases seeming to sustain a vital shock as in the case of prusic acid. A large number of cases of poisoning from this drug have been reported. We have said enough upon this subjecs to warn the public against the ignorant handling of this remedy. The antidotes for this poison, so far discovered, are not numerous. The *Journal of Cutaneous Medicine*, however, says that next to the stomach-pump, in poisoning with this acid, the best antidote is large doses of olive or almond oil, with a little castor oil. Oil is a solvent, and therefore a dilutent of carbolic acid, and may be used to stop the corrosive effect of the acid, when its action on the skin is too violent.

THE INFINITELY LITTLE.

Wondrous have been the discoveries of the microscope in tracing out the homes and habits of the anamacular parasites that prey upon the bodies of larger and nobler organizations. Some of these are so small that thousands of millions of them may subsist in the space of one square inch. But the microscope is far, far outdone by the moral lens that detects reasonable beings, capable of stealing their neighbor's little store of honey and feeding on it as their own! Myriads of spirits like these could dance quadrilles, on the point of a cambric needle.

DANIEL WEBSTER AS A SINGER.

(HE BOWS NINE TIMES TO JENNY LIND.)

Jenny Lind gave a concert at Washington during the session of Congress; and, as a remark of her respect and with a view to the *eclat*, sent polite invitations to the President. Mr. Fillmore, and the members of the Cabinet, Mr. Clay, and many other distinguished members of both houses of Congress. It happened that on that day several members of the Cabinet and Senate were dining with Mr. Bodisen, the Russian Minister. His good dinner and choice wines had kept the party so late that the concert was nearly over when Webster. Clay, Crittenden, and others came in; whether from the hurry in which they came, or from the heat of the room, their faces were a little flushed, and all looked somewhat flurred.

After the applause with which these gentlemen were received had subsided, and silence once more restored, the second part of the concert was opened by Jenny Lind with "Hail Columbia."

This took place during the height of the debate and excitement on the slavery question and the compromise resolution of Mr. Clay, and this patriotic air, as a part of the programme, was considered peculiarly appropriate at a concert, where the head of the Government, and a large number of both branches of the legislative department were present.

At the close of the first verse, Webster's patriotism boiled over; he could sit no longer; and rising, like Olympian Jove, he added his deep sonorous base voice to the chorus; and, I venture to say, never in the whole course of her career did she ever hear or receive one half of the applause as that with which her song and Webster's chorus was greeted.

Mrs. Webster, who sat immediately behind him, kept tugging at his coat-tail to make him sit down or stop singing, but it was of no earthly use, and at the close of each verse Webster joined in, and it was hard to say whether Jenny Lind, Webster or the audience were the most delighted. I have seen Rubini, Lablache, and the two Grisii's on the stage at one time, but such a happy conjunction in the national air of "Hail Columbia," as Jenny Lind's tenor and Daniel Webster's bass, we shall never see or hear again.

At the close of the air, Mr. Webster rose with his hat in his hand, and made her such a bow as Chesterfield would have deemed a fortune for his son, and which eclipsed D'Orsay's best. Jenny Lind, blushing at the distinguished honor, courtesied to the floor; the audience applauded to the very echo; Webster. determined not to be outdone in politeness, bowed again; Miss Lind re-courtesied, the house re-applauded, and this was repeated nine times.

ONLY.

Only one drop of water at a time that had found its way from the mighty ocean through the dike, and was slowly wearing a little channel. Only one drop! Yet if that little child in his morning ramble had not noticed it, who can tell what the terrible results might have been?

Only a stray sunbeam! Yet perchance it hath pierced some wretched abode, gladdened some stricken heart, or its golden light found its way through the leafy branches of some wild wood, kissed the moss covered bank where the tiny violet grew, and caused shades of beauty to adorn its lovely form.

Only a gentle breeze! But how many aching brows hath it fanned, how many hearts cheered by its gentle touch.

Only one stray bullet that pierced the noble soldier-boy as he trod the lonely midnight round, faithfully guarding the precious lives intrusted to his keeping, and the life-blood slowly ebbed out, and the sunbeams fell on the cold face of the dead.

Only a sentinel! And yet one soul more had passed from its earthly tenement to meet its reward at the hands of a merciful God.

Only a drop of ink! And yet it carried the news of death to anxious ones at home, and caus the tear of anguish to trickle down the furrowed cheek of a widowed mother.

Only a frown! But it left a sad dreary ache in that childs heart, and the quivering lips and tearful eyes told how keenly he felt it.

Only a smile! But ah! how it cheered the broken heart, engendered a ray of hope, and cast a halo of light around the unhappy present; made the bed-ridden one forget its present agony for a moment, as it dwelt in sunshine of joy, lived in the warmth of that smile.—*N. Y. Presbyterian.*

FROM DIXIE LAND.

From the "Dixie Farmer" we clip these paragraphs—not because the facts are new, but because it shows the people are *waking up* to practical labor these days.

HINTS FOR THE HOUSE.—Always lay your table neatly, whether you have company or not. Eat slowly and you will not over-eat.

Late at breakfast,—hurried at dinner,—cross at tea.

Keeping the feat warm and dry will prevent headaches.

Whatever you may choose to give away,—keep your *temper*.

Be at much pains to keep childrens feet warm and dry. Don't bury their bodies in heavy flannels and wools, and then leave their legs naked.

Dirty windows and curtains tied up in knots, always speak to the passer by of the bad taste and bad habit of the inmates.

When chamber towels get thin in the middle, cut them in two, sew the selvages together, and hem the cut edges.

Never put away plate, knives and forks, etc., uncleaned, or sad inconvenience is sure to arise when the articles are wanted.

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the antifriction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer on the wharf or landing places.

[Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, February 4.

Grain, &c.

What will our Grain growers do with their surplus wheat now, is the inquiry among those who have been so unwise as to "hold on" as the word was among those who were for speculation.

How unfortunate has it been for the hard laborer who led on by unwise counsels have been induced to "Hold on" to his grain in the hope of "making a *little more*."

How many of our farmers are now deeply regretting they did not sell in July and August! and even later, when they could have realized a much better price than they ever can again, even for the *next two years*.

We are well aware we might *tickle the feelings* of some persons to flatter them with the hope of a rise in prices, but such a thing is *hopeless*. There cannot be a rise that will be permanent. Some *scheme* may change the markets for a day or two, some finessing to *work off stock*. But a high price is utterly out of the question, and the reason is a plain one, our market is TOO WELL STOCKED.

With grain enough on hand in this State to load a *thousand tun ship every day till new wheat comes in*, and then a heavy surplus over, should open the eyes of our farmers, for such is the true state of the case, and we think our farmers begin to see and lament their error. Alas! to such conviction comes too late.

We call their attention to the letter of the Chico Farmer in another column, and some facts appended thereto.

Retail Prices in the Fruit Market.

Our Fruit market presents a fair appearance, when we consider that is is the middle of winter, and when in other cities no fruits are to be had, while here we have good apples, plenty of dried fruits, and some pears.

Our market is now quite well supplied with oranges and lemons, nuts and raisins, two cargoes having supplied us liberally.

There are a few pears yet to be had, and plenty of fresh dried fruit of all kinds.

DAIRY—BUTTER, CHEESE, EGGS ETC.

The Dairy trade is good though butter and eggs are lower than last month, yet the demand is good and trade brisk. Our Dairymen should lead off better in a climate like ours, and not allow so many thousands of firkins of butter to be imported hereafter, as is now done monthly.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

Feb. 6.—GOLDEN AGE—Capt. E. S. Farnesworth, connecting with the ALASKA, Capt. Gray.
Feb. 13.—COLERADO—Capt. W. H. Parker, connecting with the RISING STAR, Capt. King.
Feb. 22,—SACRAMENTO, Capt A. West, connecting with HENRY CHAUNCEY, Capt. Connor.
Feb. 27—MONTANA—Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury,

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

oct OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento or alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLA in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McL Vermifuge, they very frequently get one or other of the many worthless preparations called Verm now before the public. We therefore beg leave to urge upon the Planter the propriety and ance of invariably writing the name in full, and to advise their factors or agents that they will not other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., BURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements alent in the South and South West, have induced the venders of many worthless nostrums to claim for the parations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are ginal and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Plan Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take Vermifuge nor Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG, PA

DR. M'LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPL and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the South, where, in the majority of cases, the patient is not within the reach of a regular physican, some remedy should be provided, that would not in the least impair the constitution, and yet be safe and That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced they have been so tested, and that the result has been in every respect favorable, we call thousands to wit have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS are not held forth or recommended, (like most of the popular medi the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is to perform, and on the regular execution of which depends not only the general health of the body but the of the Stomach, Bowels, Brain, and the whole Nervous System, shows its vast and vital importance to health. When the Liver is seriously diseased, it in fact not only deranges the vital functions of the body, exercises a powerful influence over the mind and its operation, which cannot be easily described. It has connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful that it misleads more physicians, even of great eminence, than any other vital organ. The intimate which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have convinced that more than one-half of the complaints which occur in this country, are to be considered as their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Deranged State of the Bowels. Irritable and Vindictive feelings and Passions from trifling and inadequate of which we afterwards feel ashamed; last, though not least, more than three-fourths of the diseases enu under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increas pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometim pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometim taken for rheumatism in the arm The stomach is affected with loss of appetite and sickness; the bowels i ral are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull sensation in the back part. There is generally a considerable loss of memory, accompanied with a sing ion of having left undone something which ought to have been done. A slight dry cough is sometimes an ant. The patient complains of weariness and debility; he is easily startled; his feet are cold or burning, complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercises be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every re Several of the above symptoms attend the disease; but cases have occurred when few of them existed yet e nation of the body after death has shown the Liver to have been xtensively deranged.

AGUE AND FEVER—DR. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when take Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not pu or three times by next morning, take one or two more; but a slight breakfast should invariably follow th The Liver Pills may be used where purging simply is necessary. As an anti bilious purgative they are to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derange the Stomach

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is as cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient fant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and ever quiescent they may have been previously, no sooner is the constitution invaded by any of the numer of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too happens that a disease otherwise easily m aged by proper remedies, when aggravated by that cause, to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be expelled loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-han with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with a flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the up occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nauses and violent pains throughout the abdomen; bowe s irregular, at times costive; stools slimy, not unfrequently with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by cough sometimes dry and convulsive; uneasy and disturbed sleep, wi grinding of the teeth; temper but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPE UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to w in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectu viding the symptoms attending the sickness of the child or adult warrant the supposition of worms being th In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MER IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened wate morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to palming upon the public counterfeit and inferior articles, in consequence of which the proprietors ha forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McL FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follow McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRI This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have th stamped on the lid of the box, in red wax.

Prepared only by

FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver P Vermifuge on receipt of forty cents in Government Stamps.

CATTLE FEEDING STUFFS.

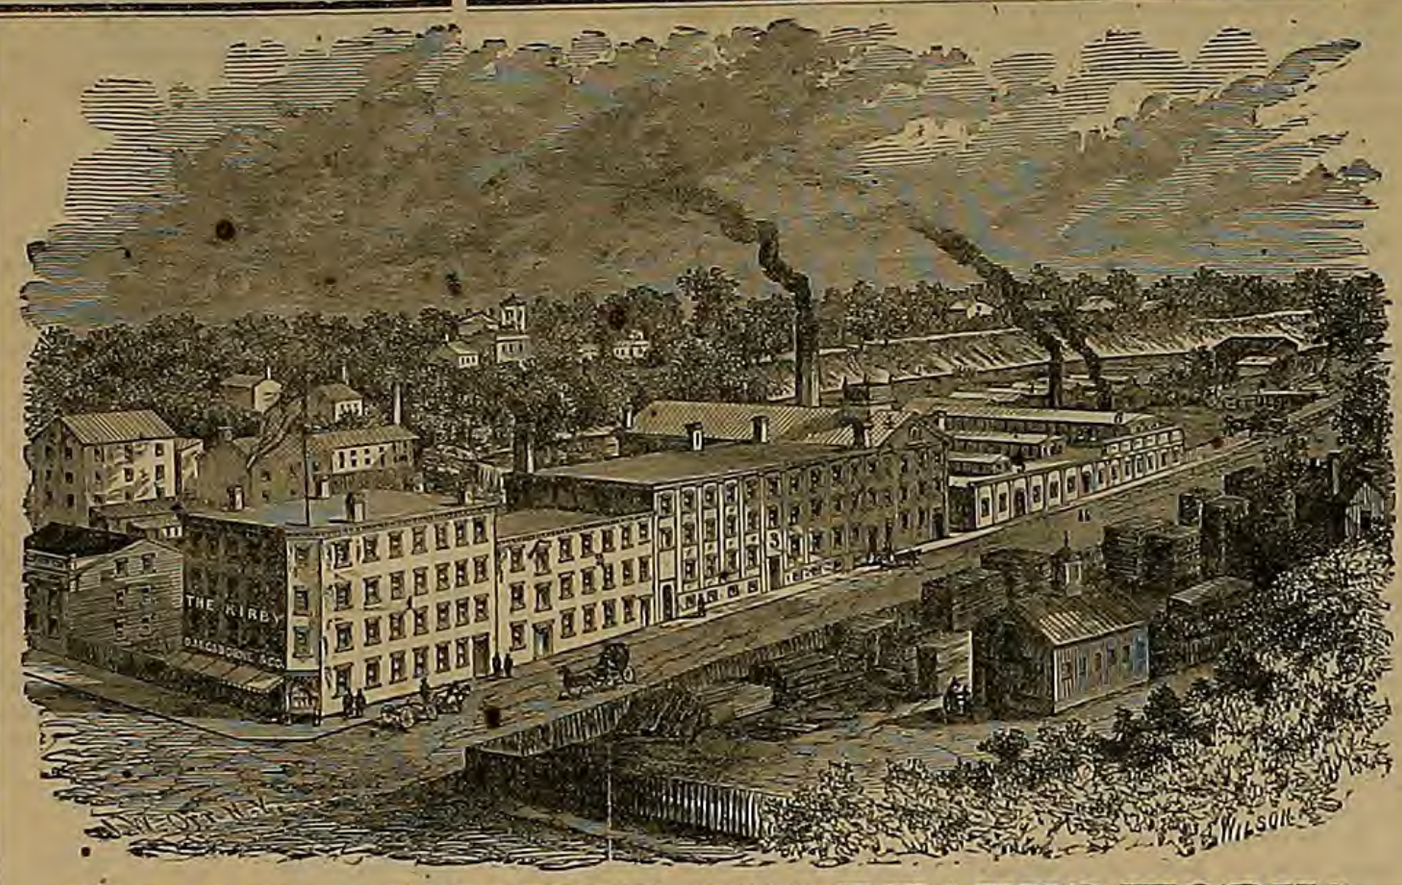
OIL CAKES.

The residuary matters of oil seeds which have been exposed to heavy pressure for the purpose of extracting the oil, are of considerable value to the agriculturist. Various seeds are crushed for the oil they contain. Amongst the most important are linseed, rape seed, cotton seed, mustard seed, poppy seed, &c. The oil is never effectually seperated from these residuary matters, hence this valuable component of a feeding material is present in a much larger quantity than in other cattle food. The feeding value of an oil-cake, however, depends very much upon the nature of the seed employed for crushing, some of these seeds containing medicinal principles, which act in an injurious manner upon the healthof animals which consume them, and are only fitted for use as manures.

Linseed Cake is by far the most extensively used oil-cake, for feeding purposes. It is highly valuable for all kinds of stock, but more particularly for animals feeding for the butcher. The great increase in the demand for this kind of cake has led to an enormous amount of adulteration. Various materials have been employed for this purpose, some of them harmless in themselves, but of considerably less value than the genuine material; while others contain poisonous principles highly injurious to animal life. Possibly, one reason why this variety of oil-cakes is now so inferior, is the great difficulty the oil-crushers experience in obtaining pure samples of linseed. Few samples of this seed can be obtained free from a large admixture of other seed. Some Petersburgh seed has been found to contain as much as 70 per cent. of impurities; Black Sea linseed, 20 per cent., and Riga seed nearly 50 per cent. In many instances it is impossible to remove all these foreign seeds from a sample of linseed; still, samples could be vastly improved if crushers were inclined; but as long as they can obtain as good a price for a cake made of impure seed as for one made of genuine seed, no improvement will be attempted. Dr. Voelcker, in a lecture on oil-cakes, stated: "From several samples of linseed, I have separated the seed and ascertained their botanical characters. In one particular sample, I counted not less than twenty-nine different kinds of weed-seeds, and among them the following, which are more or less injurious: The common darnel, which is frequently present in considerable quantities in the inferior samples of Peterburgh seed: corn cockle, which often produces very serious effect in the animal system; wild radish, which occurs in some samples of Alexandrian seeds, and is very pungent; wild rape, which is not, properly speaking, a rape, but rather a mustard, charlock, or the common wild mustard. All these are seeds which it is positively known are injurious to the health of animals; but there are others which impart a disagreeable taste to the meat of cattle fed on these inferior cakes. The Gold of Pleasure, or Camelina sativa, is such a seed, giving a disagreeable taste and also a deep yellow color to the fat of animals." A ton of linseed, or about 5½ qrs., weighing about 52 lbs. per bushel, will yield 59 gallons of oil, weighing nearly 5 cwt., or twenty-five per cent. of the weight of the whole seed the remaining seventy-five per cent. constitutes the "oil-cake." Formerly this residue was thrown aside as useless; now, however, the large demand for it at a remunerative price enables the oil crusher to sell his oil at a much lower price than would have paid him formerly. In separating the oil from the more solid particles of the seed, it is frequently necessary to put the mass two or three times through the mill; during the third time, heat is generally applied. Of course, the more completely this operation is performed the less value is the cake for feeding purposes. In Holland, some of the small millers purchase oil-cakes from France and Flanders, break them down, and work the mass into an impalpaple paste with water at a boiling point, it is well stirred, and again subjected to heavy pressure, the products resulting being an inferior cake and an oil of the lowest quality.

Besides the cake manufactured in England, we import a large quantity from France, Germany, Holland, Russia, America, and India. Practical men prefer home made cakes, it is generally fresher than foreign cake, and of a much better flavor. Contenental cake is, as a rule, much harder, contains much less oil, and is less digestible than English-made cake; besides, it not unfrequently gets damaged through bad storage before reaching this country; becomes mouldy and unfitted for cattle food. From America we obtain oil cake of first rate quality. That which is imported in barrels cannot well be excelled as food for lambs. Possibly that imported in bags is a little inferior, when it is shipped; however, in this country it seldom commands as high a price.

A good linseed cake should be reddish colored, neither too dark nor too light; if dark, rape seed may be suspected. or, if too light, poppy seed mixed with it When broken across, the smooth and shining coats of the seed should be visible. The cake should not have a tendency to split into layers. When mixed with water it ought to make a pleasant tasting jelly, thick, transparent, and free from any disagreeable smell. When linseed cake has been kept for a length of time, its mucilaginous properties, more or less, disappear. A good cake should become gelatinous on being mixed with water.



THE KIRBY MOWER AND REAPER WORKS.
Of D. M. OSBORN & CO., Auburn, N. Y.

OUR ILLUSTRATION.

We present our readers this week with the very fine illustration of the *Kirby Mower and Reaper Works*, at Auburn N. Y. Messrs. D. M. Osborne & Co., are the Proprietors of this immense Implement Manufactory, the buildings of which cover over 200,000 square feet, and is the largest Manufactory of the kind in the world.

This establishment employs nearly three hundred skilled mechanics, and has the capacity for turning out fifty machines complete every day.

We give the descriptions of the several departments. 1. Office and Sample Rooms. 2. Wood Shop. 3. Storehouse and Paint Rooms. 4. Iron Machinery. 5 Blacksmith Shop. 6. Malleable Iron Works. 7. Foundry, and Iron and Coal Yard.

Messrs. Treadwell & Co, San Francisco, Sacramento and Marysville, are the sole Agents for the Pacific States, and we call attention to their Advertisements in our columns, of these famous Implement.

GOOD FOR HENRY WARD BEECHER.

Some time since this Genius Divine in writing to "Bonner," the Genius of "Fast Horses" and liberal expenditure, "Bonner" of the Philadelphia, Leger gives a touch of the "Richelieu" school telling "Bonner," his "Joseph," we suppose. what he, (Beecher) will do when he is Pope. Hear him.

There is one law we pray you Mr. Beecher, to enact, *everybody* should take the "California Farmer.—ED. F.)

WHEN I AM POPE.—Mr Bonner, when I am Pope, I propose some new articles of faith:

1. Every man shall be married at the age of twenty five, or show good cause for neglect of duty.

2. Every man shall annually tax himself one-tenth of his income, until the sum reaches the amount of——, to procure books, journals and newspapers.

3. Wedding gifts shall never consist of luxuries—jewels, plate, etc., but of books, and with the birth of every child, ten volumes shall be put into the library in his name.

It shall be the duty of every young married man to read aloud to his wife, at least one hour a day, for the first ten years after his marriage. But this shall not be construed to prejudice of the wife's right to read, speak, lecture, etc.

All men who lie by their books in a selfindulgent and hidden manner, absorbing knowledge without benefit to their fellows, shall be treated as bees are that hide their nests—smoked out and their nests broken up!

However, I will not tell you what other laws I shall promulgate, for fear I shall lose votes and fail of becoming Pope.

THE SNOW CLAD HILLS.

This morning our Sister City, Oakland, appeared like a beautiful woman in her "Bridal Robes." The hills in the back ground, even down to Oakland, were covered with a mantle of white and from our City presented singular sight, and one we are not much accustomed to see.

Oakland must feel particularily proud to be thus treated with a snow storm.

The king of Bravaria has ordered an International Exhibition of Fine Arts to take place at Munich this year.

THE EARTHQUAKE RIGHT OPPOSITE.

We have reason *daily* to remember the late earthquake, for our office is 'right opposite' the late "Rail Road Hotel," which was shook down and with it several other buildings and which have laid a heap of ruins to the obstruction of the street and the hindrance of business ever since.

That was a terrible shaking we had as our own office plainly evinced by the fallen ceilings overturned, material &c—Yet we are very grateful we escaped so lightly.

We have now an open space before us on the opposite side of the street of five buildings which were torn down to rebuild by reason of their shattered condition, the space is about 140 feet. We speak of this now, for as we sit writing at our desk, as the great weight used in driving the piles falls upon the head of the pile, we feel a very smart *little earthquake* at every blow, and we sit at a distance of 150 feet across the street. Now if the blow of this little block of iron falling upon the pile that distance, makes so distinct a *shake* at this distance, what must we expect, when "mother earth" has her "stomach out of order" seriously, and struggles in one of her mightiest throes hereafter."

ADULTERATED LIQUORS.

Can we not stay these abominable adulterations, this wholesale manufacture of liquids that drive men to *Insanity*, to *Madness* and to *Murder* even?

Let any one inquire into the cause of these evils and they will soon find, that it *is not* the use of *pure liquors* that alone causes these crimes, bad as the habbit of a love of drink may be, but it is of the *fiery poisons* which are constantly put into the liquors call Wine, Brandy, and Whisky.

Let any person make an investigation, let them look into the matter and they can easily learn that here in our very midst, these vile compounds are made, and the *daily occurence* of crimes in our midst fully prove that men's brains are *fired up* to commit crime.

There are compounders here, that make no secret of their business, they buy the *drugs* and *compound* the Liquors, and spurious *Wines* are made of the following materials.

Spirits, Whisky or strong liquors, to this add Sugar, Alum, Raisins, Grains of Paradise, Liquorice, Catechouc, Henbane, Logwood, and Acids, Alcanate root, and various other materials, From such materials, Brandy. Wine, and Whisky. are made or multiplied by water etc 3. 4. or 6 hogsheads for one. Well may Redskins call it "Firewater" for that is its proper name.

POISONOUS WINES AND LIQUORS.

(We give the comments of the "Boston Courier" upon these abominable adulterations.)

"Much" brandy is sold, it seems, which has not a drop of grape spirits in it, but is simply corn spirits (or raw whiskey, as it is called by some), with the flavor of brandy communicated by an artificial flavoring extract. These extracts are now easily made, owing to the advance in chemistry. The brandy color is obtained from burnt sugar. Imitation brandy, or "British Brandy," as it is known to the trade, is corn spirits doctored in this way and nothing more. It contains "fusil oil," which is the most intoxicating property in common liquors, the effects of which are "giddiness, a feeling of suffocation and headache;" and "tannin," which is an astringent, but in undue quantities injurious. The dilution in the case of these liquors is a feature as striking as are the infusions. Pure brandy should contain from fifty to sixty per cent of alcohol. "None of the samples examined by Prof. Draper," says the *World*, "contained over 38 per cent. of alcohol, and some ranged as low as 29 per cent. Brandy and whiskey, if pure, should contain no traces of burnt sugar." We proceed to exhibit some of the cases of liquor sold at "the best bar-rooms in New York," at a very handsome price, even if pure. It will be observed that in every instance but two, and those excessively diluted, it is, "an imitation brandy," which is furnished to the customers."

(We here with give the Report of Prof. Draper upon the Liquors procured at five of the *Fashionable New York Hotels.*)

METROPOLITAN HOTEL.—Samples of the brandy sold at 40 cents the glass, and of the whiskey sold at 25 cents the glass, were purchased here and submitted to Professor Draper for chemical analysis. The following is this report;

No. 6. Sample marked brandy.—Water, 66 per cent; alcohol, 34. Contains slight traces of tannin and fusil oil, and a very small quantity of sugar. Is an imitation brandy.

No. 18. Sample marked Bourbon Whiskey. Water 68 per cent; alcohol, 32. Contains a very small quantity of tannin and sugar, and a considerable quantity of fusil oil. Is fair whiskey, not sufficiently rectified, and is diluted with water.

ASTOR HOUSE.—Samples of the brandy sold at 40 cents the glass, and of the whiskey sold at 20 cents the glass, were purchased here, and submitted to Professor Draper for chemical analysis. The following is his report:

No. 13. Sample marked Bourbon Whiskey.—Water, 72 per cent; alcohol, 28. Contains a little tannin and sugar, but no fusil oil. is a very pure whiskey, except that it is diluted with water.

No. 15. Sample marked brandy.—Water, 62 per cent; alcohol, 38. Contains traces of tannin and sugar, but no fusil oil. is the best specimen, and is probably a pure brandy diluted with water.

FIFTH AVENUE HOTEL.—Samples of the brandy sold at 50 cents the glass, and of the whisky sold at 30 cents the glass, were purchased here and submitted to Prof. Draper for chemical analysis. The following is his report:

No. 12. Sample marked Bourbon whisky—Water 70 per cent. alcohol 30 per cent.: contains tannin, a little sugar, and no fusil oil. Is a good whisky and equal to No. 13.

No. 9. Sample marked brandy—Water 64 per cent., alcohol 36; contains tannin, sugar, and fusil oil. Is an imitation brandy.

DELMONICO, BROADWAY AND CHAMBERS STREET.—Samples of the Brandy sold at 30 cents the glass, and of the whisky at 20 cents the glass, were purchased here and submitted to Prof. Draper for chemical examination. The following is his report;

No. 11. Samples marked Brandy—Water 68 per cent., alcohol 32; contains traces of tannin, sugar and fusil oil. Is an imitation brandy.

No. 3. Sample marked Bourbon whisky—Contains considerable tannin, the largest quantity of sugar and a little more fusil oil than No. 4.

ST. NICHOLAS HOTEL—Samples of the brandy sold at 40 cents the glass, and of the whisky sold at 30 cents the glass, were purchased here and submitted to Prof. Draper for chemical analysis. The following is his report:

No. 16. Sample marked Bourbon whisky—Water 70 per cent., alcohol 30; contains the largest quantity of sugar, a little tannin, and the largest amount of fusil oil after No. 17.

No. 20. Sample marked brandy—Water 70; alcohol 30; contains a small amount of tannin, sugar, and fusil oil, with raisin and plum flavor. Is an imitation brandy.

We call attention to the following facts which we gather from Pensylvania. also.

DRUGGING LIQUORS.— "There may be seen daily, on Chestnut street, Philadelphia, a man clad in faultless apparel, with a great Diamond upon his breast, vainly endeavoring to out glitter the magnificent *solitaire* upon his finger. In a German University he learned Chemistry and not even Liebig knows it better. His occupation is the mixing and the adulteration of liquors. Give him a dozen casks of deodorized alcohol, and the next day each of them will represent the name of a genuine wine or a popular spirit. He enters a wholesale drug-store, bearing a large basket on his arm. Five pounds of Iceland Moss are first weighed out for him. To raw liquor this imparts a degree of smoothness, of oleaginousness, that gives to imitation brandy the glibness of that which is best matured. An astringent called catchu, that would almost close the mouth of a glass inkstand, is next in order. A couple of ounces of strychnine, next called for, are quickly conveyed to the vest pocket; and a pound of sulphate of zinc (white vitriol) is a silently placed in the bottom of the basket. The oil of cognac, the sulphuric adid and other articles that give fire and body to the liquid poison, are always kept in store. The mixer buys these things in various quarters. They are the staples of his art."

EXPOSURE OF ADULTERATED LIQUORS

Recent examinations that have been made in New York by Prof. Draper, and published in the World, show that the greater proportion of all the Brandies, Whiskies, and Wines, are adulterated and made up of poisonous compounds, and we suppose New York is not the only city where these poisons can be had.

We copy from our exchanges, some of the reports recently made, and these we should think would make those who have drank at, even the *'fashionable places"* at 40 & 50 cts. per drink feel cheap.

The "World" in reporting as above, says:

The "World" has been pursueing not only the adulterators in liquors, but Tea & Coffee, Candies &c, and the vile compounds that have been eaten as substitutes, should awaken public attention. I these things are done in New York extensively, can we suppose the same things are not done here? We give the article on "Tea" that lovers of his gratifying beverage may take warning.

Agriculture.

CRANBERRY CULTURE IN NEW JERSEY.

Mr. A. B. Crandell, New York, sends to the Country Gentleman an interesting account of a visit made by himself and some friends to the cranberry district of Ocean County, New-Jersey, in September last. They took steamer from New-York to Port Monmouth, railroad to Tom's River, and thence a drive of fifteen miles "in one of the strange bye-ways which abound in the vast forests of New-Jersey; it wound around like a sheep-walk, was so narrow that the bushes brushed the wheels, and the limbs of the trees formed a long, low arch over head; there were no houses to be seen, and no voices to be heard," Their destination was the residence of Mr, E. R. Spaulding, who has "a pleasant little cottage, with a cleared space of twenty acres or more around it. The land is a sandy loam, and in quality not much above the medium of ordinary South Jersey soil. The clearing was made four or five years ago. There is now a vineyard of six acres. The varieties grown are Clinton, Delaware, Hartford Prolific and Concord. Only the latter, occupying about two acres, is yet in bearing. These vines are set four by six feet, trained to stakes, and at date of our visit they were loaded with luscious clusters. Estimating but five pounds to each vine, and 1,815 vines to the acre, we have a crop of nearly two tons, certainly a handsome yield, and evidence enough that the 'scouted section, will produce grapes. Mr. Spaulding gave us prima facie evidence, too that it will produce corn at the rate of sixty five bushels shelled, to the acre—a result accomplished by the aid of a mossbunker in each hill at planting. This fish makes a valuable fertilizer, and is plentiful in Barnegat Bay and all along shore. Numerous fine pumpkins were interspersed among the rows of corn, and just a little one side, melons—and *such* melons! There were experienced 'tasters' in our party, and the ravages made were proof positive of excellence of quality. Fortunately the quantity was not deficient. Mr. Spaulding also had a good crop of sweet and common potatoes, and we left him and his extension table more than ever disposed to agree with those who think and speak kindly of 'the barrens.'

Next morning we looked about among some of the cranberry meadows which abound in Ocean County. At Tom's River, Dr. J. R. Shrive has over seven acres in full bearing. In 1865, he got a crop of 1,100 bushels; in 1866, 1,000 bushels; in 1867, 1,930 bushels. The average price was $11,50 per barrel. Of course this result made the Doctor feel pretty jolly, but, like the goodnatured Oliver, he was not *quite* satisfied; so, during the past season, he put in eleven acres more. In the words of Virgil, 'Oh, fortunate medicine man, if you did but know it!'

Mr. A. H. Mylin has at this place a bog of five acres, eight years old. Last year it yielded 1,590 bushels, and he estimates this year's yield at 1 000 bushels, the falling off being accounted for by the ravages of the grasshopper—an enemy, by the way, from which cranberry growers have not suffered previous to last summer. Mr. Mylin lives at Lancaster, Pennsylvania and comes down occasionally 'to view the spot.' I saw him going away with a bright face, notwithstanding the deficiency in his crop. 'Four thousand dollars from five acres!' Even *this* is not a disagreeable juxtaposition of figures to have running through one's mind as one sits in the car, looking out at the autumn landscape, over which there comes a shiver, giving suggestion of the cold wind which will soon rob forest and field, and go up and down the street, and round and round the house, and pine piteously at the window to be let in. Alas for those who have no such thoughts to warm them!

At Manchester (a name signifying 'more cranberry,') we found some fine meadows. In the vicinity of this place there are about a hundred or two acres in partial or full bearing, of which Thomas Hooper has nine, Albert H. Davis twelve, Mr. McAumack eight, Capt. Hobbs seven, Judge James sixteen, A. P. Stanton forty, Davis & Trowbridge sixty, and John Torrey, Jr., seven. We gave special attention to the latter, it being near at hand and among the best. The proprietor is runing for State Senator, but he found time to furnish the following statistics: Bog put out in 1864; cost to prepare and plant, $1,520,99; cultivation, alteration, flood gates, etc., to date, $1,664,44. He stated that much of this expense might have been spared had he known at the outset as much about the business as at present. The first yield was in the fall of 1865, when he gathered six barrels, which sold for $58,78. The crop of 1866 netted $800; of 1867, $1,600, of 1868, expected to net $2,600. This bog will not be in full bearing before its seventh year: The chief points to which particular notice was called, were first, the thorough system of irrigation; second, the covering of the runners by scattering sand over them, leaving only the fruit-bearing uprights above the surface, thus gaining millions of new rootlets, relieving the parent plant, and securing better and hardier fruit and more of it: third, the freedom of the bog from all grass and weeds, and the evenness of growth, so that the appearance is that of a well-kept lawn newly mown. The meadow was certainly beautiful, and with its high, sod-covered embankment, and its ripening fruit, it did look, as our bard suggested, like a red picture of Plenty, set in a rustic frame of green and gold.

We were shown over several other meadows by Gen John S. Schultze, to whom we became largely indebted for much valuable information concerning the culture of the cranberry, of which information I will at some time make a note for your readers. Gen. Schultze, after winning high honors in 'the recent unpleasantness,' turned his sword into a pruning hook, (a wise example for other wearers of the blue,) and he is now gaining notable conquests on the field of peace. His own meadow was just ready for planting at the time of our visit, It certainly appears a model of tasteful, thorough and accurate preparation, and every detail, even the minutest, showed skill and the best judgment. Gen. Schultze believes in doing a thing in the best possible manner, and persons who contemplate similar ventures would do well to learn of him. He is likely to have the handsomest and most productive bog in the country. It is ten acres in extent; the lines of plants are mathematically straight from one side to the other, and the area is divided, by sub-ditches, into sections of a half acre each. His arrangements for flowing have been carefully looked after, and the entire expense will be about $225 per acre. Several other parties are putting in new meadows at Manchester, among whom are Messers. R. C. Browning, of 'Universal Wringer' celebrity, and W. L. Allison of the Working Farmer.

A low estimate, from data gathered, would place this season's cranberry crop, in and near the two villages mentioned, at not far from 15,000 bushels, worth at least $100,000. In the course of two or three years, as the bogs come into fuller bearing, these figures must be trebled. And all this on land which not so very long ago was thought to be almost worthless!

Our pleasant journey took in Bricksburgh, where Mr. V. S. Holt had first class crops of corn, potatoes, melons, tomatoes and other 'confirmations strong' that good can come out of this Nazareth of New Jersey."

THE FARMER ON THE SAFE SIDE.

The farmer is apt to think the professional man, or the merchant, lives an easy and luxurious life. In many instances their families may do so; but with the eminent and successful man of law or science—the artisan or merchant himself—such a supposition is a great mistake. There is not under heaven's broad canopy a more laborious class of men than these. Labor of body and of mind are theirs, and that incessant. See them early, late, in season and out of season—their whole energies devoted to their several callings without rest or intermission—and far too frequently to the premature wasting of life itself. It is no wonder that such industry directed by good education, (and by this term education I mean the entire training of the boy to manhood in its extended sense), and stimulated by a laudable ambition, should lead to success. Yet with all these appliances the labors of such men are often disastrous, and if not so, after a life of anxiety, their toils too frequently end with but the means of a slender support. Compared with these, the toils of the farmer are light. Physical labor he endures, it is true, and oftentimes severe labor, but his mind is easy. He enjoys sound rest, and good health. He has much leisure; in many cases more than is for his good. He has abundant time to discuss politics, law, religion—everything, in fact; but on what relates to his own profession, I lament to say, his mind seems less exercised than on any other subject. Now let the same early education be given to the young farmer of an equally acute intellect, that is given to him who chooses professional, mechanical or mercantile pursuits—educate each in his own line; let them start fair; apply the same thoughts, investigations, energy and toil, each in his particular sphere, and beyond all question, agriculture will, in the aggregate, have the advantage—and for this reason, if for no other, there are but few contingencies connected with agriculture. Its basis is "the firm set earth," stamped with the Divine promise, that while it remains, seed time and harvest shall continue; while commerce and trade, mechanics and arts are liable to extraordinary and continued accident. Look at the devastation by flood and fire—or ship and cargo upon ocean, lake, sea and river; conflagrations in towns and cities, and the thousand other casualties which almost daily occur, all of which are a dead weight upon labor and capital not agricultural, and the risks of the husbandman are scarce one to ten in the comparison. Rely upon it then, farmers, you are on the "*safe side*," Continue in your noble calling and take your position among the sons of men, as the second creators of wealth.—*Massachusetts Ploughman.*

FORTY POUND TURKEYS.—A Mr. Pierce, of East Windsor, Mass., told the New York Farmers' Club recently, that turkeys weighing forty pounds are not uncommon in the eastern part of Massachusetts; and that he saw one at the New England fair a few years ago, said to weigh sixty pounds. To this the Brandon Farmers and Mechanics' Club reply that they don't believe this kind of turkey exists in that state, or in New England except upon paper. The President of that Club last year offered $25 for a forty pound turkey. He received "lots" of letters about fancy poultry at fancy prices, but no one claimed the $25. The Secretary now offers, in behalf of the club, $50 for a turkey cock weighing forty pounds and two hens weighing twenty-five pounds each. We don't expect to hear that the money is taken at a very early date.

—A gentleman addressed his servant: "James I have always placed the greatest confidence in you; now tell me James, how is it that my butchers bills are so large, and I always have such bad dinners?" "Really sir, I don't know, for I am sure we never have any thing nice in the kitchen, that we don't send some of it up to the parlor;

A farmer without "gumption," is like a rudderless ship at sea. By "gumption," we mean *practical tact*, which is absolutely indispensable as an important element of success.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

30-24 STOCKTON, SAN JOAQUIN COUNTY.

Miscellaneous.

TRUE'S

IMPROVED

POTATO PLANTER

This is, undoubtedly, one of the most valuable machines, adapted to Agricultural purposes, ever introduced.

It Saves the Labor of 1 Men in Planting Time.

Makes its own furrow, cuts the potato in such slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly and does all this as fast as a horse can walk over ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a boy, plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all summer and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attention to his other spring work, which would otherwise be overwork him or be left undone.

The undersigned have the sale of this Grand Labor Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with

Particulars and Catalogues can be had at our office

WARREN & CO.,

320 Clay street, up stairs

INVESTMENTS

MADE IN HOME INSTITUTIONS PROMOTE THE general prosperity of the State. It is therefore the interest of all who reside on this coast, in effecting insurance on their lives, to give the preference to

Valuable Patents FOR SALE.

We invite the attention of energetic Mechanics to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a handsome return for labor and capital can be made from.

WARREN & CO.

EARLY GOODRICH POTATO

Important to Market Gardeners and the Agricultural Public.

The Undersigned, having growing and tested the above Potato for two seasons, have no hesitation in pronouncing it far superior to any other grown on the coast, for an early Potato, and now offer it for sale. It is very early (from three to four weeks earlier than any other) good size, white skin, smooth eyes, white flesh, superior table quality, and very productive.

L. F. or F. SANDERSON, San Jose, Cal.

Agents in San Francisco—GRIFFITH & ELLIS, 225 Washington street, one door below Front; and G. SILVESTER, No. 317 Washington street. 30-1

To Take Charge of a Place.

A young man with some capital (from $500 to $1,000) can hear of a good opportunity to take charge of a nursery place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

None but a steady and industrious young man need apply:

The applicant must be able and willing to work, and have a love and taste for rural life. To such a person a good chance can be given.

Address G. A. B.
30-20 Care of FARMER Office.

Horticulture.

THE DEAD BEE.

BY LU BILLINGS SPALDING.

The bed was a snow white daisy,
Where the little creature died;
Its sacks half filled with honey,
And its thin wings open wide.

Its tiny heart ceased beating,
While toiling for its hive;
And it left a useful lesson
To many a human life.

The daisy drooped and faded,
But it had not bloomed in vain,
For a weary little worker
Had on its bosom lain.

And its feeble might of honey,
Had been given glad and free
To the worn and weary struggler,
The dying little bee.

And when with doubtful vision,
I see no part for me,
I think upon the daisy,
And the little withered bee,

PLANT THE VINE.

No country in the world, certainly no newly discovered or newly settled country of simply *twenty-years old* has ever made such rapid progress in Fruit growing, and especially in the "Culture of the Grape" and in the "Manufacture of Wine" as CALIFORNIA. That "Vine Culture" and "Wine making" is certainly destined to become an extensive and profitable business in California, is beyond a doubt now, a *fixed fact*.

From all the information we can gather from European countries, there seems to be a steady onward decay of the Vineyards, the Vines are more or less diseased everywhere, and this disease spreads and grows more virulent; destroying, not only the *crop*, but the *vine also*.

Our 'Vine growers' are so immersed in their daily routine of business, that they do not allow themselves time to read upon their business and its interests, and thus gain important information upon this subject, which information would be of great value to them in their profession.

Vine growers must bear in mind, that a good Vineyard, even for the *sale of grapes* at the low figures of $20 per ton, delivered at the press, can be made very profitable.

California is, and must be, a great place to grow the Vine. Circumstances will soon occur which will astonish all, for there can be no doubt but that upon the opening of the *Pacific Rail Road*, our choicest fruits will be sent East, and the demand for our grapes which being two and three months in advance of theirs must throw the advantage in favor of California. Then instead of $20 per ton, growers can look for 20 and $30 per 100 lbs for all early grapes, and a high price for all fruits

Vineyards will advance in value, the Fruit will advance in value, and Wine will advance, and grape growing will be profitable, no better investment than Vine growing for the next Twenty years.

NEW FRUITS FROM SEED.

This Journal has for years counselled our Fruit growers to give their attention to the raising of NEW FRUIT FROM SEED.

By the reports in our Horticultural Journals, from the old States, we are continually reading the accounts of NEW FRUITS, and of their SUPERIOR QUALITY. There is no doubt of their great excellence and worth, for we have secured many kinds of these new Raspberries, Blackberries, Currants, Strawberries; etc., yet why should *our State* depend upon other States when California could raise her own *New Fruits*? Why will not our Orchardists try and see what they can do?

Whoever will give a few years to the business of raising NEW FRUITS will be sure to make a fortune. There can be no doubt of it. Amateurs can try. All that is needed to be successful, is to have a taste for it. Plant seed of the best fruits, and *Orchardists* can spring new kinds by hybridization. Let them read the excellent article on HYBRIDIZATION, by the well known Pomologist, the Hon. M. P. Wilder, on this subject.

A fortune can be made by originating new fruits and new vegetables, more certain and enduring, than by any speculations in Mining Stock.

NEW POTATOES FROM SEED.

Why should California with the very best climate and soil in the world, depend upon *other States* for NEW VARIETIES of Potatoes or Vegetables, when we can *beat the world* if we only try. All that is needed now is for our Potatoe raisers to save the *Potatoe Balls* of the newest and best sorts, such as Goodrich, Harrison, Early Rose, Chili, Sebec, etc. and plant the seed.

We always have seed from the celebrated Potato Farm advertised in our columns, and there is no reason in the world why California should not have NEW SEEDLING POTATOES that would rank as high as any other Potato known.

—"My dear," inquired a young wife of her husband, on his return from business, "have you seen the beautiful set of walnut furniture which the Smith's have bought?" "Hem, no my love, but I have seen the *bill*, and it quite satisfies me."

in all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

MESSRS. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed. We will make liberal Cash Advances on Merchandise consigned to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco

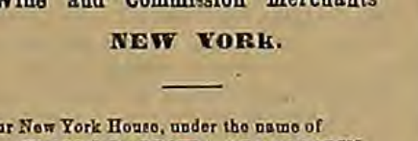
WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required.—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates.

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurius Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet 30-12.



GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles, and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.

IN THE EASTERN STATES.

LEARN HOW TO GROW

Small Fruits:

Raspberries,
Blackberries,
Strawberries,
Currants,
Gooseberries, etc.

Many *New Varieties* have, within a few years been brought out, which far surpasses the old varieties; such, among Raspberries, are the

Clark, which we place at the head of the list of tried varieties;

Davison's Thornless Black Cap, an entirely thornless black Raspberry, of very distinct habits of growth. Excellent fruit;

Prosser, a competitor for the position the Clark has taken. Stands dry Summers well;

Philadelphia, most productive

Doolittle Black Cap, extensively planted for field cultivation;

Cattawissa, good flavor, red; bears two crops annually. Have seen it with ripe berries and blossoms at the time of our first snows, about November 20.

AND MANY OTHER VARIETIES.

Among *Strawberries*, the *New Varieties* are

Charles Downing,
Dr. Nicaise.
Nicanor,
Durand, etc.

All these varieties are described in the New Edition of our

"Manual of Grape and Small Fruit Culture."

This neat little Pamphlet, containing full instruction how to cultivate all these different varieties of Small Fruits. It contains full descriptions of the New Blackberries,

WILSON'S EARLY and KITTATINNY,

together with a new White or Cream-colored variety, which will be brought out this fall. Also,

HOW TO GROW BLACKBERRY PLANTS.

Last Fall we disposed of over 250,000 Blackberry Root Cuttings. We have heard of but few instances, where they did not grow. We sent thousands of them to customers, by mail, as an experiment, to prove they could be sent safely as far as California. We sent a package to Colonel Warren of the "California Farmer."

Our Pamphlet, containing Price List of our stock of Plants and Cuttings, can be obtained by calling at the office of the California Farmer, or by addressing Col. Warren, Editor California Farmer, San Francisco, Cal.

We have 50 acres devoted to the culture of Small Fruits not all cultivated yet; 20 acres in Strawberries; 10 acres in Raspberries; 7 acres in Blackberries; 2 acres in Grapes.

WARREN & CO., *California Farmer Office*, are appointed Special Agents for our Nursery Stock, where orders can be left to secure them to customers this season. Orders should be sent at once.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE.

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, grower as the Doolittle or the Miami, but still it is good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS, making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

Farmer Office 320 Clay street, San Francis

IMPORTANT TO NURSERYMEN, GARDENERS, AND AMATEUR FLORISTS.

We beg to announce the arrival of the choicest and best assorted collection of

RARE SEEDS,

ever received on this coast. They have been selected with the greatest care, from the first houses in Europe, and are comprised of

EVERGREEN, AND DECIDUOUS TREES AND SHRUBS, RARE AND BEAUTIFUL PERENIALS, BIENNIALS, ANNUALS, ETC.;

also, new and choice Vegetables; the assortment is worthy the attention of all who admire the beautiful; and also the particular attention of gardeners who are anxious to secure something rare and new in the Vegetable kingdom.

We shall send them out in small parcels or individual packets, so that many may have the chance of securing the collection. Orders executed in rotation, and carefully packed for mailing any distance.

Persons remitting us five dollars, will have collections of seeds sent them, worth intrinsically double the amount.

WARREN & CO.,

FARMER OFFICE, 320 *Clay St.*, San Francisco.

VICK'S

Floral Guide for 1869.

The first edition of *One Hundred Thousand of Vick's Illustrated Catalogue of Seeds* and *Guide in the Flower Garden* is now published. It makes a work of 100 pages, beautifully illustrated, with about 150 Fine Wood Engravings of Flowers and Vegetables, and an

ELEGANT COLORED PLATE,

A BOUQUET OF FLOWERS.

It is the most beautiful, as well as the most instructive Floral Guide published, giving plain and thorough directions for the

CULTIVATE OF FLOWERS AND VEGETABLES.

The Floral Guide is published for the benefit of my customers, to whom it is sent free without application, but will be forwarded to all who apply by mail, for Ten Cents, which is not half the cost. Address

30-22-4t JAMES VICK, Rochester, N. Y.

New Strawberries, Raspberries, Grapes &c

We have just received an invoice of NEW STRAWBERRIES, RASPBERRIES, BLACKBERRIES, &c., to which we call the special attention of all who desire the Newest and Choicest Vines and plants known. The following varieties received:

Each and every Premium to be at regular Gold Prices, and the Premium to be selected by the winner.

We hope these offers will be so appreciated that we shall have the earnest co-operation of many friends, and to all who shall interest themselves we shall be ready to fully remunerate their kindness.

Sample copies will be sent, when desired, to those who wish to canvass among their friends.

Address COL. WARREN, Editor.
or WARREN & CO., Publishers

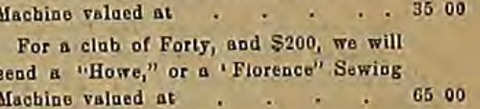
VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,
tf *Farmer* Office.



Horticultural Premium

New Vines and Plants.

With a desire to extend the cultivation of the *New* and *Rare Varieties* of the *Raspberry*, *Blackberry*, and *Strawberry*, we offer the following

PREMIUMS:

For every new subscriber and $5 two plants of the Thornless Raspberry, and two plants of the Kittatinny Blackberr

For two new subscribers and $10 we will give two plan each named above and one dozen plants of the Jucunda Strawberry.

For four subscribers and $20 four plants each of the Raspberry and Blackberry, one dozen of the Strawberry, and two Doolittle Blackcap Raspberry.

For five subscribers and $25 the same premiums as for four and four plants of the Doolittle Blackcap Raspberry.

For a club of ten and $50 we will give one dozen Davison Thornless Raspberry, one dozen Kittatinny Blackberry, ha dozen Doolittle Blackberry and fifty Jucunda Strawberry.

These premiums will enable beginners to secure these new and rare plants, which are now worth their weight in silver.

Subscribers can also secure our November and December numbers of the *Farmer* and the entire year of 1869

WARREN & CO.

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance*. We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

The California Farmer.

SAN FRANCISCO:
THURSDAY EVENING.....FEBRUARY, 11 1869.

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, [illegible] Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for *one* insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facia* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office.

Prang's Beautiful Chromos.

Those who wish to see these most beautiful pictures and who wish to order the same, can see a large collection of them at the

"FARMER OFFICE."

Those which are advertised by these Art Publishers, can nearly all be seen at our office, as we have received copies, and they are, indeed, beautiful pictures. We have them on sale. WARREN & CO.,
Farmer Office.

Country Homes Wanted.

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will [illegible] them if they communicate with this office immediately.

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Address the FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once at our office, or addressing EDITOR FARMER.

STORMS, RAIL ROADS BRIDGES, &c.

The present wintry storms will thoroughly test our Rail Roads and our Bridges and our country roads; and we think the recent storms will convince Rail Road Companies, Bridge builders, and Supervisers of our Counties and Towns, that whatever is worth doing at all is worth doing well, and that these institutions are not merely to be built for a 'sunny clime' as we naturally call California.

After the experience of so many years, and so many losses by storms, we should naturally suppose that all new constructions would be built with some reference to the *storm seasons* they are to contend against, but year after year the same losses come and the same work is done over again. When will our people learn wisdom.

We are aware that on the mountains on the Pacific Rail Road, the difficulties to contend against are fearful indeed. It is a poor feeble mortal contending against the congregated power of all the natural elements of the wintry season, the whirlwind and the tempest in all its wrath; snow, rain, hail, all combined in their greatest power, and there the best of human calculations and human efforts, may fail, but in our lower valleys, in many places when roads and bridges are carried away, it is the result of a miscalculation and of poor work, work temporarily done—*half done*, which means—not done at all.

The many years in which we have been subjected to these storms, should awaken more thought and skill in the works neccessary for protection of life and property; for as we have often said, although old Californians have seen some pretty rough storms, *wey ma see storms yet* that will make us *feel* that all former ones were light compared to them. These are now sent to *bid us prepare* for what is yet to come.

We ask every true and reflecting mind to look round our city and see the *preparations of our buildings now* to guard against the calamities of Earthquakes. Was it not the *Earthquake* that caused this work of preparation? Why should we not prebare for storms for the same reason? If we think the earthquake demands we should build our houses and stores earthquakes proof, why then should we not build our bridges and Rail Roads storm and flood proof? These are questions for those who are subject to loss and ruin by such events, to decide.

INSURE! INSURE!!

While our Journals tell us of the misrule of those in authority, and the *gross neglect of our Police to protect property*, it is the first duty of every citizen to see that their property is *protected* by an *Insurance Policy*, and that, too, by such a company as to make it a *real* Policy of Insurance, for if any person is a reader of our daily papers, they will see that fires *were never* more frequent, nor more calamitous than at the present moment, and and there is but *one way to be safe*, and that is, to be fully insured at a *good sound Office* where the stock-holders are all responsible and solvent men, then you are safe.

In times too like the present, when 'death stalks abroad at noon day' when our citizens old and young, are falling on the right hand and the left, it is all important, that those who are bound by family ties, those especially who have those dear to them, dependant on them for support, that they should provide for any sudden change in their circumstances, for although they may be in a very prosperous business, to stop it suddenly may cause such losses and changes, as to leave those they love penniless, therefore *one of the first duties of all such persons* is to *Insure their lives* for the benefit of those dependent on them. A little reflection must convince every reasoning man of this truth.

Reader! have you a wife or children who look to you for this protection? If so see that your your *property is Insured.*

Reader! have you these loved ones whom to leave destitute would embitter your last hours?—Then go to-day and secure a *Life Policy for their good.*

Now you ask, where shall we go to get Insured? We answer, we have many good sound Companies in our city, where to be insured would be safe; and their Policies as good as gold. We, however, refer you to the *Pacific Insurance Company.* It is truly *Californian in Name*, and composed of *true Californians*—men of wealth and integrity, men *worth millions*—and a Policy of this Company is *beyond all question, safe.*

The Pacific Insurance Company is *the* place *to Insure your Property.*

For a Life Policy, we point you to the California Life Insurance Company of our City. This too, is composed of Californians and their wealth, and a sound and wisely managed Institution and also beyond question, safe.

We can also point you to the Pacific Life Insurance Company, another of our Home Institutions, and also composed of and sustained by our best men, and their Capital. This institution is well and wisely governed, and to these institutions we can point with pride and pleasure as being sustained by our own people, and for the best and greatest good of our State, and for this reason above all others we deem it one of our first duties to call the attention of our readers to the great importance of *Insurance for Property and for Life.*

ST. VALENTINE'S DAY.

This noted day occurs next *Sunday*, but the day will be observed on *Monday*, and while the day may be perpetuated, and the pleasures and sports connected therewith observed, it would be much better for public taste and intellectual culture and advancement of the great mass, if the ridiculous and really trashy stuff was *rejected* altogether from sale or use, it is much to be regretted that so many persons *claiming to be respectable*, and *Parents too*, should ever encourage the sale of so much *vile* trash.

This day might be used beneficially, if only good and pure words and messages were thus transmitted from friend to friend; Then this day would speak for good.

THAT SIDE OF LEATHER.

Two weeks since we spoke of a large side of leather, we should have said a FULL HIDE, as only dealers understand the term, hides being tanned and dressed in *half sides* generally, this is a *whole hide*, and one of such a remarkable size, that the excellent and perfect manner in which it has been dressed and finished whole, demand a special notice.

This hide measures *one hundred and fifteen square feet*, finished—the length of the skin is now *twelve feet*, measuring from where it joined to the horns, to the rump—the measure round the body or width of it, is 10 feet and 6 inches.

This skin or hide was tanned and finished by R. Ward & Co. Newark, New Jersey, one of the largest and most extensive Tanneries in the United States, and we believe, *the oldest house* in the business.

This hide is the largest ever tanned, split and finished, we think in America, if not in the world, and having been finished in a superior style and without blemish, reflects the highest credit upon Messrs Ward & Co. for their skill—When we say it was *split*, it will be understood by those in the trade, but to those not acquainted with the Leather *trade*—it is, this entire hide was *divided* in its thickness, without a cut or blemish, so we say it was *skilfully* accomplished, as was done with this hide.

This *splitting hides or leather*, is a process to prepare it for what is termed ENAMELLED LEATHER, used for the covering of Coaches, Buggies and the best kind of carriages, and this superbly finished hide, is almost as soft, pliable and brilliant, as the finest morocco.

The price paid by Mess Ward & Co. for the hide as it came from the Ox in its rough state, was *Fifty Dollars*—the value of this one split, now at Mess Maine & Winchester's, at the ordinary price of enamelled leather (30c per foot,) would be $34 50—and Mess Ward & Co. had *one* or maybe, *two* more splits, from the same hide, which, the inner being less in value, might give them some $70 to $80 value in all, sufficient an amount to repay cost, as this experiment was made, *not* for profit, but to see how large a hide could be successfully completed, and their experiment, has been most triumphatly accomplished by them and greatly to their credit, as the usual size of hides cured and finished in this way, contain about *sixty feet*, while this is about double.

We certainly hope our own tanners and workers in hides and leather, will call at Mess Maine & Winchesters and see this trophy, and then go to work and see if by another year, they cannot equal our Atlantic workmen.

We hope Mess Maine & Winchester will reserve this splendid piece of workmanship to exhibit at the MECHANICS EXHIBITION this fall, and we feel confident *Mr L. Miller* of the *California Market*, will have the FAT OX IN 1870, from whose body shall be taken the *Hide* that shall *eclipse even* this present superior specimen, for CALIFORNIA workmen will not rest satisfied to be the *second rate* in the skill of manufactering.

We shall wait to see what will happen in 1870.

THE VALLEJO RAIL ROAD

One of our correspondents travelling on this route recently, furnished us the following, on a trip up on the evening train:

"Travelling in the night afforded but a poor opportunity of procuring information about the road and surrounding country, other than what could be gleaned through persistent enquiry of travelers, and parties having passed through the country before. Through this means I discovered—

That the "Junction" contains but one house, but lots are being rapidly sold, and great anticipations are being entertained of its soon being built up, though in a moderate degree.

"Davisville," which promises to become quite a thriving town on the line of the Rail Road, containing about one hundred houses, for the most part dwellings, several *whisky mills*, and one or two stores, is improving slowly from the fact that the Rail Road having been continued through to Sacramento, renders that place of secondary importance, being but a *way station*. Improvements however, are going on steadily, with moderate prospects.

Then, Puta Creek, a small stream situated back of Davisville, fordable in the dry season, forms an item of interest in the appearance of the surrounding country, and supplies moisture to the extensive Fruit Orchard immediately adjoining it, and owned and cultivated by Mr. Davis, the party from whom the "town" derived its name. This Orchard is said to be very fine, containing a complete variety of all fruits grown in this country, and of the best quality.

THE RAIL ROAD.

From its hasty construction, and considering the flat and marshy country through which it is built, does very well but is open to great improvement. The road is necessarily rough, and in some places is decidedly soft, the cars at times running through water. Another year, however, with constant application, will undoubtedly place the road in good running condition, and competent to compete with any other road in the State. Owing to the small amount of travel the Company run but one passenger car. Officers appear attentive and obliging, but somewhat oblivious to the fact, that a car when full of people, *requires ventillation.* However, time will teach them experience.

Hoping these few notes will suffice under the circumstances, I remain, yours, &c. P.

Since the above was sent us, this road has been severely tried in the 'soft' places, but under the circumstances, and the great power of the recent storm, we think the road has stood the trial well. ED. F.]

The human heart is like a feather bed—it must be roughly handled, well shaken, and exposed to a variety of trials, to prevent it becoming hard and knotty.

SUGAR BEET, AND BEET SUGAR.

We are having many letters of inquiry, upon the subject of growing the Sugar Beet and making sugar from the same, and, in order to reply to our numerous inquiries on that subject, we have taken special pains to collect such information, as is of importance to all who wish to engage in this enterprise.

We learn from George Gordon Esq., of the Sugar Refinery, whose experience and knowledge enable him to cope with the subject understandingly, that there is quite a misconception upon the minds of many persons who talk "Beet Sugar." relative to the beet, its properties, culture, &c.

Mr. Gordon it will be remembered, was in Europe recently, and of course fully understands the matter of Beet Sugar. Mr. Gordon brought from Europe two lots of pure Beet Seed, he gave away some 100lb for experiment, another lot was lost on the voyage of importation. The following rules should guide all who plant the sugar beet, for the purpose of making sugar.

The *Seed* should be sown in April, in warm, rich, sandy loam, *not* on clay or wet adobe land. We know the beet will grow anywhere and to a monstrous size, for we saw them a few weeks since, at San Jose that was of the enormous weight of 125lb, but they were coarse grained and large enough to make a respectable "dog kennel," but to *make sugar*, they should be on land that will produce them to average from 4lb to 6lb each, these are the kind that will contain the Saccharine juice, and chrystallize readily.

Lands that receive the washings from the mineral hills, have so much of the saline and alkaline matter, as to destroy the chrystalizing qualities, and *syrup* only can be made of such beets, but beets raised on the coast range, are much better and chrystalize readily.

Beets sown in February should not remain in the ground after October, as, from experiments made, should they loose their best properties. Sugar can only be made from beets planted at the right time, in the right soil, and harvested at the proper time, and beets raised from pure seed of the average size named; a large portion of the seed sold as Sugar Beet Seed, is not worth a straw being a mixsure of many kinds, hybridized in the blossom; *pure imported seed only* can be relied upon.

Growers should bear in mind, that the Sugar Beet particularily, (and other beets and several other rooted plants,) take up the saline and alkaline properties of the soil rapidly and therefore the Sugar Beet should never be planted on lands containing these properties in a prevalent quantity.

Experiments have been made to test the quantity of saccharine juice in the beet, with the following result:

Beets pulled in September	only 2½ per ct.
" " in early October	3½ "
" " 1st November	5 "
One lot choice well grown	7 "

The value of good beets, raised as recomended above, weighing 4lb to 6lb firm and solid, will generally bring $6 per ton for making sugar; large and coarse roots are fit only for stock.

To avoid misconception, we would say to those who so frequently write and ask us to go to the Sugar Refinery and see what Sugar Beets will bring there, we answer, Mr. Gordon *does not buy Sugar Beets.* The Sugar House is for *refining* purposes only, they can take Beet Sugar and refine it, but they do not make Sugar from the Beet, nor do they buy the Beet roots. We make this statement save time for all parties. *Sugar Refining* has has nothing to do with Sugar manufactoring, it is a totally different matter.

Those who design to make *Beet Root Sugar*, should have in each locality, adapted to growing the *Beet properly* for this purpose, a tract of about 1500 acres, this would supply one establishment, and this matter should be arranged beforehand, to prevent any loss and disappointment to the grower and manufacturer, as it is too apt to be the case that in all these *New Enterprizes*, men engage in them to make money only, and sometimes they have more *money* than *knowledge*, i. e. they have more *dollars* than *brains.*

PENALTY OF TOO MUCH BRAIN-WORK.

Dr, Parker, of New York, delivered a lecture a short time ago, in that city, in which he showed the evils proceeding from the transgression of the limits of their physical powers by literary men. He said:

"No man can do head-work faithfully for more than four or five or six hours. If that time is exceeded, all the phosphorus is carried off, and the man becomes irritable, broken down, and has softening of the brain. I have seen this over work in lawyers, doctors, clergymen and merchants, who have worked the brain for ten hours. They have dropped under the burden. You cannot violate the law of God with impunity. Sir Walter Scott did a large amoun of brain-work in his day, but he did not overwork himself. In his latter days, however, he became pecuniarily embarrassed, and resorted to his literary pursuits to save himself; but he worked too hard and completely broke himself down. One of the best schollars I ever knew broke himself down in his younger days, but he lived on to seventy, though he could only work some four hours a day. After these hours he engaged in vigorous exercises to keep him out of the house as much as possible, and he continued one of the best professors in the country."

CURE FOR SMALL-POX AND SCARLET FEVER.—A recent of the London *Scalpel* states that either small-pox or scarlet fever will absolutely disappear in 12 hours if the following remedy is used: Sulphate of zinc, one grain; foxglove (digitalis), one grain; sugar, half a teaspoonful; mix with two teaspoonsfuls of water. Take a teaspoonful every hour; smaller doses for children, according to age.

Editor's Chair.

Washington's Birth Day. We trust there will be enough genuine patriotism to pay a due respect to the *Memory of Washington* on the return of his "Natal Day," which will fall on Monday next.

We trust the City of San Francisco will duly honor the day.

We are obliged to defer notes on Santa Cruz and San Jose until our next.

We have some very material facts on the *Grain Market*, which will appear next issue.

Cranberry Culture.—This subject, on which a valuable, treatise will be found in our Agricultural Department specially worthy attention of all who have "Tule lands" and land that can be flooded, our Tule lands when burned off, will prove the best land for the *Cranberry.*

Farmer on the Safe Side.—Read this little article *Farmers!* there is a whole volume of truth in this short essay.

Jennie T. Hazen.—Says some smart things in our "Home Department" our Lady readers will say. "It's just so."

Horticultural Subjects.—Several of importance just now in the proper department to which we call attention.

Adulterated Liquors.—We call special attention to the articles on the subject we publish this week, they are all important.

Our Stock Raisers should read carefully the article we publish this week from the "London and Edingburgh Farmer," it is Important to them.

Acknowledgments.

Books and Magazines.—We have the handsome 'Horticultural Annual' of Orange, Judd, & Co. Publishers of the 'American Agriculturist.'

This is a very handsome illustrated Annual of 150 pages, with valuable statistics of Fruits and Flowers, and highly creditable to this well known publishing house.

The Manufacturer and Builder.—We have the new number of this valuable publication, a large quarto Monthly, fully and finely illustrated with the new inventions of the day, this being a practical Journal of Industrial Progress. Published by Western & Co., No. 37 Park Row. New York.

We have received the new catalogue of Manny Ellwanger & Barry of Rochester, N. Y., being their full descriptive catalogue of nearly 100 pages.

We have L. Scovill & Co's Farmer and Mechanics Almanac, published at Cincinnatti and New York.

American Entomologist.—We are glad to welcome this valuable work, which we are happy to see issued in such fine style, as it indicates prosperity such as a Journal of this kind should receive.

American Stock Journal.—We have No. 1, Vol. 4, and indicating success in its cause.

THE STORM.

The storm which has visited our state the present week, may truly be said to have been the most severe of any storm since the memorable winter of 61--62.

From the accounts which come to us from parts of the State, this storm seems to have been a sweeping one, as it takes its course from the ocean onward and upward, gathering strength and power in its course up and over the Sierra Nevada's where it has been felt in all its grandeur and power.

February with us in San Francisco, is usually a very beautiful season, often as bland as the "Month of Roses" in New England, this year however, it has very materially changed its character, and we have the storms and blasts of a New England easterly storm, which are so frequent in February, March and often in April there.

But why should we *not* have our share of storms? has it not been a season of storms for the last *eighteen months the world over?* and what more have we to expect to escape? We do not think the worst has past, for the mountains are piled heaven high with snow and ice, and when they melt we shall have storms and floods probably more severe than what we have yet felt.

LEWISIA REDIVIVIA.

This is a plant supposed to be found in California or on some portion of the Pacific coast. We think it is known in "Washington Territory," and also in British Columbia.

Dr Hooker of the Royal Botanic Garden, Kew, London) says: Among the plants eaten by the Kootanier, Colville, and other tribes in that part of British Columbia and Washington Territory, the beautiful Lewisia redivivia, the roots are gathered in great quantities, and boiled or eaten as *Salep* or Arrow-root. In this state they are not unpleasant to the taste, slightly bitter, but highly valued by the Indians as a nutritious food for carrying on long journeys, two or three ounces being sufficient for a man even though under great fatigue.

These Indians call it "*Spat Cum*" or "[illegible] and-ilse-ne-mare," and look upon it as one of the great gifts of the "Supreme Master of life."

We desire to learn where this root can be found, and shall esteem it a great favor if those who may read this article know of its location, will be so kind as to address a letter to the Editorial Journal upon the subject.

Special Notice.

We desire to direct the attention of our readers to the advertisement of the American Watch Company in another column. This Company is the pioneer of watch making in the United States, and has grown in the short space of fifteen years to the largest Watch manufacturing establishment in the world. This Company in connection with another important fact—that American Watches are now selling at less prices in gold than the gold prices asked before the war—[illegible] the great success of the Company.

ADULTERATION OF TEA.

The Adulteration in teas are practiced both in China and in this country. The Chinese have reduced the business to a system. Their adulterations are fo three kinds: one consists in the intermixture with genuine tea, of leaves other than those of the tea plant; a second in the manufacture of spurious articles denominated *lie* tea; and the third kind of adulteration consists in glazing, painting, or artificially coloring the surface of the leaves with various pigments. *Lie* tea is not tea at all, but the dust of tea leaves, sometimes of foreign leaves and sand made up by means of starch or gum into little masses, which are afterwards painted and colored, so as to resemble either black or green gunpowder. After the Chinese tampering, the tea has to undergo a second adulteration here. The Chinese never drink adulterated teas, and neither need we, if we refuse to buy of fraudulent dealers. There are many dealers in genuine teas in this city. Adulterating is systematized here also. We heard not long ago of one of the great tea houses buying a cargo of damaged tea from a vessel which sunk in the harbor. It was properly doctored and fixed up, and put into the market afterwards. A common adulterant of genuine teas is exhausted tea leaves. A few years ago there were eight manufactories for the purpose of redrying exhausted tea leaves in London, and several others in various parts of the country. The practice pursued was as follows: Persons were employed to buy up the exhausted leaves at hotels, coffee-houses, and other places, at 2½d. and 3d. per pound. These were taken to the factories, mixed with a solution of gum and redried. After this, the dried leaves, if for black tea, were mixed with rose pink and black lead, to *face* them, as it is termed by the trade. The same practice is pursued in this country.—*Boston Courier.*

THE PRINTERS ESTATE.

The Printer's dollars—where are they? A dollar here and a dollar there, scattered all over the country, miles and miles apart—how shall they be gathered together? The paper maker, the grocer, the miller, the tailor the shoemaker, and all assistance to him in carrying on his business have their demands; hardly ever so small as a single dollar. But the mites from here and there must be diligently gathered and patiently guarded, or the wherewith to discharge the liabilities will never become sufficiently bulky. We imagine the printer will have to get up an address to his widely scattered dollars something like the following:

"Dollars, halves, quarters, dimes, and all manner of fractions into which ye are divided, collect yourselves and come home! Ye are wanted! Combination of all sorts of men that help the printer to become a proprietor, gather such forces and demand, with such good reason, your apearance at your counter that nothing short of a sight of you will appease them. Collect yourselves, for valuable as you are in the aggregate, single you'l never pay the cost of gathering. Come in here in a single file, that the printer may form you into a battallion and send you forth again to battle for Him, and vindicate the Prinier."

Reader are you sure you haven't a $5 or $10 of the printer's dollars sticking about your clothes?

Setting Forest Trees.—Three years ago last spring, I took up several small elms from a thick growth, (they were from two to four inches through, and from twelve to fifteen feet high) and transplanted them. I cut the top of the trees off, broke a piece of glass as near the size of the tree as I could, and placed on the top. I then put a piece of woolen cloth over the glass, brought it down six or eight inches over the end, and tied with woolen yarn. The sprouts started out close up to the top, and on one, a sprout started within half an inch of the glass, broke through the cloth, and in two years grew eighteen inches. Every tree remained perfectly sound. I left one tree without protection, which died.—*From an Eastern Exchange.*

A woman may be of great assistance to her husband in business by wearing a cheerful smile upon her countenance.

Good fortune—the possession of happiness.

Waltham Watches

The "P. S. Bartlet" movement, with extra jewels, Chronometer balance, Patent Dust Cap, Patent Safety Pinion, and all other late improvements, in a solid 3 oz. Coin Silver Hunting case, with Gold Joints, $27 coin.
The same in 4 oz. case, $30. In 5 oz. case, $33 coin.

The "Waltham Watch Co.," movement with extra Jewels, Chronometer Balance, Patent Dust Cap, Patent Safety Pinion, &c., in 3 oz. case, with Gold Joints, $30 coin.
The same in 4 oz. case, $33. In 5 oz. case, $36 coin.

The "Appleton, Tracy, & Co," movement, with extra Jewels Chronometer Balance, Patent Dust Cap, Patent Safety Pinion, in 3 oz case, Gold Joints, $34 coin.
The same in 4 oz case, $37. In 5 oz $40.

"P. S. Bartlet, Watch in two and a half ounce. 18 karat Gold Hunting Case, $30 coin.
"Waltham Watch Co" Watch, in two and a half ounce, 18 karat Gold Hunting case, $34 coin.
"Appleton Tracy & Co," Watch in two and a half oz. 18 karat Gold Hunting Case, $37 coin
Any additional weight at $1 per pwt., or $20 per ounce extra.

We will send any of the above by Wells, Fargo & Co's with bill to collect on delivery, and give the purchaser the privilege to examine the watch before paying. All Express charges, however, to be paid by the purchaser But if the amount of the price of the Watch is remitted to us with the order, we will prepay the express charges to San Francisco ourselves. In sending money, drafts on Wells, Fargo & Co, are preferred.

We wish it distinctly understood that these watches are the very best, and with all the latest improvements and that they are in perfect running order, (a guarantee from the manufacturer accompanies each watch) and if any one does not perform well, we will exchange it, or refund the money.

Please state that you saw this in the California Farmer.

HOWARD & CO
Jewelers and Silversmiths,

Miscellaneous.

WALTHAM WATCHES.

The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch wearers, has thoroughly demonstrated the

STRENGTH, STEADINESS, DURABILITY: AND ACCURACY

of the Waltham Watch. To satisfy this class in all these respects, is to decide the question as to the real value of these time keepers.

MORE THAN 400,000

of these watches are now speaking for themselves in the pockets of the people—a proof and a guarrantee of their superiority over all others.

THE SUPERIOR ORGANIZATION

and great extent of the Company's Works at Waltham enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is necessary.

WE ARE NOW SELLING

Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

THESE TIME PIECES

combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country, or in Europe, only those were finally adopted with severe testing by the most skillful artisans in our works, and long use on the part of the public demonstrated to be essential to correct and enduring timekeeping.

Among the many improvements we would particularize:

The invention and use of a

CENTRE PINION,

of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and Tempered Hair-Springs,

now universally admitted by Watchmakers to be the best, are used in all grades of Waltham watches.

ALL WALTHAM WATCHES

have dust proof caps protecting the movement from dust and lessening the necessity of frequent cleaning, necessary in other watches.

OUR NEW PATENT STEM-WINDER

or keyless watch, is already a decided success, and a great improvement on any stem-winding watch in the American Market, and by far the cheapest watch of its quality now offered to the public.

TO CALIFORNIANS

and others living in portions of the United States where watchmakers do not abound, watches with the above mentioned improvements which tend to insure accuracy cleanliness, durability and convenience, must prove invaluable.

Every watch bearing the trade-mark of Waltham is guaranteed to be a thoroughly reliable time-keeper,

To prevent imposition, buyers should invariably demand a certificate of genuineness.

The trade supplied by Messrs. R. B. Gray & Co., San Francisco, Cal., and generally for sale at retail by all respectable dealers.

For other facts and information, address
ROBBINS & APPLETON, Gen'l Agents.
31-4 128 Broadway, New York.

SPLENDID RESIDENCE FOR SALE,

A VERY MAGNIFICENT RESIDENCE, SURrounded with the most valuable and choice Ornamental and Shade trees, and connected with a large and valuable heavy bearing Orchard of nearly

FIFTY ACRES.

The Fruit of the very choicest kinds.

This Estate is situated upon a Country Road, in one of the finest sections of country where lands are rapidly advancing in value.

The whole Estate, comprising over

SEVENTY-FIVE ACRES

and all of the very best land.

The Mansion House.

Is of modern style, nearly new, and now well and genteely furnished.

The entrance to the Mansion is through fine ornamental and shaded drives, and all the surroundings, are of a pleasant character.

LARGE STABLES,

CARRIAGE HOUSES, and FRUIT HOUSES, and a liberal collection of

FARMING IMPLEMENTS,

make this Estate such a one as is rarely offered for sale.

To a skillful ORCHARDIST, this is a rare chance, as the product of the extensive Orchards, would pay the purchase money in three or four years.

Those who desire a

Large and Valuable Estate,

and one of increasing value, can address
31-4 EDITOR FARMER.

To Take Charge of a Place.

A young man with some capital (from $500 to $1000) can hear of a good opportunity to take charge of a new place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

None but a steady and industrious young man need apply.

The applicant must be able and willing to work, an have a love and taste for rural life. To such a person a good chance can be given.

Address G. A. B.
30-20 Care of FARMER Office.

THE KIRBY LARGE MOWER.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down again when smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way, for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with a great strain, and be very liable to break.

THIS MACHINE HAS NO EQUAL IN DIFFICULT CUTTING

It has an INDEPENDENT ACTION by Means of a Joint in the Frame, instead of the Moving Bar, so that the Knife is alway Kept in Line With the Gearing.

It is Easy Draft for Two Horses, and can Cut Heavier LODGED GRAIN without Clogging than any other Machine on the Pacific Coast.

This Machine is the same as the Combined in every particular, only the Reaping Attachment is left off, and parties buying it can afterwards buy the whole or any part of the Reaping Apparatus from the Common Reel to the Self-Rake.

This large KIRBY MOWER is the only mower that has an independent action, and can use a reel when mowing, especially in windy weather. It can be bought as a Mower, with or without a reel.

In soft, sandy, sediment land, the lifter-wheel, on account of the narrowness of its rim, will sink in quite deeply. In this case a WIDE BAND should be provided and slipped on it, which will prevent the difficulty. The wheel as it is, will run very well on hard ground. These bands with all the Extra parts, will be kept Constantly on Hand, to supply all the calls of purchasers.

As a machine for clipping mustard, or cutting back grain that grows too fast, the Kirby Mower possesses advantages over all other Mowers from the fact that IT CAN CUT AT ANY HEIGHT from the ground, and work equally well and free under all circumstances

When you order EXTRAS for this Machine, always state the NUMBER ON THE PART WANTED corresponding with the number on the plates on the list, and also GIVE THE NAME of the part when there is no number on it.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose).

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINT your guards LOW by means of the forward bolt in the pole where it bolts to the machine. IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL

Be sure to keep ALL THE NUTS TIGHT and the JOURNALS WELL OILED, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the JOINT TIGHT WHERE THE PITMAN CONNECTS WITH THE KNIFE, and then your machine will work well without trouble or expense.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

30-22—no1

New Strawberries, Raspberries, Grapes &c.

We have just received an invoice of NEW STRAWBERRIES, RASPBERRIES, BLACKBERRIES, &c., to which we call the special attention of all who desire the Newest and Choicest Vines and plants known. The following varieties received:

Blackberries—THE KITTATINY. WILSON'S EARLY.
Raspberries—DAVIDSON'S THORNLESS. DOOLITTLE BLACK CAP.
Strawberries—DR. NICAISE, nine to the pound. GOLDEN QUEEN, magnificent. GREEN PROLIFIC, rare.
New Grapes—TEN VARIETIES New Grapes.

As the amount of these new and rare things is limited, early orders only will secure them. Address
WARREN & CO.
FARMER OFFICE

IMPORTANT TO NURSERYMEN, GARDENERS, AND AMATEUR FLORISTS.

We beg to announce the arrival of the choicest and best assorted collection of

RARE SEEDS,

ever received on this coast. They have been selected with the greatest care, from the first houses in Europe, and are comprised of

EVERGREEN, AND DECIDUOUS TREES AND SHRUBS, RARE AND BEAUTIFUL PERENIALS, BIENNIALS, ANNUALS, ETC.;

also, new and choice Vegetables; the assortment is worthy the attention of all who admire the beautiful; and also the particular attention of gardeners who are anxious to secure something rare and new in the Vegetable kingdom.

We shall send them out in small parcels or individual packets, so that many may have the chance of securing the collection. Orders executed in rotation, and carefully packed for mailing any distance.

Persons remitting us five dollars, will have collections of seeds sent them, worth intrinsically double the amount.

WARREN & CO.,

Home Miscellany.

FATHER, TAKE MY HAND.

The way is dark, my Father! Cloud on cloud
Is gathering thickly o'er my head, and loud
The thunders roar above me. See, I stand
Like one bewildered! Father, take my hand,
And through the gloom
Lead safely home
Thy child.

The day goes fast, my Father! And my soul
Is drawing darkly down. My faithless sight
See ghostly visions. Fears, a spectral band,
Encompass me. Oh Father take my hand,
And from the night
Lead up to light
Thy child.

The way is long, my Father, And my soul
Longs for the rest and quiet of the goal;
While yet I journey through the weary land
Keep me from wandering. Father take my hand
Quickly and straight
Lead to Heaven's gate
Thy child

The path is rough, my Father! Many a thorn
Has pierced me; and my weary feet all torn
And bleeding, mark the way. Yet thy command
Bids me press forward. Father take my hand
Then, safe and blest
Lead up to rest,
Thy child.

The throng is great; my Father! Many a doubt
And fear, and danger compass me about,
And foes oppress me so, I cannot stand
Or go alone. O, Father! take my hand,
And through the throng
Lead safe along
Thy child.

The cross is heavy, Father! I have borne
It long, and still do bear it. Let my worn
And fainting spirit rise to that blest land
Where crowns are given, Father take my hand,
And reaching down
Lead to the crown
Thy child.

PASSING AWAY.

It is written on the rose
In its glory's full array—
Read what these buds disclose—
"Passing away."

It is written on the skies,
Of the soft blue summer day;
It is traced in sunset's dyes—
"Passing away."

It is written on the brow,
Where the spirits ardent ray
Lives, burns, and triumphs now—
"Passing away."

JUSTICE.

Carlyle says in this God's world; with its whirling eddies and mad-foam oceans, where men and nations perish, as if without law and judgment, for an unjust thing is sternly delayed, dost thou think that there is therefore no justice? It is what the fool has said in his heart. It is what the wise in all times were wise because they denied and knew forever not to be. I tell thee again there is nothing else but justice; one strong thing I find here below—the just thing, the true thing. My friend, if thou hadst all the artillery of Woolwich marching at thy back in support of an unjust thing, and infinite bonfires visibly waiting ahead of thee to blaze centuries to come for thy victory on behalf of it, I would advise thee to call Halt, to fling down thy baton and say, "In God's name, no!" What will thy success amount to? If the thing is unjust, thou hast not succeeded, though bonfires blazed from north to south, and bells rang, and editors wrote long articles, and the just thing lay trampled out of sight to all mortal eyes, an abolished and an annihilated thing.

AN ANALYSIS OF FOOD.—It is stated that a hungry man who sits down before a pound of beefsteak, tender, juicy and an inch thick, and eats it, will find upon analysis that sixty-five per cent. of his steak was water; that eighteen per cent. will go to give him an aldermanic fleshness, and that fourteen per cent. is assigned to warm him and make him feel comfortable on a cold day. Of the flesh forming ingredients, according to Dr. Playfair, every one, on an average, requires ninety-two pounds annually to keep up a proper bodily condition. If it is not obtained from steaks, then it must be secured from something else. Cheese is a great flesh former, (30 per cent.) and taken with beer speedily conceals all traces of unsightly bones. Two ounces of flesh formers per diem will keep a man alive if he is not forced to labor, but hard labor requires six, or the body will run short of starch and sugar, and go behindhand in health and strength. In 100 parts of wheat there are 10 pounds of flesh, but there is nearly double the amount in the same quantity of oat-meal.

SIMPLE AND PERFECT CURE FOR BURNS.—Take essence of peppermint and whiskey, in proportion of one part peppermint and three parts spirits, and apply with cloths, and it gives perfect relief instantly. Peppermint and sweet oil is equally good, put on with cotton. This should be always on hand, whenever there is danger from such accidents, as it acts like a perfect charm, and will not fail to relieve.

THE LITTLE ONES.

A row of little faces by the bed,
A row of little hands upon the spread,
A row of little roguish eyes all closed,
A row of little naked feet exposed.

A gentle mother leads them in their praise,
Teaching their feet to tread in Heavenly ways,
And takes this lull in childhood's tiny tide,
The little errors of the day to chide.

No lovelier sight this side of Heaven is seen,
And angel's hover o'er the group serene;
Instead of odor in a censor swung,
There floats the fragrance of an infant's tongue.

Then, tumbling headlong into waiting beds,
Beneath the sheets they hide their timid heads,
Till slumber steals away their idle fears,
And like a peeping bird each face appears.

All dressed like angels in their gowns of white,
They're wafted to the skies in dreams of night;
And Heaven will sparkle in their eyes at morn,
And stolen graces all their ways adorn.

HOW TO MAKE MOTHER HAPPY.—"Why mother, how bright and cheerful you look to night! What has happened?"

"I feel very happy my dear, because my little boy has really tried to be good all day. Once when sister Katie teased him and he spoke quick and cross to her, he turned round a moment after, of his own accord, and said he was wrong and asked her to forgive him. I believe I should grow young and never look tired or unhappy again, if every day my little boy and girl were as thoughtful, unselfish and loving as they have been to-day."

Here's a grand secret for you little ones. And now that you know how to make mother happy, may you keep her face always full of sunshine.

THINGS A MAN CAN'T DO.

"Jennie T. Hazen," in the *Chicagonian*, says there are some things a man can't do, as follows:

Some woman, in a sudden burst of ingenousness, has acknowledged that there are some things a man can't do, and expresses unbounded admiration for the men who do these things so deftly.

Well, what if they can do two or three things better than a woman? I, for one, am not going into ecstacies over them, nor will I make a standing exclamation of myself, they can "do up" a bundle and carry an umbrella.

Women can do a hundred things that they can't, but they never think of making a great fuss over it.

One thing a man can't do is to own up frankly that he can't do everything better than a woman can. Another thing a man can't do is to carry "the baby." I've tried them, and I know. You just take one—a baby, I mean—and "do it up" in the blankets and shawls, all snug and nice, and give it to Joseph to carry, while you are putting on your sacque and hat, just keep your eyes on the baby, and you will see an ominous squirming in your bundle, and hear certain half smothered—but to you well understood sounds. Upon investigation, you will find the baby red in the face, and its heels where its head ought to be. You take it and shake it up a little, give it a soft pat here and there, and restore it to him "right side up."

Will he acknowledge it was his fault? Will he confess he don't know how to carry the baby?

Thirdly, as our good parson used to say, about the time he ought to have said "seventeenthly and lastly"—he cant hook up a ladies dress, at least he could not years ago, when ladies' dresses hooked up in the back. There was always three or four hooks and eyes that I could not reach, and times without number I've called upon "my John" to hook them.

The good, clumsy fellow would fumble away with fingers that were all thumbs, while he grew red in the face with his efforts to make the "plagued thing hitch," giving it up at last with "hang the things! Why don't you have buttons as we do?"

Let me think! What else is there that he can't do? He can't make tatting, or crochet; he cant wear crinoline, nor manage two yards of trail; he can't wear a "love of a bonnet," or a balmoral shoe; and last, and best of all, he can't say "No?" to an offer of marriage, and that's the blessedest privelege we women have.

APPLE PUDDING.—MR. EDITOR,—Seeing in your paper a receipt for apple pudding, allow me to say, as far as my experience proves, the very best kind of crust for boiled pudding is simply a little salt in the flour and scald with boiling water, not pouring so much as to make it soft and sticky, but rather dry; let it cool roll out; then put a layer of apples and the roll, another layer and so on three or four times; close up the ends and roll tight in a cloth, folding in the ends. put into boiling water with salt, boil one hour, and it will come out what we call a bolster pudding; take it directly from the water to the table and eat with butter, sugar and cream.

Black currants preserved and made with this crust in a dish as a pie and *boiled* as above, and eaten with cream, I consider one of the very best desserts that can be sent to the table.

TO STEW ONIONS.—Peel the onion nicely, take those of an even size, wash them, put them into a stew pan (porcelain) with no more washing than left from the washing, with two ounces or butter, pepper and salt slightly, add a stick of cinnamon, and stew slowly for fear of corching before they draw a sirup; when almost done remove the cover, and finish cooking.

Please let me know if you ever eat a better dish. ADDIE.

—*Germantown Telegraph.*

Women charm, as a general thing, in proportion as they are good. A plain face with a heart behind it, is worth a world of heartless beauty.—Men who have tried both, agree on this.

24-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal; its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to
HENRY E. CHILD,
30-22 41 Park Row, New York.

PACIFIC ANATOMICAL MUSEUM,
....AND....
GALLERY OF NATURAL HISTORY AND SCIENCE,
Eureka Theatre, Montgomery Street.

This truly elaborate and magnificent collection of all that is strange, wonderful and curious in SCIENCE, NATURAL HISTORY, AND ART, is now open to the public.

Extensive embellishments and improvements have been made. The additions will include an immense collection in BOTANY, ICTHYOLOGY, and ENTOMOLOGY.

COMPARATIVE, FLORAL, AND BOTANICAL ANATOMY will be largely illustrated, and form a leading feature of the institution. Every exertion has been used to render this superb collection the most INSTRUCTIVE, AGREEABLE, and USEFUL IN THE WORLD.

INSECT AND ANIMAL LIFE will be beautifully displayed and the celebrated Du Chaillu GORRILLA, which was exhibited ALIVE in Paris, has been added to the already vast collection of HUMAN AND COMPARATIVE ANATOMY.

Open daily from 9 A. M to 5 and 7 to 9 P. M. Sundays from 29x1

San Francisco Agency, 338 Montgomery street, corner California street, s.

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME.

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this Home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing to and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden with all manner of luscious fruits, and with a judicious care and management, the entire cost of the place could be returned again in a few years *by its productions*, can learn of the owner by applying to the Editor of the Farmer. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco at Gold Value, will be received in part payment and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN &

Miscellany.

A SONG FROM THE SUDS.

BY LOUISA M. ALCOTT.

Queen of my tub, I merrily sing
While the white foam rises high;
And sturdily wash and rinse and wring,
And fasten the clothes to dry;
Then out in the free fresh air they swing,
Under the summer sky.

I wish we could wash from our hearts and souls
The stains of the week away;
And let water and air, by their magic, make
Ourselves as pure as they;
Then on the earth there would be indeed
A glorious washing-day!

Along the path of useful life,
Will heart's-ease ever bloom?
The busy mind has no time to think
Of sorrow, or care, or gloom;
And anxious thoughts may be swept away
As we busily wield a broom.

I am glad a task to me is given
To labor at day by day;
For it brings me health and strength and hope,
And I cheerfully learn to say,
"Head you may think, Heart you may feel,
But Hand you must work alway!"

ART AND ARTISTS.

[From Watson's art Journal of Jan 9 and other sources we glean the following upon art and artists.]

It is stated that Rosa Bonheur, *brushes* eight thousand francs into her pocket yearly.

The Peerless Parepa-Rosa will give her second Grand Concert at Steinway Hall, on Friday Evening, January 15th. The excitement to hear this admirable and popular artist, was evidenced by the over flowing audience at Steinway Hall, last evening, Friday, and as appetite grows by what it feeds on, we may expect that the second concert will prove as brilliant a success as the first.

BEAUTIFUL PAINTINGS.—There are now on exhibition at Springfield, Ohio, a group of three small paintings in oil which are very creditable achievements in art. The finest of the three is a beautiful view on Lake George. Another is some Domestic Fowls, and the third a cluster of Apple Blossoms, all three are the work of a pupil of professor Manzon's; and were executed at the Cooper Institute in this city.

MUSICAL JOKE.

Billings, the celebrated musical composer, boasted that there was no point connected with the science of music that he did not understand. A wag sent him a note, requesting an interview with him on a particular day, to consult on a difficult question of music, which he said no other man could answer. Billings promptly met him, and said to him: "Whatever your question may be, I pledge myself to answer it, as there is nothing connected with music that I have not mastered." "My question is an important one," replied the wag, with the most serious face imaginable; "indeed it affects the whole world, and has never yet been answered" "Let me hear it," said Billings, growing excited. "It is this," said the other; "when a man snores in his sleep through two octaves, so that the whole house can hear it, do you consider the sounds produced to be vocal or instrumental music?

TRUE INDEPENDENCE.—To lead a truly independent life one must live out of their own individuality, guided by a conscientious and religious life, for how useless it is to rely for happiness on "the world." If you would pass through life in the easiest possible manner shrink from nothing in itself virtuous and rational. Venerate that which is inherently changelessly right. Release your mind from the trammels of conventionalism, and suffer no other restraint upon your acts than that imposed by conscience and the Bible; so you will insure a sweet immunity from countless petty cares and annoyances, acquire an ever-increasing strength of character, and build on a firm and durable basis that inward respect for yourself, which is incalculably more to be valued than the changeful approval of artificial people.

VERY WELL TOLD.—The next morning the judge of the police court sent for me. I went down and he received me cordially; said he had heard of the wonderful things I had accomplished by knocking down five persons and assaulting six others, and was proud of me. I was a promising young man, and all that. Then he offered a toast: "Guilty or not guilty?" I responded, in a brief but eloquent speech, setting forth the importance of the occasion that had brought us together. After the usual ceremonies, I was requested to lend the city ten dollars.

PRESERVATION OF FLOWERS.—The following is a very simple way to keep flowers in a vase fresh for a long time:

Put a tablespoonful of powdered charcoal into the water which is to recieve the flower-stalks. The charcoal will settle immediately on the bottom of the vase, and the water will remain liquid. This done it is not necessary to renew the water or the charcoal for several days. The flowers will keep their freshness and their perfume, and will look and smell as fine as though just brought in from the garden.

—A white boy met a colored lad the other day and asked him what he had such a short nose for. "I spects so it wont poke itself into other peoples busines."

—A chap from the country, stopping at a hotel sat down to dinner. Upon the bill of fare being handed to him by the waiter, he remarked: "I don't care about readin' now—I'll wait till after dinner."

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facia* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office.

AUZERAIS HOUSE,

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum;

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

GRAIN WAREHOUSES.

SANSOME AND CHESTNUT STREETS,

SAN FRANCISCO.

THESE MAGNIFICENT BRICK WAREHOUSES—the largest in the State—are now completed and ready for the reception of storage. The facilities for receiving and discharging are unsurpassed, there being a water front of six hundred feet. Insurance and Advances effected at the lowest rates.

For storage, apply at the Warehouse to
THOMAS H. DOUGLAS,
Storekeeper and Wharfinger.
Or to I. FRIEDLANDER,
112 California stret.

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer on the wharf or landing places.

[Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, February 11.

Grain, &c

Our Grain Market presents no very material change in rates from last week, and none materially, save less demand, and this we presume to arise from the severe storm which has prevailed for weeks past more or less severe.

It will be seen by those who glance at our Dailies, that in their commercial columns they all admit a dullness and the tendency to a decline in prices of wheat and flour.

Flour has rarely been at the low figure now ruling.—Good superfine can be had at 4 to $4 50, and extra flour 4 75 to $5 25 of various brands. The retail of extra Family flour is from 5 25 to $5 75.

We learn from the Millers, that although they keep on grinding it is to little or no profit. But customers must be supplied, therefore they 'keep moving.'

The continued rains will induce a still continuance of plowing and of planting too, as there can be no doubt but with the great depth to which the moisture has descended into the earth, that in many localities wheat, planted *this month* will mature finely, and barley will be planted quite late, as it is being noticed by some of our grain growers that a much too small amount was planted last year, and they are now turning their attention to putting in a crop of barley now as a clear gain, by reason of the favorable season.

As we have before remarked, our grain growers must look well to their crops and sale of the same in season another year, for there are large operatoos in the field, and they have large crops too, and when the Harvest Season comes, these operators will *make the market.*

In the first years of 'Barley planting,' the crop was frequently put into the ground as late as March, and even April, when the season was wet, and there can be no doubt but that a fine crop can be raised this year, if *planted even in March.*

Retail Prices in the Vegetable Market.

There has been a scarcity of some of the best vegetables during the week, nevertheless on the whole, we have nothing to complain of. New potatoes are coming more freely to hand. Fresh tomatoes are also arriving from Mexico, and can be purchased at the low rate of twenty-five cents per pound. Some excellent specimens of the silver giant Celery were brought to Market, also splendid specimens of Thorburns Nonpareil Cauliflowers. It is a favorite with many of our gardeners,

POULTRY AND GAME.

In consequence of the festivities of the Celestials, who are so very numerous in this free country, all the hens and chickens have been bought off by them, and at prices almost unprecedented. Of course, an occasion like the present, 'John' becomes exceedingly extravagant, consequently the high rates quoted below. Chick-realizing ten and twelve dollars per dozen, wholesale, sounds well for our Ranchmen, and as Chinese increase and multiply, so in proportion will the demand for the gallinaceous tribe increase,

DAIRY—BUTTER, CHEESE, EGGS ETC.

The prices in our butter and egg market fluctuate very much, sometimes in consequence of the large orders our merchants have for shipment up country and at others in consequence of the bad state of our roads, which almost puts a stop to communication. The difference this week may be attributed to the unusual demand for Celestial rejoicings, nevertheless at all times we have thought the prices in this department cover more profit than any other articles brought to the city.

GARDEN GROUNDS LAID OUT,

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.

Traveling.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates as given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

Feb. 6.—GOLDEN AGE—Capt. E. S. Farnesworth, connecting with the ALASKA, Capt. Gray.
Feb. 13.—COLORADO—Capt. W. H. Parker, connecting with the RISING STAR, Capt. King.
Feb. 22.—SACRAMENTO, Capt A. West, connecting with HENRY CHAUNCEY, Capt. Connor.
Feb. 27—MONTANA— Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury,

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman' and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se4 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings. Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtil further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9 50 A. M.; Reno at 4.20 P. M.; Wadsworth at 6.30 P. M. Winnemucca at 3 30 A. M.; Argenta at 8 50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12 05 P. M. Reno at 2 10 A. M. Colfax at 9.50 a. m. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6:30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermitt, Silver City, Owyhee, and all points n Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages or White Pine, and Overland Stages for Salt Lake City and the Atlantic States.

C. CROCKER,
General Superintendent

Horticultural Premium

New Vines and Plants.

With a desire to extend the cultivation of the *New* and *Rare Varieties* of the *Raspberry, Blackberry,* and *Strawberry,* we offer the following

PREMIUMS:

For every new subscriber and $5 two plants of the Thornless Raspberry, and two plants of the Kittatinny Blackberr

For two new subscribers and $10 we will give two plan each named above and one dozen plants of the Jucunda Strawberry.

For four subscribers and $20 four plants each of the Ra berry and Blackberry, one dozen of the Strawberry, and two Doolittle Blackcap Raspberry.

For five subscribers and $25 the same premiums as for four and four plants of the Doolittle Blackcap Raspberry.

For a club of ten and $50 we will give one dozen Davisc Thornless Raspberry, one dozen Kittatinny Blackberry, ha dozen Doolittle Blackberry and fifty Jucunda Strawberry.

These premiums will enable beginners to secure these ne and rare plants, which are now worth their weight in silver.

Those who send now can also secure our November and December numbers of the *Farmer* and the entire year of 1869

Can obtain SUPERIOR SEED at the

FARMER OFFICE.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLA in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine 'Dr. McL Vermifuge, they very frequently get one or other of the many worthless preparations called Verm now before the public. We therefore beg leave to urge upon the Planter the propriety and n ance of invariably writing the name in full, and to advise their factors or agents that they will not r other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., P BURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements a alent in the South and South West, has induced the venders of many worthless nostrums to claim for their parations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are th ginal and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Plant Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take Vermifuge nor Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG, PA

DR. M'LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPL and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in th South, where, in the majority of cases, the patient is not within the reach of a regular physican, re some remedy should be provided, that would not in the least impair the constitution, and yet be safe and That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced they have been so tested, and that the result has been in every respect favorable, we call thousands to wit have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS are not held forth or recommended, (like most of the popular me the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is to perform, and on the regular execution of which depends not only the general health of the body but the of the Stomach, Bowels, Brain, and the whole Nervous System, shows its vast and vital importance to health. When the Liver is seriously diseased, it in fact not only deranges the vital functions of the body, b oreises a powerful influence over the mind and its operation, which cannot be easily described. It has s connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful cha that it misleads more physicians, even of great eminence, than any other vital organ. The intimate co which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises ov passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal st or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have be convinced that more than one-half of the complaints which occur in this country, are to be considered as their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Deranged State of the Bowels. Irritable and Vindictive feelings and Passions from trifling and inadequate of which we afterwards feel ashamed; last, though not least, more than three-fourths of the diseases enu under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increas pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometim pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometim taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels i ral are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull, sensation in the back part. There is generally a considerable loss of memory, accompanied with a sin tion of having left undone something which ought to have been done. A slight dry cough is sometimes an ant. The patient complains of weariness and debility; he is easily startled; his feet are cold or burning, complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every re Several of the above symptoms attend the disease; but cases have occurred when few of them existed yet e nation of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when taken Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not pu or three times by next morning, take one or two more; but a slight breakfast should invariably follow th The Liver Pills may be used where purging simply is necessary. As an anti bilious purgative they are to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derange the Stomach

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist than consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an in fant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and however quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too often happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, bids to treatment, ludicious in other respects, but which entirely fails in consequence of worms being overlooked, even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with oc al flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upp occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy or tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nauses and v violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by cough sometimes dry and convulsive; uneasy and disturbed sleep, wi grinding of the teeth; temper v but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPE UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to war in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual viding the symptoms attending the sickness of the child or adult warrant the supposition of worms being th In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MER IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIE This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the stamped on the lid of the box, in red wax.

Prepared only by

FROM GOV. CLAFFIN'S MESSAGE.

AGRICULTURE AND PUBLIC ROADS.

[We ask the attention of the readers of the Farmer to the following Extract from the message of GOV. CLAFFIN of Massachusetts, *upon the* subject of AGRICULTURE and PUBLIC ROADS, two subjects which we hope will recieve the attention of our Legislators at the Next Session of our Rulers this winter. Old Massachusetts (God Bless her) has always cherished all her Industrial Interests and this is the cause of her present PROSPERITY.]

More than ordinary prosperity has attended the labors of the farm during the past year, and the products of agriculture are estimated at over $40,000,000. The crops of the farm, the orchard and the garden were abundant and generally satisfactory. It is gratifying to notice the gradual improvement of an interest which lays at the foundation of all wealth in any civilized community. The improved modes of culture, improved farm stock, and improved farm implements, mark the advance of a new era, when more thought, more mechanical skill, and greater scientific attainments will be applied to develope all our material resources; and when greater and more profitable results will follow the labors of husbandry. Nature has done so little for us, in comparison with her bountiful gifts to the grain-growing regions of the West, that science and art must be called upon to do more. It was a wise forethought, therefore, that incorporated into our organic law the injunction upon the Legislature to encourage the development of agriculture. This has been done through the medium of Agricultural Societies in the form of prizes to successful competitors in the various departments of farm industry. Many of these societies are undoubtedly accomplishing a good work, they stimulate energy and enterprise, awaken thought and inquiry, and spread information among the people.

Closely connected with our agricultural and other prominent interests is the system of public highways. Few things are of greater importance to a community, or a surer test of civilization, than Good Roads. Those of our fellow citizens who have visited Europe are unanimous in their opinion that our public roads are far inferior to those of other countries, where the means of easy and safe communication are better appreciated. The science of road making is apparently not well understood; or, if it is, the present modes of superintending the construction and repair of roads are so defective; that the public suffers to an extent of which few of us are aware. It may be found on investigating the cause of our miserably poor and ill-constructed roads, that the laws relating to this subject need revision, so as to give more uniformity in the construction and repair of our highways. It is evident also, that the science of road making should have a prominent place in the course of applied at Mhematics at the Massachusetts Agricultural College.

The Savannah *News* says that the prepared fibre of the Ramie plant resembles the fleece of the Cashmere goat. It is very fine, yet stronger than hemp. The stalks are cut from the field, and ginned, and the article is then ready for the market. Three or four crops can be raised during the year.

THE WHEAT GROWING INTEREST.

We take the annexed article from the Bulletin of February 3d, and the Letter of the "Chico Farmer," which they copy. We also copy from the Bulletin of February 11, their *suggestions* to our Farmers relative to themselves and their business, and while these remarks may all appear very plausable and fair, we think they rather aim a slight thrust into the "Union's tender spot, and probably a touch at the Market Review of the Commercial Herald, Perhaps they may include the 'Farmer,' as we have ventured to *advise the Farmers*, because we believe they are always desirous of *correct information*; and as correct as even the Bulletin; we believe also the Commercial Herald and Market Review, takes as much pains to give valuable information, and is as correct and reliable as even the Bulletin.

As for the Farmers, we feel satisfied that for all the past year, the advice and counsel given in this Journal has been sound, and if followed by our Farmers generally, would have resulted in a great gain to them.

It is amusing, we must say, to notice, that while the Bulletin in its *editorial* protests against giving advice relative to selling, or "holding on" to the wheat, it does not hesitate to copy from the American Agriculturist of New York, a very good article, every word of which being the very kind of counsel, that the Bulletin declines to give, and the very counsel the *Farmer* has given every month and almost every week, as the readers of the Farmer well remember.

We publish these articles to sustain those Journals that are the *real friends* of the Farmer, and those who have been desirous of their prosperity, and we think the Farmers know *who are their friends*.

The following is the article alluded to.

A WHEAT GROWER IN THE VOCATIVE, &c.—A Tehama county farmer—one, we suspect, of a pretty large class in the same condition—illustrates, in a communication published below, the advice which the *Union* has proffered so freely of late about the wheat market. The advice of that paper having been in the inverse ratio of its information, we see what comes of it, and are also able to note the value of the persistent attempts to discredit the daily quotations given by the papers of this city.

The *Bulletin*, having the best commercial facilities at hand, has not ventured to advise farmers about selling or holding on to wheat, but has been content to give the latest and most exact quotations of the home and foreign markets. And this being done, every farmer could decide for himself what he ought to do. The attempt to write down every man a knave who deals in grain in this city and to brand the quotations of respectable papers as falsehoods made in the interest of a "ring," has turned out a failure and something more. The wheat growers are out and injured But has not the ex-Secretary of the Labor Exchange had full swing in the effort to punish his enemies and reward his friends. And has not the garrulous 'Agricola' uttered his crude opinions through the same channel? Time vindicates the truth, even if it fails to sustain the ill-judged conclusions of our contemporary, or make good the losses incurred by following its counsels.

Hear what the Tehama Farmer says:—

Editor Bulletin.—I have read the crimination and recrimination that has appeared lately in the columns of the Sacramento *Union* and the *Bulletin* respecting the quotations of prices in the grain market, and like many others, my neighbors have found out to my sorrow that the editor of the *Union* is anything but a reliable prophet. Through his advice, when I could have realized last October $1 per bushel for my wheat, I held on to it to get an advanced figure, which the Union asserted wheat would surely command before the new year. The new year came, and wheat had fallen instead of rising, and still the Union said "hold on," until storage and interest have nearly compelled me to sell at any price, and yet the price of wheat declines.

Again, as one of the most potent reasons why I should still persist in holding on to my grain, the Union predicted a *drought*, and a total failure of crops the coming year, and notwithstanding the earth is saturated with moisture, still it rains, and the abundant harvest in prospect threatens to sink still lower the already deteriorated value of my last season's crop. What shall I do? I have no longer any confidence in the quotations or predictions of the Union. Is there any show of our selling out my grain to the Union, and persuading them to take the risk of the "hold on policy?"

Tehama county; Jan. 29, 1869. J. H. T.

The Bulletin of the 11th thus counsels the Farmers:

"Considerable gratuitous advice has been given to California farmers the past few months, as to the proper time for them to sell their produce, and as to what constitutes a fair price for the same.—It is quite safe to say that no well informed farmer *needs* any advice of this kind; and it is, perhaps, equally safe to say that most of our farmers are sufficiently well posted in the general markets to look out for their own interests quite as well as their disinterested friends. It is both natural and right that farmers should desire and strive to secure the highest market price for their produce.—This object perhaps is quite as generally obtained by selling at one season as at another. The most ambitious farmers do not always obtain the highest prices; indeed the reverse is more frequently true. Holders of property of any kind, whose views are always just a little in advance of the rising market, generally fail to discover when the market has reached its climax, and hence often have to sell at a much lower figure than their less avaricious neighbor. As a general remark, those who only demand a fair price for their property, in view of all the existing circumstances at the time of sale, succeed quite as often as any other class. In this connection, the following paragraph from the "American Agriculturalist" is worthy of attention.

"Sell when you can get a good price. This should be the farmer's rule, To hold produce in hope of getting extravagant prices may occasionally succeed, but it generally fails. Farmers by holding back their produce, may help speculators "form a corner," but the speculators never divide the profits. If you can get a fair price, sell as soon as you are ready. But if an article that you can hold does not bring a fair price—if it is below the cost of production—do not dispose of it—it will certainly rise. We know that there are few things that make a farmer 'feel so bad,' as to find that if he had held his produce a few weeks he could have got a much higher price. We know farmers who sold their Barley last fall at $1 50 and their Wheat at $2 25, while some of their neighbors held both and sold the Barley at $2 10 and have their Wheat still on hand. Now it is not pleasant to think that you could have got 60 cents a bushel more for the Barley, but then there is some consolation in thinking that you got 50 cents a bushel more for your wheat than you could get now.—We once crossed the Atlantic with a well known captain in a sailing vessel. Another equally celebrated captain left Liverpool on the same day.—When we took in the pilot the first question the captain asked was: "Any news of the New World?' "She reached New York three days ago.' We all 'felt as bad' at being beaten, as the farmer who sold his Barley at $1 50. But our captain remarked: "He must have taken the southern course. He has hit it for once. But it is wrong nevertheless." So we say to the farmer who got $2 10 for his Barley. He hit it for once. But the principle is wrong. Better to sell when you are offered a fair price. This same farmer had some capital hogs. They were very fat, and he was offered 13½ cents for them. He kept them three weeks longer and sold them for 10½ cents.

[Comment on the above, is needless, for it strengthens the position this Journal assumed in advising the farmers of this State, to sell, sell, sell, they *were* getting a fair average, a liberal price, and we advised them to sell, the very course indicated by the "Am. Agriculturist." ED. FARMER]

TO ORCHARDISTS.

A grand chance will be offered to an orchardist who desires to engage in RAISING FRUIT on a large scale for Exportation over the Rail Road east. A large and valuable orchard, covering over *forty acres* with the best kind of fruit bearing trees, where an income of over TEN THOUSAND DOLLARS per year can be relied upon, is now offered for sale by reason of the present owner changing his business.

A very fine and large Mansion house of modern style nearly new, and very handsomely furnished with large Barn, and Stables, Carriage house, and Sheds, Fruit house and all other buildings needed together with suitable Teams and Tools to carry on the place.

The mansion is surrounded by Splendid shade and Ornamental trees and fine finished avenues leading from the public road to the Residence.—This estate is one of the most desirable that has been offered for sale for years, and for a gentleman who desires a place ready to hand, has no superior in our State.

None need apply without ample means, as there is room for a large and permanent profit.

Apply to the *Editor of the Farmer.*

IN THE MOUNTAINS.—The snow-sheds of the C. P. R. R. have stood the storm beautifully. Trains will probaly be able to run through from Alta to Truckee by monday, There is a large force of men and fifteen locomotives with snow- ploughs now at work. The snow- sheds are a perfect protection where complete, but on the other side of the Summit they are unfinished. Another winter will bring full protection. —*Sac. Bee.*

—How did Adam get out of the garden of Eden? He was *snaked* out.

Good fortune—the possession of happiness.

BEE KEEPING ILLUSTRATED.

The instincts of the honey bee tend to a rapid increase of colonies by swarming. In a good field they increase by doubling and trebling their number anually, : if in common sized hives, of from one cubic foot to 2000 cubic inches:

Increase by annually doubling by swarming, gives 64 in seven years from one, and 512 in ten years: increasing by each colony, securing a first and second swarm anually, will give in five years, 81 from one, and in ten years, 19,636. It is not very uncommon success to double or treble colonies for three or four years. Mr. Quimby, and Mr Miner, suppose they may be doubled in ten years up to 512 colonies. In this section the highest safe limit for profit from surplus honey, would be reached by doubling from one colony in six years, and by trebling in four years, twenty seven to thirty two.

Thirty colonies is as many as can be most profitably kept on a square mile in this section. Last season (1867) there were perhaps twenty five old colonies on the square mile in my apiary; and in the two neighboring apiaries, one within ten and the other within eighty rods of mine. Mine averaged 62½ surplus lbs. in the farmers hives, and 125 in the Eureka hives; and my neighbors secured what they reckoned good returns from theirs. This season (1868) with forty colonies old and new my best hive gives but 147 lbs. against 174 from my best in 1867. and the average much below the last year. My neighbors secure but 140 lbs. from their whole twenty colonies.

My four best in 1867. gave 500 lbs, and in 1868. but 406 lbs. The community around ascribe it all to the difference in the seasons; no honey in the flowers; the poorest honey season I have ever seen, pass from one apiarian to another.

Now what are the facts? They are these! This is but an ordinary field for honey yielding flowers; twenty colonies found sufficient supply, forty colonies was two much for the field; give them an accession of equal numbers another year and one half of them will not secure enough to live through the winter. Remove half of them and the remainder will do well again," will have a good season. The truth is the field is over stocked with bees: forty colonies to the square mile cannot be very prosperous; in Albany, and vicinity in the class of hives which we call swarmers, bees will continue the process of swarming until they so far exceed the capacity of the field that one half of them fall short of winter stores. They must be fed or broken up. There is a great reluctance in lessening the number of stocks.; weak ones are preseived to go through the winter.

The result is,' quite a portion of them die, and another part are so weak as to invite the debredations of the moth, and often of the strongest swarms form the stock for the labors of the season, so many have failed; the bees prosper for a season or two, and after a little time of successful labor, poor seasons again occur, and many of the bees perish, An acquaintance informed me had kept bees 52 years commencing with one hive and going as high as 50; and several times been tduced to four swarms; He has been counted one of our most successful Apiarians because he has kept bees so long. This uncertain state of the business will be sure to result from the use of small hives, and the encouragement of so frequent swarming. To give permanence and certainty to the business we must limit our colonies to the capacity of the field. For this purpose we must introduce non-swarming hives; Effective non-swarming hives must give sufficient surplus honey box room to store all the honey gathered by all the workers all the season.

In 1866 I built four hives with box room, for 125 lbs. of surplus. They pleased me so well I called them "Eureka" I placed a swarm in each; and patented them in 1867. In that season they gave me four new swarms and five hundred lbs. surplus honey in the boxes. Thus I received from them in one year enough to pay eight dollars each for the two hives, five dollars each for the swarms, and ten dollars for the right to use in one apiary, more than twice over in one season.

The season past has not been so favorable. My neighbors within eighty rods had 140 lbs. from twenty hives. My best gave me 147 lbs of surplus and my four best 406 lbs.

Convinced that more room must be given to to prevent swarming, I have constructed hives with larger surplus box room of 150 lbs. and another size with 200 lbs, box room- From these I have had no swarms issue; and I think with 200 lb. boxes they will rarely, if ever swarm

The hive is so constructed that it may be used with movable comb frames, pars fastened in place, or moveable bars with side guides,

Two new swarms placed in my hives by a neighbor in 1868, gave 114½ lbs. surplus. Twenty five hives in his old swarming hives, gave less then 100 lbs. surplus from the twenty-five.

I have little faith in confining the Queen or clipping her wings to prevent swarming as the same disposition to swarm will be felt; the same preparation to swarm will be made, and the same delay of labor by the workers. if not greater delay.

But with ample room to store all the honey they can gather, they will quietly fill box after box with workers, as they increase in the commencement of the season, and I now have little doubt that strong colonies, that would have made two or three colonies in swarmer hives, will often give 200 lbs. of surplus or more.

Albany, N Y. JASPER HAZEN.

PROTECTING ANIMALS IN STORMY WEATHER.

Farmers, generally, do not appreciate the loss sustained in the condition and health of domestic animals by their exposure to cold rains and storms. Most animals can endure severe cold as long as they can keep dry, but their bodies becoming wet, and kept wet, evaporation commences, which carries off heat rapidly' and they are soon chilled through and through. This almost always deranges health, and most especially with milch cows, which are less vigorous and less able to resist sudden changes from heat to cold than stock not devoted to the dairy.—Most of our domestic animals will endure sudden changes from cold to heat with impunity, but the opposite is often attended with very injurious consequences. Again, even if the health of the animals is not seriously impared, a large quantity of food will be required to sustain the heat thus lost, or there must be necessarily a waste of flesh.—

On the score of economy in food, to say nothing of deranged health, it will be cheaper to house cattle from cold storms and from wet, weather it be falling rain or snow. A certain amount of food is required to keep up the temperature of the body, and in extreme cold weather the appetite is much sharper than in mild weather. The extra food ordinarily used in cold weather is not employed for laying up flesh but is consumed to make heat. It is this principle which renders it more difficult and more expensive to fatten animals in winter than in warm weather.—There is considerable difference of opinion among stockmen in regard to the winter management of milch cows. The old class of farmers insist that stock is healthier when allowed to run in the yard most of the day. While others urge that the best results are obtained by keeping cows in the stable most of the time during winter, allowing them to go out each day for water, and returning them immediately to the stable. There is no doubt bu the latter system will require less food than the other, but it is not yet fully established that such close confinement is promotive of the largest development of health and vigor even when stables are kept clean and well ventilated. In good weather stock enjoy their freedom in the yard, and a few hours from their stall in the middle or warmer part of the day seems to be more in accordance with nature, even though more food may be required to carry the animal through. But in stormy weather, or when it is extremely cold, doubtless the best place for cattle is under shelter. Nothing pays better than care and attention to stock during the winter, and if a saving is to be made both in food and health, all storms and sudden changes of temperature must be guarded against as far as possible.—*Massachusetts Ploughman.*

STRENGTH OF OUR GOVERNMENT.

In eight years the strength of the Government of the United States has increased a thousand fold. Before 1860 the doctrine of State rights had well nigh foundered the central power. Government was nothing more than a chimera. The States were omnipotent. They could do everything. The people were ignored. The Constitution settled nothing, especially if slavery were involved. Have we a Government? was the people's question when Sumpter was fired upon. Have we a Constitution guaranteeing human right? is the question they are asking to-day. We have. It shall no longer be the machine of wrong. Insist upon its perfect adaptation to the present. Let it square with the primitive charter—the Declaration. Let it be worthy of the nation and the times. Let it bhe to palladium of human rights, the glory, power, and creed of a free country, where "liberty" is not a tinkling cymbal, and where "citizenship" is not sounding brass.—*Forney's Press*

THE FIRST TRAIN THROUGH.—A car has lately been completed at the Central Pacific Shop, under the direction of Ben Welch; designed as a tender for the passenger cars which are to compose the first through train to the States on the opening of the Road. It is divided into a large number of compartments—one lined with zinc for meat, several for groceries, vegetables etc; one, with a wire door, for live fowls; large tanks for fresh water; all arranged as neatly and compactly as can well be imagined. At one end of the car there are several berths for the accomodation of the train hands. The car is strongly built, and having both rubber and steel springs, is probaly one of the easiest riding in the State. *Sac. Union.*

White Pine—A man frozen to death lately; the price of a desire for rapid riches.

Agriculture.

ASPARAGUS.

BY D. P. VAN BRUEN, NEWARK, N. J.
—*In N. Y. Horticulturist.*

There is perhaps, no succulent vegetable more generally valued for its palatable, nutritious, and healthful qualities than asparagus, which can be successfully cultivated in any climate, from the tropics to the cold, bleak shores of Lake Superior, where it is found growing wild. Asparagus is also found in its wild state in low and often flooded fresh and salt meadows, as well as in the barren salt sands of the seashore, and when brought under proper cultivation, it gives a greater return for the labor bestowed than any other production of the market garden. Its proper mode of cultivation is less understood than any other vegetable produced for table use. My first knowledge of asparagus, (when a boy,) some forty-five years ago or more, was an old bed in my fathers garden which bed was put out by my grandfather before my fathers recollection. There the asparagus was cultivated, on the same spot of ground, until about 1810, when it became necessary to have the garden in another location. The old asparagus roots were removed and carefully put out again, where they remained out until 1852, when the bed was destroyed for the purpose of erecting a building. From the time of the removal of the roots until they were destroyed, forty-two years elapsed, and from the time of the first planting of the roots by my grandfather till they were destroyed was at least one hundred years.

MANURING ASPARAGUS BEDS.—The bed was always very well cultivated; the old stocks were cut off in the fall; the bed was liberally covered with manure, which was forked in in the spring. Until its destruction, the asparagus never decreased in quality or quantity. These facts of my own knowledge are satisfactory to my mind that the limited production of asparagus is only from a neglect of its proper cultivation. I find a great variety of opinions with writers in relation to the proper mode of propagating and cultivating asparagus. Some writers say it is necessary that the earth should be removed three feet deep or more, and the bottom filled in with stone, old boots and shoes, and the earth removed should be mixed with manure and returned, and the plants or roots should be set out eighteen inches or two feet apart, and be planted twelve inches deep. Others say that six to fifteen inches apart, and four to twelve inches deep, is preferable. With such badly-balanced opinions among so many theorists, no definite mode of cultivation could be arrived at. Some ten years since, I made an entirely new garden where I now live, and always having enjoyed the luxury of asparagus without depending on the market for my supply, I determined to make a bed to suit my own views of the nature of the plant. My soil is a sandy loam. I prepared my ground with a large quantity of well-rotted manure, and divided my ground into beds five feet wide and twenty feet long. The ground was then dug up one spit deep the length of a long spade blade. Believing that asparagus required the warmth of the sun, air, and surface moisture, and having no fear that the roots would run down beyond my control, I had my bed trenched (or marked out) four inches deep and twelve inches apart. The roots were two years old, and were taken from a garden adjoining my own. They were placed in the trenches twelve inches apart, as soon as dug from the ground where they grew. Each branch of the roots was spread out horizontally, and they were all covered four inches deep. The asparagus grew apparently as well as though the roots had never been removed.

SALT FOR ASPARAGUS.—The next year I cut from the bed in sufficient quantity for my own table. Every season, when the weeds commenced growing, I sowed broadcast one half bushel of salt, and the same quantity twice afterward, as the weeds began to recover. I always have asparagus before any appears in the market-gardens in the neighborhood, and cut it every day from the time I commence until the season ends. The productiveness of my bed has increased every year and all gardeners and others who have seen it pronounce it the most prolific bed they have ever seen. The average growth of the stalks, at the time of the seeding, is five to seven feet in height. I never cut my asparagus until it has grown at least four to six inches above the ground, and we never cut it over one inch below the surface. Some writers advise cutting two to six inches below the ground. But at that depth the bottom of the stems is always tough. Prof. Mapes once stated that there were twenty-eight species of asparagus. Some writers have attempted to classify the different qualities. With my experience in raising and largely consuming the article, I think that I could quite as easily distinguish between the taste of a white hen's egg and that of a black one, as I could tell the difference in the quality or taste of the purple or blue-headed asparagus from that of any other color or species of the plant.

PLANTS.—No plant will pay the market gardener so much money for the labor as the asparagus. But remember, always grow your own roots from seed; trust not the seed-shops for roots. If once you have got a good healthy plantation, the bed will not run out for a hundred years, provided it is always kept free from weeds, and manured well I manure mine four inches deep each year. From my bed, eighteen by thirty-six feet, I take at least fifty dollars worth yearly. To those who wish to grow their own plants, it is simply necessary to sow the asparagus in drills like onions; cultivate well the first summer; if they do well, they will be large enough in the fall to set out then, or during the next spring; in two years from that time they are of sufficient strength to stand cutting.

Asparagus comes only from one common centre and hence it is not advisable to purchase old plants Many do this, thinking they can get a product so much quicker, they are mistaken, young plants are invariably, the best. Neither must the roots be planted too deep. If the roots are near the surface of the soil, the stems will start much earlier then if put a foot below, as is usually practised.

THE ASPARAGUS BEETLE.—This Asparagus beetle has become a formidable enemy to asparagus culture on Long Island, and it appears to be slowly spreading inland. It is now ten years since it made its appearance in this country, having been brought from Europe, where it has been known for a long time.

Mr. A. S. Fuller states: "when living in Brooklyn, a few years since, my asparagus beds were attacked by this beetle, and I tried salt, lime, ashes, and various other things, with scarcely any success. There is, however, one pretty effectual remedy, and that is, allow your hens and chickens to run in the asparagus beds as soon as the beetle appears. Birds will also assist in their destruction, if permitted to do so unmolested. In the fall the asparagus tops should be cut down and burned on the bed, and a little straw or other combustable material added, as many insects or their larva will be destroyed in this way.

THE PROFITS OF CULTIVATION.—Inquiries have been made of commission-merchants and market gardeners as to the money value of asparagus per acre, and their opinion is unanimous in the statement, that if rightly managed, an asparagus bed of several acres will pay a larger profit per acre than the same space devoted to any of our smaller fruits. Figures from $400 to $700 per acre have been named. When we consider how easily the crop is marketed, requiring no expensive berry baskets or crates, or the trouble of renewing the vines every three or four years, or the possibilities of loss in times of picking, because of rain etc, and that, once well established, it will last a life time, it should receive more attention. It certainly requires very rich land to grow large asparagus; but the yeald is very great, very steady; and italways commands a good price in market.

CARE OF FARM IMPLEMENTS.

Carelessness and slovenly habits are not wholly confined to any particular locality, and hence we; are not surprised to find that even among our enterprising western farmers, some indication of a want of care and economy occasionally occurring. The "Prairie Farmer" gives a statement of a correspondent, in which he says that during "a short day's ride" from home, he had the curiosity to count the instances where farm implements were left exposed to the weather, with the following result.

Twenty-six wagons, nine buggies, two gigs, thirty four sleds and three cutters, were seen standing near houses, barns or sheds, fully exposed; four plows were standing in the furrows, and twenty-threethe up road-side, turned up or laid flat; thirteen double-shovel plows, two of which lay upon an old sled, four hung upon fences, and the rest where last used; nineteen reapers were standing out, tilted up and lying in all positions. Six were under shade trees and straw sheds, and three in fields where last used. Seven mowers were backed up into the corner of fences or tilted around the hay stack with rails piled on them to keep the cattle off. Eight horse-rakes were piled upon hog-pens or broken-down wagons; six seeders sharing the fate of other things. After the owners of these implements have paid all their taxes, they may buy a new suit, as they evidently have more money than they know what to do with, judging from the freedom with which they throw it away —

[The above we clip from the "*Country Gentleman*," and we ask our readers if they do not sometimes see similar scenes in the rural districts of California, *perhaps*? it is because *our* Farmers have so much to do!—ED. F.]

RAISING CALVES.

At a late meeting of the Franklin, Mass. Farmers' Club, the President, Phineas Stedman, Esq. after advising farmers and dairy-men to raise their own calves, gave the following as his method:

The calves may be most economically fed by taking them from the cow during the first week. Having learned to drink new milk readily, skimmed milk, warmed to the temperature of new milk may be substituted gradually until, at three weeks old the new milk may be withheld entirely. Oil meal, and wheat bran should now be given, commencing with a table spoonful once a day. This should be scalded and allowed to stand a short time to swell. After a few days, the provender may be given at each meal, and the quantity increased at discretion. It is of the utmost importance that calves, and indeed all young stock be kept in a thrifty, growing condition. It is much easier and cheaper to keep a young animal growing, than to bring it again into a flourishing condition after it has, by want of care or proper food been allowed to stop growing. I prefer to rear calves which are dropped in autumn or early winter. At this season they are likely to receive better care, are better prepared to bear the cold of the succeeding winter, and until they arrive at maturity, hold an advance of several months, in age and size, over those which are dropped the following spring, while always classed of the same age. —*N. E. Farmer.*

THE MISSISSIPPI valley contains 768,000,000 acres of the finest land in the world, or space for one hundred and fifty States of the size of Massachusetts—Yet old Massachusetts with her small territory, can buy out all the Mississipi valley, with the wealth made from her well improved means.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

TRUE'S

IMPROVED

POTATO PLANTER

This is, undoubtedly, one of the most valuable machines adapted to Agricultural purposes introduced.

It Saves the Labor of Men in Planting Ten

Makes its own furrow, cuts the potato in slices as the farmer may prefer; drops them with the most perfect regularity, and covers them and does all this as fast as a horse can walk over ground that can be plowed

No intelligent farmer can fail to see the advantage with which one man can, with the aid of this machine plant six acres of potatos in a day, is of great value; because the days in which PLANTING can properly be done are very few, while he has a great deal of time and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from other machines. It affords its aid "in the right time," and gives leisure to its owner to attend to his other spring work, which would otherwise be overwork him or be left undone.

The undersigned have the sale of this Great Labor Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for the improvement, and a good Mechanic can make a fortune.

Particulars and Catalogues can be had at

Prevost on Silk Culture, from early beginning This set of Volumes would be a Library of valuable to the Cultivator of the Soil sent to Farmer Office will be promptly

Horticulture.

PRUNE CURRANTS—BLACKBERRIES, &C.

Currants, Blackberries, Raspberries, Gooseberries, and all small fruits need as much care and good attention in proportion to their size, as *large trees.*

One great reasons why this kind of fruit runs out and becomes worthless and barren, arises entirely from *neglect*, because they are *small fruits* or *small bushes*, they are supposed to grow without care or attention. This is a fatal error—*nothing worth planting is not worthy of constant care.*

Currant bushes should be carefully cultivated and closely *pruned*. All old diseased and decayed wood should be cut away, and new wood shortened back. This class of fruit should not be allowed to grow in *bushes*, but grown up in *tree form*, with clean stems and branching *one or two* feet from the ground. All buds should be rubbed off below the branches, and all *suckers* cut out around the roots.

Currants are among the *first class fruits*, and grown with care can be made productive and the fruit greatly improved, by judicious pruning.

For pruning Blackberries, Rasberries, &c. see Editorial page.

LEWISIA REDIVIVIA.

This is a plant supposed to be found in California or on some portion of the Pacific coast, we think it is known in "Washington Territory," and also in British Columbia.

Dr Hooker of the Royal Botanic Gardens at Kew, London) says: Among the plants eaten by the Kootanier, Colville, and other tribes in that part of British Columbia and Washington Territory, is the beautiful Lewisia Redivivia, the roots are gathered in great quantities, and boiled or eaten like *Salep* or Arrow-root. In this state they are not unpleasant to the taste, slightly bitter, but are valued by the Indians as a nutritious food for carrying on long journeys, two or three ounces being sufficient for a man even though under great fatigue.

These Indians call it "*Spat Lum*" or "Ptleemasd-ilse-ne-mare," and look upon it as one of the great gifts of the "Supreme Master of life.

We desire to learn where this rootcan be found and shall esteem it a great favor if those who shall read this article and know of its location, will be so kind as to address a letter upon the subject, to the Editor of this Journal.

A CHEERFUL FACE.

Carry the radiance of your soul in your face. Let the world have the benefit of it. Let your cheerfulnes be felt for good wherever you are, and let your smiles be scattered like sunbeams, 'on the just as well as the unjust.' Such a disposition will yield you a rich reward, for its happy effects will come home to you, and brighten your moments of thought.

Cheerfulness makes the mind clear, gives tone to thought, adds grace and beauty to the countenance. Joubert says: 'When you give, give with joy and smiling.'

Smiles are little things, cheap articles, to be fraught with so many blessings both to the giver and the receiver—pleasant little ripples to watch as we stand on the shore of every-day life. They are our higher, better nature's responses to the emotions of the soul.

Let the children have the benfit of them; these little ones who need the sunshine of the heart to educate them, and would find a level for their buoyant natures in the cheerful, loving faces of those who lead them.

Let them not be kept from the middle-aged, who need the encouragement they bring.

Give your smiles also to the AGED. They come to them like the quiet rain of summer, making fresh and verdant the long, weary path of life. They look for them, from you who are rejoicing in the fulness of life.

'Be gentle and indulgent to all. Love the true, the beautiful, the just, the holy.'

WEBSTER'S FAITH.—Daniel Webster was a firm believer in Divine revelation, and a close student of its sacred pages. On one occasion, a small company of select friends spent an evening at his house. Tea over, the Bible, and the relative beauties of its several parts, became the topic of conversation. When the turn came to Webster, he said: "The masterpiece of the New Testament, of course, is the Sermon on the Mount. That has has no rival—no equal. As to the Old Testament writings, my favorite book is that of Habakuk, and favorite verses, chapter iii, 17, 18: "Although the fig tree shall not blossom, neither shall fruit be in the vines; the labor of the olive shall fail, and the fields shall yield no meat; the flock shall be cut off from the fold, and there shall be no herds in the stalls; yet will I rejoice in the Lord. I will joy in the God of my salvation." This, continued Webster, I regard as one of the sublimest passages of inspired literature, and often have I wondered that some artist, equal to the task, has not selected the prophet and his scene of desolation as the subject of a painting."

Home can never be transferred, never repeated in the experience of an individual. The place consecrated by parental love, by the innocence and sports of childhood, is the only home of the human heart.

What you dislike in another, take care to correct

NEW YORK.

Our New York House, under the name of WILSON, MORROW & CHAMBERLIN, will open in New York City about the first of November ext, and will have the exclusive agency of our

WINES AND LIQUORS

in all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

MESSRS. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed. We will make liberal Cash Advances on Merchandise consigned to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco

WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required.—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates.

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD

WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurius Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet 30-12.

VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

GRAPE VINES.

Learn How Grapes are Grown

IN THE EASTERN STATES.

LEARN HOW TO GROW

Small Fruits:

Raspberries,
Blackberries,
Strawberries,
Currants,
Gooseberries, etc.

Many *New Varieties* have, within a few years been brought out, which far surpasses the old varieties; such, among Raspberries, are the

Clark, which we place at the head of the list of tried varieties;

Davison's Thornless Black Cap, an entirely thornless black Raspberry, of very distinct habits of growth. Excellent fruit;

Prosser, a competitor for the position the Clark has taken. Stands dry Summers well;

Philadelphia, most productive

Doolittle Black Cap, extensively planted for field cultivation;

Cattawissa, good flavor, red; bears two crops annually. Have seen it with ripe berries and blossoms at the time of our first snows, about November 20.

AND MANY OTHER VARIETIES.

Among *Strawberries*, the *New Varieties* are

Charles Downing,
Dr. Nicaise,
Nicanor,
Durand, etc.

All these varieties are described in the New Edition of our

"Manual of Grape and Small Fruit Culture."

The neat little Pamphlet, containing full instruction how cultivate all these different varieties of Small Fruits It contains full descriptions of the New Blackberries,

WILSON'S EARLY and KITTATINNY,

together with a new White or Cream-colored variety, which will be brought out this fall. Also,

HOW TO GROW BLACKBERRY PLANTS.

Last Fall we disposed of over 250,000 Blackberry Root Cuttings. We have heard of but few instances where they did not grow. We sent thousands of them to customers, by mail, as an experiment, to prove they could be sent safely as as California. We sent a package to Colonel Warren of the "California Farmer."

Our Pamphlet, containing Price List of our stock of Plants and Cuttings, can be obtained by calling at the office of the California Farmer, or by addressing Col. Warren, Editor California Farmer, San Francisco, Cal.

We have 50 acres devoted to the culture of Small Fruits not all cultivated yet; 20 acres in Strawberries; 14 acres in Raspberries; 7 acres in Blackberries; 2 acres in Grapes.

WARREN & CO., *California Farmer Office*, are appointed Special Agents for our Nursery Stock, where orders can be left to secure them to customers this season. Orders should be sent at once.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE.

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant a grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very similar and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicates, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS, making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

Farmer Office 320 Clay street, San Francis

LANDS

FOR SALE OR TO LEASE.

IN NAPA VALLEY

IN THE VICINITY OF CALISTOGA.

ON THE

LINE OF THE RAIL ROAD

Within three and a half hours from San Francisco.

THE UNDERSIGNED WILL LEASE FROM TEN to Thirty Acres of CHOICE VINEYARD LANDS, to competent parties, for the term of Four Years, they planting the same in Vines and cultivating them during the said term. At the expiration of the term.

ONE HALF OF THE VINEYARD

Will be deeded the Lessor for services.

ALSO, TO LEASE,

Four Thousand Three Hundred

Acres of Grazing and Grain Land, eight miles from Marysville, on the Yuba river. 2,000 acres under fence on very advantages terms

CALIFORNIA FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:
THURSDAY EVENING.....FEBRUARY, 11 1869.

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER Office are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mail, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING.

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞To those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so.

Send for Sample Papers and get up a club. Address
PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facia* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office.

Prang's Beautiful Chromos.

Those who wish to see these most beautiful pictures and who wish to order the same, can see a large collection of them at the

"*FARMER OFFICE.*"

Those which are advertised by these Art Publishers, can nearly all be seen at our office, as we have received copies, and they are, indeed, beautiful pictures. We have them on sale. WARREN & CO.,
Farmer Office.

Country Homes Wanted

There is wanted at this time, several **Homes in the Country**, in good and pleasant localions, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will them if they communicate with this office immediately

None but good bona fide sellers need app as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.

Preserve Your Sight!

BRAZILIAN PEBBLES.
SPECTACLES AND EYE-GLASSES

Mounted in fine gold, Steel and Shell Frames, accurately adapted to the various conditions of sight. Those in need of Spectacles will find my assortment the most extensive, and receive the attention of one skilled in his profession.

C. MULLER, Optician,
71 No 205 Montgomery street, San Francisco.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a our office or addressing EDITOR FARMER.

SATISFACTORY.

From the scores of letters we are receiving daily, we gather the most satisfactory evidence of the rapidly increasing prosperity of our State, in all the various branhces of industrious enterprises.

We receive many letters full of enthusiasm which warms up the very heart's blood, and drowns the shadows of murmuring, which sometimes reaches us from the political discussions, all of which tends so much to disturb the PROSPERITY which would otherwise rest upon this State like the Golden rays of the Morning sun.

We have a letter before us from one of our early Pioneers, who, as a cultivator has made the very wilderness "blossom with the Rose," for he has converted a once desert waste, into an earthly Paradise, and being deeply interested in all that relates to the best and truest interest of our State, and himself actively engaged and laboring to advance all these interests, in a *Private Letter*, upon various subjects, writes thus to us.

"It is most pleasing to contemplate the long and expanding vistas of Prosperity, ready and opening to all industrious and good people of our State.

The BREAD, the WINE, the GLOSSY SILK, have their future secured—*now* is the time to reach out a helping hand to another Great Industry,—SUGAR MAKING. Our natural advantages for this are superior to all other countries. The Beets can be sown with the advent of the rainy season and improve in quality until the advent of another; The manufacturers can begin in the month, of June, at this time the operation of *drying* can begin and continue without fear of damage from rain for at least four months; the Beet can be thus sliced up in the field where they grow, spread on the ground, thus avoiding the great outlay for sheds, scaffolds &c. and reducing the cost of transportation 75 per cent, this reduced cost, admits of their being transported from places at a distance from the factory

It requires but a *careful* and *cautious* start in the enterprise, under an *experienced head*, and soon we will be EXPORTERS OF SUGAR.

B. D. WILSON & CO'S NEW WINE HOUSE.

The well known and popular Wine House of Messrs. B. D. Wilson & Co. recently located on Jackson St., have the present week, removed their establishment, to the large and very spacious building on the corner of Broadway and Battery streets.

This building is admirably appropriate for the extensive busines this house is now doing.

This warehouse is one of the most substantial and best built warehouses in our city—it is 135 feet deep by 75 feet wide, and two stories, with high studded walls. The cellars extend under the sidewalks on each street, giving them wine cellars 145 feet deep, and 92 feet wide, high, broad, deep, and well ventilated and truly the very best in our city. The capacity of this cellar, is over 500,000 gallons.

Messr B. D. Wilson & Co. will manufacture Brandy largely this coming season—they estimate about 30,000 gallons, and their aim will be, as it always has been, to make the *very purest and best*.

The Wine department will be largely increased as from their *new* young vineyards of 75,000 vines, just coming into bearing,—their first crop, they will make about 20,000 gallons of choice wines, and from their old vineyards, they will have large products and are determined to turn out, as good wines as can be produced.

We rejoice to note the success which attends *California* enterprises—all that tends to build up our State, and no one who watches the growing importance of the *Wine* interest, but what must admit its great importance.

VIGILANTE! VIGILANTE!

'Eternal Vigilance, is the price of Liberty!' to those who look over our daily Journals and read the fearful accounts of Robberies and Murders committed in our midst almost daily, and those who read of the Assaults, the Garrotings, the work of the Incendiary, and the terific loss of property, arising from the dangers to which our city is now daily exposed; we may well remember the word VIGILANTE! for it signifies what is now needed to remove from our midst the robbers, murderers and assassins, that are gathering in upon us by the score.

It needs not the word of a prophet, to tell to what all this lawlessness is fast tending.—There is a point when once reached, *action* must be had to stay the tide of Ruin, Desolation, and Death!

It is now, we beleive, an admitted fact, that Life and Property are almost at the mercy of scores of highwaymen and escaped convicts from other places, who now infest our City, and our Police are not able to cope with them.

The present condition of our Police and general authorities, who seem to be fighting for the Spoils and Emoluments of office, are quite similarto the early days of San Francisco, and unless these fearful evils which now prevail so very alarmingly, shall be stayed, it needs no Prophets ken to see that the "Tocsin" of alarm will be sounded again, and the word 'Vigilante," will pass along our streets, quickly followed by that quiet tread of *thousands* who will rally to the "Defence of their Rights!"

THE STEAM PLOW AT OROVILLE.

[We give place to the following Note just received, hoping it may induce others to attend the trial of this New and Important Implement of the Farmers. We shall be there if possible.ED. F.]

OROVILLE Feb'y 16th 1869.

TO THE EDITOR OF THE CALIFORNIA FARMER.

DEAR SIR.—The Public Trial of our Steam Plow will take place on Wednesday Feb 24th 1869. This plow turns, and pulverizes the soil in a thorough manner. We tried it privately after these soaking rains, and it did splendid work. Farmers and Landholders are specially invited. And I hereby extend a cordial invitation to you to be present.

YOURS RESPECTFULLY, O. LOCHES.

MOUNT VERNON.

WASHINGTON'S BIRTH DAY.

The First Great Day to which our people should ever look with Reverence and Affection is the *Fourth of July*. A day that must be kept in perpetual remembrance, by every Patriot and Christian in our land. Next to this day, comes the "Birth Day of the *Father of his Country*" and this day also, should be sacredly observed too, for to *George Washington*, more than any other, cause or source of Success and Salvation of our "*Country's Liberty*," owes it's present glory, *Save always* that great power above us whose ever watchful providence ever guards us, and to which *Washington*. always looked to and relied upon, in the Great hour of need.

Yes let the day be writ.—
Love shall remember it
While earth shall last.

The Poet "Mellen," very truly speaks the sentiments that should live in the hearts of all good men.

We copy part of one stanza, a little changed, from the Poem delivered at the Centennial Celebration of Washington's Birth Day in Boston, Mass. in 1832.

My Country! O my Country! never let it be
That they who gave us Freedom, and that One
Who bore it's banner, foremost of the free,
The tried, but Heaven-encompassed
WASHINGTON," shall be forgot.

And Heaven grant we may never see the day in this land of Freedom, when those who poured out their life-blood shall cease to remember *Washington*.

The Poet, Pierpont," speaks in his Poem on the same occasion, in 1832 also, and alludes to the time when the City of Boston was in the possession of the British, and WASHINGTON, who was then stationed at Dorchester Heights," from whence he decended with his Army and Triumphantly succeeded in compelling the British forces to evacuate Boston. The Poet thus speaks of the Leader of our Armies.

"There, like an angel form
Sent down to still a storm,
Stood WASHINGTON!
Clouds broke and rolled away!
Foes fled in pale dismay:
Wreathed were his brows with bay
When war was done.
God of our Sires and Sons
Let other Washingtons
Our Country bless.
And, like the Brave and Wise
Of by-gone Centuries
Show that true greatness lies
In RIGHTEOUSNESS.

Amen! Amen! Say we, to these words and we trust that God will vouchsafe to THIS NATION now, as it shall come under the *Dominion' Power*, and *Rule* of one who like Washington, has led our Armies, that *Wisdom* to direct, that shall indeed lead to PEACE; aye Peace among our whole people. No President ever came into power since the time of Washington whose peculiar position as the Leader of our Armies, made his case so similar that of Washington, and it is indeed to be hoped that the reccollection of those days may inspire him who will so soon sit where Washington has sat, at the *Head of this Nation*, may influence and inspire him to deeds of greatness, that shall reflect Honor upon our Nation; and in so doing it will reflect Honor upon himself.

Monday next, is the BIRTH DAY OF WASHINGTON. The day we trust will be duly remembered by all; if not with pomp and outward display, at least with the grateful remembrance of Him who was "First in War, First in Peace, and First in the Hearts of his Countrymen."

We place at the head of this article the "Tomb of Washington" at "Mt. Vernon," the spot sacred to every pure and loving heart, and as this picture shall be seen, may all say.

—Though he sleeps,
He yet speaks to us
from his beautiful resting place on the Banks of the Potomac.—

CONTINUED RAINS.

The long continued Rains of the present Winter, has made quite a change in the plans of many of our Farmers; and many who in January had about concluded that their PLOWING SEASON was over, have plowed *hundreds of acres* since and we can safely say, *that many Thousands of acres Extra to Grain*, have been planted by reason of these favorable rains. We think we can also safely say, that *more rain* is near at hand and that the *warm days* and *chilly nights*, clearly indicate that we shall *have more Rain within One Week*.

It is to be hoped also that our Farmers will improve the present opportunity to put all the land possible under the plow, in order that there may be the largest possible number of acres of *Summer Fallow* for another year, as this system has proved so profitable.

Hops are profitable only when there is a general failure. When there is a full crop they do not pay for cultivation.

EDITING A NEWSPAPER.

No person who has not tried the post of an editor could possibly conceive of the Trials, Vexations and Cares which surround and sometimes almost overwhelm an Editor who desires to fulfill his responsible position faithfully and conscientiously.

An Editor who claims to be an *individual of himself*, or who desires to lead and act out his *own individuality*, must expect *trials* and *vexations*, for he will, if he is of a *progressive mind*, run a tilt against opinions, fancies and feelings of many of his casual readers, and very often he will have more fault found with him and his writings, all he writes—all he says—all he does, by those who are *not his subscribers*, nor those who have ever given a dime to his Journal, than those who frankly and justly may criticise his Journal which they, as subscribers, claim as *their Journal*.

Rev. Henry Ward Beecher, of whom it may truthfully be said, there lives not in these United States a more fearless writer, in speaking upon this subject, calling it the "*Mysteries of Editing*" speaks thus:—

"The world at large does not understand the mysteries of a newspaper, and, as in a watch, the hands that are seen are not the passive instrumen of the spring, which is never seen; so, in a newspaper, the most worthy causes of its prosperity are often least observed or known. Who suspects the benefit which the paper derives from the enterprise, the vigilence and the watchful fidelity of the publisher? Who pauses to think how much of the pleasure of reading is derived from the skill and care of the printer? We feel the blemishes of printing, if they exist, but seldom observe the excellencies.

We eat a hearty dinner, but do not think of the farmer that raised the materials thereof, or the cook that prepared them with infinite pains and skill. But a cook of vegetables, meat, pastries, and infinite bonbons has a paradisal office compared with an editor. Before him pass in review all the exchange newspapers. He has to know all their contents, to mark for other eyes the matter that requires attention. His scissors are to be alert, and must clip with incessant industry all the little items that together form so large an interest in the news department.

He passes in review each week every State in the Union, through the newspaper lens. He looks across the ocean and sees strange lands, and following the sun' he searches all around the world for material. It will require but one second's time for the reader to take in what two hours search produced. By him are read the manuscripts that swarm the office like flies in July. is his frown that dooms them; it is his hand that condenses a whole page into a line; it is his sternness that restricts sentimental obituaries, that gives young poets a' twig on which to sit and sing their first lays.

And the power behind the throne, in newspapers, as in higher places, is sometimes as important as the throne itself. Correspondents occasionally are regular, stand in awe of that silent power which has the last chance at an article, and humility. And in short, as the body depends on a good digestion, so the health of a paper depends upon that vigorous digestion which goes by means of an editor,

Ought they not to be honored? And since little fame attends them, they should at least have their creature comforts multiplied. From that dark and dismal den in which they have so long had purgatorial residence, they are at length translated.

HAVE WE THE INQUISITION?

The excitement which has recently been made in the case of the Rev. Mr. Hamilton, would lead one to suppose, that we here in this "Land of Liberty," were yet subject to Inquisitorial Power.

It may be that the *Church*, may have some *Legal Rights* or Power not yet fully understood, but in the recent case at Oakland it certainly appears very strange that a Church cannot elect a Pastor and retain him when clear proof is given as in the ase of the Rev. Mr Hamilton, that he has been highly successful in doing good and building up a Church and Congregation and in greatly advancing the cause of Religion and Morality, and in uniting to himself in the highest degree the love and affection of his whole people.

We feel sure the present effort to apply *Inquisitorial Power* will fail, and greater religious freedom will be the result.

PHOTOSCOPIC VIEWS

Those who are fond of beautiful pictures should by all means go to the Rooms of the PHOTOSCOPIC TABLE COMPANY, and see what Genius and Art can accomplish. These *Photoscopic Views* were on Exibition at the "Mechanics Fair, and there created quite a sensation, for being an entirely *new thing*, and *very beautiful*, they must please all Who have a "Love of the Beautiful' n them. This company deserve much credit for their perseverance in carrying forward this *New Design* to it's completion; and the Artist, Mr Mill, should receive from the Public, a liberal reward for his very wonderful success in advancing art. The Rooms are open Day and Evening for the public. —"See Advertisement."—

More Oranges.—G. N. Sweezy, Esq; has an Orange tree growing at his residence which bore a crop of one hundred oranges this year. He has also one hundred trees growing on his ranch.

Marysville Appeal

PERSONAL.—L. Prevost, Esq, the pioneer silk raiser on the Pacific Coast who has done more than any other man to introduce and foster the cultivation of silk in this country, arrived in this city by the overland stage, on Tuesdry last. It is the intention of Mr. Prevost, we are pleased to learn, to settle in this county, and engage in the raising of silk on an extensive scale.

—*Los Angeles News.*

—The bread of idleness—loaf-ing.

Editor's Chair,

We crave indulgence for several articles over this week, the *Wheat* question required and our Rambles in Santa Clara and San must keep one week more.

The people of San Jose are talking about per Mill, and a Woolen Mill.

NEW WOOLEN FACTORY.—The Citizens of Rosa are taking steps to establish a Woolen this is right—fine sheep, and fine wool, such as can gather in that section, should be made Home and the "Santa Rosaans," can do this as as any body else, and make it profitable too.

BEET ROOT SUGAR.—Our neighbors at are talking about erecting a factory to make Root Sugar. We suggest to them to see they *begin right*. Fifteen hundred acres Beet should be planted to supply the Factory planted in Febuary in good soil as advised Farmer last week.

Acknowledgements.

Books Received —We have just received Steamer, a *Valuable Souvenir of Important Tr*

We acknowledge reception of a copy James C. Jackson's Book. "How to treat the without medicine." Dr. Jackson, it is well is the principal of "Our Home on the Hill the Celebrated Water Cure at Dansville, Li ton county, N. Y. Dr. Jackson's Essays with those of his accomplished Daughter Harriet N. Austin, upon Physiology, Health mans interest &c. we have often given in ums. It will also be remembered that Dr. son and Daughter, send forth the "Laws of one of the best publications in the United and doing a world of good.

"How to treat the sick without medicine," W teem one of the best "Family Books" issued the press. It is full of Essays upon the day practical duties of preserving the "Hea for without Health, life is but little worth. subjects treated upon in this valuable are, Air, Food, Water, Bathing, Sun-light, Exercise, &c. &c.

This Volume contains 538 pages, neatly b and contains a greater amount of pra truths, all tending to the preservation of or it's restoration, than can be found in ordinary medical books such as cumber many braries, or kill more than they cure.

We cannot close this notice without refer a very beautiful part of this Book which we on the Dedicatory page, which reads thus

Miss Harriet N. Austin, M, D.
My beloved Daughter, and
To You I Dedicate this Book.

Because to you more than any other perso I indebted for the Health and Strength wh I have been able to write it.

And also for the Sympathy
Which under my professional labors was cessary, to make the task of writing it a labor love.

Such sentiments bespeaks the value of book, which we trust will find a large the Pacific Coast.

This book can be had at $3,25 by addres Austin, Jackson & Co. Danville, Livingston N. Y. and the book will come by Mail.

We acknowledge the New Volume of Agri tural Reports from Hon. Horace Capron Com sioner of the Agricultural Department at W ington.

This volume is surely and certainly an impr ment upon all former Reports of this Depart and reflects great credit upon all who have interest in the success of that department.

PLANT SMALL FRUITS.

We would urge greater attention at the p time to the planting of small fruits, such as *berries*, *Raspberries*, and *Blackberries*, with *berries*, and *Currrants*.

Never have we had so good a season to mence the cultivation of such fruit as the ent. Last year the demand for them was and they sold readily, and at good prices, and yond all question the demand will be increased this year.

When the Railroad shall carry off all our *fruit*, pears, apples, and grapes, to New Boston, and Philadelphia, *small fruits* will a big price in our markets' and they will pay so plant, and plant largely.

WEATHER AND FARMING IN SAN JOAQUIN CO.

MOORE LANDING Feb'y 10th

COL. WARREN.

DEAR SIR.—Since writing my we have had some very heavy frosts, which leveled my first planting of Goodrich pota they are up now again about two or three high and look as well as if nothing had hap them, except they are not so tall as before. amined two of the hills after they were down; I found that they had dozens of small tatoes from the size of a pin headt o a pea is hill which tells well for an early crop of th

We are now in our second days continuous with no prospect of a stop for some time is the largest fall of rain this season here think that our farmers will put in grain yet o new sod until the 1st of March next. I put in yet thirty more acres of barley as an ment, after which, I will summer fallow hundred acres, Crops are splendid; far ahead this time last year. Having nothing more mentioning, and shall conclude. Hoping to bar from you. I remain Yours &c.
D.

A Small Farm.—T'is said a Farmer in A wants to sell farm of *fifteen hundred thousand* if the printer had left out the *hundred* he probaly hit upon the *right size* of the farm.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes, when the article they have to sell, is wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seed, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

UNFAIR PREACHING.—A correspondent of a contemporary, protesting against the preaching of long sermons, dwells with a particular sense of injury upon the tactics employed last Sunday by his own clergyman. "I appeal," he says, "to you and to the public whether this was fair, viz: to say "Lastly;" then after a long interval, "Finally;" then "Time permits me to say no more than these last words" then, "conclude;" then "Just once more," and yet go on and on as if the sermon had only just commenced? Further was it fair, after coming to the end of a pathetic description, which I ventured to say nine-tenths of the congregation took to be the end of the sermon, to use the words "And now," in the accustomed tone, which caused me and some others to rise with commendable alacrity, and yet to follow them up, not with the well-known formula, but with "Once more again?"

The richest thing we have heard of yet, is Morton's proposition to pension Mrs. Lincoln, on the ground that her husband was killed in the service of the country in the war of the Rebellion. Sound logic that.

GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.

Choice Grape Vines and Cuttings,

Those who desire to secure the very choicest varieties of Grapes, either in

STRONG ROOTED VINES OR Good Healthy Cuttings,

Can secure the very choicest. Many varieties from rooted vines, that will show fruit the present year.

THE RAISIN GRAPE.

Strong jointed vines of this very desirable grape, can be had with all others at

FARMER OFFICE.

Waltham Watches

The "P. S. Bartlet" movement, with extra jewels, Chronometer balance, Patent Dust Cap, Patent Safety Pinion, and all other late improvements, in a solid 3 oz. Coin Silver Hunting case, with Gold Joints, $27 coin.

The same in 4 oz. case, $30. In 5 oz. case, $33 coin.

The "Waltham Watch Co." movement with extra Jewels, Chronometer Balance, Patent Dust Cap, Patent Safety Pinion, &c., in 3 oz. case, with Gold Joints, $30 coin.

The same in 4 oz. case, $33. In 5 oz. $36 coin.

The "Appleton, Tracy, & Co," movement, with extra Jewels Chronometer Balance, Patent Dust Cap, Patent Safety Pinion, in 3 oz case, Gold Joints, $34 coin.

The same in 4 oz case, $37. In 5 oz $40.

"P. S. Bartlet, Watch in two and a half ounce. 18 karat Gold Hunting Case, $80 coin.

"Waltham Watch Co" Watch, in two and a half ounce, 18 karat Gold Hunting case, $84 coin.

"Appleton Tracy & Co," Watch, in two and a half oz. 18 karat Gold Hunting Case, $87 coin.

Any additional weight at $1 per pwt., or $20 per ounce extra.

We will send any of the above by Wells, Fargo & Co's with bill to collect on delivery, and give the purchaser the privilege to examine the watch before paying. All Express charges, however, to be paid by the purchaser But if the amount of the price of the Watch is remitted to us with the order, we will prepay the express charges to San Francisco ourselves. In sending money, drafts on Wells Fargo & Co, are preferred.

We wish it distinctly understood that these watches are the very best, and with all the latest improvements and that they are in perfect running order, (a guarantee from the manufacturer accompanies each watch) and if any one does not perform well, we will exchange it, or refund the money.

Please state that you saw this in the California Farmer.

WALTHAM WATCHES.

The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch wearers, has thoroughly demonstrated the

STRENGTH, STEADINESS, DURABILITY: AND ACCURACY

of the Waltham Watch. To satisfy this class in all these respects, is to decide the question as to the real value of these time keepers.

MORE THAN 400,000

of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over all others.

THE SUPERIOR ORGANIZATION

and great extent of the Company's Works at Waltham enable them to produce watches at a price which renders competition futile, [those] who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is necessary.

WE ARE NOW SELLING

Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

THESE TIME PIECES

combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country, or in Europe, only those were finally adopted with severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring timekeeping.

Among the many improvements we would particularize:

The invention and use of a

CENTRE PINION,

of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and Tempered Hair-Springs,

now universally admitted by Watchmakers to be the best, are [all grades of Waltham watches.

ALL WALTHAM WATCHES

have dust proof caps protecting the movement from dust and lessening the necessity of frequent cleaning, necessary in other watches.

OUR NEW PATENT STEM WINDER

or keyless watch, is already a decided success, and a great improvement on any stem-winding watch in the American Market, and by far the cheapest watch of its quality now offered to the public.

TO CALIFORNIANS

and others living in portions of the United States where watchmakers do not abound, watches with the above mentioned improvements which tend to insure accuracy cleanliness, durability and convenience, must prove invaluable.

Every watch bearing the trade-mark of Waltham is guaranteed to be a thoroughly reliable time-keeper,

To prevent imposition, buyers should invariably demand a certificate of genuineness.

The trade supplied by Messrs. R. B. Gray & Co., San Francisco, Cal., and generally for sale at retail by all respectable dealers.

For other facts and information, address

ROBBINS & APPLETON, Gen'l Agents.
31–4 128 Broadway, New York.

SPLENDID RESIDENCE FOR SALE,

A VERY MAGNIFICENT RESIDENCE, SURrounded with the most valuable and choice Ornamental and Shade trees, and connected with a large and valuable heavy bearing Orchard of nearly

FIFTY ACES.

The Fruit of the very choicest kinds.

This Estate is situated upon a Country Road, in one of the finest sections of country where lands are rapidly advancing in value.

The whole Estate, comprising over

SEVENTY-FIVE ACRES

and all of the very best land.

The Mansion House.

Is of modern style, nearly new, and now well and genteely furnished.

The entrance to the Mansion is through fine ornamental and shaded drives, and all the surroundings, are of a pleasant character.

LARGE STABLES,

CARRIAGE HOUSES, and FRUIT HOUSES, and a liberal collection of

FARMING IMPLEMENTS,

make this Estate such a one as is rarely offered for sale.

To a skillful ORCHARDIST, this is a rare chance, as the product of the extensive Orchards, would pay the purchase money in three or four years.

Those who desire a

Large and Valuable Estate,

and one of increasing value, can address

31–4 EDITOR FARMER.

To Take Charge of a Place.

A young man with some capital (from $500 to $1000) can hear of a good opportunity [illegible] of a new place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

None but steady and industrious young man need apply.

The applicant must be able and willing to work, and have a love and taste for rural life. To such a person a good chance can be given.

Address G. A. B.
Care of FARMER Office.

THE KIRBY LARGE MOWER.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way, for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with a great strain, and be very liable to break.

THIS MACHINE HAS NO EQUAL IN DIFFICULT CUTTING

It has an INDEPENDENT ACTION by Means of a Joint in the Frame, instead of the Moving Bar, so that the Knife is Kept in Line With the Gearing.

It is Easy Draft for Two Horses, and can Cut Heavier LODGED GRAIN without Clogging than any other Machine on the Pacific Coast,

This Machine is the same as the Combined in every particular, only the Reaping Attachment is left off, and parties buying it can afterwards buy the whole or any part of the Reaping Apparatus from the Common Reel to the Self-Rake.

This large KIRBY MOWER is the only mower that has an independent action, and can use a reel when mowing, especially in windy weather. It can be bought as a Mower, with or without a reel.

In soft, sandy, sediment land, the lifter-wheel, on account of the narrowness of its rim, will sink in quite deeply. In this case a WIDE BAND should be provided and slipped on it, which will prevent the difficulty. The wheel as it is, will run very well on hard ground. These bands with all the Extra parts, will be kept Constantly on Hand, to supply all the calls of purchasers.

As a machine for clipping mustard, or cutting back grain that grows too fast, the Kirby Mower possesses advantages over all other Mowers from the fact that IT CAN CUT AT ANY HEIGHT from the ground, and work equally well and free under all circumstances

When you order EXTRAS for this Machine, always state the NUMBER ON THE PART WANTED corresponding with the number on the plates on the list, and also GIVE THE NAME of the part when there is no number on it.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose).

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINT your guards LOW by means of the forward bolt in the pole where it bolts to the machine. IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL

Be sure to keep ALL THE NUTS TIGHT and the JOURNALS WELL OILED, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the JOINT TIGHT WHERE THE PITMAN CONNECTS WITH THE KNIFE, and then your machine will work well without trouble or expense.

FARMER OFFICE

Horticultural Premium New Vines and Plants.

With a desire to extend the cultivation of the *New* and *Rare Varieties* of the *Raspberry, Blackberry,* and *Strawberry,* we offer the following

PREMIUMS:

For every new subscriber and $5 two plants of the Thornless Raspberry, and two plants of the Kittatinny Blackberry

For two new subscribers and $10 we will give two plants each named above and one dozen plants of the Jucunda Strawberry.

For four subscribers and $20 four plants each of the Raspberry and Blackberry, one dozen of the Strawberry, and two Doolittle Blackcap Raspberry.

For five subscribers and $25 the same premiums as for four and four plants of the Doolittle Blackcap Raspberry.

For a club of ten and $50 we will give one dozen Davison Thornless Raspberry, one dozen Kittatinny Blackberry, ha dozen Doolittle Blackberry and fifty Jucunda Strawberry.

These premiums will enable beginners to secure these new and rare plants, which are now worth their weight in silver.

Those who send now can also secure our November and December numbers of the *Farmer* and the entire year of 1869

WARREN & CO.

HALL'S PATENT FOR PRESERVING EGGS.

We have refrained hitherto, from saying much upon this subject, until we had the opportunity of claims of the patent. We have accordingly, put up a few eggs, to test the matter, and have them now, as put up months ago. We invite parties, to call and see these eggs, and examine for themselves. They possess the whiteness, clearness and fresh the newly laid egg, and they frost, as a new egg, which cannot be said of any preserved egg we know of.

The cheapness and the saving of time, over every other process, may be considered in its favor. The parties in New York, are making arrangements to secure the Patent in all Europe, and it runs yet, 10 years in the United States. Cost of putting up a barrel—less than 50 cents, and the time, does not exceed 10 minutes, Rights for sale by Warren & Co. Farmer Office, San Francisco.

Home Miscellany.

I AM HAPPY.

BY GERTIE JOHNSON.

I am happy! I confess it!
Though, perhaps, my muse should sing,
Of some sorrow that doth shadow,
All my soul with its dark wing,
But she'd rather sing of gladness,
Rather sing a cherry song,
So I grant her full permission,
As she bears my pen along.

Happy! happy! Hear the echoes
Giving back the words to me!
Every one is full of laughter,
As a child's heart, full of glee.
Happy! happy! Birds repeat it,
Zephyrs chant the glad refrain,
Flowers brightly smile to hear it,
Hill tops toss it back again,

Happy! happy! Brooklets murmur,
As they laughing dance along;
And the pebbles on the margin,
Sing again the merry song;
And the lillies in their splendor,
Resting on the glassy pool,
Dream about the merry music
In the shadows dark and cool.

And the sunbeams shine more brightly
Than they ever shone before;
How they seem to dance about me.
Falling through the open door;
How they dance upon the housetop,
Drip in showers from the eaves,
Kiss the waves beneath them gliding,
Flash like smiles across the leaves.

I am happy! 'tis no matter,
Does the sun shine—does it rain?
Listen! how the crystal rain-drops
Patter it upon the pane?
Happy in the rosy morning,
Happy in the hush of night;
All my songs are glad thanksgivings,
He will guide my feet aright.

From the darkest depths of sorrow
He has brought me to the light.
And I know that if I trust him,
He will guide my steps aright.
So I sing my song of gladness
In the sunshine, in the rain—
Earth and ocean, light and darkness,
Join me in the glad refrain!—

THE LAW OF TRUE MARRIAGE.

The Law of Marriage is thus illustrated and truthfully by Gail Hamilton.

Wherever man pays reverence to woman, and feels the influence of any woman as purifying, chastening, abasing, strengthening him against temptation, shielding him from evil, ministering to his self-respect, medicining his weariness, peopling his solitude, winning him from sordid prizes, enlivening his monotonous days with mirth, or fancy, or wit, flashing heaven upon his earth, and mellowing it all for spiritual fertility—there is the *element* of Marriage. Wherever woman pays reverence to man; wherever any woman rejoices in the strength of any man, feels it God's agent, upholding her weakness, confirming her purpose and crowning her power, wherever he reveals himself to her, just, benignant, unruffled, perhaps, but not overcome by the world's turbulence, and responding to all her gentleness; his feet on earth, his head among the stars, helping her to hold her soul steadfast in right, to stand firm against the encroachments of frivolity, vanity, impatience, fatigue, and discouragement; helping to preserve her good nature, to develope her energy, to consolidate her thoughts, to utilize her benevolence, to exalt and illumine her life—there is the *essence* of Marriage. Its Love is founded on self-respect at the very moment of merging self in another. Its love is mutual, equally giving and receiving at every instant of its action. There is neither dependence nor independence, but interdependence. Years cannot weaken its bonds, distance cannot sunder them. It is a love which vanquishes the grave, and transfigures death itself into life.—

Unselfish love.—Whenever unselfish love is the main spring of men's actions; whenever happiness is placed not on what we can gain for ourselves, but on what we can impart to others; whenever we place our satisfaction in gratifying our fathers and mothers, our brothers and sisters, our wives and children, our neighbors and friends,—we are sure to attain all the happiness which the world can bestow.

Perseverance.—If you wish to do good, do good; if you wish to assist people, assist people. The only way to learn to do a thing is to do it; and that implies, before you learn to do right you will do wrong, you will make blunders, you will have failures; but persevere, and in the end you will learn your lessons, and many other lessons by the way.

Cure for Small-pox and Scarlet Fever.—A recent number of the London *Scalpel* states that either small-pox or scarlet fever will absolutely disappear in 12 hours if the following remedy is used: Sulphate of zinc, one grain; foxglove (digitalis), one grain; sugar, half a teaspoonful; mix with two teaspoonfuls of water. Take a teaspoonful every hour; smaller doses for children, according to age.

LOVE'S RECOMPENSE.

It was then in that beautiful vale of Vire, some twenty years agone, that Francois Lorimer went out to take his first May walk with Mariette Duval, ere the relentless conscription called him from his happy home, his sweet valleys, and his early love. It was a sad walk, as may well be imagined; for though the morning was bright, and nature, to her shame be it spoken, had put on her gayest smile, as if to mock their sorrow; yet the sunshine of the scene could not find its way into their hearts—and all seemed darkened and clouded around them. They talked a great deal, and they talked a long time; but far be it from me to betray their private conversation. I would not for all the world—especially as I know not one word about it—except, indeed, that Francois Lorimer vowed that the image of Mariette should remain with him forever—should inspire him in the battle, and cheer him in the bivouac; and that Mariette protested that she would never marry any body except Francois Lorimer, even if rich old Monsieur Latoussefort, the great Foulan, were to lay himself and fortune at her feet; and, in short that when his seven long years were out, Francois would find her still a spinster, and very much at his service.

Mais si je perdrois une jambe? said Francois Lorimer. 'Qu'est ce que c'a fait?' replied Mariette. They parted—and first to follow the lady. Mariette wept a great deal, but soon after got calm again, went about her ordinary work, sang her song, danced at the village fete, talked with the talkers laughed with laughers, and won the hearts of all the youths in the place; by her unadorned and native grace. But still she did not forget Francois Lorimer; and when any one came to ask her in marriage, the good dame, her mother referred them directly to Mariette, who had always her answer ready, and with a kind word and gentle look sent them away refused, but not offended. At length good old Monsieur Latoussefort presented himself with all his money-bags declaring that his only wish was to enrich his gentle Mariette; but Mariette was steady, and so touchingly did she talk to him about poor Francois Lormier, that the old man went away with tears in his eyes. Six months afterward he died, when to the wonder of the whole place, he left his large fortune to Mariette Duval. In the meanwhile Francois joined the army, and from a light handsome conscript, he soon became a brave, steady soldier. Attached to the great Northern Army, he underwent all the hardships of the campaigns in Poland and Russia, but still he never lost his cheerfulness, for the thought of Mariette kept his heart warm, and even a Russian winter could not freeze him.

All through that miserable retreat, he made the best of everything. As long as he had a good tender piece of saddle he did not want a dinner; and when he met with a comfortable dead horse, to creep into, he found board and lodging combined. His courage and his powers of endurance called upon him from the first, the eyes of one whose best quality was the impartiality of his recompence. Francois was rewarded, as well as he could be rewarded; but at length in one of those unfortunate battles by which Napoleon strove in vain to retrieve his fortunes, the young soldier in the midst of his gallant daring, was desperately wounded in the arm. Pass we over the rest—mutilated, sick, weary, and ragged, Francois approached his native valley, and doubtful of his reception—for misery makes sad misanthropes—he sought the cottage of Madame Duval. The cottage was gone; and on enquiring for Madame Duval, he was directed to a fine farm house by the banks of the stream. He thought there must be some mistake, but yet he dragged his heavy limbs thither; and knocked timidly against the door.—'*Entrez*,' cried the good humored voice of the old dame. Francois entered, and unbidden tottered to a chair.

Madame Duval gazed on him for a moment, and then rushing to the stairs called loudly, 'Come down Mariette, come down, here is Francois returned!' Like lightning Mariette darted down the stairs, saw the soldiers old great coat, and flew towards it—stopped—gazed on his haggard face and empty sleeve; and gasping, fixed her eyes upon his countenance. 'Twas for a moment she gazed on him thus in silence, but there was no forgetfulness, nor coldness, nor pride about her heart—there was sorrow, and joy, and love, and memory in her glance.—'O Francois, Francois,' cried she, at length casting her arms around his neck, how thou hast suffered!" As she did so the old great coat fell back, and on his breast appeared the golden cross of the Legion of Honor. 'N'importe!' cried she, as she saw it. '*voila ta recompence!*'—He pressed her fondly to his bosom. 'My recompense is here' said he' 'my recompense is here.'

Antidote for all Poisons.—A plain farmer says: It is now over twenty years since I learned that sweet oil would cure the bite of a rattlesnake, not knowing it would cure other kinds of poison. Practice, observation, and experience have taught me that it will cure poison of any kind both on man and beast. I think no farmer should be without a bottle of it in the house. The patient must take a tablespoonful of it internally, and bathe the wound with it for a cure. To cure a horse in requires eight times as much as for a man. It is an antidote for arsenic and strychnine. It will cure the bloat in cattle by eating too freely of fresh clover; it will cure the stings of bees, spiders, and other insects, and will cure persons who have been poisoned by a low running vine growing on the meadows, called Ivy:

We would invite a trial of the same prepartion for our Poisonous Oak.—Ed. F.

Two rival belles met at a hop. "How well you look under candlelight!" exclaimed one, with a stress on the candles. "And how charming you are in the dark!" answered the other.

"No smoking" is inscribed upon a sign in one of the *churches* of Louisville.

—Handsome apples are sometimes sour.

SUNSHINE FOR THE CONSUMPTIVE.

By Dr. Henry I. Bowditch.

We have been told by mptivesthat one of the best prescriptions we have made has been their removal from a north room to the sunny south chamber. As we write, two cases come to mind, strikingly illustrative of the sun's benign influence. We had been attending, at an orphan asylum, a girl about twelve years old, who had been long ill of severe typhoid fever. She was wholly prostrated in mind and body, and emaciated to the last degree. It was plain that she was falling into that depressed condition of all the powers of life that so often precedes consumption. Day after day we visited her, but all recuperative power seemed lost. Half dead and alive, the little creature neither spoke nor moved, and ate only on compulsion. One day, on our way to visit her, we felt that elastic thrill which the warm rays of the sun impart in the early cool weather of spring. We involuntarily leaped a long, and were instantly struck with the fact that "virtue had gone out of us," when we left behind us the sunlight and warmth of the street and entered that northern chamber, the dormitory of the poor orphan. That inspiriting influence, the invalid had never experienced in the slightest degree during the whole of her sickness, as, owing to its peculiar situation, not a ray of direct sunlight had ever entered the chamber. We were shocked, and for the first time considered the depth of her loss, and our own remissness in regard to her. The air of the room had been pure, the ceilings of the infirmary were lofty, the attendants had been faithful and sagacious. Nothing seemed lacking, in fact, to restore health. Yet it did not come. On the contrary, there seemed a constant downward tendency. "A sunbath in the warm rays of this delicious spring day is what this girl needs," we instantly said to the sister superior. This lady gladly conseted to the change, and placed the little patient in another room having a southern aspect, and consequently filled with sunlight. The invalid immediately recognized the changed, and asked, in her weak way, to have the curtains raised, so as to let in the full blaze of the light. Soon she wanted to sit up, and directed that the easy chair, in which she was proped, should be so placed as to allow her whole body below her face to be exposed to direct rays of the sun. It was the natural tendency of disease, seeking for all life-renovating influences. And we have never met with so marked or so rapid improvement as immediately began in the body and mind of the girl. Appetite and strength increased daily, and with them burst forth again all the joyousness of the child,s heart.

Another analogous case, which, although we do not demonstrate by it the influence of the sun alone, we cannot forbear to name, because by such examples we impress perhaps on the minds of our readers the real principles underlying the whole question. A lady aged about thirty, resident in the northern part of New England, consulted us for undoubted tubercular disease of the lungs. Her house was well situated, and on the side towards the south was a small piazza resting, on stone steps, which was raised two or three feet above the ground. The winter was approaching and rules were to be given. Having full faith in these divine influences of pure air and sunlight we directed that she should sit out on this piazza every day during the winter, unless it were too stormy. It was so arranged as to shut out the cool air on three sides, and to admit the full blaze of sunlight in front. Here, according to our directions she used to sit, wrapped in furs, reading or writing for several hours each day during the following winter, and with most excellent results. She was directed frequently to make deep inspirations, in order to fill the lungs with pure air. She was never chilled, because the sun's rays and her warm clothing prevented it. She never "took cold" there. On the contrary, the balmy influences exerted upon her byher daily sun and air bath were so grateful; her breathing became so much easier after each of them, that, whenever a storm came, and prevented the resort to the piazza, the invalid suffered in consequence therof. Whether these remarks will prove to our readers that want of sunlight may be reckoned among the causes of consumption may well be doubted, but we trust that, at least, they will convince some skeptics that sunlight has a potent influence in raising the human body from various weaknesses that sometimes are the precursors of fatal phthisis. —Atlantic Monthly *for February.*

Valuable Recipes from Lady Contributors to the Massachusetts Ploughman.

Coffe Cake.—One cup of molasses, two cups of sugar, one cup of butter, one cup of hot coffee, one teaspoon of cloves, two teaspoons of cinnamon, one teaspoon of salt, one of soda, flour to make it the usual stiffness.

Tea Cake.— One large spoon of butter, one small cup of sugar, one teaspoon of soda, two teaspoons to cream of tartar, one cup of milk, two eggs, one pint of flour, nutmeg to taste.

A smart little fellow.—A youngster who was taken into a toy store the other day by his doting mamma, had a number of articles shown him by the attentive storekeeper, in the hope of making a sale—but without effect. At last, one of those *papier mache* representations of a mouse was produced, and after being wound up by a key, was set on the floor, where it ran about in a very mouse-like manner. The youngster's attention was enlisted at once; but the result was not as expected, for he shouted out, "O' mar, I don't want that; we've got lots of them at home, and don't have to wind 'em up, either."

—A medical student, says he has never been able to discover the bone of contention, and desires to know whether it is not situated very near the *jaw* bone.

—Would you be strong, conquer yourself.

Miscellaneous.

Santa Clara College, S. J.

SANTA CLARA, CAL.

Conducted by the Fathers of the Society of Jesus.

The eighteenth annual session of this institution will commence on THURSDAY, August 27th, 1868

TERMS—Tuition in the Classical and Scientific Departments; Boarding and Lodging; Washing and Mending of articles; School Stationery; Medical Attendance and Medicines; Fuel, Light, Baths, etc., per session of ten months.....$35

For further information apply to the President of Santa Clara College, Santa Clara, Cal., or to Rev. A. Maraschi, S. J., St. Ignatius Church, Market street, between Fourth and Fifth, San Francisco.

'64-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal; its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to

HENRY E. CHILD,

A PRINCELY RESIDENCE

IN THE COUNTRY

FOR SALE

To any wealthy person who desires to withdraw from the drudgery of a business life in the city, and enter upon a newer and better and higher life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place as we have, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only because of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden with all manner of luscious fruits, and which with a judicious care and management, the whole cost of the place could be returned again in a few years *by its productions*, can learn of the opportunity by applying to the Editor of the Farmer. No person need apply unless with the intention to fulfill contract.

Real Estate, or other property, in San Francisco at Gold Value, will be received in part payment and *Statistical proof given* to show the real profits annually of this rich and fertile spot.

Inquiries and letters addressed to the Farmer will be promptly attended to. WARREN

Miscellany.

BOOTS.

THEIR MORAL EFFECT ON MEN

A writer in Cassell's Magazine, gossips about "Bad Boots," as follows:

The influence of boots upon the mind is very different from that of any other garment. A man may have a shocking bad hat, but he forgets it; his coat may be threadbare, but his mind is not directed towards it; but we defy a man to stand upright in a pair of bluchers with worn-down heels, and we believe that it is just as difficult to feel morally upright in them. He cannot look people straight in the face and feel upon the square with them. He feels the weakness of his foundation, and he mistrusts the character of the superstructure that they support, however imposing in other respects. A man shabby in the boots sometimes flatters himself that he carries off attention from them by the use of a splendid necktie, but this is a delusion and a snare. The boots are the key of the position, and we feel sure that no man ought to undertake any serious matter unless he stands up in a good sound pair of boots.

A celebrated physiologist has said that, if human action could be searched into, it would be found that the intestines of one man often influence the destinies of another. Doubtless, this is a profound remark, but it applies to upper and nether soles as well as to digestion. By way of argument, imagine the final charge of the guards at Waterloo made in bad boots. It would have been all very well for the great Duke to have said, "Up Guards, and at 'em;" but could they have got at them? And if they had failed and we had lost Waterloo, what next, and next? But, badinage apart, no one will feel inclined, we suppose, to deny the influence of the mind upon the body, and *vice versa*.—When boots are hopelessly gone, shame seems to have departed also. What terribly bad boots we see crossing-sweepers following their profession in! But these are put on sometimes to excite pity. We feel this, and the effects is lost upon us. But is there a more piteous sight than a poor beggar with a boot on one foot and a shoe on the other? A man brought to this point of degradation must be demoralized beyond the hope of recovery. With women the moral influence of bad boots is not so great as with men, for the reason that they contrive not to show them; but the physical influence is far more serious. The writer, speaking from a long experience in the practice of a dispensary, where the poor mainly apply, can safely say that not a tithe of this class possess sound boots. Hidden under the petticoats, they are allowed to wear sometimes until the feet are just upon the ground, and the wearer's stockings are from morning to night, in wet weather, in a state of sop.

This may seem a minor evil, but it is just the one that causes half the disease among poor women, whose constitutions render them far less able to bear exposure of this kind than the other sex. There are also clubs and benefit societies of all other kinds, but we cannot fancy an institution that would do more immediate and lasting good than a "Good Boots Club" for the benefit of women. We may ascend higher in the social scale, and find the same evil prevailing.—Many poor governesses and servants are shockingly shod. It is just the weak point in their dress which they can hide, and they invariably do it, whereas it lies at the foundation of their health and that of their children, and it should claim their first attention. We laugh at the clattering wooden sabots of the French and German working classes; but in comparison with the flimsy, ill-made foot covering our own poor indulge in, they are more healthy and lasting. But fashion, even with the very poor, is far more powerful, we fear, than consideration of health or service.

VERDICT OF A JURY OF BOYS.—When Dr. Nathaniel Prentice taught a public school in Roxbury, he was very much a favorite; but his patience, at times, would get very much exhausted by the infraction of the school rules by the scholars. On one occasion, in rather a wrathy way, he threatened to punish with six blows of a heavy ferule the first boy detected in whispering, and appointed some as detectors. Shortly after, one of the detectors shouted—"Master, John Zeigler is whispering." John was called up and asked if it was a fact. (John, by the way, was a favorite, both with his teacher and his school-mates.) "Yes," answered John. "I was not aware of what I was about; I was intent on working out a sum, and requested the boy who sat next, to hand me the arithmatic that contained the rule, which I wished to see."

The doctor regretted his hasty threat, but told John that he could not allow him to escape the punishment, and continued: "I wish I could avoid it, but cannot, without a forfeiture of my word. I will," continued he, "leave it to any three scholars you may choose to say whether or not I omit the punishment."

John, said he agreed to that, and immediately called out, G. S——, T. D——, and D. P D——. The Doctor told them to return a verdict, which they soon did (after consultation,) as follows: The master's word must be kept inviolate—John must receive the threatened six blows of the ferule; but it must be inflicted on voluntary proxies—and we, the arbitrators, will receive the punishment by receiving each of us two of the blows."

John, who had listend to the verdict, stepped up to the Doctor, and with out-stretched hand, exclaimed: "Master, here is my hand, they shan't be struck a blow; I will receive my punishment."

The Doctor, under the pretence of wiping his face, shielded his eyes, and telling the boys to go to their seats, said he would think of it. I believe he did think of it to his dying day; but the punishment was never inflicted.—*Middlesex Jour*

A GEORGIA STORY.

HEAT IT HOT.—Col. M'Hatten emigrated to Illinois in the early settlement of the country when roadside inns were unknown, and every dweller in the wilderness kept a sort of traveller's home. The Colonel, by a lucky investment in wild land, became in time, a rich man--but he kept up his habits of hospitality; and if the guest was well-to-do in the world, he did not object to turning an honest penny in that way.

One cold, blustering winter evening a horseman drew up to the house and asked accommodation for the night. A half grown lad answered in the affirmative, and ushered him into the sitting room, where the great wood fire, of itself gave him a cordial welcome. After supper, the landlord made his appearance for the first time. He was hearty and hale, and rosy as any boniface should be, but he was bent and crippled in his gait. He explained by saying, that he had taken a cold which had settled in his back.

"I don't mind the pain so much," he continued, "but it is so inconvenient. I have been recommended to try a poor man's plaster, and if you will excuse me, I will have it put on. Sam! Samuel! Samuel M'Hattan!"

"Here, father," said the lad above-mentioned, hastily swallowed a huge piece of mince pie, which he had been quietly enjoying.

"Here, Sam, my boy, heat this plaster for me, and put it on my back. Heat it hot, Sam."

Saying which, he handed the plaster to his son, and seating himself astride his chair, with his back to the fire, threw his suspenders back, and his shirt over head. "Now, Sam, said the Colonel, 'if the poor man's plaster is hot, you may put it on; but you may wait a little; I'm afraid it's not hot enough. Can you tell," he continued, turning to the traveller, who was seated in the corner' "Can you tell me why this is called the poor man's plaster—sometimes the poor man's friend? eh, give it up?" laughing to himself,—"because it sticketh closer than a brother! eh?"

Poor Sam, who had been watching his chance to speak without interrupting his father, now ventured to say:

"I guess it's hot enough now, father."

"What do you know about it?" said the old man, testily. "I say, heat it hot, Sam, heat it hot."

Sam, whose face was at a red heat, had held the plaster to the fire until it ran and dripped down on the hearth, and he made no reply.

"Well," said the old man looking around, "maybe it will do now, Sam. Clap it on."

Sam, armed with the plaster, approached him; and if my word can be taken, did clap it on. The old man gave one yell, like a wild Indian, and jumped clear over the back of the chair, kicking his old-fashioned breeches off his feet, dancing around with pain. The traveller laughed until he cried; and the more mine host roared, the more he laughed. When the first agony was over, the Colonel began to swear, and our traveller thought it would be prudent to retire, lest he should share his wrath with Sam, who he observed was making good his distance.

The next morning, when leaving, he handed the Colonel five dollars, saying with a sly twinkle of his eye:

"I don't want any change. It is cheap at that."

After he was seated upon his horse, and out of range, he said:

"Heat it hot, Sam, heat it hot. It sticketh closer than a brother, eh?"

BADLY FRIGHTENED.—A loafer, who had been noisy, was up before the Mayor's court. His Honor told him to pay over five dollars for his fine. C-c-c can't do it," muttered he: "a-a-in't got the p-p-pewter." "Are you a married man?" inquired the Mayor. "N-n-n not exactly, so far gone as that." "Well, I will have to send you to the work house." "T-t-t-tain't nuthin' to g-g-g-go there," said Alick; "b-b-but when you t-t-talked about m-m-marriage, old fellow, you f-f-frightened me."

Can any one tell why men who cannot pay small bills, can always find money to buy liquors, and treat when happening among their friends?

Can any one tell how young men who dodge wash women, and who are always behind with their landlords can play billiards night and, day, and are always ready for a game of poker or seven-up?

Can any one tell how men live and support families, who have no income and do not work, while others who are industrious and constantly employed, half starve?

THE PHOTOSCOPIC TABLE COMPANY.

THE NEW INVENTION of this Company is known as the ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture. Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☛ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

is on the red cover of the package.

Depot, 320 Jackson Street,

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. This three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

[Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, February 18.

Grain, &c

The Grain Market remains without any material change, although the news from New York and Liverpool both, are lower price.

Never has the prospects of the grain planter been more favorable, and never have the grain crops looked so universally good, even we should say, so very excellent as the present season.

Grain is growing strong, healthy and rapidly, and there is every reason to believe we have an ever-shall age yield beyond that of any year yet seen in California, for never before have we had so large an area of grain planted on summer Fallow'd land, or grain that has been put into the ground so wisely and well.

We have noticed with a good degree of satisfaction, that our farmers are begining to feel some pride in their calling. Our *Wheat* raisers are getting rich and they feel their *dignity*, we are glad of it, they will soon have an opportunity to make their *influence* felt, (Who will solve our meaning?)

Our Grain growers that *read*, will observe that the price of wheat in Liverpool is 10s 8d and 10s 6d, $2,60 $2,56,—deduct the cost and charges andit leaves $1,50 nett.

The New York prices are $1,90 and $1,95 currency per bushel or about 1,46, 1,48, in gold per bushel. Deduct cost and charges for sending abroad, and there is no margin to the exporter worth the risk, and the reason why ships are loaded with grain or flour either to Liverpool or the East, arises most undoubtedly from the fact the *owners* load the most of what goes abroad to *make freight*.

Our Farmers if they were wise, would now *Rush their grain into market* and dispose of it the best they could, for the coming year's crops will be so large, that they will be glad to get 1½c for it—Such is our firm belief.

Retail Prices in the Fruit Market.

It is with regret, we record the indifferent supply of California fruit nor in our market, because we know well, that in certain localities, almost every variety of tropical fruits, can be produced, independent of the rarest and choicest of Pears and Grapes, which can be preserved the season through. What has become of the choice winter Pears, and the Canson Hall Muscat grapes, they should be plentiful at this season?—The reply is, there are not many produced, consequently, there is no supply in the market.

Retail Prices in the Vegetable Market.

In this department, everything is bright and prosperous.—Even at this period of the season, we are having late spring and summer produce brought to market, such as large late Asiatic Cauliflowers, large red Tomatoes, (perfectly ripe), yellow Malta Turnips, spring or winter's growth, spring (for we must use this term.) Onions, one inch in diameter, and every variety of Salad in use. What will our friends in the cold East, think of such facts,—such is the case, prices as below.

Asparagus, ₱ lb	50	@	75

FISH

(Tessmore and Hayes.)

During the past week, our fish market, has been well supplied with all the varieties of the scaly tribe, even Salmon, (the King of fishes) has been more plentiful, and at every restaurant, you can hear all the Europeans, calling out for salmon, salmon, salmon!—of course, it is a cheap dish for new arrivals, nevertheless in these localities, should at all times, be abundant and pretty plentiful. Herrings, are the reverse; the climate is too warm for an over abundant supply consequently, the prices are high in proportion.

POULTRY AND GAME.

(A. A. Louderback.)

Our Chinese festivities are over, consequently, a sudden drop in the prices of the leading articles in this department—nevertheless, as the bad condition of the roads leading to the direct communication to our city, is some interruption to the conveyance of the articles our ranchmen have in stock, therefore, the prices are better than we could have expected. We, from past experience, think that prices in this department have always been very remunerative.

Special Notice.

We desire to direct the attention of our readers to the advertisement of the American Watch Company, in another column. This Company is the pioneer of Watch-making in the United States, and has grown in the short space of fifteen years to the largest Watch Manufacturing establishment in the world. This fact, in connection with another important fact—that their Watches are now selling at less prices in greenbacks than the gold prices asked before the war—illustrates the great success of the Company.

Traveling.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

Feb. 6.—GOLDEN AGE—Capt. E. S. Farnesworth, connecting with the ALASKA, Capt. Gray.

Fed. 13.—COLERADO—Capt. W. H. Parker, connecting with the RISING STAR, Capt. King.

Feb. 22,—SACRAMENTO, Capt A. West, connecting with HENRY CHAUNCEY, Capt. Connor.

Feb. 27—MONTANA— Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury,

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—If desired an amount of $10 to $20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se4 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL.

Or address Editor Farmer.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLA[illegible] in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. M[illegible] Vermifuge, they very frequently get one or other of the many worthless preparations called Ver[illegible] now before the public. We therefore beg leave to urge upon the Planter the propriety and [illegible] ance of invariably writing the name in full, and to advise their factors or agents that they will not [illegible] other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., [illegible] BURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. T[illegible] popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements [illegible] alent in the South and South West, has induced the venders of many worthless nostrums to claim for the[illegible] parations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are [illegible] ginal and only reliable remedy for Liver Complaints that has yet been discovered. and we urge the Pla[illegible] Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take [illegible] Vermifuge nor Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG, PA

DR. M'LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR. McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER [illegible] BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMP[illegible] and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the [illegible] South, where, in the majority of cases, the patient is not within the reach of a regular physican, requ[illegible] some remedy should be provided, that would not in the least impair the constitution, and yet be safe and [illegible] That such is the true character of DR. McLANE'S LIVER PILLS, there can be no doubt. The great [illegible] which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It [illegible] our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced [illegible] they have been so tested, and that the result has been in every respect favorable, we call thousands to wit[illegible] have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS are not held forth or recommended, (like most of the popular me[illegible] the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected [illegible] deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally suppos d. The function it is [illegible] to perform, and on the regular execution of which depends not only the general health of the body but the [illegible] of the Stomach, Bowels, Brain, and the whole Nervous System, shows its vast and vital importance to [illegible] health. When the Liver is seriously diseased, it in fact not only deranges the vital functions of the body, b[illegible] ercises a powerful influence over the mind and its operation, which cannot be easily described. It has n[illegible] connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful cha[illegible] that it misleads more physicians, even of great eminence, than any other vital organ. The intimate con[illegible] which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises [illegible] passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal n[illegible] or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have long [illegible] convinced that more than one-half of the complaints which occur in this country, are to be considered a[illegible] their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the [illegible] Deranged State of the Bowels. Irritable and Vindictive feelings and Passions from trifling and inadequate [illegible] of which we afterwards feel ashamed; last, though not least, more than three-fourths of the diseases enu[illegible] under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, increa[illegible] pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometim[illegible] pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometim[illegible] taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels [illegible] ral are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull [illegible] sensation in the back part. There is generally a considerable loss of memory, accompanied with a sli[illegible] ion of having left undone something which ought to have been done. A slight dry cough is sometimes an [illegible] ant. The patient complains of weariness and debility; he is easily startled; his feet are cold or burning, [illegible] complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise [illegible] be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every [illegible] Several of the above symptoms attend the disease; but cases have occurred when few of them existed yet [illegible] nation of the body after death has shown the Liver to have been xtensively deranged.

AGUE AND FEVER—DR. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when taken [illegible] Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after [illegible] Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not pur[illegible] or three times by next morning, take one or two more; but a slight breakfast should invariably follow the [illegible] The Liver Pills may be used where purging simply is necessary. As an anti bilious purgative they are [illegible] to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derangem[illegible] the Stomach

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist tha[illegible] consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is an [illegible] cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient [illegible] fant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to some [illegible] cause. It ought here to be particularly remarked, that although but few worms may exist in a child, and [illegible] ever quiescent they may have been previously, no sooner is the constitution invaded by any of the numerous [illegible] of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it too fre[illegible] happens that a disease otherwise easily m aged by proper remedies, when aggravated by that cause, bids [illegible] to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked, [illegible] even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be expelled [illegible] loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-han[illegible] with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with [illegible] al flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an aur[illegible] circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the [illegible] occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy [illegible] tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a [illegible] sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nauses and [illegible] violent pains throughout the abdomen; bowe s irregular, at times costive; stools slimy, not unfrequently [illegible] with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by [illegible] cough sometimesdry and convulsive; uneasy and disturbed sleep, wi grinding of the teeth; temper [illegible] but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DEPE[illegible] UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to w[illegible] in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual [illegible] viding the symptoms attending the sickness of the child or adult warrant the supposition of worms being the [illegible] In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MER[illegible] IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury [illegible] most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water [illegible] morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over ten [illegible] a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. [illegible] great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to a[illegible] palming upon the public counterfeit and inferior articles, in consequence of which the proprietors have [illegible] forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following [illegible] of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLA[illegible] FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: [illegible] McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROPRIE[illegible] This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have the [illegible] stamped on the lid of the box, in red wax.

Prepared only by

FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box LIVER PI[illegible] Vermifuge on receipt of forty cents in Government Stamps.

CALIFORNIA FARMER AND JOURNAL OF USEFUL SCIENCES.

VOLUME XXXI. SAN FRANCISCO, CALIFORNIA: THURSDAY EVENING, FEBRUARY 25, 1869. NUMBER 6

The California Farmer AND Journal of Useful Sciences.

PUBLISHED EVERY THURSDAY EVENING.

BY WARREN & CO.

Office—No. 320 Clay street (up stairs), below Battery.

SAN FRANCISCO.

TERMS OF SUBSCRIPTION,

By mail, for one year, $5; for six months, $3. For a Club of five new subscribers, a sixth copy will be sent gratis. When payments are delayed six months $1 additional per year will be charged.

City subscribers, delivered by carrier, 12½ cents a number or $6 a year in advance.

☞ Advertisements and Subscriptions must be paid for in advance. Payments in Gold or Silver.

☞ All letters on business connected with the office should be addressed to WARREN & Co. PUBLISHERS.

LETTER FROM WHITE PINE.

NUMBER TWO.

CARSON, Nev. Feb'y. 15, 1869.

COL. WARREN.—*Dear Sir:* Having visited the Capitol of the State and taken a look at things generally, I propose, in my rough and unpolished style to give you a few items concerning matters Hereabouts. You mus'nt expect very much from one, more accustomed to following the plow, driving team, and running a threshing machine, than writing a newspaper article; and if this won't do to print, you need not return it—give it over to the "devouring element."

The Nevada Legislature being now in session, I naturally sought the Capitol and, during my leisure hours for a week or more have been in the habit of attending their sessions. I learn that there are twenty Senators, and thirty-nine Assemblymen.

THE HALF OF THIRTY-NINE!

I am informed that a vexed question had to be disposed of at the opening of the session, as to the member from Lincoln County being entitled to his seat. The Constitution provides that the number of Senators shall never exceed half the number of Assemblymen. Previous to the present session, the representation stood thirty-eight Assemblymen, and nineteen Senators. This was exactly the Constitutional proportion. At the last session, the County of Lincoln was created and one Assemblyman and one Senator accorded to it. This gave the whole number of Assemblymen as already stated. I am told that a great deal of mathematical learning was displayed by Senators pro and con, on the admission of the Lincoln Senator. It was boldly asserted that twenty was as near the half of thirty-nine as nineteen, while on the other hand, it was claimed that that was not the question to be determined—the real question being, whether twenty was more than half of thirty-nine? It is not certain which proposition was carried, further than that the member from Lincoln was admitted to his seat. It may therefore be assumed as an established fact, that "twenty is as near the half of thirty-nine as nineteen."

A CAPITOL MOVEMENT.

One of the measures creating the most local interest here, is a Bill to appropriate one hundred thousand dollars to build a Capitol on the Plaza. It is considered, with the people here, to be about the turning point of political power between the "East" and "West," the great Humbolt desert being a sort of natural divison of the State. At present, the Empire of population and representation in the State Legislature is in the western portion of the State. The growing importance of the eastern portion, and the recent mineral discoveries and rush of emigration to the East, points to that, in the near future as the Empire of this State, in population and wealth.

Carson, was fixed upon in the Constitution as the Capitol of the State, and no removal can be had without an amendment to the Constitution. The people of this locality see in the next apportionment of representation, the probability of a change in the Constitution, and a speedy removal of the Capitol, hence the interest felt in the Capitol appropriation measure. It has engaged the constant attention of the citizens of the Capitol ever since the session commenced, and it is charged that the delegations locally interested have logrolled, traded, and swapped votes on all measures whereby they could gain support for it, and they have so far succeeded as to pass the measure through the Assembly. It is now in the Senate where they confidently count on its passage.

A FIELD DAY IN THE ASSEMBLY.

It is not often that a rustic from the country is privileged to see so much, in so brief a time, as the occurrences in the Assembly on Friday last. It all grew out of the Capitol Appropriation Bill. The vote was taken on Wednesday, and carried barely by a Constitutional vote—one of the members opposed to the measure voting for the Bill, giving it an apparent strength of one vote that it did not have. On enquiry, I learn that in order to be allowed to move a reconsideration of a measure that has passed, it is necessary for the moving party to have voted with the majority. One who voted for the Bill gave notice that on the next day (Thursday) he would move to reconsider the vote by which the Bill passed. On that day, by a parliamentary trick, the Assembly was adjourned, thus cutting off the right to make the motion. On the day following, it was asserted on the one side, but denied on the other, that the *title* to the Bill had never been approved, and a resolution was offered to request the Senate to return the Bill. One of the members who had supported the measure, repented and voted for the Resolution and it was adopted. A motion was then made to instruct the Clerk to communicate to the Senate the action had, and on this the author of the Capitol Bill commenced to buck. He made frivolous motions and when ruled out of order, persisted in debating them. He was ordered to take his seat and refused to obey, the Sergeant-at-Arms was ordered to seat him, which was done in no very courteous manner. But the offending member would n't stay seated. He rose and resumed his offensive conduct. One of his friends was absent and he wanted to kill time till he could be brought in. The speaker again ordered him to be seated which order he refused to obey.

CARRIED OUT.

The speaker now ordered the offender under arrest. His name I afterwards learned, is Mayhugh and he is from Esmeralda County. The Sergeant at Arms and his assistant now advanced to arrest and take the obstreperous Assemblyman from the Hall; but he resisted—seized hold of his desk, next of chairs which were toppled over and tumbled round in the wildest confusion and disorder, but the Sergeants bore him off into the rear of the Hall. After a few minutes he returned in charge of the officers, and was taken to the front of the speaker's stand and reprimanded, after which he apologized, and the matter seemed to be satisfactory all round.

A NEW JURY BILL.

There is a measure under consideration here known as the Beatty Jury Bill, which is new in some of its provisions. As first introduced, there were no exemptions allowed, only on payment of twenty-five dollars; but the opposition offered in the interest of the firemen has effected a change, so far as to exempt active firemen who have apparatus for extinguishing fire. The theory of the Bill, is that jury service is compulsive while all the services rendered by firemen and militiamen is voluntary—that the exemptions in favor of priests, ministers, physicians, lawyers, editors, etc, has no merit whatever. They are equally, with all other classes, interested in having jury duty performed and ought to do their share; that if the peculiar profession or avocation chosen is of such a character, as not to admit of their performing this service, they ought, in justice to those who are compelled to perform it, contribute something into a fund, to compensate those required to do jury duty. The Bill, in its amended form I have no doubt will become a law.

RAILROADS.

Bills have passed to aid by Counties interested in the building of a Railroad from Carson to Virginia, and the road will doubtless be built within the next twelve months, thus facilitating the working of a large class of low grade ores, which expenses heretofore have made it unprofitable to have reduced.

AGRICULTURAL PROSPECTS.

There is now a great deal of enquiry after the agricultural lands in the eastern portion of the State. As mineral discoveries are made, large tracts of arable and grazing land is brought to the knowledge of the public. The United States surveys are being pushed forward along the route, of the Central Pacific Railroad, and men are locating farms and making ready to cultivate the soil, with a good prospect of speedy reward. Barley at White Pine is now selling at 16 cents per pound, and Hay along the road from Elko there, is bringing $170 per ton. With these extravagant figures which will never be realized again, a stimulous to agricultural pursuits is given which will bring under speedy cultivation large tracts, which it might otherwise have required years to develope.

THE OPENING MARKET.

Did you ever contemplate the extent of the market which is now opening to California fruits and other sources of trade, by the extension of the Railroad? For years this great country, extending from the eastern base of the Nevada Mountains to Salt Lake, will be supplied by California fruits. Not a little will find its way even to the city of Chicago. The nurseries and flower gardens will also have a good demand for long years to come. The extent of country to be supplied is immense. If it is populated, as present developements seem to indicate, it is hard to conceive what is in the near future, of population and trade in this new country. San Francisco, by a liberal course and proper foresight, may command for California this expansive and unfolding empire. Much is said and written about Chicago competing for this trade; it cannot be done, unless the people of California show themselves unworthy of the position they occupy on the map of the world.

Since writing the foregoing the Capitol Bill has passed and is now in the hands of the Governor. Two new County Bills are now pending, with a fair show to become laws—one for a County to include White Pine, another to include Elka and the northeastern portion of the State.

AN OLD CALIFORNIAN.

LOS ANGELES, CULTIVATION, SILK CULTURE Etc.

LOS ANGELES, FEB'Y 17th 1869

Friend Warren,—Accompaning this note, please find a Small Sample of "Fruits from our Fairy land."

There is but little to note in this quiet pastoral district. The Orange crop, though small is of fine quality. More land has been put in small grain than ever before and the late heavy rains have dispelled all doubts of a dry season which was much feared.

A large Emigration has been coming here for the past few months, some of whom have settled while others returned. Some of the largest Rancho's (Spanish Grants) have past into the hands of the "Small Fry," *land grabbers*, and are at last offered for sale, even at exorbitant prices.

A few Emigrants have been induced to purchase and settle on the dry lands who will doubtless come to grief.

A few artesian well borers have commenced their labors here, and it is ammusing to see the silly tricks resorted to by land owners to make believe they have succeeded in getting running water. A low swamp or springy location is selected where by sinking a short distance the water is induced to flow to the surface and: "There don't you see, we have got Artesian water." Buy our lands, and "go thou and do likewise," others however, are trying in good earnest and, O should they succeed, won't our deserts flourish, and "Blossom as the Rose?"

There is an unsure and I fear an unhealthy excitement about "Silk Culture," this season; parties engaging in this business, although they have never reeled an ounce of silk in their lives, can inform you precisely how much money they will make the first year, the second, more, and the third they come out almost *millionares* they base their fast and fabulous fortunes, first upon the State Bounty, or Premium, and next the sale of Eggs, but little being said of preparing the silk for market.

Now Col, you have been observing this closely for at least five years and should be good authority, can you inform us, in the first place as to the "States Bounty," on Mulberry trees and how the State officials proposes to raise these fabulously large sums; as to eggs, if they keep falling in price as last season from 10 to 6 and 4 Dollars per ounce I don't see much encouragement here; but has there been no actual experiment made? can you not give us the cost of raising and preparing one pound of reeled silk for market, and also its price? Give us something reliable, Col, for we do not want calculation made on paper, by parties who have mulberry cuttings and eggs for sale; we have a supply of those on hand ourselves

M. D. J.

OUR REPLY.

In reply to our kind friend, we will first give him our grateful thanks for the large box of delicious fruit which he has so generously sent us, and which came to us in perfect order.

When we opened the box the *perfume* of the delicious fruit was like a breath from "Araby the Blest," and the odors are still about us.

The Lemons, Oranges, and Limes are as large, fine and delicious, each perfect in their kind as can be found in any market in the world. Well may our correspondant call Los Angeles, the 'Fairy Land' if her groves bear such fruits as these.

In reply to the inquires relative to the State Bounties on Mulberry trees, Cocoons &c. also the cost of Reeling Silk &c. we will endeavor in our next to give full details, and the data we shall give shall be reliable.

Hoping to hear often from our friend from the "Fairy Land," as we know we have many readers who are alike interested in the silk question.

ED. FARMER.

THE BOYHOOD OF LINCOLN.

Prang's last elaborate chromo, "The Boyhood of Lincoln," will undoubtedly prove a most profitable venture. There is something peculiarly felicitous in the conjunction of the subject and the picture which assure success. The democracy of art has been applied to teaching the great lesson of American democracy. Eastman Johnson has done in painting for our common home life, what Rogers has done in sculpture for our war life, and this chromo-lithograph will go far to make his name as popular.

The argument for chromo lithography is quite logically and forcibly evolved in this very picture. Just the boys in our land who ought to study the impressive story of the boyhood of Lincoln—and for whom it comes as an evangel—would never be able to do so but for this invention of cheap picture printing. Were the canvas the only medium, Lincoln's life and struggles would be told but to rich men's sons, and its blessed promise to every one of the striving many, from whose shoulders it is the mission of American Republicanism to lift the burdens, would be lost.

In its rare fidelity to the homely details of Western life, presenting an artistic photograph of the backwoods cabin, the home and school of so many an American statesman, this picture has a claim on popular appreciation that will be readily recognized, and it is not venturing much to predict that before very long its rich, dark shades and warm, glowing colors will become household treasures in cot and cabin from ocean to ocean.

GENIUS.

ALEXANDER HAMILTON said to an intimate friend: 'Men give me some credit for genius. All the genius I have lies just in this: When I have a subject in hand, I study it profoundly. Day and night it is before me. I explore it in all its bearings. My mind becomes pervaded with it. Then the effort which I make the people are pleased to call the fruit of genius. It is the fruit of labor and thought.'

Mr. Webster once replied to a gentleman who pressed him to speak on a subject of great importance: 'The subject interests me deeply, but I have not time.—There, sir,' pointing to a huge pile of letters on the table, 'is a pile of unanswered letters to which I must reply before the close of the session (which was then three days off). I have no time to master the subject so as to do it justice.'

'But, Mr. Webster, a few words from you would do much to awaken public attention to it.'

'If there is so much weight in my words as you represent, it is because I do not allow myself to speak on any subject until my mind is imbued with it.'

Demosthenes was once urged to speak on a sudden and great emergency. 'I am not prepared,' said he, and obstinately refused.

The law of labor is equally binding on genius and mediocrity.

RELIGIOUS SPECULATIONS.—Investigations by revenue officers show that the wealthy trustees of churches up town have used money set apart exclusively for religous purposes in investments in Stocks through their favorites brokers. One revenue officer estimates at least two millions in church funds thus invested, while the name of the real capitalists are never made public. A Baptist clergyman is known to have speculated largely in stocks and spends much of his time among brokers. It is said, numbers of churches have been mortgaged for purposes of obtaining money to use in stock speculations.—*N. Y. Exchange*

PRETTY TALL SMOKING.—The tallest chimney in the world, is said to be that at the Port Dundas Works, Glasgow, Scotland. Its height, from the foundation, is 468 feet, above the ground 454 feet, the foundation being 14 feet deep; the outside diameter on a level with the ground is 34 feet, at the top 12 feet 4 inches. The most wonderful part of the story of this lofty chimney is, that having been twisted out of the vertical line to the extent of 7 feet 9 inches, by a violent wind, before the mortar was hardened, human skill has reduced it to a perfect perpendicular again. The mortar was sawed out on the windward side, so as to allow the chimney to settle sufficiently to restore the perpendicular.

SACRAMENTO PROPERTY GOING UP.—The Sac. Bee of the 15th says.

SOLD TO-DAY;—The 100 or 103 acres of land known as part of the Hartley Estate, lying between R and Y, and immediately east of Thirty-first street, was disposed of to-day to Geo. W. Mowe, for $15,000. Garland bid within $50 of that amount, and Barrett, Lansing, and others came close upon the figure. That is about $150 per acre, and is called a good sale.

—If industry is no more than habit, it is at least an excellent one.

OUR SUNLIGHT AND MOONLIGHT.

Italian lands never gave a more genial breath nor their skies a more glorious halo than we San Franciscans have enjoyed for several days past.

Italy may have boasted of her Starlight and Moonlight scenery, but we think we can vie with Italy in both; let the Painter catch the inspiration of our own views from the Steamer's deck in the Moonlight going up to Sacramento. Let him but look away to the Range of the "Sierra Nevada's" and catch the gleams of their ice crested peaks, while the river banks beneath his eye is covered with bright flowers and the air he breathes is as balmy as the breath of roses, and the Painter if he is an "artist" will not need to go to Italia's far clime for Moonlight Scenery, for we have it here in its richest and most beautiful perfection.

NEWS FROM HONOLULU.

The Commercial Herald furnishes us the following news of Jan 23.

EARTHQUAKE.—Another of these unwelcome visitors startled our citizens on Wednesday afternoon, at half past five o'clock. In the valley and near the harbor it was not so distinctly felt as on a line between the two points. From Kaalaea, on the winward side of the island, we learn that it was quite severe, so much so that it was feared that the sugar works were injured, but after careful inspection everything was found in order. News from Kau, Hawaii, is anxiously waited for.

SHARK OIL.—We learn that an expedition is being organized, and a vessel fitted, out for the purpose of catching sharks, in the water about Pearl River. The oil will be extrcted from their livers, and the fins dried for the China trade.

QUICKSILVER.—Small quantities of quicksilver have been offered about town by natives the past week, which it is said was brought up from the bottom of the harbor by the steam dredge boat. Perhaps the oldest inhabitant can tell how it came there.

METEOR.—On Tuesday evening, at about half past ten o'clock, a brilliant meteor shot across the heavens, in the north-eastern part. The light emitted was so bright and the flash so sudden as to startle parties who were out walking,

NEWS FROM LOS ANGELES.

RAIN.—The frequent rains with which we have been blest for the past two weeks has made our farmers the jolliest people imaginable, it has also had much of the same effect upon the real estate agents and agricultural implement venders, for while those who are awaiting a more favorable aspect of the season for purchasing lands, are now anxiously enquiring for locations to purchase or rent; those who already have lands are adding to their force of gang plows, cultivators, &c. to get in as much land as possible.

TEJUNGA RANCHO.—The Tejunga Rancho, situated about fifteen miles from this city, was sold a a few days since for $6,600, an advance of over 3,000 upon what was paid for it some four months since.

DEEDS.—There has been recorded in this county, at the office of the County Recorder, during the month ending Monday, Feb. 10th, one hundred and one sales of real estate, amounting in the aggregate to $138,139.

SNOW.—The snow has appeared nearer the valley, upon the foothills, this winter, than for a number of years past, which accounts for the present unusually cold weather in this city.

IN BLOOM.—We notice that the Almond trees, throughout the city are in full bloom, as is usual at this season of the year.

Lower Californiа.—We have received a large and well gotten up Pamphlet, containing a History of this region of the Country. The pamphlet contains about 50 pages and offers to it's readers a treatise of that region, it's GEOGRAPHY and CHARACTERISTICS with a history of the grant, and purposes of the California Company.

Lumber at White Pine.—It don,t take much to build up there, Lumber sells at $ 250 to $ 350 per thousand. Why don't some live yankee put up a saw mill, and make his pile."—

—Mankind should learn temperance from the moon—the fuller she gets, the shorter her horns become.

—Solomon advises the sluggard to go to the ant, but the shiftless of the present day go to the uncle.

—A dandy inquired at a fruit stall, "Are these apples fit for the hogs to eat?" "Try 'em and see," said the woman.

Reader! have you those loved ones whom to leave destitute would embitter your last hours?—Then go to day and secure a *Life Policy for their good.*

—Riches got by fraud are dug out of one's own heart, and destroys the mind.

Agriculture.

FARMING MACHINERY.

The improvement of the portable steam engine, no less than of the locomotive steam engine, to meet the demands of agriculture, is one of the most important problems of the day. There are already in England, stationary engines of 100 indicated horse power, employed to drag gangs of ploughs. The application of steam to the other operations of agriculture is almost equally important. "Engineering" says: When all the advantages of steam are fully understood by farmers we may expect to see it applied on thousands of farms where, thus far, it has never been seen. It will be employed to mix clay and sandy soils, assimilating the texture of hill top lands to that of those in the valleys. It will be employed to pump farm and other sewage to where it ought to be pumped for irrigation, for sheep washing, for stone breaking, and in many other ways. The worthy steam farmer will be a sort of factory owner and engineer-in-chief, and many of his men will be mechanics, engine drivers, and stokers. The great farms will be almost in a single field, levelled where possible almost like a drawing table. The steam farming (not barnyard) engine can equally draw a plough, a cultivator, a harrow, a seed drill, or a drain plough, and it is not clear why it should not also draw a reaping or mowing machine, provided it was made sufficiently wide to render the application of steam profitable.

There is no less than 300 steam ploughs and cultivating sets now used in England. "Engineering" estimates that they have broken up and pulverized from once to 6 to 8 times, at least half a million acres (possibly much more, for it is exceedingly difficult to form any accurate estimate,) and that in a manner never before known since ploughs were invented. There are now ploughing engines capable of exerting 100 indicated horse power, and capable of putting a draught of 3 or 4 tons upon an implement at a rate varying between 3 and 4 miles an hour. With such power any depth can be reached, and as the disintegrating power is, by a well-established mechanical law, as the square of the velocity, the soil is broken with 4 times the mechanical effect at 4 miles an hour, as in the case of a horse-drawn plough at two miles.

The committees of the Royal Agricultural Society on steam cultivation, published in 1867, after examining some 200 steam-tilled farms, report that "A culture deeper than is possible for horses to effect, works a highly beneficial change in the texture of the soil, imparts additional efficiency to drainage works, augments the value of the manure applied, brings into operation certain latent properties of the soil, which much increases its fertility; it also fits land, formerly unfit, for the growth of turnips, allows of their being fed off by sheep, the operations of the field is economized, and the growth of the crops is stimulated." At the time of their report steam tillage was considerably cheaper than horse tillage. Now, the steam ploughing engine, rope, and other tackle, and the attached implements, have been very much improved, and the comparison would be still more in favor of steam.

But the greatest gain is in the improved crops due to thorough tillage, and this may amount to an extra quarter of wheat per acre, an extra 3 or 4 tons of turnips, or something equivalent, and in this way the average crop may be increased possibly to the extent of £10,000,000. There are many recorded instances of steam-ploughed fields yielding 2 or more quarters of wheat per acre more than fields of the same character of soil alongside, but cultivated by horses.

Although there is probably no more efficient and economical power than steam for large operations, the substitution for "one horse" operations of some safer and more cheaply managed power than steam, as at present generated and used, should merit the serious consideration of the profession.

The "American Artisan" suggests also the following important problems for agricultural engineers: The development of *compound machines* for preparing, by different changes of parts, the food for animals, whether of grain or stalk or root; for disintegrating and preparing refuse mineral and vegetable substances for fertilizing purposes; for cleaning fields from stones; for the rapid and efficient construction of drains, and for many other purposes which would be developed in time, but can hardly be now foreseen.

Sweet Potatoe Seed from the Bloom.—A correspondent of the Plow, Loom, and Anvil, says he has raised, for three years past, sweet potatoes of better quality than usual, in the following way.

The yam potatoe blooms in August; the seeds are formed of about the size of a sage seed and of about the same color. The pods should be noticed and gathered when ripe, or they will drop. In the spring, at the usual time of sowing the seed, I sow them in the same way I sow cabbage seed.

They do not come up quite as soon, but will continue doing so during spring. The plant is small and delicate in appearance, and should be drawn in a wet season with a little dirt attached to it and transplanted. The leaf and vine have a different appearance from the potato, and will be found to grow larger and smoother than usual.

I prefer this method after satisfactory practice, in raising the potato to any other.

The cheapest of lawyers—keeping ones own counsel.

COTTON SEED OIL.

The cotton seed in its ordinary condition weighs about 33 pounds per bushel, of which about one-half is oil-yielding kernel, and the rest husk or hull, the latter being covered with a short woolen coat of fibres or filaments. In the usual method of extracting the oil this hull is removed by machinery, and the oil is expressed from the kernels by subjecting the same to great pressure after being ground, about 60 gallons of oil being obtained from a ton of the hulled seed. The oil weighs about 8 pounds to the gallon, and may be used not only in the manufacture of soap, but for grinding paints, and when of first quality and properly refined, as a table oil in the place of that obtained from olives. One reason why this branch of production has not thriven better may, perhaps, be found in the employment of costly machinery, which not only involves a large original outlay of capital, but necessitates the consumption of all the seed of a large neighborhood in order to keep the apparatus constantly, and thus profitably employed, while the most available method would appear to involve the use of cheap and easily-operated machinery. This would enable each proprietor to extract the oil from the seed at such times and under such circumstances as might be the most convenient, and to employ the cotton seed as manure to nearly the same extent as if the crude seed were buried in the earth, inasmuch as the oil is simply a hydro carbon, worth comparatively little as a fertilizer, while the pomace or oil-cake, containing the mineral matter and substances capable of generating ammonia, could be used for manurial purposes.

The "American Artisan" calls the attention of inventors to this subject, and indicates the direction of improvement.

DON'T EAT PORK

John Wilbrecht, a farmer residing five miles west of Rome, a son; and two daughters, all adults, have died since Dec 18th of trichinosis. Five other members of the family and of the family of his son in law, B. Friedel, are ill of the same disease some of them in a very critical condition. A microscopical examination of the muscle of one o the deceased revealed the presence of myriads of trichina in an active state. The little worms looked, under the microscope like living snakes. The salt pork and sausages of which these families had eaten were full of trichina in the encysted state. This pork was raised by Mr. Wilbrecht, and fattened as usual on corn and grain. There was nothing in the conduct or appearance of the animals when fattening or the look of the meat to indicate disease. The sausages are made of raw meat and then smoked until quite black and dry, as is the German custom, and have been eaten by all the persons attacked without cooking. This terrible calamity which has befallen these people is another impressive warning to the public of the importance of thoroughly cooking pork. In heating this meat to the boiling point is the only safety against frightful and mortal disease.

S. F. Bulletin

AGRICULTURAL ITEMS.

The live stock traffic of Chicago for 1868 amounted to 324,525 beeves, and 1,706,782 hogs received. Sixty five million dollars were paid out for cattle and hogs.

At a recent meeting of the Connecticut Board of Agriculture, Mr. E. H. Hyde stated that he once had a Durham cow that produced 55 pounds of milk, which made 21 pounds 15 ounces of butter daily, for thirty days in succession.

At a sale of Short-Horns in England, Moss Rose, a famous cow, but somewhat aged, sold for 400 guineas. Two others, Princess, Second and third, brought 630 guineas. Fifty six cows averaged over £67, and ten bulls averaged £64.

Mr. Thomas Anderson, of Garrard, Ky., has a cow, four years old in September last, that has given birth to five calves!

David Anderson, of Gwinnett county, Ga., offers a premium of a silver pitcher worth $10 to the farmer producing the largest quantity of cotton per acre, ginned at his gin.

A Providence merchant, some days since purchased what he supposed to be a five pound ball of butter. On cutting it, it was found to be mashed potato, with a covering of butter.

[Only one of Hertz's tricks ED.F.]

REMOVING OLD PUTTY.—Those who have plant houses, frames, &c., know how difficult it is to remove old putty from sashes without injuring the sash. I have seen it stated in some journal, that it could be removed very easy by applying a hot iron to it. I tried the experiment a few days ago for the first time, and was quite surprised to find how easily the most indurate old putty could be cut out after being well warmed up by the application of a red hot iron. Try it.—Ex.

HEAVY JUDGMENT.—In the District Court yesterday, a Judgment was rendered in the suit of Jacob Eliat, vs. Julio Verdugo for fifty six thousand dollars and costs of suit. The judgment was for foreclosure of mortgage upon a note and mortgage given about six years ago for two thousand six hundred dollars, drawing three per cent per month compounded monthly.

The *Practical Farmer* gives a statement of the cost of a few fowls lately imported from England by D. W. Heratine, of Philadelpha. For four Buff Cochins, four silver Gray Dorkings, and four dark Brahma Pullets, all prize birds, 26 pounds and 12 shillings—or something like $160 in currency—were paid. To this was added cost of freight and insurance. The produce from similar fowls have been readily sold at $20 per pair.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

GOOD PLACES FOR BOYS.

Dear Sir:—I would like very much to get a ace as clerk in New York. I am sixteen years d, and have always lived on a farm. I under- and arithmetic pretty well, and think I could ve good satisfaction in a store. If you can help o get a place, it will be doing me a great favor. Yours respectfully,

Many such letters are received here every year. Ve have not time to answer each one personally, nd as the matter is an important one to many oung readers, we give the following general an- wer. First, to follow the Yankee way of answer- ng one question by answering another, Why do ou wish to leave the farm and come to New York? he answer in most cases is "It's easier than orking on a farm." Perhaps so. It is easier in ne sense to be good for nothing than to be val- able to yourself and others; it takes much less work—simply do nothing, and be nobody, is the ule. But the question to be looked at is, Will it ay to have an easy time and get little in return? hose that succeed in the city must do it by hard ork. Many a rich merchant in New York per- orms more real labor in a day and is more ex- austed than the hardest worked laborer on a farm. He does not exert his muscles as much, but his rain, which is the seat of his power, is intensely ctive, and he wears out fast. Those who "take hings easy" in the city get the same small return s the loungers in the country; so nothing will e gained in that respect. "But," say, or rather hink, many boys, "they have such nice things in ew York; shows, museums, circuses, and some- hing going on all the time." Yes, there are thous- nds of ways for spending money for amusement here, all of which bring no profit, and what is orse, too many of them are surrounded with dan- er. Thousands of young are every year amused y the shows and ruined by their corrupt sur- oundings, for the drinking saloon and the gam- ling rooms are close by the principal places of musement, and every temptation to enter them is held out. But furthermore, there are thousands of boys and young men born here, accustomed to city life, who stand ready to fill all the desirable places. They usually have the best opportunities, having acquaintances and friends to help them, so that a boy from the country applies for a place under great disadvantages. A single advertise- ment for a boy by a friend of ours was recently answered by more than two hundred applicants. It is true that a few, perhaps one out of a hundred, who come to this city, succeed by long self-denial and hard work in gaining an independence, but it s not certain that even these are better off than hey would have been to have used the same en- ergy and worked their way up in the country. Work, patience, perseverance, honesty, brains, and energy, will win anywhere, and the farm where you have already made a beginning is equal to any other place for working out the problem of life.—*American Agriculturist.*

HORTICULTURAL RARITIES.

Senator Morgan presented a petition from a large number of horticulturists throughout the country, praying the enacting of a "Horticultural Protective Rights Bill." They desire the enactment of a law making it the duty of the Patent Office Department to grant letters patent on new horticultural rarities. Purchasers of said rarities to be allowed to propagate for their individual use only during the time of right granted, and that a gift of plants propagated from said rarity by any other excepting the originator be considerated a breach of law similar to that of a sale. This is a vital point, as it is a practice among gardeners employed by gentlemen to disseminate new rarities by gift. Protection would soon be the means of giving rarities that would succeed in every section of the country. Fruits much earlier, hardier, and more valuable would be perfected in abundance, and it would be possible by crossing and acclimation that many of the fruits of the tropics and of the old country could yet be grown in this country as far North as the lakes. The petitioners, therefore, pray Congress to take the matter under consideration and correct the present unequal and unjust system.

LEWISIA REDIVIVIA.

This is a plant supposed to be found in California or on some portion of the Pacific coast, we think it is known in "Washington Territory," and also in British Columbia.

Dr Hooker of the Royal Botanic Gardens at Kew, London) says: Among the plants eaten by the Kootanier, Colville, and other tribes in that part of British Columbia and Washington Territory, is the beautiful Lewisia Redivivia, the roots are gathered in great quantities, and boiled or eaten like *Salep* or Arrow-root. In this state they are not unpleasant to the taste, slightly bitter, but are valued by the Indians as a nutritious food for carrying on long journeys, two or three ounces being sufficient for a man even though under great fatigue.

These Indians call it "*Spat Lem*" or "Pileem-and-lise-ne-mare," and look upon it as one of the great gifts of the "Supreme Master of life.

We desire to learn where this rootcan be found and shall esteem it a great favor if those who shall read this article and know of its location, will be so kind as to address a letter upon the subject, to the Editor of this Journal.

Our New York House, under the name of WILSON, MORROW & CHAMBERLIN, will open in New York City about the first of November ext, and will have the exclusive agency of our

WINES AND LIQUORS

in all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

MESSRS. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed. We will make liberal Cash Advances on Merchandise co signed to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco

WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required.—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD

WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurius Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet 30-12.

VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

Learn How Grapes are Grown

IN THE EASTERN STATES.

LEARN HOW TO GROW

Small Fruits:

Raspberries,
Blackberries,
Strawberries,
Currants,
Gooseberries, etc.

Many *New Varieties* have, within a few years been brought out, which far surpasses the old varieties; such, among Raspberries, are the

Clark, which we place at the head of the list of tried varieties;

Davison's Thornless Black Cap, an entirely thornless black Raspberry, of very distinct habits of growth. Excellent fruit;

Prosser, a competitor for the position the Clark has taken. Stands dry Summers well;

Philadelphia, most productive

Doolittle Black Cap, extensively planted for field cultivation;

Cattawissa, good flavor, red; bears two crops annually. Have seen it with ripe berries and blossoms at the time of our first snows, about November 20.

AND MANY OTHER VARIETIES.

Among *Strawberries*, the *New Varieties* are

Charles Downing,
Dr. Nicaise.
Nicanor,
Durand, etc.

All these varieties are described in the New Edition of our

"Manual of Grape and Small Fruit Culture."

This a neat little Pamphlet, containing full instruction how cultivate all these different varieties of Small Fruits It contains full descriptions of the New Blackberries,

WILSON'S EARLY and KITTATINNY,

together with a new White or Cream-colored variety, which will be brought out this fall. Also,

HOW TO GROW BLACKBERRY PLANTS.

Last Fall we disposed of over 250,000 Blackberry Root Cuttings. We have heard of but few instances where they did not grow. We sent thousands of them to customers, by mail, as an experiment, to prove they could be sent safely as as California. We sent a package to Colonel Warren of the "California Farmer"

Our Pamphlet, containing Price List of our stock of Plants and Cuttings, can be obtained by calling at the office of the California Farmer, or by addressing Col. Warren, Editor California Farmer, San Francisco, Cal.

We have 50 acres devoted to the culture of Small Fruits not all cultivated yet; 20 acres in Strawberries; 14 acres in Raspberries; 7 acres in Blackberries; 2 acres in Grapes.

WARREN & CO., *California Farmer Office*, are appointed Special Agents for our Nursery Stock, where orders can be left to secure them to customers this season. Orders should be sent at once.

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE.

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, grower as the Doolittle or the Miami, but still it is good grower and very prolific Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS, making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

GRAPE VINES, ETC., FOR FALL OF 1868

We offer for Fall planting a Stock of Fruit and Ornamental Trees, Grape Vines, Etc., which for extent, variety, vigor and beauty of growth has never been surpassed.

Full particulars given in the ollowing Catalogues, just issued, sent prepaid on receipt of 10 cents each, for Nos. 1, 2 and 3—No. 4 free. No. 1, Descriptive Catalogue of Fruits. No. 2, Ornamental Trees. No. 3, Green House Plants. No 4, Wholesale List.

ELLWANGER & BARRY,

30 8 Mt Hope Nurseri Rochester, N. Y

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR AN *ORANGE PLANTATION,*

Can obtain SUPERIOR SEED at the

FARMER OFFICE.

PREMIUMS for 1869.

With a hope to enlist a new interest for our Journal and to give to those who co-operate with us a just recompense for their time and labor, we offer the following

Very Liberal Premiums

For the Year 1869,

THE THIRTY FIRST VOLUME,

—AND—

SIXTEENTH YEAR

OF THE

"California Farmer."

We trust the following Premiums will induce those who desire to receive our Journal, and the accompanying New Year's Gifts, to extend to us their generous influence for the Extension of our Circulation, until every family in the Rural Districts shall have a copy of the

"CALIFORNIA FARMER."

TERMS OF SUBSCRIPTION:

(Payments in Gold or Silver, Always in Advance.)

By mail, one year,.....$5 00
" " six months,.....3 00
When payments are delayed six months,.....6 00

CLUBBING.

To clubs of five, (and extra copy), six for... 25 00
do twenty,..... 75 00
do fifty 175 00

Or, we will give as Premiums, as follows:

For every club of five, and $25, Agricultural Books valued at.....6 00

To every club of Ten, and $50, Agricultural Books valued at..... , . 15 00

For every club of Twenty, and $100, Agricultural Books valued at . . . 30 00

For every club of Fifty, and $250, Agricultural Books valued at 75

Thus securing to a Farmer, or a Farmer's Club, the nucleus of a good Library—The Books to be at our lowest advertised Gold prices.

Every Farming District in our State could by co-operating with us secure a large and valuable Library, without any other cost save a little labor and co-operation to extend the FARMER'S circulation.

To any Lady who will secure us Ten subscribers, and $50, we will send Magazines or Floral Books to the value of $15 00

For Twenty subscribers, and $100, we will send Books and Magazines, or a Sewing Machine valued at 35 00

For a club of Forty, and $200, we will send a "Howe," or a "Florence" Sewing Machine valued at 65 00

Each and every Premium to be at regular Gold Prices, and the Premium to be selected by the winner.

We hope these offers will be so appreciated that we shall have the earnest co-operation of many friends, and to all who shall interest themselves, we shall be ready to fully remunerate their kindness.

Sample copies will be sent, when desired, to those who wish to canvass among their friends.

Address COL, WARREN, Editor.

or WARREN & CO., Publishers

IMPORTANT TO NURSERYMEN, GARDENERS, AND AMATEUR FLORISTS.

We beg to announce the arrival of the choicest and best assorted collection of

RARE SEEDS,

ever received on this coast. They have been selected with the greatest care, from the first houses in Europe, and are comprised of

EVERGREEN, AND DECIDUOUS TREES AND SHRUBS, RARE AND BEAUTIFUL PERENIALS, BIENNIALS, ANNUALS, ETC.;

also, new and choice Vegetables; the assortment is worthy the attention of all who admire the beautiful; and also the particular attention of gardeners who are anxious to secure something rare and new in the Vegetable kingdom.

We shall send them out in small parcels or individual packets, so that many may have the chance of securing the collection. Orders executed in rotation, and carefully packed for mailing any distance.

Persons remitting us five dollars, will have collections of seeds sent them, worth intrinsically double the amount.

WARREN & CO.,

FARMER OFFICE, 320 *Clay St.*, San Francisco.

Jebb's Patent Churn.

This admirable Churn—one of the best yet invented—and which was pronounced

THE BEST CHURN EXHIBITED AT THE LATE STATE FAIR,

and to which was awarded by the Committee

THE FIRST PREMIUM,

is now offered for sale to the Trade, or at Retail, in lot to suit purchasers at the

CALIFORNIA FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:
THURSDAY EVENING.....FEBRUARY, 25 1869.

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING.

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for *one* insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facia* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office.

Prang's Beautiful Chromos.

Those who wish to see these most beautiful pictures and who wish to order the same, can see a large collection of them at the

"FARMER OFFICE."

Those which are advertised by these Art Publishers, can nearly all be seen at our office, as we have received copies, and they are, indeed, beautiful pictures. We have them on sale. WARREN & CO.,
Farmer Office.

Country Homes Wanted.

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 20 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they communicate with this office immediately

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.

Preserve Your Sight!

BRAZILIAN PEBBLES.
SPECTACLES AND EYE-GLASSES

Mounted in fine gold, Steel and Shell Frames, accurately adapted to the various conditions of sight. Those in need of Spectacles will find my assortment the most extensive, and receive the attention of one skilled in his profession.

C. MULLER, Optician,
71 No 205 Montgomery street, San Francisco.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a our office, or addressing EDITOR FARMER.

RAMBLES IN THE COUNTRY.

SANTA CLARA.

Some little time since we made our first trip in the "Horse Cars" from San Jose to Santa Clara. This is indeed a very fine place for a car ride, the long Avenue of Shade Trees extending almost this entire route, The "Almaden Road" as it is so well known, will make this trip very pleasant in the hot days of Summer, and although the recent heavy rains did suspend the travel for a few days it will make it so much more pleasant when resumed—as the citizens have begun to realize the value of this convenient mode of travel.

Santa Clara City is one of the Beautiful Spots in this great and prosperous Valley. There is a quiet beauty about it that speaks of "Rest;" 'tis true that it does not wear the look of the hurry and bustle which is found in San Jose, for the business is not as large nor as extensive, but there is a quiet, yet *certain prosperity* stamped on all the interests of the place.

The Business portion of the City has been much improved within two years past, many New and Substantial Buildings have been erected. Manufactures have increased; Mechanic art has increased; Mechanics are fully employed; Farms are better improved; Orchards, Vineyards, and Gardens have been put under a higher state of Cultivation, while many New and Beautiful *Mansions* and *neat Cottage Houses* have sprung up like magic, all giving plain evidence of an increased prosperity.

Among the places we visited was the NEW MACHINE SHOP of E. H. Davies, Esq, a large and spacious new building erected expressly by him as a *Complete Machine Shop*, where every branch of business connected with an Establishment of this kind could be carried on with the most improved machinery and the best workmen in the very best manner.

The Building is 66 feet long, by 40 feet wide, and 3 stories high, built thoroughly, and with strict reference to mechanical convenience for the various kinds of labor to be carried on.

The machinery is all *entirely new* and of the very latest and most approved kinds—many of the machines being the first of the kind introduced into this State.

A very fine 10 horse power Engine, made by "Mess. Grifford & Houghton, Fall River, Mass." carries all the works. The machinery was all from the "Putnam Machine Works, Fitchburg, Mass.," esteemed we believe, as one of the most complete establishments in the United States. The beautiful machinery here at work is certainly strong proof of their excellent workmanship.

The object of Mr. Davies in establishing so extensive works at Santa Clara was to give an opportunity to all who wish good work done to know they need not go far to obtain it.

The Establishment of Mr. Davies is prepared to do all kinds of work, such as Planing, Sawing, and Turning all kinds of Wood Work. Turning and Finishing Brass and Copper Work, Building and Repairing Carriages, Farm Implements, and all kinds of work usually done in a COMPLETE MACHINE SHOP.

Mr. Davies has expended a liberal sum of money to build up the concern and it is now the duty of the citizens to encourage him and *build him up*, and make his work prosperous which he truly deserves.

We also visited the several "Flouring Mills" to see the various samples of "Wheat," for which the Valley of Santa Clara is so famous, as her wheat usually command 2½ to 5 cents per 100 lbs. more than grains elsewhere grown, and we attribute this to the attention paid in *sowing clean seed*, and properly cleaning the wheat after it is harvested, much to the credit of the wheat growers of the Santa Clara region.

The Santa Clara Mills is carried on by Mess. Robinson & Co. The mill has 3 run of stone for *Flour*, and one for *Feed*, and turns out 120 barrels of Flour per day of the very best quality. The Santa Clara Mills Flour is sold in this city by Mess. C. Clayton & Co. This Flouring Mill was among the earliest established in our State.

The Farmers' Mills of Santa Clara, carried on by Mess. Morgan & Whittle has 3 run of stone, 2 for Flour, and 1 for feed—often however, running all three for Flour, and turns out usually 60 barrels of Superior Flour daily.

In addition to these places of Industry, there are many others, where Carriages, Waggons, Plows and Farming Implements are made and repaired, all giving employment to those who love labor and are willing to work.

"Cameron's Hotel" has been enlarged and improved within a few years, and is now the only large and genteel Hotel of Santa Clara; and there Mr. Cameron as "Mine Host" is found, ever ready to receive and wait upon his guests in his usual courteous and attentive manner.

SANTA CLARA COLLEGE.

We cannot omit to speak of this Grand Institution while speaking of Santa Clara, for it is one of, if not the very greatest feature in the Valley of Santa Clara.

The spacious grounds of this college and the large and elegant building, that now covers a portion of the ground, loom up to view as *the* feature of the place as you approach Santa Clara on all sides. The lofty Dome upon the New Building looms up like the Dome of some great "Cathedral" that forms the principal piece in a Picture; and justly so do these fine College Buildings give the principal and most striking feature to the Panorama of the Santa Clara Valley. No visitor to the Valley should go away from the place without a visit to this Noble Institution of learning, where all who take an interest in Education and the well being of society, will always find a ready welcome and be shown over these spacious buildings, complete in everything as an Educational Institution, and under the able and excellent Rev. Father Varsi who is President, and a large number of Fathers as teachers who are doing a great work.

We have more to say of this College soon, and more of Santa Clara, and also San Jose, but we must defer till our next letter.

LOOK TO YOUR GARDENS.

Now is the time to put the Gardens in order for the coming summer, now is the the time to *trench deep* if you would preserve the soil from the *droughts* of *summer*.

Dig deep, and the moisture will keep.
And the plants will grow while you are asleep.

Few persons are aware of the great importance of *deep cultivation* here in this dry and sunny land, deep culture and thorough work in the garden is the only kind of work that will pay.

Deep culture, the deeper and more thorough the earth is broken up and pulverised the bettr it will be for the plants that are sending out there delicate roots in search of food, and the longer this kind of earth will retain its moisture

It is a very great mistake to suppose that *cultivation* in dry weather, dries up the earth, it is directly the reverse, provided it is *deeply* and *thoroughly done* and this work upon a good rich soil; dry, loose sandy soil needs no such culture no will it do to *merely scratch* the *surface soil* while leaving the lower soil a hard pan, for this kind of work is sure to dry it all up, but deep and repeated cultivation in the dry season is sure to keep the soil in good condition and all greatly to all that grows in the soil.

Let any person try this plan correctly and they will soon be convinced of its excellence.

UNSUCCESSFUL FRUIT GROWERS.

Knowledge of fruit.—It is greatly to be regretted that more attention is not given to the study of the variety and the quality of various fruits by those who purchase and plant the same. Many here who plant scarcely know a Nectarine from an Apricot or a Plum from a Peach and as to the *different varieties* of the same fruits there they are completely in the dark, they say all they know is they bought it for a Peach or Plum, but of their own knowledge they can say but little.

Now it is Important that those who grow fruit should know the varieties and the adaptation of that kind of fruit to their soil, if they aim at success one kind may do well, another not produce at all, and then too one may be early, another late, and this they should know in order that they may be properly suited to their *location* as well as soil, as the different kind of fruits are all affected materially by these circumstances of soil and climate, and unless the growers will study these things he never can be a very successful grower.

A few days since when asking a person if he grew strawberies he answered he did, when we inquired the variety, he said that he could not Say, all he knew was they called it a strawberry, such things ought not to be.

PRUNE, RASP BERRIES BLACKBERRIES &c.

This kind of fruit bearing vines needs as careful care and as correct pruning as Fruit Trees, so that they may yield larger and better perfected fruit both in size and *quality*.

This class of fruit bearers will if neglected decrease in the quantity and quality of its fruit rapidly if the soil is left without a judicious cultivation the mass of their roots will mat together seriously injuring the crop, and if the *branches* are left to grow without pruning, the fruit will also decrease in size and quality.

Rasberries and Blackberries acquire to have their stalks cut back to strong and stout wood so as to compel them to throw out lateral branches upon which grow the finest fruit, where there are lateral branches on the stalks even then if they are small and without strength it is better to cut them off to within six inches of the stalk and all strong branches should be shortened so that the fruit may be larger and better, there is no class of fruit bearing vines that will show improvement quicker than the kind of fruit we now speak of, and no fruits more refreshing in their season, every little garden spot in our city should have them.

OUR NATIVE TREES AND FLOWERS.

However desirable it always is to procure all that is Beautiful and Rare from other lands and make them our own by acclimating them with us, we do know we have many very beautiful Trees, Shrubs and Flowers that are surpassingly beautiful and really rare and valuable, so much so that the Nursery men and Florists of Europe and other States of our Union are sending to us for them, that can truly appreciate them, yet how few of our own people, even they who have showy gardens ever think of procuring these Gems of our own State.

We hope a better feeling may exist and we trust those who "Love the Beautiful," now that "Spring time," is near, will take there Baskets on their arms, and with there garden trowel go out among the hills and ravines and on our flower crowned plains and gather some of these "Gems," and transplant them into the "Home Paterre."

PLANT SMALL FRUITS.

We would urge greater attention at the present time to the planting of small fruits, such as *Strawberries*, *Raspberries*, and *Blackberries*, with *Gooseberries*, and *Currrants*.

Never have we had so good a season to commence the cultivation of such fruit as the present. Last year the demand for them was large, and they sold readily, and at good prices, and beyond all question the demand will be greatly increased this year.

When the Railroad shall carry off all our *large fruit*, pears, apples, and grapes, to New York; Boston, and Philadelphia, *small fruits* will bring a big price in our markets and they will pay well so plant, and plant largely.

—"Ma, if you will give me an apple, I will be good." "No, my child, you must not be good for pay—you must be good for nothing."

—One has only to die to be praised.

CULTIVATE THE FIG.

There is no Fruit more easily grown, none of so rapid growth, and none that comes to so early fruiting as the Fig, and certainly none that is richer or more delicious, and none that will pay better in our market for a careful culture.

We have often called the attention of our own orchardists to this Fruit as one that will pay well for a judicious care and attention to its culture.

The "Fig" in its *fresh state*, requires time to become a favorite with many, like the "Tomato" it is not liked at first, but when its qualities are appreciated, it will always become *the* favorite, for it is one of the most *healthy* and nutritious as it is one of the most delicious of all fruits.

The fruit of the Fig tree was in large demand the last year and there was only a limited supply and then at full prices and generally of the common "Black Fig" of California.

The best varieties to grow are the Brown Turkey, a very large Fig, the White and Brown Ischia and several other of the Mediteranean varieties, each and all of them very prolific in their bearing, and always very profitable to raise.

There should be more attention to the cultivation of the Fig in every section of our State as the demand for this fruit will increase every year.

WHITE PINE FEVER.

Fever increases. Pulse counts up to nearly 90°—April, 100°—Blood heat, and in May and June, to Fever heat. Afterwards when the Fever changes we shall see many a poor pale face that will appear just like those who have long been confined in a "dark chamber" for the memories of White Pine, will come home to them like "Gold Run," "Gold Lake," Frazer River," and many other gold excitements since the days of '49.

We have no doubt but what there are rich spots there; *very rich*, but it is only to a few—a very few that will ever secure nicnes from "White Pine" by *mining* we mean. There are opportunities no doubt where men can make "piles" by going. They can work earnestly as mechanics, and make money legitimately at their trades. Others can open Boarding and Lodging Houses, and make money and properly, too, and some will go to open drinking places, and gambling saloons and houses of ill repute, and money will be—ill-gotten. But, we venture to say that not *one person in the hundred that go to White Pine* the present year will *better their condition*. Our counsel is, to those who are doing well now, "let well enough alone."

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the article they have to sell, is wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seed, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

THE WOOL MARKET.

The first lot of New Wool the "Spring Clip" has come to market from the "Catalina Islands"—there is however no *price* yet fixed to grade the market; therefore in view of the New York market which indicates a rising scale, we presume the wool growers will adopt the "Hold On" policy—this for a brief time may be wise, as a little time only, and the price must be established as this market is bare, and the Factories must have a supply. A little time and it will be fixed.

TO ORCHARDISTS.

A grand chance will be offered to an orchardist who desires to engage in RAISING FRUIT on a large scale for Exportation over the Rail Road east. A large and valuable Orchard, covering over *forty acres* with the best kind of fruit bearing trees, where an income of over TEN THOUSAND DOLLARS per year can be relied upon, is now offered for sale by reason of the present owner changing his business.

A very fine and large Mansion House of modern style nearly new, and very handsomely furnished, with large Barn, and Stables, Carriage house, and Sheds, Fruit house and all other buildings needed, together with suitable Teams and Tools to carry on the place.

The mansion is surrounded by splendid Shade and Ornamental trees and fine finished avenues leading from the public road to the residence.—This estate is one of the most desirable that has been offered for sale for years, and for a gentleman who desires a place ready to hand, has no superior in our State.

None need apply without ample means, as there is room for a large and permanent profit.

Apply to the *Editor of the Farmer.*

VELOCIPEDESTRIANS. This New Invention has created quite a furor in our City. The "Mechanic's Pavilion," and "Platt's Hall," are both engaged daily by large crowds of people enjoying this "rapid sweeping along." Reports from New Orleans tells us this *fashionable* sport is on the wane there, it having become a *nuisance*, and they are forbidden on the sidewalks by law.

—Little and often, make a heap in time.

Editor's Chair,

[Here we shall hold our special weekly chat with Readers and Correspondents, and here we shall call their attention to such articles in each issue of Journal to which we would direct their special attention.]

We invite Farmers to read the article on "Farming Machinery" which we take from the Engineering Magazine. It shows our progress in this country; we are progressing, but the end is not yet.

We ask our country readers to peruse the article in our "Home Department," the "Hour of Interest," and we think that some of the "Children grounds" around many a country Home will be pictured there. Our hope is that many parents will go and *imitate Charlie*, reform and improve the Homestead.

MOTHER IS CHILDISH.—Let every cold hearted thoughtless and ungrateful child read this little sketch and awake to duty; the lips that chide a Parent are a sure indices of a *bad heart*.

GOOD PLACE FOR BOYS.—We think the Rural Agriculturalist is right, and any one who goes around our city and sees the *hundreds* and thousands of young lads, and young men who are fast going in the road to ruin will see what a city can do to boys. Send them to a farm—it is their salvation.

ERRATA.—The Sugar Beet interest is not properly considered. In our issue of Feb. we published some very important data. We desire however to correct a misprint; the time to *plant in April*—it should have been *February*, as may be seen, in the paragraph, which was in connection below.

We hope to hear from all who are interested in this *Important industry*.

Acknowledgements.

Articles Received at the California Farmer Editor's Rooms, No. 320 Clay Street.

MAGAZINES RECEIVED.—We have a copy of Van Nostrand's Ecclectic Engineering Magazine, the number received by us being No. 1 of Vol. 1, indicates "Something New."

The Magazine is of the size and style of the Ecclectics and Quarterlies, well got up, contains much that is valuable, we can fully appreciate such a work and we copy this week from its pages the article on Farming Machinery.

This Ecclectic is a selection from British and Foreign Engineering, generally a kind of digest of all. It is conducted by A. L. Holley, Civil Engineer of the Bessemer Iron Works, published by D. Van Nostrand, 192 Broadway, N. Y. A valuable publication and worthy a liberal patronage.

PETERS' PARLOR COMPANION, a musical Magazine to be issued every month, 198 Broadway, N. Y, containing the compositions and publications of this Music Publisher, which are large and various—each number is 16 pages of Music, all new and valuable. A very interesting publication.

THE FARM JOURNAL.—This new Publication also headed "Dietz's Experimental," and devoted to the interests of the American Farmer. The new Magazine has been established by Peter Dietz, Esq., the well known dealer in GRAIN—especially WHEAT at Chambersburg, Pa. The "Farm Journal" has been got up in good style and we wish it success.

RHODE ISLAND SOCIETY OF INDUSTRY.—We are again indebted (to the Corresponding Secretary we suppose of this excellent Industrial Association) for these Volumes of Transactions for the year 1867, now just issued.

This report is a valuable record of the doings of the Society, embraced in this Volume of 400 pages and containing a vast amount of information of the progress of that State. We return thanks for the volume.

The volume has been sent out in very handsome style from the printing office of Messrs. Sidney Angell & Co., of Providence reflecting credit on them.

We have the Quarterly size (new series) of the Monthly Reports of the Boston Medical and Surgical Journal. This is one of the best and most interesting Medical publications of the day, containing as it does, Reports of cases under the treatment in Hospitals, Medical Societies, cures, etc., such as can be found in no other now published. It is an invaluable publication to all Medical men. Published monthly by Dr. Clapp & Son, Boston, Mass. $4 per year.

NATURAL SCIENCES.—We have the receipt of numbers of the "Proceedings of the Academy of Natural Sciences of Philadelphia," a most valuable publication. This Society is doing a world of good by their efforts to develope and bring into practical utility the things hidden from the mind of ordinary travellers in the "Journey of Life" and calling attention to much that is valuable and of interest to humanity.

We acknowledge the receipt of the Report of the New York Poultry Society, from the hand of David E. Gavitt, Esq. the Corresponding Secretary.

This Circular announces also, the plan of the New York State Poultry Society, the object of the gathering in the Domestic fowls will produce a desire of men, to go into the Country to raise these handsome animals. The poultry show alluded to will take place March 23'd at Niblo's in City, at the skating Rink on 3d Avenue between 63 and 64 street

We have received No. 1 of Vol. 1 of the Western Horticulturist, a Monthly, and a very valuable acceptable volume, Containing many valuable Essays on important subjects.

THE INCOMING ADMINISTRATION.

General Grant, it is announced as definitly decided, will not appear at any inauguration ball or reception. This simple fact is probably a very significant indication of the future policy of the incoming Administration—a straw which shows which way a very great wind will blow. Are we nearing the rigid simplicity of severe republicanism? Is the new *régime* to make good in practice the theory of our democratic system?

The immediate results of this expression of the Presidential intention are not few nor unimportant. Retrenchment will be the order and fashion of the day. Display and extravagance will not be a passport to promotion or the favor of the Administration. Public office will not be looked to as the reward of social folly, and the poor Governmental clerks relieved from tax of ball, or reception attendance, will find in that exemption at once an equivalent to the twenty per cent. increase of salary so persistently and piteously called for. Office seekers, and those that hope to bask in the sunshine of the departments, will probably find it to their advantage to ponder on the Presidential position in this matter, and direct their walk and conversation in accordance therewith.—*Forney Press.*

THE PEABODY GOLD MEDAL.

The President sent to Congress last week the correspondence between Secretary Seward and George Peabody, relative to the gold medal presented to him by order of Congress, in consideration of his munificent donation for the promotion of education in the Southern States.

Mr. Peabody says:

Cherishing as I do the sincerest affection for my country, it is not possible for me to feel more grateful than I do for this precious memorial of its regard, coming as it does from thirty millions of American citizens, through their representatives in Congress, with the full accord and co-operation of the President.

This medal, with the rich illustrated transcript of the Congressional resolutions, I shall shortly deposit in the Peabody institution at the place of my birth, in apartments specially constructed for their safe keeping, along with the public testimonials with which I have been honored. There, I trust, it will remain for generations to attest the generous munificence of the American people in recognizing the efforts, however inadequate, of one of the humblest of their fellow countrymen to promote the enlightenment and perpetuity of his native land.

GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.

Choice Grape Vines and Cuttings.

Those who desire to secure the very choicest varieties of Grapes, either in

STRONG ROOTED VINES OR Good Healthy Cuttings,

Can secure the very choicest. Many varieties from rooted vines, that will show fruit the present year.

THE RAISIN GRAPE.

Strong jointed vines of this very desirable grape, can be had with all others at

FARMER OFFICE.

Waltham Watches

The "P. S. Bartlet" movement, with extra jewels, Chronometer balance, Patent Dust Cap, Patent Safety Pinion, and all other late improvements, in a solid 3 oz. Coin Silver Hunting case, with Gold Joints, $27 coin.
The same in 4 oz. case, $30. In 5 oz. case, $33 coin.

The "Waltham Watch Co." movement with extra Jewels, Chronometer Balance, Patent Dust Cap, Patent Safety Pinion, &c, in 3 oz. case, with Gold Joints, $30 coin.
The same in 4 oz. case, $33. In 5 oz. $36 coin.

The "Appleton, Tracy, & Co," movement, with extra Jewels Chronometer Balance, Patent Dust Cap, Patent Safety Pinion, in 3 oz case, Gold Joints, $34 coin.
The same in 4 oz case, $37. In 5 oz $40.

"P. S. Bartlet. Watch in two and a half ounce. 18 karat Gold Hunting Case, $60 coin.
"Waltham Watch Co" Watch, in two and a half ounce, 18 karat Gold Hunting case, $64 coin.
"Appleton Tracy & Co," Watch, in two and a half oz. 18 karat Gold Hunting Case, $67 coin
Any additional weight at $1 per pwt., or $20 per ounce extra.

We will send any of the above by Wells, Fargo & Co's with bill to collect on delivery, and give the purchaser the privilege to examine the watch before paying. All Express charges, however, to be paid by the purchaser. But if the amount of the price of the Watch is remitted to us with the order, we will prepay the express charges to San Francisco ourselves. In sending money, drafts on Wells Fargo & Co. are preferred.

We wish it distinctly understood that these watches are the very best, and with all the latest improvements and that they are in perfect running order, (a guarantee from the manufacturer accompanies each watch) and if any one does not perform well, we will exchange it, or refund the money.

Please state that you saw this in the California Farmer.

WALTHAM WATCHES.

The extensive use of these watches for the last fifteen years by Railway Conductors Engineers, and Expressmen, the most exacting of watch wearers, has thoroughly demonstrated the

STRENGTH, STEADINESS, DURABILITY: AND ACCURACY

of the Waltham Watch. To satisfy this class in all these respects, is to decide the question as to the real value of these time keepers.

MORE THAN 400,000

of these watches are now speaking for themselves in the pockets of the people—a proof and a guarrantee of their superiority over all others

THE SUPERIOR ORGANIZATION

and great extent of the Company's Works at Waltham enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is necessary.

WE ARE NOW SELLING

Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

THESE TIME PIECES

combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country, or in Europe, only those were finally adopted with severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring timekeeping.

Among the many improvements we would particularize:

The invention and use of a

CENTRE PINION,

of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and Tempered Hair-Springs,

now universally admitted by Watchmakers to be the best, are used in all grades of Waltham watches.

ALL WALTHAM WATCHES

have dust proof caps protecting the movement from dust and lessening the necessity of frequent cleaning, necessary in other watches.

OUR NEW PATENT STEM WINDER

or keyless watch, is already a decided success, and a great improvement on any stem-winding watch in the American Market, and by far the cheapest watch of its quality now offered to the public.

TO CALIFORNIANS

and others living in portions of the United States where watchmakers do not abound, watches with the above mentioned improvements which tend to insure accuracy cleanliness, durability and convenience, must prove invaluable.

Every watch bearing the trade-mark of Waltham is guaranteed to be a thoroughly reliable time-keeper,

To prevent imposition, buyers should invariably demand a certificate of genuineness.

The trade supplied by Messrs. R. B. Gray & Co., San Francisco, Cal., and generally for sale at retail by all respectable dealers.

For other facts and information, address
ROBBINS & APPLETON, Gen'l Agents.
31-4 128 Broadway, New York.

SPLENDID RESIDENCE FOR SALE,

A VERY MAGNIFICENT RESIDENCE, SURrounded with the most valuable and choice Ornamental and Shade trees, and connected with a large and valuable heavy bearing Orchard of nearly

FIFTY ACES.

The Fruit of the very choicest kinds.

This Estate is situated upon a Country Road, in one of the finest sections of country where lands are rapidly advancing in value.

The whole Estate, comprising over

SEVENTY-FIVE ACRES

and all of the very best land.

The Mansion House.

Is of modern style, nearly new, and now well and genteely furnished.

The entrance to the Mansion is through fine ornamental and shaded drives, and all the surroundings, are of a pleasant character.

LARGE STABLES,

CARRIAGE HOUSES, and FRUIT HOUSES, and a liberal collection of

FARMING IMPLEMENTS,

make this Estate such a one as is rarely offered for sale.

To a skillful ORCHARDIST, this is a rare chance, as the product of the extensive Orchards, would pay the purchase money in three or four years.

Those who desire a

Large and Valuable Estate,

and one of increasing value, can address

31-4 EDITOR FARMER.

To Take Charge of a Place.

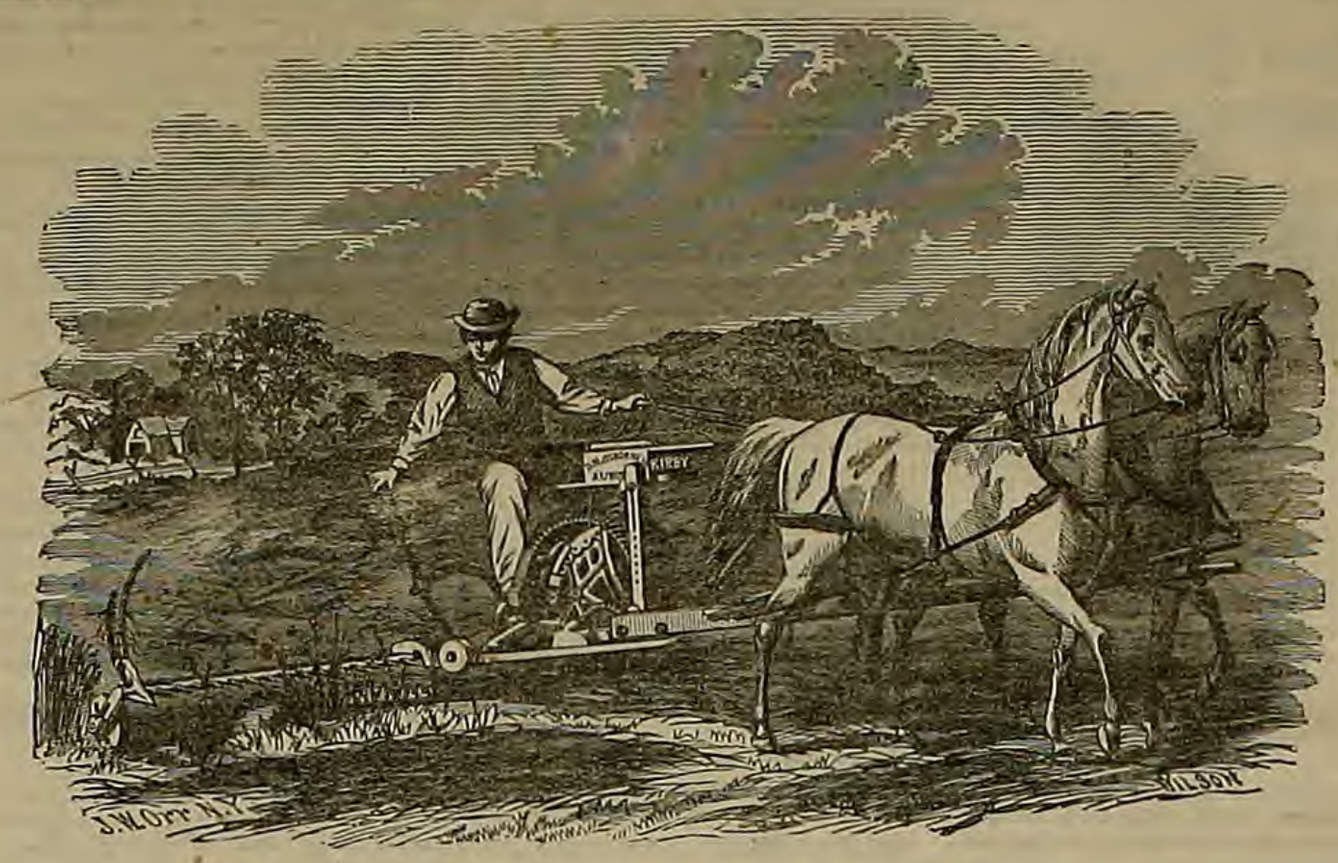
A young man with some capital (from $500 to $1000) can hear of a good opportunity to take charge of a new place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

None but a steady and industrious young man need apply.

The applicant must be able and willing to work, and have a love and taste for rural life. To such a person a good chance can be given.

Address G. A. B.
Care of FARMER Office.



THE KIRBY LARGE MOWER.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down again when smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way, for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with great strain, and be very liable to break.

THIS MACHINE HAS NO EQUAL IN DIFFICULT CUTTING.

It has an INDEPENDENT ACTION by Means of a Joint in the Frame, instead of the Moving Bar, so that the Knife is Kept in Line With the Gearing.

It is Easy Draft for Two Horses, and can Cut Heavier LODGED GRAIN without Clogging than any other Machine on the Pacific Coast.

This Machine is the same as the Combined in every particular, only the Reaping Attachment is left off, and parties buying it can afterwards buy the whole or any part of the Reaping Apparatus from the Common Reel to the Self-Rake.

This large KIRBY MOWER is the only mower that has an independent action, and can use a reel when mowing, especially in windy weather. It can be bought as a Mower, with or without a reel.

In soft, sandy, sediment land, the lifter-wheel, on account of the narrowness of its rim, will sink in quite deeply. In this case a WIDE BAND should be provided and slipped on it, which will prevent the difficulty. The wheel as it is, will run very well on hard ground. These bands with all the Extra parts, will be kept Constantly on Hand, to supply all the calls of purchasers.

As a machine for clipping mustard, or cutting back grain that grows too fast, the Kirby Mower possesses advantages over all other Mowers from the fact that IT CAN CUT AT ANY HEIGHT from the ground, and work equally well and free under all circumstances.

When you order EXTRAS for this Machine, always state the NUMBER ON THE PART WANTED corresponding with the number on the plates on the list, and also GIVE THE NAME of the part when there is no number on it.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose).

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINT your guards LOW by means of the forward bolt in the pole where it bolts to the machine. IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL.

Be sure to keep ALL THE NUTS TIGHT and the JOURNALS WELL OILED, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the JOINT TIGHT WHERE THE PITMAN CONNECTS WITH THE KNIFE, and then your machine will work well without trouble or expense.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

New Strawberries, Raspberries, Grapes &c

We have just received an invoice of NEW STRAWBERRIES, RASPBERRIES, BLACKBERRIES, &c., to which we call the special attention of all who desire the Newest and Choicest Vines and plants known. The following varieties received:

Blackberries—THE KITTATINY. WILSON'S EARLY.
Raspberries—DAVIDSON'S THORNLESS. DOOLITTLE BLACK CAP.
Strawberries—DR. NICAISE, nine to the pound. GOLDEN QUEEN, magnificent. GREEN PROLIFIC, rare.
New Grapes—TEN VARIETIES New Grapes.

As the amount of these new and rare things is limited, early orders only will secure them. Address

WARREN & CO
FARMER OFFICE

Horticultural Premium New Vines and Plants.

With a desire to extend the cultivation of the *New* and *Rare Varieties* of the *Raspberry, Blackberry,* and *Strawberry,* we offer the following

PREMIUMS:

For every new subscriber and $5 two plants of the Thornless Raspberry, and two plants of the Kittatinny Blackberry.

For two new subscribers and $10 we will give two plants each named above and one dozen plants of the Jucunda Strawberry.

For four subscribers and $20 four plants each of the Raspberry and Blackberry, one dozen of the Strawberry, and two Doolittle Blackcap Raspberry.

For five subscribers and $25 the same premiums as for four and four plants of the Doolittle Blackcap Raspberry.

For a club of ten and $50 we will give one dozen Davison Thornless Raspberry, one dozen Kittatinny Blackberry, one dozen Doolittle Blackberry and fifty Jucunda Strawberry.

These premiums will enable beginners to secure these new and rare plants, which are now worth their weight in silver.

Those who send now can also secure our November and December numbers of the *Farmer* and the entire year of 1869.

WARREN & CO.

HALL'S PATENT FOR PRESERVING EGGS.

We have refrained hitherto, from saying much upon this subject, until we had the opportunity of demonstrating the claims of the patent for ourselves. We have accordingly, put up a few eggs, to test the matter, and have them now, as put up months ago. We invite parties, to call and see these eggs, and examine for themselves. They possess the whiteness, clearness and freshness of the newly laid egg, and they front, as a new egg, which can not be said of any preserved egg we know of.

The cheapness and the saving of time, over every other process, may be considered in its favor. The parties in New York, are making arrangements to secure the Patent in all Europe, and it runs yet, 16 years in the United States. Cost of putting up a barrel—less than 50 cents, and the time, does not exceed 10 minutes. Rights for sale by Warren & Co. Farmer Office, San Francisco.

M. C. HAWLEY & CO.,

Home Miscellany.

HOURS AT INTEREST.

A LIFE SKETCH.

BY SYLVANUS COBB, JR.

"There, Eliza, just taste of what that Julia Lombard sent to you."

And thus speaking, Charles Morrill placed upon the table, something covered with a white napkin.

His wife raised the dainty cloth and beheld a small Chinese basket nearly filled with grapes, with half dozen magnificent Bartlett peare set around the edge. It was truly a tempting sight, and Eliza Morrill was not slow to prove the quality of the fruit.

"Aren't they splendid!" cried Charles, as he noticed how his wife smacked her lips.

"I never tasted more luscious grapes in my life."

"But just try one of the pears, Eliza."

"Wait until this evening, Charles, and then we'll take the comfort of them."

The fruit was put away, and after tea Charles Morrill did a few chores around the house, and then went out to one of the stores and spent an hour or so. Later in the evening he came in and found his wife eating a pear, which she pronounced even more delicious than the grapes.

"Charles," said the wife, after she had eaten the pear and resumed her work, "how is it that Thomas Lombard continues to have so much fine fruit.'

"O, he's got a knack that way.,,

"But he doesn't own any more land than you do. All the place he has for raising his fruit is the small garden attached to his house."

"Yes, but he knows how to do it, and he must have better land than mine too."

"What makes you think so."

"Why, see how many things grow in his garden."

"But you never tried to make them grow in yours. And besides, Charles, I believe that so far as his knowing how to do it is concerned, you could very easily learn all that he knows. Oh, how I wish that we could have such fruit growing!"

"I should like it, Eliza, as well as you would; but I don't see how it can be done. I haven't the time to take care of such things."

"But, Charles," suggested the wife, very mildly, "you have as much time as Thomas Lombard has. Now don't go looking cross, Charley, for certainly I do not mean to find fault. But, if we could only have a few fruit trees and grape vines growing around our house. You are as good as Tom Lombard, and I love you dearly; and for that very reason——"

"Come, come, teazer, none of that, If I could find a grape vine that could be transported directly to my garden in a bearing condition, and one that would take care of itself, I think I would buy it."

"Look at that, Charles," replied Eliza, pointing to the cradle, "Don't you think we shall love our child all the better from our having reared and nursed him during the helpless hours of infancy."

"Egad, Eliza, you ought to be a professor of moral philosophy in one of our schools."

"I would much rather that you should obtain a professorship in an agricultural college, retorted the wife with a light laugh; and having seen her husband smile, she let the fruit subject drop.

On the following morning, however, as she handed the empty Chinese basket and the napkin to Charles she could not help remarking.

I" wish I had something to send back."

"Pshaw!" replied Charles, who caught the meaning of his wife's regretful tone; "what's the use of feeling so. Julia Lombard wouldn't feel half the satisfaction in sending such little tokens of friendship if she thought you would consider yourself under obligation to make return."

"I'll buy something."

"You know what I mean. I mean something of our own raising."

"Then send of your pumpkin pies."

And with this piece of jocularity, Charles Morrill went away to his work.

Now, there could not be two men situated more alike in regard to temporal matters than were Charles Morrill and Thomas Lombard, both were young—not far from thirty; had both been married the same time; were both mechanics, receiving like wages; and their cottages were like as two peas in a pod. But when we come to their gardens the similarity ends, save where Eliza cultivated flowers, and where a few cucumber vines and early potatoes were grown, the ground of Charles Morrill was very smooth and grassy—kept neat and clean by the tidy wife, but yielding no profit.

The garden of Thomas Lombard was a very different thing, and on a few square yards of land he contrived to raise more than some men would gain from an acre. He had grapevines of various kinds, and all thrifty and hardy; he had dwarf pears and dwarf apples; he had plum and cherry trees; he had a strawberry bed; and he had many other things which yielded much comfort,

Charles Morrill looked over the premises as he entered his friend's yard with the basket, and he could not help wishing that he had just such things growing around his house, but what was the use? How could he ever have time and patience to get so much stuff growing?

On the next Saturday, as was the custom of the journeymen mechanics of the town, Charles took the afternoon for recreation; and he concluded that he could not do better than take his gun and go into the woods after partridges. The autumn leaves were falling, and the season for partridges was good. And then he fancied that Eliza would like a nice fat partridge for the Sunday's dinner. So he took his fowling piece, and his powder flask, and his shot pouch, and having tucked the bottoms of his trousers inside the tops of his boots, started off.

Tramp tramp, tramp! Hark! a partridge!—Creep, creep, creep. Ha! he's off! Once more—tramp, tramp-tramp, tramp, tramp. Eh?—what's that?——sh! Easy! Soft now!—I'll have this one!——. Blast the luck! Why, I never saw the thundering things so shy and wild!

Towards evening Charles wended his way homeward, and as he passed Lombard's place he saw Thomas at work in the yard.

"Ah! what luck, Charley?"

'Oh, plague take the luck! You can't get within forty rods of a partridge! I never saw 'em so wild. But what are you doing?—pruning your vines?"

"Yes.—This is the last one."

"D'ye always prune them in the fall?"

"I think that is the best time in our climate."

"And do you have to cover them up every winter?"

"Yes. If we don't protect them in some way, the extreme cold of our winters is very apt to kill the tender wood of the vine; and that is the very wood that throws out the fruit-bearing shoots another season. I just lay mine down, and throw a little loose straw over them."

"And how is it with other fruit?"

"Well, some I have to protect against the bitter frosts of our winter."

"That's the trouble of raising fruit in this country," said Charles.

"Why, surely, Charley, I dont see any great trouble. It's rather a pleasure than otherwise."

"But look at the work."

"O, I grant there is some work in the matter; but then work is a part of our life, you know.—Different men have different tastes. Now, just see what I have accomplished this afternoon, in the way of providing for a glorious crop of fruit next Summer, and I certainly havn't worked any harder than you have. While I have been pruning my vines and clearing up ready for laying them down, you have been tramping through the woods, with a gun on your shoulder, with powder and shot strapped to your body, and all for what? What have you got for it, Charley?"

"I've had the fun," replied Morrill, with an effort.

"Exactly, and so have I had the fun," said Lombard, smiling. "It is just as we accustom ourselves, I have no doubt that you have really had sport this afternoon, and you may be assured that I have taken real pleasure and comfort in my work. But, Charley, which of us two do you imagine feels better satisfied with the result of his afternoon's labors?"

"Tom," he said, after quite a pause, "of course you have the best plan of the work, and I wish I had the same faculty."

"You have the faculty, Charley, if you'll only use it."

"But I dont see how you do it. A fellow has so little time out of the shop. The Lord knows I should like things just as you have them, but it's too late now."

"No' no, Charley—not a bit of it. All you've got to do is to lay down a rule for your guidance, and go at it. Our wealthy men have not become rich all at once. Their commencement was dollar by dollar. Shall I tell you the simple rule that I have laid down?"

"Yes, Tom, I'd like to hear it."

"Well, after I'd been married awhile, and got my little home paid for, I thought how best I could beautify and adorn it, and thus render it pleasant and attractive. I had not much money to devote for investment in these things, so I thought that I would put out my spare hours out at interest."

"Hours at interest?" repeated Morrill, "that's a queer idea."

"Yes," continued Tom, but I think it's quite a sensible one. Just think how many spare hours we have, first and last, through the year. I thot of this, and I then planned that I would so invest those hours that they should yield to me the greatest possible amount of interest—not sordid and selfish interest of pleasure but comfort such as my wife, and children, and friends could enjoy with me. Of course I did not mean to be always at work and digging, but to employ my leisure hours sensibly. You see the result around us—You spend an hour at tenpins, and I spend it in my garden. You enjoy your recreation and I enjoy mine. You spend half a day fishing or hunting, and I spend half a day taking care of my grape vines. Your sport is healthy and so is mine; and so we invest our hours, or place them at interest. You can see what income of comfort and satisfaction mine yield to me. How is it with yours?"

"Upon my soul, Tom, I never looked at it in that light before," replied Charles, with considerable animation. "By gracious! that is well worth trying. If I only knew how to take care of them."

"I'll show you all that, Charley, and I'll do more. I have some fine vines started, and you may have as many as you can set out."

"By the Big Bear!" cried Morrill, "I'll take you at your offer. But when should the vines be set out?"

"You had better set them out this Fall."

"I'll do it. You won't forget to save them for me?"

"I am not apt to forget."

Charles Morrill went home and hung up his gun, and put away his powder and shot, and by the time he had washed his hands and pulled his trowsers down over his boots, supper was ready. His wife laughed at him on account of his empty game bag, but she did not fret.

Another Saturday came, and Eliza was not a little surprised upon seeing her husband, with spade and pick, preparing two large excavations in the yard, which he was partly filling up with old bones and ashes, and stuff from beneath the sinkspout.

"In mercy's name, Charles, what are you doing?" asked his wife.

"I'm going to put five or six hours out at interest this afternoon, was the reply.

"Hours at interest! What do you mean?"

Why, I am going to set out a couple of grape vines; and if I get time I'll put down a few dwarf pears; and when they begin to bear I shall begin to get my dividend. D'you understand?"

At first Eliza Morrill could hardly believe it; but as soon as she was convinced that Charles was really making preparations for setting out grape vines, she hurried away and finished up her work in the house, and then came out to help him; and so they worked together all the afternoon; and when evening came, Charles felt that he had already been repaid for his labor.

"I declare," he cried, "it has been real recreation."

"It's been real fun," echoed Eliza.

But the work did not stop there. As soon as Charles got into the new way, he found it very pleasant and agreeable. Winter came, and while the snow was upon the ground he found no difficulty in making good investment of his hours and when Spring came, and nature began once more to smile in answer to the sunshine and the rain, he turned his attention to his garden, and many a pleasant and profitable hour he spent there. The hour, or two hours, which had aforetime been almost daily spent in lounging about the stores, were now spent about his home, and he made it a recreation too.

Of course there could be very little return the first year; but as time passed on, Charles Morrill kept the investment good, and by and by the interest began to come in, and the dividends were large. Eliza no longer sighed in vain for her own vine and fig tree. They had fruit in abundance and to spare, and not least among the items of their gain, was their ability to bestow their good things upon their friends. Surely, Charles had made a good investment.

Young reader, when you lay down this paper, do not let the thought pass unheeded from you. There is such a thing as putting hours at interest; and he is wise who so invests his leisure hours that the return, in the time to come, shall be comfort and satisfaction.

MOTHER IS CHILDISH.

"She is childish!,' How thoughtless, how disrespectful, how ignorant and sinful an expression;—What! that mother, whose form is bowed, whose eyes are dimmed in watching over you, whose interest in you has never abated, though another calls you his. Her judgement, believe me, young friend, is deeper more matured than yours; but because you differ, how easy it is to say, Mother is childish! Shame on you! I know it is believed by the giddy young, that old folks get childish. The author who said, young folks think old folks are fools; but old folks know that young folks are, Spoke Truth undying. Says one, At forty, man suspects himself a fool—knows it at fifty. I know that there are many young who are talented; but they do not get wiser in age. The youthful talents of Webster and Clay; Says one, gave promise in that day—gave promise of the mighty intellects that in later years would rule the Senate. Benjamin Franklin was past the meridian of life when the highest nobles of France received him as the one deemed best by those bold spirits across the Ocean, who had pledged their all for freedom, to ask aid of them. Washington, and most all the leaders in that glorious struggle were middle aged or older.

John Quincy Adams was 81 when he died; yet the younger members of Congress sought instruction of him. And let me ask is it the young statesmac whom we now trust to; or is it to those whose wisdom is matured by experience?

Who can read without deep emotion, "Washington's last visit to his mother?" What respect and tenderness in his attention! She was not a "childish old woman" to the "Father of his country." In imagination I can see the god-like hero reverent and gentle as a child in his mother's presence. And when, "after fifty years, France's noblest son, America's benfactor—Lafayette, visited our land, were any ungrateful to say, "Childish old woman!"

God forgive you, thoughtless young man or young woman, who use such language to or of her who has borne so patiently with your faults. She has tried this life, and knows its voidness, knows there is something more than present gratification to seek. She who has heretofore held the first place in your heart has yielded it to another, God and mothers alone know with what anguish.

Her heart is not hardened because it gives no sign. She has learned to endure in silence. Her hopes of life are fled. Is it any wonder she turns to her grandchildren for love? Their innocent prattle is music to her; her heart receives them, treasures them, takes pleasure in them. Oh! then, teach them to love and respect her; let their innocent hearts cherish her whom you "have no time to humor"

It will soothe her heart-pains at your neglect and more calmly and peacefully will she pass down the stream of life. The benefit will not to hers only; your children will learn lessons of wisdom which you cannot give—which you have not time or inclination to teach them. Experience makes us all wiser; she has raised one generation, and is now able to avoid errors which are prevalent with us all in dealing with the little ones entrusted to our care. God bless the aged, and give the young more sense than to think that gray hairs are a sign of childishness.

Miscellaneous.

Santa Clara College, S. J.

SANTA CLARA, CAL.

Conducted by the Fathers of the Society of Jesus.

THE EIGHTEENTH ANNUAL SESSION OF THIS INstitution will commence on THURSDAY, August 27th, 1868

TERMS—Tuition in the Classical and Scientific Departments; Boarding and Lodging; Washing and Mending of articles; School Stationery; Medical Attendance and Medicines; Fuel, Light, Baths, etc., per session of ten months,.....$35

For farther information apply to the President of Santa Clara College, Santa Clara, Cal., or to Rev. A. Maraschi, S. J., St. Ignatius Church, Market street, between Fourth and Fifth, San Francisco.

94-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal: its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to

San Francisco Agency, 338 Montgomery street, corner California street, s.

A PRINCELY RESIDENCE IN THE COUNTRY FOR SALE

To any wealthy person who desires to retire from the drudgery of a business life in the city and enter upon a newer and better and healthier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this place and gathering the products. Such a place I have, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only because of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden with all manner of luscious fruits, and which with a judicious care and management, the whole cost of the place could be returned again in a few years *by its productions*, can learn of the owner by opportunity by applying to the Editor of the *Farmer*. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco at Gold Value, will be received in part payment and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN

Miscellany.

CHINESE STREET JUGGLERS.

A letter from China to the Chicago *Tribune* says: "Street jugglers and mountebanks abound in Canton, and in fact in every Chinese city. They also travel from place to place throughout the country, displaying their feats and picking up a little cash here and there. As a general thing their juggling feats do not amount to a great deal, yet some of them are very clever, and would create fully as much of a theatrical *furore* in the United States as did the Japanese performers. Sword swallowing and stone eating appear to be the commonest feats, and operators of this description can be seen in almost every street. One fellow, however, performs a number of feats in front of our hotel which demanded from me more than a passing notice. He stations himself in the centre of the street, and having blown a blast upon a bugle to give warning that he was about to begin his entertainment, he took a small lemon or orange tree, which was covered with fruit, and balanced it upon his head. He then blew a sort of chirruping whistle, when immediately a number of rice-birds came from every direction and setting upon the boughs of the bush they balanced or fluttered about his head. He then took a cup in his hand and began to rattle some seeds in it, when the birds disappeared. Taking a small bamboo tube, he next took the seed and putting one in it blew it at one of the fruit, when it opened and out flew one of the birds, which fluttered about the circle surrounding the performer. He continued to shoot the seed at the oranges until nearly a dozen birds were released. He then removed the tree from his forehead, and setting it down took up a dish, which he held above his head, when all the birds flew into it, then covered it over with a cover, and, giving it a whirl or two about his head, opened it and displayed a quantity of eggs, the shells of which he broke with a little stick, releasing a bird from each shell. The trick was neatly performed, and defied detection from my eyes. The next trick was equally clever and difficult of detection. Borrowing a handkerchief from one of his spectators, he took an orange, cut a small hole in it, then squeezed all the juice out, and crammed the handkerchief into it. Next, giving the orange to a bystander to hold, he caught up a teapot and began to pour a cup of tea from it, when the spout became clogged. Looking into the pot apparently for the purpose of detecting what was the matter, he pulled out the handkerchief and returned it to the owner. He next took the orange from the bystander and cut it open, when it was found to be full of rice. He performed a number of pleasing feats, but I have given enough to satisfy the reader that they are equally as expert as the Japanese."

VELOCIPEDES.

A New York cotemporary thus speaks and prophesies in regard to velocipedes:

From a careful estimate the army of velocipedists will have numbered by the 1st of May at least 2,000. The laws of progress being irresistible, the velocipedes will come, bestridden by babies of full growth; they will invade the parks, rush along the foot paths, roll over every patch of Nicolson pavement they can scent out, despite the blue coats, and take possession of the city generally. "Oh, very well" we fancy we hear the elderly ladies and old gentlemen, with weak nerves, say; "Oh, very well; but we shall have municipal laws passed prohibiting their running on sidewalks, or on the streets, or in the streets, or in the park, or anywhere (with a scream); we'll put them down." But you can't do it, ladies and gentlemen; they will break through your municipal laws like pie crust. Who will make the arrests, pray? "The policemen!" How can they? Take the politest, liveliest blue bottle you can clutch, and send him after a velocipedist? Why, the fellow on wheels would be round fourteen corners before Buttons had his mind made up! No, no, there is only one way that we know of for driving out these fiery Huns, but we fear it will not meet the general approval. The cure might possibly be set down as even worse than the disease—get velocipedes for the police.

The number now in this city and suburbs is about 250. Five manufactories are, at this writing, are actually at work, and others are about to begin. These now in operation cannot meet the demand or even approximate to it. In one establishment alone we read on the order book over fifty orders, all received within a few days. In another, almost as many were recorded. Those who commenced the manufacture at the "Onward," are engaged increasing their facilities for producing, and by the largest of those it is estimated that within a few days he will be able to turn out fully twenty machines per diem. With these figures it will be easily seen that an estimate of 2,000 for first of May, assuming the demand to continue, is not an excessive one. Just as soon as the manufacturers now commencing the business get fairly to work, we may look also for a reduction in the price of the velocipedes, now excessively high. The most inferior machines are readily sold for seventy dollars, the superior ones, without ornamentation or extra of any kind, for one hundred and twenty.

We have no doubt whatever that there has been surreptitious practice going on in the backyards during the pleasant days of this mild winter by velocipedists.

—"My dear Horatio, I had a very mysterious dream about you." "What was it dear?" "I dreamed I saw you carried up to heaven in a golden chariot, surrounded by angels clothed in white and purple. What is that a sign of dear?" "It is a sign of a full stomach, my dear."

—"Husband, I can't express my detestation of your conduct." "Well, my dear, I'm very glad you can't."

A LOST GENIUS.

I knew a woman once, gifted so extraordinarily by God, that she might have been a florist, a musician, an artist, a teacher, an evangelist,—Since to the mastery of any one of these callings she could have brought an equal power and passion.

Whatever her fiery mind fastened upon, it fused into itself, nor was there anything her cunning right hand sought to do in which it did not execute.

At fourteen her precocity was so great that her father cut short her studies, because "She knew enough for a Woman," and made her a teacher in his school. At sixteen she married a young clergyman. Children came fast, Her health gave way but her energy remained. She was never idle a moment; but alas! neither father nor husband nor one of her twelve brothers and brothers in law saw that that it would be better economy to give the genius they were all so proud of, a musical or an artistic or medical education, that she might pay with her earnings some commoner mortal to make clothes for her little ones, than to let her do it herself with the painful toil of the needle. And she had been brought up with too narrow a vision of woman's duties and destinies to understand herself that she was wasting her life and abusing her powers. All her ready gifts were in her eyes merely appropriate feminine accomplishments, and to make fame or money out of them never occured to her as a possibility, far less as a duty. And yet her mind was ever in a fever of desire, of invention, of agonzied craving for the realization of the dreams of beauty, of beneficence, of friendship, that tormented her. The music rang in her ears; the fearful and wonderful human organism haunted her brain; the dread mysteries of sin and suffering, the awfulness of human responsibility, the glories of salvation burned upon her lips as she taught her children their daily Bible lesson; and still, nailed to her chair, the swift needle went in and out,—went as it often seemed to her, through her delicate lungs as well as through the cloth, until at nine and thirty the struggle ended; the body after long paroxysms of exquisite anguish, gave up it's strong hold on life, and the rich soul exaled away to heaven, rejoicing to escape from the bars which it had so long beaten it's bright wings in vain.

I saw her in her coffin, with an expression of freedom and exaltation upon her marble features that seemed a glory reflected down from her now triumphing far off spirit, and I resolved to remember the woe and earthly wreck of her thwarted nature, and never to cease until I saw some better way for women than this which can so horribly waste and abuse their finest powers.—*Atlantic Monthly.*

Spirituous Liquor.—"That the spiritous liquor in use is nearly all badly adulterated, and that not a little of it is unfit for human beings to drink, are facts which, we suppose, nobody cares dispute. Indeed, so familiarized has the mind of the public become to these facts, that the terms 'Jersey lightning,' 'benzine,' 'pizen,' or the capalistic consonants 'r. g.,' are commonly used in application to the liquors sold over bars, and no surprise is excited. No one has failed to notice the deterioration in the quality of liquors since a time within the recollection of men not very old. Half a century ago it was the common custom for families to keep wines and liquors on their sideboards, and use them on their tables. Perhaps as much was consumed then as now, but how comparatively small were the evil effects."—*Boston Courier.*

We have the names of Several parties who are making "Fire Water", in this City, and we trust that the *Next Legislature* will correct this growing and fearful evil.—Ed. Far.

A clergyman and one of the elderly parishioners were walking home from meeting one frosty day, when the old gentleman slipped and fell upon his back. The Minister, on being assured that he was not hurt, said to him: "My friend, sinners, stand on slippery places." The old gentleman looked up, as if to assure himself of the fact, and replied: "Yes' I see they do; but I can't."

A joker declared that a blind man, by taking something from the breafast table, recovered his sight. What did he take? He took a tea cup and *saucer* (saw, sir)

A woman may be of great assistance to her husband in business by wearing a cheerful smile upon her countenance.

THE PHOTOSCOPIC TABLE COMPANY.

THE NEW INVENTION of this Company is known as the Anthropphoroscopic, or "Photoscopic Table," designed to give a Life effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION o this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group Families entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changible pictures, arranged to suit the wishes an desires of each owner of the table,

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

The Company have opened a Suit of Rooms for Exhibition and sale of the Photoscopic Table at the corner of St. Marks Place, No. 23 KEARNY St., west side, up stairs, to which they cordially invite the public to examine them. 32-1

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum;

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H. & L.

is on the red cover of the package.

Depot, 320 Jackson Street,

Railroad Lands.

Central Pacific Railroad,
Land Department.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. This three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer on the wharf or landing places.

[Corrected Weekly, by Enyron Farmer.]

San Francisco, February 25.

Grain, &c

What of the Grain Market now? Do those who have held on to their wheat see any better prospect ahead? Have they been the gainer by the "Hold on" system advocated by the Sacramento Union?

We ask our grain holders now to read the news from Liverpool, viz:

Wheat a 10s. 5d. and the New York quotation are 1,80x1,90 currency for wheat, these rates are actual loss to ship from here—this is most unfortunate in view of the immense stock still in hand and the certainty of a harvest unprecedented for quantity the present year.

We assert boldly that the crop of 1869, will be 50 per cent beyond that of 68, judging from the area planted and the present prosperous look of the grain.

What shall be done with the *Three quarters of a Million Tons of Grain*—the crop of 1869? and what shall be done with the 150,000 Tons wheat now on hand? We wait for a reply! One thing is very certain, our wheat raisers may make up their minds to sell wheat at the opening of the New Harvest at 1¼—and they that *sell first* will be the best off.

We do not say this with any pleasure, but unpalitable medicine has to be taken to restore, and those who were so anxious as to "hold on" are a little sick,—now take this medicine—resolve to "meet the market" the present new year whatever it may be, and Rush our crops abroad and "Realize"—this is our council to the Farmers. Time will tell if we are right.

The present weather is very favorable for the growing crops of Grain. The cold winds keep back the seed and Stock suffers in many places.

The demand for Wheat and Flour is now very limited, no disposition on the part of shippers to ship more—only to fill their contracts already existing.

There are quite a number of our Farmers visiting San Francisco now that feel bad, as they learn the prospects for the irold crop, it will make thousands of dollars difference to many of them, and we think they will call to mind the advice the "Farmer" gave them all through the season, Sell! Sell! and now that they are ready to sell, they loose by delay 20 to 30c on every 100lbs, and to those who have 20,000 sacks, it is quite an item, but there are some lessons our Farmers must learn even by costly experience.

Retail Prices in the Fruit Market.

Our market has been abundantly supplied with apples of second quality from Oregon, also with oranges, lemons and limes from Los Angeles, and a limited quality of pine apples and bananas from Panama, were it not for those, our market would "cut but a poor figure."—We make use of the last term, because we know well, that almost every variety of choice and tropical fruits can be grown within a few miles of this city, and it reflects discredit and want of foresight on the part of our orchardists.

Retail Prices in the Vegetable Market.

Our vegetable market has retrogaded somewhat this last week, as far as supply and quality is concerned. It is true, we have had a few and well grown cauliflowers, also a limited supply of early green peas, realising the modest price of one dollar per pound, but outside of these two articles, there is nothing worthy of note of this spring's growth. The supply of yellow Danvers onions of last year's growth, has been good, and in prime sound condition, for which there is an unusual demand.

FISH

(Tessmore and Hayes.)

There has been a fair supply of fish in our market during the past week, and prices about the same as last quotations. We are at a loss to know why herrings should not be more plentiful and cheaper. We presume it is in consequence of their being further out at sea, consequently there is more danger in capturing them, than there is in catching the varieties which keep more towards shore—Prices as below:

Salmon, ₱ lb	18	@	20

MEATS-

(L. Miller & Co.)

With our butcher, all is activity—They are doing a good, and an increasing trade. Mutton in our market is of extra fine quality. Lamb is not to be had this week. The beef is somewhat below mutton in quality. Our graziers will have to grow a quantity of Mangel Wurtzel, Swedes, Turnips, Carrots, &c, so as to fatten their cattle, and send them to the slaughter house almost melting in fatness, and not until then, may we expect to have the fine rump steaks which can be had in European markets—Prices as below:

Beef, tenderloin, ₱ lb	20	@	25

DAIRY—BUTTER, CHEESE, EGGS ETC.

(M. B. French & Co.)

Our dealers are doing a good trade and chiefly with California produce. Our Eastern merchants are continually pushing into our market, butter, lard and cheese, which at present, is a complete drug. Eastern produce is not sought after now. Californians have become epicurians—they will have the freshest and best of all those things, and thanks to our ranchmen and farmers, we can have them in any quantity, almost at all times. Our Eastern friends would do well to keep their produce at home—Prices as below:

Butter, California, ₱ lb (Fresh)	50	@	55

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp'y steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southhampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

Feb. 6.—GOLDEN AGE—Capt. E. S. Farnesworth, connecting with the ALASKA, Capt. Gray.

Feb. 13.—COLERADO—Capt. W. H. Parker, connecting with the RISING STAR, Capt. King.

Feb. 22,—SACRAMENTO, Capt A. West, connecting with HENRY CHAUNCEY, Capt. Connor.

Feb. 27—MONTANA— Capt. Wm. H. Hudson, connecting with ARIZONA, Capt. Maury,

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman' and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se4 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

PROPRIETOR

Choice Grape Cuttings.

50,000,

VERY CHOICE GRAPE CUTTINGS.

Many kinds not to be had at any other place.

ALSO—Very strong 2 year old rooted vines, at a very low figure.

Apply at the Farmer office,

Or address Editor Farmer.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLA... in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McL... Vermifuge, they very frequently get one or other of the many worthless preparations called Verm... now before the public. We therefore beg leave to urge upon the Planter the propriety and im... ance of invariably writing the name in full, and to advise their factors or agents that they will not receiv... other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROS., Pi... BURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements... alent in the South and South West, has induced the venders of many worthless nostrums to claim for their... parations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the... ginal and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter... Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no... Vermifuge nor Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG, PA.

DR. M. LANE'S CELEBRATED LIVER PILL

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for LIVER... BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLA... and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the W... South, where, in the majority of cases, the patient is not within the reach of a regular physician, requ... some remedy should be provided, that would not in the least impair the constitution, and yet be safe and... That such is the true character of DR McLANE'S LIVER PILLS, there can be no doubt. The great... which has invariably attended their use, will, we think, be sufficient to convince the most incredulous. It is... our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects produced... they have been so tested, and that the result has been in every respect favorable, we call thousands to... who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular m... the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms connected... deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function it is... to perform, and on the regular execution of which depends not only the general health of the body but the... of the Stomach, Bowels, Brain, and the whole Nervous System, shows its vast and vital importance to... health. When the Liver is seriously diseased, it in fact not only deranges the vital functions of the body... exerises a powerful influence over the mind and its operation, which cannot be easily described. It has... connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful ch... that it misleads more physicians, even of great eminence, than any other vital organ. The intimate sy... which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises... passions of mankind, convince me that many unfortunate beings have committed acts of deep and criminal... or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I have... convinced that more than one-half of the complaints which occur in this country, are to be considered a... their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the... Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequ... of which we afterwards feel ashamed; last, though not least, more than three fourths of the diseases enu... under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalog...

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, incr... pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; some... pain is felt under the shoulder blade, and it frequently extends to the top of the shoulder, and is some... taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels... ral are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull... sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful... tion of having left undone something which ought to have been done. A slight dry cough is sometimes an... ant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burning; ... complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise... be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every o... Several of the above symptoms attend the disease; but cases have occurred when few of them existed, yet... ination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when take... Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after... Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not pu... or three times by next morning, take one or two more; but a slight breakfast should invariably follow... The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are... to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight derang... of the Stomach.

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist... consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is ig... cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient... fant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to ... cause. It ought here to be particularly remarked, that although but few worms may exist in a child, ... ever quiescent they may have been previously, no sooner is the constitution invaded by any of the numer... of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it fre... happens that a disease otherwise easily m aged by proper remedies, when aggravated by that cause, ... to treatment, udicious in other respects, but which entirely fails in consequence of worms being overl... even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be expe... loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, even-... with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, with... al flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an... circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the... occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, slimy... tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a... sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea and... violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently... with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied by... cough sometimes dry and convulsive; uneasy and disturbed sleep, wi grinding of the teeth; tempor... but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE DE... UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to w... in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffec... viding the symptoms attending the sickness of the child or adult warrant the supposition of worms being... In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN M... IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injur... most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened wa... morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. Over... a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S... great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons... palming upon the public counterfeit and inferior articles, in consequence of which the proprietors ... forced to adopt every possible guard against fraud. NEW VARIETY OF CORN.

PROVIDENCE, Feb., 2, 1869.

EDITOR CALIFORNIA FARMER. DEAR SIR:—At the Annual Meeting of this Society, held on January 20th, I was instructed to tender you the thanks of the Society for the CALIFORNIA FARMER, furnished to them during the last year.

I will add that your paper has been a most welcome visitor on our book-table, in Railroad Hall.

I forward to you by the same mail a copy of the Society's transactions for 1867, whose publication has been accidentally delayed.

I also mail you an ear of the "Rhode Island White-Cap Corn." On your soil I suppose it would grow twice the size which it does here. It has several peculiarities. The cob is very small and it bears with us two or three ears on the stalk; yielding fifty bushels of shelled corn to the acre. It is therefore, about as prolific as any corn suited to this latitude.

But its chief distinction is its extraordinary sweetness. It is so superior to all other varieties of Indian Corn for family use, that when once tried it is seldom abandoned. It bears a higher price than any other Indian Corn in the market, and I believe is the finest of all American varieties, at least for domestic use.

If the Post-office vouchsafes to deliver the ear which I mail to-day, you will observe how perfectly the end is capped over, which is the characteristic form.

I have had a good many specimens of grains sent me for the comparative analysis now in progress in the Department of Agriculture at Washington.

This ear of R. I. White-Cap Corn, I select and send you as the purest specimen I have received. It was raised by BENJAMIN BOGMAN, Wichford, Rhode Island.

I cannot but think that this variety of corn would become a favorite with you, and while we are indebted so much to the Pacific slope for useful and ornamental plants, I should be glad to help eke out a return in kind.

I also send you three packages of Sweet Corn; Rhode Island varieties, which are quite famous in this region. The "Narragansett" Sweet Corn was grown by THOS. G. POTTER, of East Providence, R. I., the originator of the variety. It is considered the sweetest and most prolific of the early varieties.

The "Asylum" Sweet Corn was grown by THOS. E. PAYSON, Superintendent of the Dexter Asylum, Providence, where the variety originated. It is a very large and prolific variety.

The "Rhode Island" Sweet Corn was grown by JAMES DE WOLF PERRY, of Bristol R. I., a variety obtained by him, by a selection of ears for a succession of seasons. It is very large, and perhaps superior to the Asylum, though it has not been extensively introduced like the latter.

These are all taken from specimens sent to me for the Department at Washington, and are, therefore, good of their kind. Larger quantities can be easily furnished if desired.

Yours Respectfully,
WM. F. CHANNING, Secretary.

THE KIRBY LARGE MOWER.

INTERNAL IMPROVEMENT.

[The important words which head this article are now beginning to be appreciated in CALIFORNIA, and we trust that our next LEGISLATURE will awake to their importance.

The rapid progress towards completion of our GREAT WORK, the Pacific Rail Road has induced us to publish the Report of a Committee of the Legislature of Massachusetts nearly *forty years ago.*

That Committee was composed of men of the highest standing; names, eminent in the history of that State; men of wealth and great influence, nearly every one of whom was known to us personally; but while we review their words of wisdom and earnest counsel in those early days before the Iron Horse, with breath of Fire swept over that State, while we recall the good deeds of these excellent men, as sadness comes over us to think they have all passed away, but only to their reward in a better world.

This Report must be read with great interest by all who comprehend the changes which has taken place in these United States within the period from that day to the present; and when the Great and Grand Day which is now near to, us shall come, when the dwellers on the Atlantic shall come to greet the dwellers on the Pacific, when the *Iron Horse* shall ride in triumph up and over the Sierra Nevada mountains and speed off on its great mission, then and then only can we fully appreciate the value of the labors of such men as Pioneered the work of Internal Improvements in the "Old Bay State."]

COMMONWEALTH OF MASSACHUSETTS.

To the Hon. the Senate,
and the House of Representatives:

The Directors of Internal Improvement have the honor herewith respectfully to submit such further information upon the construction and utility of Railroads as they have been enabled to obtain, in compliance with a concurrant order of the two Houses of the Legislature, at the last session. Considering the duty assigned them, by the terms of their commission, as merely ministerial, in collecting and presenting facts applicable to the "practicability and expediency" of adopting this particular species of improvement, they feel constrained to confine themselves to a communication of the result of such examinations as they have directed, and of the practical operations which have fallen within the scope of their inquiry, as evidence to others, rather than offer observations, which are the effect of the additional information thus acquired, upon their own minds. They will not forbear, however, to add an expression of satisfaction, that all their previous anticipations of the value of such improvements are abundantly confirmed, and that they feel an assured confidence in the correctness of the calculations and estimates of the expense of the construction, as well as the inducements to, and promise of advantages from their enjoyment, which in a former Report they so fully and unequivocally expressed.

It was deemed expedient to ascertain, in the first place, how far the face of the country and the manner of executing the work of constructing Railroads in other places, would upon comparison, afford encouragement to similar undertakings in Massachusetts. The Directors therefore, sought to avail themselves of the experience which other States had already acquired on this subject. It was known that Pennsylvania had engaged extensively in similar enterprises, after the best means had been resorted to, for direction in her plans of public improvement. The people and the State of Maryland also, had undertaken one of the greatest enterprises of the age, in the Baltimore and Ohio Railroad, upon the most careful investigation of the principles and character of this mode of intercommunication, and upon critical inquiries into its practical operation upon the business and interests of society. Scientific men had been sent to Europe expressly charged to obtain all the information which the introduction and use of Railroads there could afford, and the result had been a decision in both of the aforesaid States, in favor of their equal applicability to the circumstances and occasions of transportation in our own country. With a view to the knowledge which might be obtained by an examination of the works which were thus in progress, and a direct communication with those who had their superintendence, a committee composed of one of the members of the Board and the Engineer who had been employed in the survey of the Providence route, and whose intelligence and accuracy were fully approved, were authorized to visit the scenes of these improvements, and to make the inquiries and procure all the information which could be found useful in the proceedings which were to be had here. In the course of the season, this Committee accordingly examined the principal public works in the States of Pennsylvania and Maryland, and have made a report of the result of their observations, which the Directors herewith transmit, and request they may be received as part of the execution of their commission.

It will be seen that the State of Pensylvania is deeply committed to the objects of internal improvement. The extent to which she is at this time engaged in Canals and Railways, either on the public account, on in joint stock operations of her citizens, exceeds 1200 miles; at an estimated cost of 15,000,000 dollars. The Committee found no degree of discouragement entertained, on account of the magnitude of these undertakings, or from any obstacles which had been presented to their accomplishment. On the other hand, they met every where on the routes of their location the strongest manifestations of the improvement of country, by the progress of the works, and received assurances of the entire dependence of the interests of trade, manufactures, and agriculture upon their successful completion.

In the description of the Baltimore and Ohio Railroad, an explanation is afforded of the great expense of its construction. The most extraordinary difficulties are overcome, and excessive sacrifices made, to conform to a preferred location of the Road, in reference to its approach to the city of Baltimore. High embankments, deep cuttings, magnificent bridges, and viaducts of solid masonry, faced and ornamented with hammered granite, brought from great distances, are the occasions of cost, which are not usually within the estimates of such improvements, and exclude all comparison between that work, and others which any where else have been projected. Yet is the enterprise still prosecuted with a zeal and confidence of success, which admits no distrust, on this account, of the attainment of the ultimate object. The considerations of encouragement, which the promised advantages from its use, have presented, are strikingly applicable to the circumstances of our own State, in relation to an improved communication, between the capital and the trade of the North River.

On the route of this road, the rails have been laid for nearly two miles from the city, upon which experiments of the most satisfactory character have recently been made in the rapid passage of carriages moved by horse power. The way is graded, and prepared to receive the rails for nearly 25 miles further, and great progress has been made upon other sections of the route. The estimated cost of the whole work exceeds more than two fold. that of all the improvements taken together, which have been proposed in Massachusetts. The State is at the same time engaged in another railroad from Baltimore to the river Susquehanna, the first stone of which was laid in August last, and upon which much labor has already been done. Besides all this, the mighty project of the Chesapeake and Ohio Canal is in a state of vigorous prosecution.

Through the instrumentality of an application by the President of the Board to his Excellency Gov. Martin of Maryland, the Directors were put in possession of much more minute information on the subject of the public works, in that State. Among the documents herewith transmitted to the Legislature will be found an original communication from Col. Long, of the U. S. Typographical Engineers, and President of the Board of Engineers employed on the Baltimore and Ohio Railroad, containing precise answers to definite inquiries, which were proposed in relation to the progress of that principal work, and also on the general subject of this kind of construction, the best application of moving power in its improvement, and the preference to be given to it, over other modes of conveyance. This valuable document was expressly prepared for the instruction of this Government, and entitles the distinguished officer who promptly and gratuitously furnished it, to very grateful acknowledgements. In the authentic character of the information which it contains, where we have the known results of the application of scientific principles to the laws of matter, and of practical experience in the operation of labor, the Directors are spared the occasion of repeating their own observations upon the same subjects of inquiry, which were presented to their attention, It will well supply the place of opinions and suggestions, which less particular information obtained elsewhere would otherwise have required them to make, and must be received as an acceptable substitute for any detail by themselves, in regard to whatever it embraces.

From a comparison of the description which is given of all the works both in Pennsylvania and Maryland, with the surveys which have been had here, it cannot fail to be seen, that we have few of the difficulties to overcome, which are found in those States. The country here, is less broken into deep and precipitous inequalities of surface, the elevation nowhere so great for a like distance of way upon any proposed route for a road, the earth is of a kind more easy of removal and graduation, and materials are both more abundant and better suited to the construction of the tracts. The courses of location also, are, in the general more direct. It would seem, too, from the information furnished us, that the work, even there, may be constructed at a rate, having regard to the character of the ground, as low as the estimates which have been made with us. Iron for the rails has actually been obtained at less cost, and more contracts for excavating and removing earth and preparing the way for the rails, have recently been entered into, at a price below the allowance in the estimates of our own Engineers. These latter circumstances are particularly deserving of note, as fortifying the reliance which may be placed upon the sufficiency of former calculations for similar works in this Commonwealth.

In the prosecution of the inquiries to which our attention has been directed, we have been called to receive in astonishment, the accounts which are given, of recent experiments in England, upon the capacity and adaptation of steam carriages as a self-moving power over Railroads. This invention promises to produce a new era in the business and arrangements of society. The effects which are to result from it can hardly be compassed by the anticipation of the most sanguine. Distance is lost in the application of this power to the purposes of conveyance. A rate of travelling with a velocity of from 20 to 30 miles the hour, is fully demonstrated to be within the capacity of these engines, and the ease, safety, and economy of this mode of dispatch are made equally apparent. Thus will intercourse of every description be facilitated. Places of market heretofore considered too remote from each other for inter-communication, will be rendered easily accessible. The labor bestowed upon transportations will be spared to purposes of production; and that diffusion of wealth which is the fruit of trade extended through city and country, from the mart of commerce to the field of the husbandman's culture, and through the workshops of the mechanic and manufacturer, will be richly experienced. Whenever the time shall arrive for the introduction of these machines into the United States, the inexhaustible beds of coal which have been discovered will supply abundant fuel for the engines, while the ways over which these move, will render the facility and cheapness of that supply, the strongest inducement to their use. Yielding entire confidence to the accounts of the experiments to which we have referred, we deem it proper to offer to the Legislature, as part of the information which may be expected from this Report, various extracts from periodical publications in Europe, to show how greatly the advantages heretofore proposed from Railways, are increased in prospect by recent discoveries.

The Directors are not aware, in conclusion, that there is any thing for them to add to the Report of their Committee, which, in connection with the communication of Col. Long, the extracts before referred to, together with the foregoing remarks, will present all the information of which they are possessed, upon the subjects of inquiry proposed, by the order of the Legislature, and in compliance with which, the same is respectfully submitted.

MOUNDING UP PEACH TREES.—The mounding system was first practiced, so far as I know, by Isaac Bolmar of Warren county, Ohio. I visited his orchards some years ago—acquainted myself with his system—and concluded to try it upon my orchard of 4,000 of trees—then one year planted. I plant my trees in the fall, and in the spring following cut them back to six inches above the bud. The tree then instead of having one body had several—from three to six. The second summer I plow both ways, turning the furrows toward the trees. The men follow with shovels, throwing the loose soil around the tree to the height of about one foot. In the fall I cut the trees back, taking off about one-third of the year's growth. The next spring or summer I pursue the same method, raising the mound about one foot higher; cut back in fall, and the third summer repeat the process, raising the mound another foot, which finishes the job. The mound will then be about three feet high at its apex and six feet in diameter at its base: The mounding need not be done in summer, or at any peculiar season; it is just as well done in the fall when the hurry is over. The dirt is never taken away from the trees—in fact it cannot be removed without injury to the tree—for young rootlets each year keep climbing up through this mound. I had occasion to remove one of these mounds a few days since and found it a mass of healthy roots.—Correspondent of *Journal of Agriculture.*

OUR ILLUSTRATION.—We again present to the "Grain Growers" of our State, another view of the famed KIRBY REAPER, which we have advertised in our columns, and which valuable Machine is only sold by Messrs. Treadwell & Co sole Agents for the Pacific Coast, thus we have presented *three distinct* views of what is esteemed one of the *Best Inventions* ever presented to "harvesters."

Agriculture.

SYMPATHY BETWEEN MEN AND ANIMALS.

There is a sympathetical relation existing between men and animals which is not sufficiently understood or studied by farmers and those who have the care and training of domestic animals. That there is a controlling power which man has over the lower orders of the animal kingdom is manifest to all. It is the decree of the great Creator that man should have dominion over the beasts of the field, the fowls of the air, and the fishes of the sea. There is naturally placed upon all animals the fear of man; so that, instinctively those in a wild state flee from him or slink away from his presence. There is a power in the eye of man, when fixed steadily, which causes even the most fierce and savage beast to quail beneath it. There is a power and majesty in "the human face divine" that exerts a peculiar sympathetical and restraining influence upon every animal. It is the power, glory and majesty of mind over matter and brute instinct. But in order that this power may be felt and exerted in its full and legitimate manner it requires courage and calmness. It is the calmness and fearlessness of the gaze that give the power. As soon as the eye quails through trepidation or fear, the power is gone, the spell is broken, the beast has conquered, and there is danger.

It is not, however, to this power in a general sense that we would invite attention at this time, but to that influence and power which is exerted over domestic animals by those who have the care of them. A man is constantly exerting a peculiar sympathetical influence over all the various animals with which he has to do—which is being as constantly reflected back in the disposition and character of each individual creature, according to the sagacity, spirit and value of the animal. Some animals, however, are naturally so stolid and spiritless that they are almost worthless except to supply the market stalls. How often do we see the nature and character of a man reflected back in his horse? A nervous, fidgety, irascible man will make in a short time a nervous, restless, fractious horse. His horse has caught his temper and disposition, and will make them manifest. While on the other hand, a calm, dignified, even-tempered man will soon make his horse, like himself, calm, noble, docile and gentle. How manifest is this also in times of danger, when horses become alarmed and frightened—if their drivers are alarmed and terrified, the horses become terrified and unmanageable; while on the other hand, if their drivers are self-possessed and speak calmly and soothingly to their alarmed animal, they will soon begin to lose their fear and regain their confidence. We have often seen horses when anything occurred to excite their fear, neighing for their masters, and if at liberty, running to them for protection, when a few strokes of the hand upon the neck, and a few soothing words would quiet all their fear and make them calm and self-possessed.

Horses, as a general thing, can be far more easily controlled by the voice than by the whip, or rein even. They soon learn the tone of their master's voice, and know what is meant by it, and readily will obey that voice if properly trained, with far less trouble, and certainly with far less pain and suffering, than from the use of the whip. Let it here be remembered that it is not harsh, angry words, or loud oaths and imprecations that does this work of training; but words of calmness, firmness and gentleness. Animals do not like to hear the harsh grating tones of anger or passion, or oaths and imprecations of the furious man, any more than men do; and they will soon, under such treatment, become nervous, fiery and vicious. Many a noble horse has had to suffer the most shameful abuse for that which the harsh, angry voice of his master or driver has made him to be.

A man can easily make his cow nervous, fidgety and kicking, by his nervousness and irritability, and oxen will soon become fractious and unmanageable by the use of harsh, angry words and unkind treatment. All animals learn to love those who treat them with kindness. They love the calm, soothing, gentle tones of their master's voice, and readily obey his call. A calm, gentle word, the humming of a tune, a pat or stroke of the hand, will do far more to make a cow, an ox or a horse gentle and manageable than anything else—for these win their confidence. The man who controls himself on his farm, in his stable and barn, among his horses, oxen and cows, gains far more every way, in comfort to himself, in safety and security of life and property, and in the yield of dairies, than by following any other course, for he has learned to govern himself, and in governing himself he has learned the secret of governing and managing his horse, his ox and his cow; in a word, everything feels the happy influence of a calm and dignified self control.

Who has not marked the difference between the appearance of a stock of cattle and horses kindly managed, and that of a stock, differently treated. In the one, the animals were peaceful and happy, and everything appeared in good humor. The cows, quietly chewing their cuds, are all ready with their full quota of milk, in a healthy condition, fit for the dairy; not a foot lifted, and nothing lost from the foaming pails. The horses seem to smile and neigh a welcome to their kind-hearted masters; and even the geese and hens join in a merry concert. What more inviting scene presents itself at the twilight hour of some beautiful June day than such a farm yard, the very picture of peace and prosperity. While in the other everything is in a flurry and tumult, a pefect "hurly burly." Cows and oxen dodging this way and that, afraid of a blow or a kick, while the very hens and geese fly in terror from the loud, angry and boisterous shouts or horrid oaths, with which the whole herd is hurried into the barn-yard. The agitated and trembling cows chew no cud, but yield their heated milk, entirely unfit for the dairy, and per chance half is lost by a luckless kick of the foot, to be returned by a slap from the milking stool, only to make the poor trembling creature more fearful and uneasy.

How much need is there that our farmers should learn the secret of making their "barn families" peaceful and happy. It is sad to see how many farmers permit their animals to be most shamefully abused by rough men and boys, who should not be allowed to have anything to do with the noble animals God has given for the use and comfort of man. Such men and boys are better qualified for the House of Correction than for the farm. Every man will mould and shape the character and disposition of his domestic animals by his own spirit and temper. As he is, so they will be. If his horse, ox or cow is vicious and unmanageable, instead of abusing it, let him blame himself, or rather regulate his own conduct—govern himself—and thereby learn the secret of governing his creatures. G.

LOW HEADS FOR APPLE-TREES.

A writer in the *Rural New-Yorker* gives his experience in cultivating his apple trees as low as possible. Indeed, he says that his Rhode Island Greening trees, now twenty years old, stand only fifteen feet apart in the rows, and are trained so low that three-fourths of the apples can be picked by hand from the ground. He has a single row of these trees twenty-six rods long, or about twenty-six trees in all, and says their product last fall was fifty-five barrels of best marketable apples, which he sold at $3 per barrel, and twenty-five bushels second quality sold at 50c. per bushel; from the rest 110 gallons of cider were made and sold at ten cents per gallon, and $7.50 worth of dried apples, making a total of $196. We should say this was doing well even for central New York, where the crop was produced.

On our own premises we have always pursued the same course with our pear trees and have succeeded well. Sometimes the crops have been very large. Fruit trees that are trained low, can have their fruit gathered from the ground or from a step-ladder, and will frequently bear perfect fruit within from twelve to eighteen inches of the ground. This low-branching of trees shades and protects the trunk from the hot sun in summer, and thus insures for it a longer and more productive life.—*Germantown Telegraph.*

WORKSHOPS FOR FARMERS.

It is always perplexing and unpleasant, and not unfrequently a cause of much expense, to be compelled to run to the carpenter or the blacksmith every time a hinge is to be replaced, a wheelbarrow injured, or a strap broken. To obviate such contingency, the farmer should either be himself or have in his employ one who can repair such injuries, and he should also provide accomodations and tools which will enable him to do it. A workshop, with a good bench, vise, and all the various tools required in the performance of the more simple details, should be among the buildings of every homestead. A little skill in the use of tools—and this any person of moderate capacities can readily acquire—will enable one to save many dollars annually, besides furnishing pleasurable and profitable employment for many an otherwise idle and perhaps painful hour. Here should be found white wash, paints, oils and brushes; cement, pruning and grafting tools, syringes for irrigating plants; glass, nails, screws, putty, glazing tools, and indeed, every article that may be required in keeping the premises and apparatus of the farm in a state of complete repair.

Having once become accustomed to these advantages and conveniences, the wonder will be how it were possible that they were not introduced long before.—*Germantown Telegraph.*

PLOWING IN RIDGES.

No one but those who have had experience in low lands can have an idea of how great is the loss to crops from stagnant water about the roots. Yet most of us have land which we must work, and yet cannot afford to underdrain, for want of sufficient capital, or from some motive other than a want of faith in its profitableness.

Now if such land be plowed up into narrow ridges, it serves very much the same purpose as an underdrain. To be sure it is but a temporary purpose, for in time the loss of land between the ridges would come to as much expense as the first cost of drain tile. Still, it is better to have a full crop on only a portion of one's land, than risk a total failure on all; and in this way ridging will often be found to pay very well.— *Forney's Press.*

MILKING GOATS.—Many families about Towns and Suburbs of Cities who have not pasture and conveniences for keeping a cow, might keep a milking goat to great advantage; they are easily cared for and are not costly to keep; may be fed on the slops of the kitchen. If milked regularly twice every day, one will yield a sufficiency for a small family. Goats milk is very healthy, very nourishing, and is often prescribed for the sick during convalescence. The animal is very domestic in its habits, fond of being petted, and grateful for kind attentions.

—An English farmer broke up thirty acres of water meadow which produced nothing but coarse edge grasses and rushes. After it was thoroughly drained and laid down to grass, he was able to cut four crops of green fodder annually of the best quality. The same thing could be done in thousands of cases in this country.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or 'Haine's Gearing,' or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so consstructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

30-24 STOCKTON, SAN JOAQUIN COUNTY.

AMERICAN POMOLOGICAL SOCIETY.

It having, upon consultation with some of the Fruit Committees, been deemed advisable to hold a special meeting of the officers and committeemen of the American Pomological Society; for the purpose of a careful revision of the Catalogue, the undersigned hereby give notice that such meeting will be held on the 10th day of February, 1869, 10 o'clock, A. M., at the rooms of the *American Agriculturist* (which have been generously tendered to the Society,) in the City of New York.

It is hoped that every one will recognize the importance of our Fruit Catalogue, and also see the necessity of a special meeting for its revision, and be present thereat, to aid and assist, preparatory to the next session of the Society, to be held in Philadelphia, Sept. 15, 1869. Should it be impossible for any one to attend in person, he is urgently requested to write out his views and opinions, and forward the same to F. R. Elliott, care of Charles Downing, Newburgh, N. Y.

Contributions of fruits are also specially invited, in aid of the work to be performed. These may be directed to "American Pomological Society, care of Orange, Judd & Co., Broadway, New York."

MARSHALL P. WILDER, *President.*
F. R. ELLIOTT, *Secretary.*

EIGHT ACRES OF MUSIC.

Not long since a musical gentlemen of our acquaintance purchased a small piano of the kind offered in our premium list. His house is situated in about the middle of an enclosure of eight acres, and by listening in different parts of the field he found that he could distinctly hear the notes of the instrument when played on, from every part of the premises. Our young philosophers know that sound is caused by vibrations communicated to the air from a sonorous, body, and conveyed to the ear, passing thence through the auditory nerve to the brain. Here, then, was the air over eight acres in extent, all tremulous when a single note was struck, the whole caused by the vibration of a wire less than three feet long. It is a pleasant thought that one can thus make acres of music. Without doubt all the fine motes of dust floating in the air felt the influence, and were set to dancing after their own fashion, to the music of the piano. We have witnessed something even more wonderful than this. A pleasant thought given out by some warm-hearted writer and sent vibrating through the land by the press, has brought music to tens of thousands of hearts. Play on the pleasant strings, boys and girls, and let there be a continued and happy chorus ringing through the land.—*American Agriculturist.*

THE WASTED FLOWERS.

On the velvet banks of a rivulet, sat a rosy child. Her lap was filled with flowers, and a garland of rosebuds were twined around her neck. Her face was as radiant as the sunshine that fell upon it; and her voice was as clear as that of the birds that warbled at her side. The little stream went singing on, and with each gush of its music the child lifted a flower in its dimpled hand—with a merry laugh, threw it upon its surface. In her glee, she forgot that her treasures were growing less, and with the swift motion of childhood, she flung them upon the sparkling tide, until every bud and blossom had disappeared. Then seeing her loss, she sprang upon her feet and burst into tears, crying aloud to the stream: "Bring back my flowers!" But the stream danced along regardless of her tears; and as it bore the blossoming burden away, her words came back in a taunting echo along its reedy margin.

And long after, amid the wailing of the breeze and the flitful burst of childish grief, was heard the fruitless cry—"Bring back the flowers!" Merry maiden! who art idly wasting the precious moments so bountifully bestowed upon thee, observe in this thoughtless child an emblem of thyself. Each moment is a perfumed flower. Let its fragrance be dispensed in blessings all around thee, and ascend as sweet incense to its benevolent Giver. Else when thou hast carelessly flung them from thee, and seest them receding on the swift waters of Time, thou wilt cry in tones more sorrowful than those of the child—"Bring back my flowers!" And the only answer will be an echo from the shadowy past—"Bring back my flowers!"

VICTORIA REGIA.—This was on exhibition at Nashville, from the Insane Asylum, where grown, as Mr. Sharkey assures us, without a particle of artificial heat. The leaves were over six feet in diameter, forming a perfect circle. There were three blooms of proportionate magnitude and richness. We have never heard of this great flower being grown with such success without artificial heat, in so Northerly a latitude as this, and doubt if it has ever been done. Mr. Sharkey may feel proud, therefore, of his success.—*Dixie Farmer.*

—W. C. Flagg, says that Hale's Early Peach was decidedly in advance of any other variety in its period of ripening last year, in the vicinity of Alton, Illinois. He began packing and shipping it five days in advance of the Early Tillotson; six before Troth's Early, and fourteen before Large Early York. It is a highly colored, beautiful peach, of good quality, of great hardness and productiveness.

—Little and often, make a heap in time.

NEW YORK.

Our New York House, under the name of
WILSON, MORROW & CHAMBERLIN,
will open in New York City about the first of November ext, and will have the exclusive agency of our

WINES AND LIQUORS

in all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

MESSRS. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed. We will make liberal Cash Advances on Merchandise consigned to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco.

WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required.—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates.

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD

WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurious Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet. 30-12.

VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,
tf *Farmer Office.*

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance.* We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

Miscellaneous.

SPLENDID RESIDENCE FOR SALE,

A VERY MAGNIFICENT RESIDENCE, SURrounded with the most valuable and choice Ornamental and Shade trees, and connected with a large and valuable heavy bearing Orchard of nearly

FIFTY ACES.

The Fruit of the very choicest kinds.

This Estate is situated upon a Country Road, in one of the finest sections of country where lands are rapidly advancing in value.

The whole Estate, comprising over

SEVENTY-FIVE ACRES

and all of the very best land.

The Mansion House.

Is of modern style, nearly new, and now well and genteely furnished.

The entrance to the Mansion is through fine ornamental and shaded drives, and all the surroundings, are of a pleasant character.

LARGE STABLES,

CARRIAGE HOUSES, and FRUIT HOUSES, and a liberal collection of

FARMING IMPLEMENTS,

make this Estate such a one as is rarely offered for sale.

To a skillful ORCHARDIST, this is a rare chance, as the product of the extensive Orchards, would pay the purchase money in three or four years.

Those who desire a

Large and Valuable Estate,

and one of increasing value, can address

HALL'S PATENT FOR PRESERVING EGGS.

We have refrained hitherto, from saying much upon this subject, until we had the opportunity of demonstrating the claims of the patent for ourselves. We have accordingly, put up a few eggs, to test the matter, and have them now, as put up months ago. We invite parties, to call and see these eggs, and examine for themselves. They possess the whiteness, clearness and freshness of the newly laid egg, and they froze, as a new egg, which cannot be said of any preserved egg we know of.

The cheapness and the saving of time, over every other process, may be considered in its favor. The parties in New York, are making arrangements to secure the Patent in all Europe, and it runs yet, 16 years in the United States. Cost of putting up a barrel—1 as than 50 cents, and the time, does not exceed 10 minutes. Rights for sale by Warren & Co. Farmer Office, San Francisco.

RAISIN,

And other choice

New Advertisements.

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co.,
Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE.

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, grower as the Doolittle or the Miami, but still it is good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:
THURSDAY EVENING.....MARCH 4, 1869.

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, [illegible] Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for one insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facie* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the article they have to sell is wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seed, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office.

Special Notice.

We desire to direct the attention of our readers to the advertisement of the American Watch Company, in another column. This Company is the pioneer of Watch-making in the United States, and has grown in the short space of fifteen years to the largest Watch Manufacturing establishment in the world. This fact, in connection with another important fact—that their Watches are now selling at less prices in greenbacks than the gold prices asked before the war—illustrates the great success of the Company.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a. our office, or addressing EDITOR FARMER

INAUGERATION DAY.

To-day, President Johnson retires from the Presidency, and Gen. Grant assumes the reigns of our National Government.

To-day is written upon the records of our National Escutcheon these words:

"LET US HAVE PEACE!"

If we can read the signs of the times correctly, our Nation "will have peace" for we believe Gen. Grant will adopt the rule of WASHINGTON in his appointments, and in his removals, and this will be his motto:

"IS HE HONEST? IS HE CAPABLE?"

If these questions are answered in the favor of the applicant "all is well," if not, there will be no possible hope for a mere "Office-Hunter," and this will save our Country from numberless evils and a waste of the Public Treasure.

We do not believe that Gen. Grant will *ever* become a *partizan* PRESIDENT; but on the contrary he will lay aside all partizan feeling and labor for truest interest of the whole country.

Gen. Grant will have an opportunity to prove to the world that he is indeed, the *True Friend of Peace*; for he will stand almost in the same relation to our Nation and the People that the Beloved Washington stood, The Leader of our Armies and a Victorious General, who returning from The Battle Field crowned with the emblems of Victory, lays down the Sword of Battle to assume the sceptre of Peace as the Ruler of a People whose Nation he has saved.

With such a history before him and such an opportunity for establishing an enduring Fame by FAITHFULLY ADMINISTERING *the* GOVERNMENT over which he has been called to preside, it cannot be doubted but what the NEW ADMINISTRATION will be one of Wisdom that will lead to great Prosperity.

PRUNING EVERGREENS.

All Evergreens need a careful attention now. Every species need attention in order to have the *form* of the tree *beautiful*, not those unsightly *monumental cones* that disgrace our Public squares and give them the appearance of a *Graveyard*, but such care to shape them as to have them show graceful pendant branches, not the pyramidal stiffness of a tomb ornament, but that lively, open, yet compact form in which alone can make them beautifully natural.

More than *three-fourths* of our Evergreen and ornamental trees are spoiled because their care is entrusted to very unskillful men; those who often-er can neither read nor write, yet call themselves *Gardeners*. Those who do not wish to sacrifice years of labor and years of time should never entrust a Garden to an unskillful man. An hour's bad work, will take years to redeem.

EARLY BLOSSOMING.—Notwithstanding the very cold weather experienced for some time past in the country and the cold north winds so very prevalent, together with serious frosts in many places, yet we see the Apricot and Peach trees are coming into blossom in many places.

This is a good time to go over such trees and cut away all dead wood and all useless sap wood, suckers, etc. Such attention would increase the crop over 25 or 50 per cent.

CULTIVATE THE FIG.

There is no Fruit more easily grown, none of so rapid growth, and none that comes to so early fruiting as the Fig, and certainly none that is richer or more delicious, and none that will pay better in our market for a careful culture.

We have often called the attention of our own orchardists to this Fruit as one that will pay well for a judicious care and attention to its culture.

The "Fig" in its *fresh state*, requires time to become a favorite with many, like the "Tomato" it is not liked at first, but when its qualities are appreciated, it will always become *the* favorite, for it is one of the most *healthy* and nutritious as it is one of the most delicious of all fruits.

The fruit of the Fig tree was in large demand the last year and there was only a limited supply, and then at full prices and generally of the common "Black Fig" of California.

The best varieties to grow are the Brown Turkey, a very large Fig, the White and Brown Ischia and several other of the Mediteranean varieties, each and all of them very prolific in their bearing, and always very profitable to raise.

There should be more attention to the cultivation of the Fig in every section of our State as the demand for this fruit will increase every year.

HIGH HEELS.—The *Scientific American* tells its readers what every physician and student of physiology knows about the silliness and harmfulness of wearing high-heeled shoes. When the heel is raised, as is the prevalent custom, the bones of the thigh, pelvis, and leg, as well as the foot, are thrown into an abnormal position; and while the bones maintain their plasticity, the effect of such unnatural tension is sure to be perpetuated in the shape of crooked shins, bandy legs, elephantine toe joints, and a cramped, ungraceful gait.

—"A three year old" neighbor saw a drunken man "tacking" through the street. "Mother," said he, "did God make that man?" She replied in the affirmative. The little fellow reflected for a moment, and then exclaimed, "I wouldn't have done it."

—Riches got by fraud are dug out of one's own heart, and destroys the mind.

ELOQUENT PREACHING PAYS.

"Without a Parable spake he never a word."

We copy the following remarks relative to the distinguished Divine's name from the "Newburyport Herald," and the great interest shown to secure Pews in his church and sit under his eloquent preaching.

There can be no question but that this interest arises entirely from the fact that "Henry Ward Beecher" preaches to *interest his hearers*, and to do this, he speaks *from the heart*, and it *goes to the heart*, his people go to church, they ask for the *bread of truth* and he *feeds them*.

It has always appeared very strange to us that in a land so full of LIVING TEXTS for the PREACHER, these Ministers of JESUS CHRIST, seem to forget that their Lord and Master set them the example how to preach.

"Without a Parable spake he never a word."

We believe it is too late now, (in this age of progressive truth) to *preach long sermons*, for there is a parable against long sermons, and certainly many of the Theological sermons that are sent forth Sabbath after Sabbath, if the Preacher could but hear the remarks of the mass of his hearers, he would certainly conclude that *they* at least felt that when they came to church if they had

"Asked for Bread, he had given them a Stone."

There can be no question, that we have too much sermonizing, and too little faithful eloquent preaching, such as that which "going from the heart is sure to reach the heart".

If the BLESSED SAVIOUR, knowing what kind of preaching was best for poor frail erring humanity has left an Example for those who claim to be his Disciples, aye *Teachers* of his Disciples, then in Heaven's name let them follow it.

We believe there is no other spots of God's fair earth so full of *living Texts*, as this *fair land of* CALIFORNIA; all the most powerful words of the "Old Prophets" here seem to be "Literaly fulfilled" and these texts could be brought home to the minds of the people by any eloquent preacher whose *Heart* is in his work, one who preaches more to convert men from the *error of their ways* than for a "*Large Salary.*"

How striking are the following:

"The Hills and Mountains are full of Gold and Silver."

A Land flowing with Milk and Honey."

"The Desert shall rejoice and blossom as the Rose."

"The Mountains shall be laid low, and the Vallies filled."

These and a thousand texts of a practical nature as applying to the daily labors, toils and researches of men of all clases in our midst, could be made the text for an Eloquent Preacher whose heart was in the work for the welfare of men, and the conversion of men from the errors and sins by which they are surrounded.

It was this kind of Preaching that made *Christ* so successful and drew to him the crowds that followed him. It is this kind of Preaching that makes Beecher so successful and it was this kind of Preaching that made the ever to be lamented "Starr King" so successful while living, and his Memory so cherished now.

When our Preachers shall nevers speak "without a Parable" and these parables taken from the daily life and surroundings of our people, we shall have *more Popular Preachers, better filled churches*, less desecration of the Sabbath day, more children in our Sabbath schools and less in our streets, House of Industry, and House of Correction, but until we do, evil will increase in our midst.

Here is the paragraph to which we allude—

"The rent of Pews at Ward Beecher's church, for 1869, bringing in the total, $92,000, is a most remarkable fact. It was never equalled before: and shows how much better eloquent speaking suits, than sermonizing. His Sunday addresses, are published every week; but we don't remember ever to have seen a sermon from him, unless putting a passage of Scripture over an address makes that address a sermon. What he says—oftentimes very good—might as well be preceded by the proverbs in common use—as a series of Timothy Titcomb's essays were—as by anything from the Bible; but in all that we have read from him, we don't remember a single instance in which he attempted to explain the spiritual significance of the language; and failing in this first and paramount point, he might as well talk morally, pleasantly and usefully, under the head of some wise sayings from Robert B. Thomas's Almanac, as under words of Job, Solomon and Paul."

We here also add an article from "Forney's Press," which aptly illustrates a kind of Preaching to which many congregations are too often called upon to suffer from—this is a kind of Preaching that will never convert the world.

"UNFAIR PREACHING.—A correspondent of a contemporary, protesting against the preaching of long sermons, dwells with a particular sense of injury upon the tactics employed last Sunday by his own clergyman. "I appeal," he says, "to you and to the public whether this was fair, viz.: to say "Lastly;" then after a long interval, "Finally;" then "Time permits me to say no more than these last words:" then, "conclude;" then "Just once more," and yet go on and on as if the sermon had only just commenced? Further was it fair, after coming to the end of a pathetic description, which I venture to say nine tenths of the congregation took to be the end of the sermon, to use the words "And now," in the accustomed tone, which caused me and some others to rise with commendable alacrity, and yet to follow them up, not with the well-known formula, but with "Once again?"

We hope for the cause of Religion and Morality, the world will advance in this work of Reformation among Preachers.

—A dandy inquired at a fruit stall, "Are these apples fit for the hogs to eat?" "Try 'em and see," said the woman.

STEAM CULTIVATION.

From personal observation of the application of steam power in cultivation, together with a careful and extended examination of numerous reports by inspecting committees and practical farmers in Europe, who have had large experience in its use, I am convinced that it can be adopted in this country with great facility and profit; and that it is the desideratum, the great thing now needed, to raise and advance farming to the highest scale of prosperity and dignity, in which men of the best minds, highest culture, and broadest views, will delight to engage and find scope for enlarged intellect and ambition. Pecuniary gain should not be the sole measure of benefits in estimating the value of any apparatus or system; the facilities and leisure for mental elevation and enjoyment, with the increased dignity and efficiency in the profession which will be promoted by its adoption, are legitimate and weighty results to be regarded in determining the question of approval.

The profession of agriculture is the foundation and support of all other industries, and consequently the most important of all; hence it should receive the encouragement of inventive genius and have all attainable aids of mind and machinery to make it useful, profitable, and attractive to the highest degree; everything practicable should be done to raise it from its present character of dull drudgery to its just and proud position among liberal and respected professions. The delights of brain-work must, to a greater extent, relieve the toil of physical efforts; mechanical or scientific power, which can suffer neither pain nor fatigue, should be made, as far as possible, to take the place of animal muscles, which do suffer pain and fatigue and become exhausted.

Improvements in agricultural operations must keep pace with the progress of other vocations, such as manufactures, commerce, and the professions. Nothing should be left undone which we can fairly effect, to increase the yield, cheapen the cost, and lighten the labor of obtaining the productions of the earth; we cannot render too cheap or too plentiful the necessaries of life; while at the same time, the operations of production should be made as attractive and respectable as possible, that intelligent minds may find as much inducement to engage in this as in any other of the pursuits of civilized life. Mind must be permitted more and more to predominate over muscular labor, and, as far as may be, machinery must take the place of animal forces in farm operations, as in other pursuits of civilization.

Unless the farmer keeps pace with the spirit of the age, uniting art with science, he will find himself in an inferior grade, where he will enjoy less of the blessings, treasures, and refinements of life, and endure more hard work than other classes; for the experience of all enlightened communities proves that the necessaries of life, as well as its luxuries, are cheapened and improved in the same proportion as the ingenuity of the mind guides the power of the muscles, and the mechanical powers supercede the animal forces.

STEAM CULTURE IN EUROPE.

Steam power has in Europe become extensively employed in farm operations generally, such as harvesting, thrashing, and grinding grain, cutting feed, sawing wood, &c; but the principal object of this article is to furnish a history, with the results of its application in the cultivation of the soil in different localities and on various kinds of lands, that parties may judge for themselves from their own standpoint and necessities whether to avail themselves of its use. It is not my purpose to advocate or favor any particular machine or system, but to state facts generally, and leave those interested to choose which, if any, tackle or system will be best adapted to their particular case.

I might multiply testimony upon the subject under a great variety of managment and circumstances, showing equally varied degrees of success, but, as with everything else, the results depend upon the care, system, energy, and intelligence which are brought into the business as well as upon circumstances and conditions; and much depends, to, upon a wise adaptation of machinery and labor to the special requirements of individual cases. This paper will be confined almost entirely to facts, to practical experience, and official reports, drifting very little into theory or conjecture.

The earliest recorded attempt to apply steam power to the cultivation of land was stated by Mr John C. Sutton, of Shirly, at a meeting of the English Farmer's Club, as published in the Farmer's Magazine, as follows:

"The first attempt appears to have been made as far back as 1618, was revived in 1634, and at various periods since, attempts of more or less importance have been made up to 1854. We find in 1854 the late John Fowler exhibited his steam draining plough at the Royal Society's meetings, and in the journal of that society is the remark, that surely this great power can be applied to more general purposes, and we commend the idea to engineers and mechanics; and the suggestion has not been overlooked, as subsequent successes amply prove."

As early as 1832 Mess Heathcote and Parker, of England, employed traction steam engines in clearing and cultivating a large tract of marshy ground, lying between Manchester and Liverpool, which had been considered unreclaimable by any other means then on hand.

It is computed that more than half a million dollars ware expended in experiments for steam culture in England, up to 1858, before it became a practical success; and inventors in this country might not find it altogether useless to give careful study and attention to experiments and results in that country while pursuing efforts to perfect machines adapted to our wants.

From several reports of committees, published in the journal of the Royal Society of Agriculture in England, for 1867, are condensed the following statments relative to the results of steam cultivation in that country, the facts given suggesting many useful hints to farmers:

Editor's Chair,

[Here we shall hold our special weekly ... our Readers and Correspondents, and ... call their attention to such articles in ... *our Journal*, to which we would direct ... attention.]

It was our pleasure to be at "Monticello" (the "Monticello" of Thomas Jefferson) in ... sa Valley, Napa County, this brightmorning ... an appopriate name and place for "Insect ... Day," from which visit we gather many ... ting items for our "Rambles in the Country" ... shall speak of this place in our next.

We have many letters, received during ... sence which shall have our prompt care.

RAMBLES No. 3, SPRING TIME, will be ... next week, including San Jose Nurseries ... Houses, Napa, the Berryessa Valley, etc.

MASSACHUSETTS LEGISLATION FORTY YEARS ...—We would ask special attention to the ... and interesting memorial which we publish ... week's issue. It shows the deep interest ... "Old Bay State", took in early days for ... Improvements."

The Essay on Steam Cultivation, by D. ... tiss, of Madison, Wisconsin, should receive ... tion from our Farmers as of great moment ... take it from the Reports of the Agricultural ... reau at Washington, and shall publish more ... same subject.

MEN AND ANIMALS.—We call the special ... tion of our Stock Men and Farmers ... the most excellent essay upon the "Sympathy ... tween Men and Animals" which we take ... Eastern exchange.

The truths here presented should make ... impression upon every man who ever ... contact with any class of animals. There ... albe lessons to be learned in this essay.

A CHAPTER ON AIR.—This is worth ... is one of the lessons taught by wisdom, ... ered by experience. Taken from Dr. ... new Book, "How to treat the Sick without ... cine."

DEATH AT THE TOILET.—Here we ... lady readers with a sketch, to show ... *Tyrant Fashion* will do. The story will ... itself.

A WOMAN'S ADVOCATE.

We have received No. 1 of *The El Dorado*, ... new journal just established in our ... El Dorado Publishing Association, to be ... The Association is incorporated with ... of $20,000. The journal is neatly printed ... page paper and wears a handsome face. ... shall we be to see a good journal of this ... per.

THE ROAD TO SUCCESS.

Horace Greeley, the Veteran and Noble ... of the New York *Tribune*, thus pictures the ... success, and we would earnestly call the ... of all Young Men who are entering upon ... of active life to ponder well upon this ... which so admirably points out the Road to ... cess:

"A true and noble success is within the ... of every human being who rightly appreciates ... will diligently seek it. It may very well ... other than the aspirant meditates—it may ... seem defeat to the superficial observer—but ... still reigns, and no heroic and unselfish ... ever really be defeated. If five thousand ... fill the Presidential chair, it is very certain ... all cannot have precisely that outward ... stamp of success they covet; but, were ... thousand, and their aspiration rather ... than circumstantial, to enlighten and ... countrymen rather than rule them, there ... ple work and scope for them all. ... privileged to teach thousands to loathe ... frivolity, display and vice, and love ... briety, modesty and virtue, while ... cates the same lessons only in a narrow ... neighborhood, unpraised, unsung, ... save in the books of the Recording Angel. ... scope of influence in these two cases is ... but the measure of essential success is ... Who ever has learned to find delight ... good, and in nothing inconsistent ... do whatever good is within his reach, ... pine that his opportunities are such only ... en has been pleased to vouchsafe him—... esteem his life a failure. Should sickness ... ality confine him for years to a bed of ... and dependence, he will thenceforth ... glow of heartfelt resignation, or benign ... of grateful piety, whereof the influence ... fused more widely and enduringly than ... have imagined. In the ever proceeding ... Good against Evil, Right against Wrong ... against Error, there can be no real defeat ... solute discomfiture—only postponement ... and the ill-success of a misdirected attack ... wisely planned manovere. In that great ... whoever plants himself firmly on the side ... is allied with all the moral forces of the ... and is certain of ultimate triumph. The ... the base, the selfish and the sycophantic ... seem to flourish for a season; but their ... soon passes away and is forgotten, ... good to stand forth like the evergreens ... est in Winter, when the Summer foliage ... dwarfed and obscured them, lies shrivelled ... feet. Happy they who learn in childhood ... treasure through after trials and temptations ... grand lesson of the age—the philosophy ... to noble ends.

Family dismemberment," is the Chicago ... for divorce.

SPENT AND MISSPENT.

Stay yet a little longer in the sky;
O golden color of the evening sun!
Let not the sweet day in its sweetness die,
While my day's work is only just begun.

Counting the happy chances strown about
Thick as the leaves, and saying which was best
The rosy lights of morning all went out,
And it was burning noon, and time to rest.

Then leaning low upon a piece of shade,
Fringed round with violets and pansies sweet
My heart and I, I said, will be delayed,
And plan our work while cools the sultry heat

Deep in the hills and out of silence vast,
A waterfall played up his silver tune—
My plans lost purpose, fell to dreams at last,
And held me late into the afternoon.

But when the idle pleasure ceased to please,
And I awoke, and not a plan was planned,
Just as a drowning man, at what he sees
Catches for life, I caught the thing at hand.

And so life's little work-day hour has all
Been spent and misspent doing what I could,
And in regrets and efforts to recall
The chance of having, being, what I would.

And so sometimes I cannot choose but cry,
Seeing my late sown flowers are hardly set—
O darkening color of the evening sky,
Spare me the day a little longer yet!

LEWISIA REDIVIVIA.

This is a plant supposed to be found in California or on some portion of the Pacific coast, we think it is known in "Washington Territory," and also in British Columbia.

Dr Hooker of the Royal Botanic Gardens at Kew, London) says: Among the plants eaten by the Kootanier, Colville, and other tribes in that part of British Columbia and Washington Territory, is the beautiful Lewisia Redivivia, the roots are gathered in great quantities, and boiled or eaten like *Salep* or Arrow-root. In this state they are not unpleasant to the taste, slightly bitter, but are valued by the Indians as a nutritious food for carrying on long journeys, two or three ounces being sufficient for a man even though under great fatigue.

These Indians call it "*Spat Lum*" or "Pileem-sad-lise-ne-mare," and look upon it as one of the great gifts of the "Supreme Master of life.

We desire to learn where this root can be found, and shall esteem it a great favor if those who shall read this article and know of its location, will be so kind as to address a letter upon the subject, to the Editor of this Journal.

COATS, BROS' WOOL CIRCULAR.

PHILADELPHIA, Feb. 1, 1869.

January has been characterized by much more activity in the Wool market than has prevailed for the two previous months. Sales of low and medium fleeces and super-pulled are largely in excess of the same period last year, although at a very considerable advance in price. Ruling rates for these descriptions have been from eight to ten cents higher on the fleece and pulled, and from ten to twelve cents higher on the tub wools, than for the same time last year. This however, has been occasioned more by the great scarcity of these descriptions, than from any corresponding advance in goods that would warrant so great an advance in this staple. The finer wools being in larger supply, have not experienced the same advance, and are now selling at comparatively low prices, in many cases actually lower than the coarser grades.

While there is at present the prospect of a very large and prosperous spring trade in dry goods of all descriptions, woolen and cotton, and with the knowledge that the country has been gleaned of wool of all grades to an extent rarely known before at this season of the year, yet the holders of fine wools continue to be free sellers, even at the present low prices, rather than hold for advanced rates based on prospective improvement in the goods market; for it is undeniably true that the prices at which most description of woolen goods have been selling for some months past will not warrant much advance on present prices, even of the fine wools. With the prospect of a very large and healthy trade for all wares and merchandise from all the Southern States, as well as from the West, based on the good crops and favorable prices of the past season, the indications are that we shall have a very active trade in wool during the next two months, which will prove satisfactory to both manufacturers and dealers.

The amount of pulled sold this season has been unusually large, owing to the great scarcity of low fleece and the unprecedented number of sheep slaughtered within the last few months. This must have the effect of causing a much shorter supply and consequently much higher prices for the next clip; but it has very materially aided all the manufacturers of coarse woolens in this neighborhood, as, without it, many mills would, of necessity, have stopped running. As it is, the prospect for all manufactures for this season is very encouraging, leaving the future to take care of itself.

The sales for the month, of Domestic Fleeces and Pulled, foot up about 2,500,000 pounds, within the range of 52 to 61 for Fleeces, and 40 to 49 for Pulled.

PRICES CURRENT OF WOOL AT PHILADELPHIA, FEBRUARY 1st 1869.

Terms of Payment:—For all descriptions of Wool, cash prices are now quoted, Time sales being reduced to a Cash basis.

COATES, BROTHERS,
Nos. 127 and 128, Market St.

WALTHAM WATCHES.

The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the

STRENGTH, STEADINESS, DURABILITY: AND ACCURACY

of the Waltham Watch. To satisfy this class in all these respects, is to decide the question as to the real value of these time keepers.

MORE THAN 400,000

of these watches are now speaking for themselves in the pockets of the people—a proof and a guarrantee of their superiority over all others.

THE SUPERIOR ORGANIZATION

and great extent of the Company's Works at Waltham enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is necessary.

WE ARE NOW SELLING

Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

THESE TIME PIECES

combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country, or in Europe, only those were finally adopted with severe testing by the most skillful artisans in our works, and long use on the part of the public demonstrated to be essential to correct and enduring timekeeping.

Among the many improvements we would particularize:

The invention and use of a

ENTRE PINION,

of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and Tempered Hair-Springs,

now universally admitted by Watchmakers to be the best, are used in all grades of Waltham watches.

ALL WALTHAM WATCHES

have dust proof caps protecting the movement from dust, and lessening the necessity of frequent cleaning, necessary in other watches.

OUR NEW PATENT STEM WINDER

or keyless watch, is already a decided success, and a great improvement to watch in the American Market, and by far the cheapest watch of its quality now offered to the public.

TO CALIFORNIANS

and others living in portions of the United States where watchmakers do not abound, watches with the above mentioned improvements which tend to insure accuracy cleanliness, durability and convenience, must prove invaluable.

Every watch bearing the trade-mark of Waltham is guaranteed to be a thoroughly reliable time-keeper,

To prevent imposition, buyers should invariably demand a certificate of genuineness.

The trade supplied by Messrs. R. B. Gray & Co., San Francisco, Cal., and generally for sale at retail by all respectable dealers.

GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

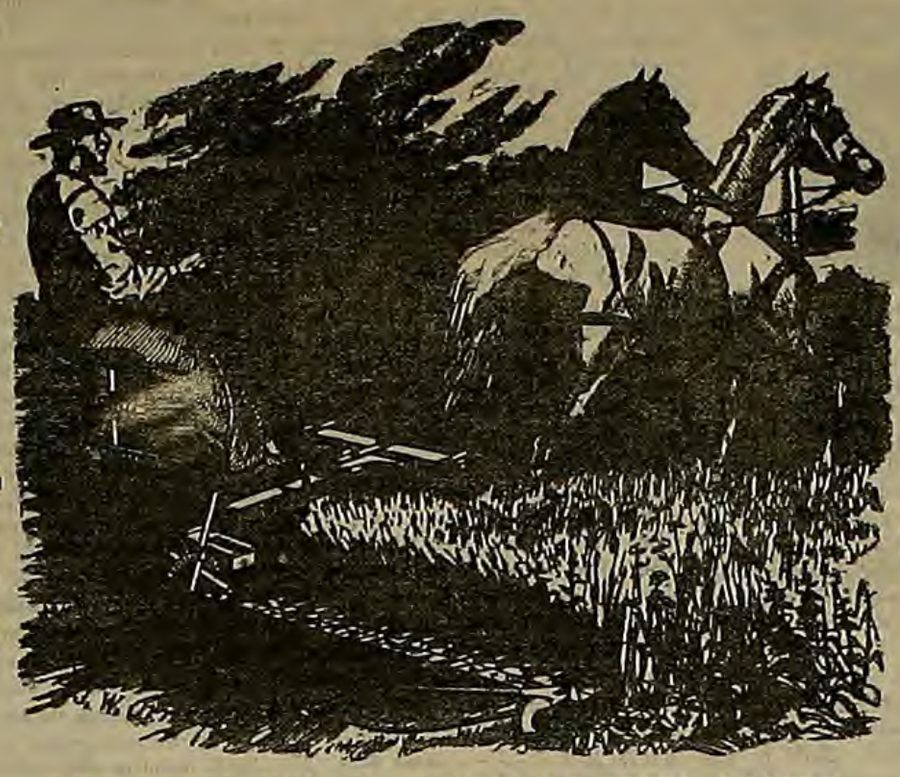
Address WARREN & CO.,
Farmer Office.

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR AN *ORANGE PLANTATION*,
Can obtain SUPERIOR SEED at the
FARMER OFFICE.

THE KIRBY CLIPPER MOWER!

IT HAS THE **INDEPENDENT Action!** IS ALL OF **IRON & STEEL** AND OF REMARKABLY **Light Draft!**



THIS IS THE **LIC TEST! CHEAPEST!** AND **Best Single Mower!** IN THE MARKET.

THE KIRBY MOWER AS SEEN ON LEVEL GROUND.

ONE HORSE can work it by putting on Shafts in place of the Pole and then cut TEN ACRES A DAY. Length of cut, four feet two inches.

When you order EXTRAS for this machine, always state the NUMBER OF THE PART WANTED corresponding with the number on the plates on the list, and also GIVE THE NAME of the part when there is no number on it. By carefully preserving the circular, you can always order your Extras by number and by name. The parts illustrated on this sheet are for the Combined Machine, but the Clipper parts do not differ from them in name except in a very few instances.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose.)

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINTS of your guards LOW by means of the forward bolt in the pole where it bolts to the machine; IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL.

Be sure and keep all the Nuts tight and the Journals well oiled, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the Joint tight where the Pitman connects with the Knife, and then your Machine will work well without trouble or expense.

The nature and working of this Machine may be well illustrated by the following incident:

Our General Agent was in Oregon, setting up and starting a machine for a party that wanted to buy 'if it suited and would cut anywhere." He led the way around the field followed by the Agent driving the Machine; as he was led off from smooth ground to where it was rough and boggy, and where it had never been cut over before, the driver simply bore his weight back in his seat, thus elevating the heel of the finger bar and holding it there with his weight, and at the same time elevated the outer end of the bar with the lever at his right, following CLOSE UP to his leader until the level ground was reached again; then he dropped the bar again, having followed the purchaser close all the way through. His curiosity was roused to know how the Machine was brought through without getting STUCK, and the reply was "it was not made to STICK, it was made to go." He followed the Machine around once, and then got on and drove around twice, when a neighbor said: "Mr. Withim how do you like the Machine?" His reply was: "To tell the truth it is a little the nicest Machine I have ever seen, for I can sit here and work my hand and feet and balance the Machine with my weight, all at the same time, I will have to keep it," and paid his money down on the Machine.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down again when smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way, for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with a great strain, and be very liable to break.

Sole Agents for the Pacific Coast.

30-22—no1

New Strawberries, Raspberries, Grapes &c.

We have just received an invoice of NEW STRAWBERRIES, RASPBERRIES, BLACKBERRIES, &c., to which we call the special attention of all who desire the Newest and Choicest Vines and plants known. The following varieties received:

Blackberries—THE KITTATINY. WILSON'S EARLY.
Raspberries—DAVIDSON'S THORNLESS. DOOLITTLE BLACK CAP.
Strawberries—DR. NICAISE, nine to the pound. GOLDEN QUEEN, magnificent. GREEN PROLIFIC, rare.
New Grapes—TEN VARIETIES New Grapes.

As the amount of these new and rare things is limited, early orders only will secure them. Address

WARREN & CO.
FARMER OFFICE

Horticultural Premium

New Vines and Plants.

With a desire to extend the cultivation of the *New* and *Rare Varieties* of the *Raspberry*, *Blackberry*, and *Strawberry*, we offer the following

PREMIUMS:

For every new subscriber and $5 two plants of the Thornless Raspberry, and two plants of the Kittatinny Blackberr

For two new subscribers and $10 we will give two plan each named above and one dozen plants of the Jucunda Strawberry.

For four subscribers and $20 four plants each of the Raspberry and Blackberry, one dozen of the Strawberry, and two Doolittle Blackcap Raspberry.

For five subscribers and $25 the same premiums as for four and four plants of the Doolittle Blackcap Raspberry.

For a club of ten and $50 we will give one dozen Davison Thornless Raspberry, one dozen Kittatinny Blackberry, ha dozen Doolittle Blackberry and fifty Jucunda Strawberry.

These premiums will enable beginners to secure these ne and rare plants, which are now worth their weight in silver.

Those who send now can also secure our November and December numbers of the *Farmer* and the entire year of 1869

WARREN & CO.

Country Homes Wanted

There is wanted at this time, several **Homes in the Country**, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

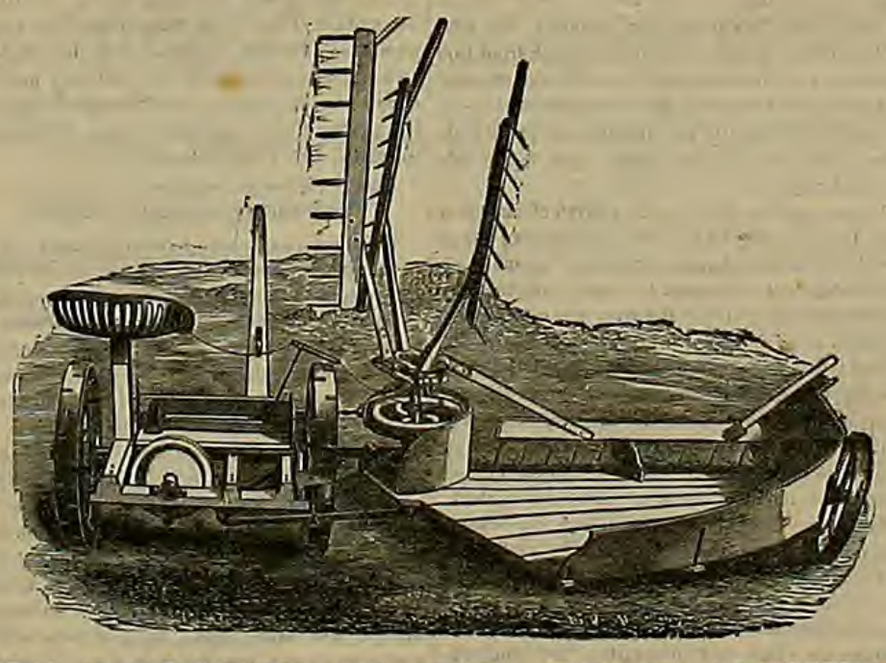
Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they communicate with this office immediately

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Address the FARMER OFFICE.

M. C. HAWLEY & CO.,
108 FRONT ST.,
SAN FRANCISCO.

BUCKEYE Mower, Reaper, AND SELF RAKER

NEW YORK.
SAN FRANCISCO.
PORTLAND.



THE BUCKEYE IS THE BEST MOWER.

The Buckeye is the Best Reaper.

THE BUCKEYE IS THE BEST SELF-RAKING REAPER.

MARCUS C. HAWLEY & CO.,
108 & 110 Front St., San Francisco,
SOLE AGENS FOR THE
BUCKEYE MOWER AND REAPER.

We offer the BUCKEYE SELF-RAKING REAPER to Farmers with the utmost confidence, knowing they are Superior to any Self-Raking Reaper yet invented.

A large number were sold last year, and the universal testimony was, that not one man in ten could rake grain equal to the Buckeye Self-Raker.

SOLE AGENTS FOR C. AULTMAN & CO.'S

CELEBRATED SWEEPSTAKES THRASHER!
ALSO, THE GENUINE
HAINES' HEADER,
Manufactured at Pekin, Illinois. Also
Hollingworth's Wheel Horse Rake,
The most Improved Rake in use.

M'CORMICK'S HAND AND SELF-RAKING REAPERS.

And a COMPLETE STOCK of
Agricultural Implements and Hardware.

31-1-3m 108 & 110 *FRONT ST., SAN FRANCISCO.*

Home Miscellany.

DEATH AT THE TOILET.

[*From the Diary of a late London Physician.*]

"'Tis no use talking to me, mother, I *will* go to Mrs. P——'s party to-night, if I die for it—that's flat! You know as well as I do, that Lieutenant N—— is to be there, and he's going to leave town to-morrow—so up I go to dress."

"Charlotte, why will you be so obstinate? You know how poorly you have been all the week, and Dr. —— says late hours are the worst things in the world for you."

"Pshaw mother! nonsense, nonsense."

"Be persuaded for once, now, I beg! Oh dear, what a night it is too—it pours with rain, and blows a perfect hurricane! You'll be wet and catch cold, rely on it. Come now, won't you stop and keep *me* company to-night? That's a good girl!"

"Some other night will do as well for that, you know; for now I'll go to Mrs. P——'s, if it rains cats and dogs. So up—up—I go!" singing jauntily.

"Oh she shall dance all dressed in white, so ladylike."

Such were, very nearly, the words, and such the manner in which Miss J—— expressed her determination to act in defiance of her mother's wishes and entreaties. She was the only child of her widowed mother, and had, but a few weeks before, completed her twenty-sixth year, with yet no other prospect before her than bleak single-blessedness. A weaker, more frivolous and conceited creature never breathed—the torment of her amiable parent, the nuisance of her acquaintance. Though her mother's circumstances were very straightened, sufficing barely to enable them to maintain a footing in what is called the middling genteel class of society, this young woman contrived by some means or other to gratify her penchant for dress, and gadded about here, there, and everywhere, the most showily dressed person in the neighborhood. Though far from being even pretty-faced, or having any pretensions to a good figure, for she both stooped and was skinny, she yet believed herself handsome; and by a vulgar, flippant forwardness of demeanor, especially when in mixed company, extored such attentions as persuaded her that others thought so.

For one or two years she had been an occasional patient of mine. The settled pallor, the sallowiness of Her complexion, conjointly with other symptoms, evidenced the existence of a liver complaint; and the last visits I had paid her were in consequence of frequent sensations of oppression and pain in the chest, which clearly indicated some organic disease of her heart. I saw enough to warrant me in warning her mother of the possibility of her daughter's sudden death from this cause, and the imminent peril to which she exposed her self by dancing, late hours, &c.; but Mrs——'s remonstrances, gentle and affectionate as they always were, were thrown away upon her headstrong daughter.

It was striking eight by the church clock, when Miss J——, humming the words of the song above mentioned, lit her chamber-candle by her mother's and withdrew to her room to dress, soundly rating the servant girl by the way, for not having starched some article or other which she intended to have worn that evening. As her toilet was usually a long and laborious business, it did not occasion much surprise to her mother, who was sitting by the fire in their little parlor, reading some book of devotion, that the church chimes announced the first quarter past nine o'clock, without her daughter's making her appearance. The noise she had made over head in walking to and fro to her drawers, dressing table, &c., had ceased about half an hour ago, and her mother supposed she was then engaged at her glass, adjusting her hair, and prepairing her complexion.

"Well, I wonder what can make Charlotte so very careful about her dress to-night!" exclaimed Mrs. J——, removing her eyes from the book, and gazing thoughtfully at the fire; "Oh! it must be because young Lieutenant N—— is to be there. Well, I was young myself once, and it's very excusable in Charlotte—heigho!" She heard the wind howling so dismally without, that she drew together the coals of her brisk fire, and was laying down the poker when the clock of —— church struck the second quarter after nine.

"Why, what in the world can Charlotte be doing all this while?" she again inquired. She listened—"I have not heard her moving for the last three-quarters of an hour! I'll call the maid and ask." She rung the bell, and the servant appeared.

"Betty, Miss J—— is not gone yet, has she?"

"La, no, ma'am," replied the girl, "I took up the curling irons only about a quarter of an hour ago, as she had but one of her curls out; and she said she should soon be ready. She's burst her new muslin dress behind, and that has put her into a way, ma'am."

"Go up to her room, then, Betty, and see if she wants any thing; and tell her it's half past nine o'clock," said Mrs. J——. The servant accordingly went up stairs, and knocked at the bed-room door, once, twice, thrice, but received no answer. There was a dead silence, except when the wind shook the window. Could Miss J——have fallen asleep? Oh, impossible! She knocked again, but unsuccessful as before. She became a little flustered; and after a moment's pause, opened the door and entered. There was Miss J—— sitting at the glass. "Why, la, ma'am!" commenced Betty in a petulant tone, walking up to her, 'here have I been knocking for these five minutes, and" ——. Betty staggered horror-struck to the bed, and uttering a loud shriek, alarmed, Mrs. J——, who instantly tottered up stairs, almost palsied with fright. Miss J—— was dead.

I was there within a few minutes, for my house was not more than three streets distant. It was a stormy night in March, and the dessolate aspect of things without—deserted streets—the dreary howling of the wind, and the incessant pattering of the rain—contributed to cast a gloom over my mind, when connected with the intelligence of the awful event that had summoned me out, which was deepened into horror by the spectacle I was doomed to witness. On reaching the house, I found Mrs. J—— in violent hysterics, surrounded by several of her neighbors who had been called in to her assistance. I repaired instantly to the scene of death, and beheld what I shall never forget. The room was occupied by a white-curtained bed. There was but one window, and before it was a table, on which stood a looking-glass, hung with a little white drapery, and various paraphernalia of the toilet lay scattered about—pins, brooches, curling-papers, ribands, gloves, &c. An armed-chair was drawn to this table, and in it sat Miss J ——, stone dead. Her head rested upon her right hand, her elbow supported by the table; while her left hung down by her side, grasping a pair of curling-irons. Each of her wrists was encircled by a showy gilt bracelet. She was dressed in a white muslin frock, with a little bordering of blonde. Her face was turned towards the glass, which, by the light of the expiring candle, reflected with frightful fidelity the clammy fixed features, daubed over with rouge and carmine—the fallen lower jaw—and the eyes directed full into the glass, with a cold dull stare that was appalling. On examining the countenance more narrowly, I thought I detected the traces of a smirk of conceit and self-complacency, which not even the palsying touch of death could wholly obliterate. The hair of the corpse, all smooth and glossy, was curled with elaborate precision, and the skinny sallow neck was encircled with a string of glistening pearls. The ghastly vissage of death thus leering through the tinselry of fashion—the "vain show" of artificial joy—was a horrible mockery of the fooleries of life.

Indeed, it was a most humiliating and shocking spectacle. Poor creature! struck dead in the very act of sacrificing at the shrine of *female vanity*. She must have been dead for some time, perhaps for twenty minutes, or half an hour, when I arrived, for nearly all the animal heat had deserted the body, which was rapidly stiffening. I attempted, but in vain, to draw a little blood from the arm. Two or three women present proceeded to remove the corpse to the bed, for the purpose of laying it out. What strange passiveness! No resistance offered to them while straighted the bent right arm; and binding the jaws together with a faded white ribon, which Miss J—— had destined for her waist that evening.

On examination of the body, we found that death had been occasioned by disease of the heart. Her life might have been protracted, possibly for years, had she but taken my advice, and that of her mother. I have seen many hundred of corpses as well in the calm composure of natural death, as mangled and destorted by violence; but never have I seen so startling a satire upon human vanity, so repulsive, unsightly, and loathsome a spectacle, as a *Corpse dressed for a ball.*

THE LIGHT HEARTED PEOPLE.

There are people who habitually make the best of things, not from any shrinking from pain on their own account or for others but simply from a natural and unconquerable lightness of heart. These people supply the oxygen of the moral atmosphere, and should be maintained at the public expense to keep it sweet and pure. Even if instead of being, as they generally are, active and otherwise estimable members of society, they did nothing but enjoy life, they would still be worth cultivating for the sake of the light and heat which they kindle. The only difficulty is how to regulate them. They are so irresistably impelled to sing songs that, in a world where heavy hearts are unfortunately common, it is difficulty always to keep the vinegar and nitre apart. It is unreasonable to expect any great consideration for the susceptibilities of melancholy people from the constitutional cheerful, because the very fact of their being so implies a certain degree of insensibility, which involves a corresponding amount of blindness to other people's sensibility. A genuine cheerful person makes the best of your troubles because they really do not appear to him very distressing, and it is for you to decide whether such a view will act on your mind as a tonic or an irritant.

PLANT SMALL FRUITS.

We would urge greater attention at the present time to the planting of small fruits, such as *Strawberries*, *Raspberries*, and *Blackberries*, with *Gooseberries*, and *Currants*.

Never have we had so good a season to commence the cultivation of such fruit as the present. Last year the demand for them was large, and they sold readily, and at good prices, and beyond all question the demand will be greatly increased this year.

When the Railroad shall carry off all our *large fruit*, pears, apples, and grapes, to New York; Boston, and Philadelphia, *small fruits* will bring a big price in our markets and they will pay well, so plant, and plant largely.

—"Ma, if you will give me an apple, I will be good." "No, my child, you must not be good for pay—you must be good for nothing."

—One has only to die to be praised.

AIR.

It is of very great importance in a large class of diseases that persons in order to recover should have pure air, and plenty of it, to breathe. Almost all the diseases (and they are quite plenty) which arise from deterioration of blood or from bad and imperfect circulation of it, may be said in good measure to be caused by want of proper aeration of the blood. Almost all diseases of the lungs are to be largely accounted for under defective use of air, springing either from want of it or from the impurity of it. Many of the diseases of the skin have their predisposing, and some of them their proximate origin in defective or insufficient use of air. Not unfrequently are diseases of the bowels to be attributed to the same cause. Air, therefore, may not be simply regarded with great favor as a probylactic agent—an agent whereby disease may be prevented; but as a therapeutic agent—an agent whereby disease may be cured.—But in order to have it as efficient as possible it needs to be pure atmospheric air; not such gasses as are found in cesspools, in pestilential districts of country, in large cities, in crowded halls in unventilated churches, in close and unaerated sleeping rooms, but such air as is pure, and therefore free from noxious or distructive elements.

It will take a great while for the medical world, and a good deal longer for the people at large, to learn that in the treatment of any disease arising from non-aeration of blood, no remedy can be found to work with such therapeutic surety as pure atmospheric air, rightly applied. Until the medical profession discerns this and instructs the people in it, resort will be had to all sorts of agencies supposed to be particularly curative for the overcoming of lung diseases. Meanwhile the whole system of practice will continue to be as it has hitherto been, a decided failure, and the subjects of such treatment will continue to die.

As the Psycho-hygenic treatment comes to be understood, death from diseases of any and every kind, will be steadily less frequent, until at length persons who have accepted and followed this philosophy of living, will know nothing about sickness. They will live from birth, to death by old age, without aches or pains.

And when this philosophy of life comes to be universal, sickness, except from casualities or accidents, will cease to be. Children will be born, and have no diseases in childhood, in youthhood, at adolescence, at adult or middle age, but will go from the cradle to the grave without being sick, dying *when their time comes.*

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO.

To Take Charge of a Place.

A young man with some capital (from $500 to $1000) can hear of a good opportunity to take charge of a new place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

No one but a steady and industrious young man need apply.

The applicant must be able and willing to work, and have a love and taste for rural life. To such a person a good chance can be given.

24-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* It is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world; publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal: its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Miscellany.

EUROPEAN BASKET WILLOW.

Being one of the first to introduce into this State the European Basket Willow, and believing that when its cultivation is properly understood, it can be made not only one of the surest crops the farmer can grow, but also one of the most profitable, I have thought an article on this subject might not be unprofitable to the numerous readers of the *Farmer*.

The soil best adapted to the growth of the European Willow has been generally supposed to be a heavy, wet soil—nearly every plantation which has come within the range of my observation having been set on meadow land—but from experiments made on a variety of soils, I am satisfied that this is a mistake. To my surprise I have found them to make a better growth on a warm, rich, sandy loam, where either corn or potatoes would grow luxuriantly. On such soil they sometimes make growth of ten feet in one season, and will make an average growth of six to eight feet; being very straight and slim, surpassing in quality anything I have ever seen imported. Our hot sun seems exactly adapted to its growth. During our hottest days in July, in a warm soil, they will make a growth of from three to four inches in twenty-four hours, while in a wet day they grow not more than one-half an inch.

To prepare the soil for a plantation it should be ploughed and planted two years with some crop which requires the land to be well cultivated; it should also be made rich enough to produce not less than fifty bushels of Indian corn to the acre.

In transplanting the willows, tops are preferred to roots; twigs about one half an inch in diameter should be selected and cut from twelve to fifteen inches in length. As early in April as the weather will permit, the land should be well ploughed and furrowed three feet apart. In these furrows the cuttings should be set one foot from each other, not perpendicular, but on an angle of about forty-five degrees. The first year the land should be well cultivated. After this they require but very little attention except harvesting the crop.

The first years' growth should not be cut, but after the second years' growth, sometime between October and March, they should be cut as near the ground as possible. This crop is worth but little except to make cuttings for a new plantation; but after this, a valuable crop may be cut every year between December and March—February being the best month, if the weather is not too cold and and the snow is not too deep. No injury will occur to the roots if the crop is secured before the warm days in March start the circulation of sap. The canes should be bound in bundles of about fifty pounds each, and set in three or four inches of water. Sometime in May it will be found the bark will peal off very easily; they should then be stripped and sent to market.

During the past six or eight years, there has been a great demand for Basket Willow It has sold as high as eighteen cents per pound; but at six cents per pound, it yields a profit of not less than fifty dollars per acre. There is a ready sale for all that is grown and a very large quantity is imported. I have no willows for sale, nor time to answer any questions, except through the *Farmer*.

E HERSEY. *N. E. Farmer.*

Hingham, Mass., Dec. 5, 1368.

REMARKS.—The cultivation of the willow on a sand bank, or even on a warm, rich, sandy loam is a new idea to us. From our observation, as well as our reading, water and willows have become closely associated in our mind. They grow in wet places on our own farm, and wherever willows flourish we generally find them within reach of water. A late writer says that in England, where the white willow may be seen growing extensively in ten or a dozen counties, it is not grown on any but moist soil; in springy and wet situations, unfit for cultivation by reason of being too moist or wet, it may be found in quantity, but not on dry upland at all, except by the side of a ditch, or exceptionally wet places.

The common idea among cultivators of the necessity of "a heavy wet soil" for the growth of the willow is not only common but very ancient. Mr. Lowell in his recent poem, "Under the Willows," speaks of trees of that variety

> ——"that lean along the brink
> Where the steep upland dips into the marsh."

And a much older writer than Mr. Lowell speaks of "the willows of the brook" It is with much pleasure, therefore, that we publish the foregoing statement by Mr Hersey, of his success in cultivating the Basket Willow on upland. The value of his statement is enhanced by his well known caution about making any statement or recommendation which is not fully justified by his own practical experience or personal knowledge, or to which he is unwilling to affix his name. But his doing the latter should not subject him to a personal correspondence. Inquiries for further information from Mr. Hersey must be made through the *Farmer*.

—Weeds are God's policemen. They make lazy farmers cultivate the soil, which without them never would be stirred, and consequently never produce a crop. A good farmer hoes often, weeds or no weeds, but a slack fellow never uses the hoe if he can find any excuse to avoid it.

—WHEAT IN ENGLAND.—The Agricultural Gazette estimates the annual consumption of wheat in the United Kingdom as 20,000,000 of quarters, it may be a million more, and states the average yield per acre, throughout the Kingdom, at 27 bushels. An English quarter is eight bushels.

—Mankind should learn temperance from the moon—the fuller she gets, the shorter her horns become.

—If industry is no more than habit, it is at least an excellent one.

BRITISH RAILWAYS.

The amount of capital expended on railways in the United Kingdom at the close of 1868 was about 500,000,000 pounds sterling, 14,223 miles being open for traffic, of which the average cost per mile was £34,233. The traffic receipts for 1868 were £39,823,268, being £2,800 per mile for the year. The working expenses for the past two years have been just about one-half of the expenses, being 50.6 per cent, in 1867 and 49 5 per cent in 1868. The net earnings on capital in 1868 were 4.13 per cent.

The capital of railway companies, which has not been largely increased the past year, stood at the close of 1867 as follows.

Share—Ordinary	£233,023,854
" Preferred	143,209,357
Loan—Debentures	110,392,559
" Debenture stock	15,637,117
Total	£502,262,887

The numbers of passengers conveyed in 1867 were as follows:

First class	31,725,708
Second class	77,700,297
Third class and parliamentary	178,262,108
	287,688,113
Add periodical tickets	119,791

The receipts from passengers were £15,909,705, the average being 1 shilling and 1¼ penny per passenger.

The receipts from luggage, parcels, horses, carriages and dogs, were £1,453,571.

The receipts from mails were £575,358, being about £40 3s. per mile. The general rate of compensation to railways for carrying the mails in the United States has been $150 per mile.

The general merchandise conveyed amounted to 46,474,037 tuns, the receipts from which were £13,655,890, averaging 5 shillings 7¼ pence (being $1 35, coin per tun.

Minerals of all descriptions conveyed amounted to 98,633,791 tuns, the receipts from this traffic £7,640,878, an average of 1 shilling 6½ pence (or say 37 cents coin) per tun.

Of live stock carried, there were 15,724,058 heads, the receipts from which were £847,590, being 1 shilling and 0¾ penny (26 cents, coin,) per head.—*N. Y. Stock Exchange.*

THE OLD MIDDLESEX SOCIETY.

The Trustees of this time-honored and influential Society held their annual meeting at the Middlesex Hotel, in Concord, on Friday last. Nearly all the Trustees were present, and manifested a most lively interest in the business before them. The President of the Society, John Cummings, Esq., of Woburn, presided. A vote was passed directing a building committee to proceed at once and erect a substantial building according to a plan adopted last year. It is to be *one hundred and thirty feet long and seventy wide.* Its form will be unlike any building we have ever seen devoted to such objects; and we think will admirably subserve the purposes for which it is designed.

Before taking up the various branches of the premium list, several committees were appointed to report what changes it seemed desirable to make in them. On going through the items, *seriatam*, animated discussions frequently sprung up, and some of them were pretty thoroughly sifted. In most cases, at least on the more important items, the premiums were considerably increased, and some of them nearly doubled.

Some new premiums were added, one of which offers a premium of $20 for the best example in thorough drainage on not less than one acre of ground. Another is a premium of $15, and one of $10, for the best vegetable and fruit garden on any farm of not less than twenty acres. This is an admirable movement. It will tend to the care and cultivation of better gardens *on the farms*, where they have been greatly neglected, and to the introduction of fresh an healthful fruits and vegetables on the table of the farmer, where a meagre supply only has been enjoyed. The President made some excellent remarks while the motion was pending, clearly showing that the *moral* influence of this movement would be still more valuable than the physical, and that it would gradually lead to that neatness, order and embellishment about the farm, that would give a new aspect and tone to rural life.

Many of the Trustees are still short of middle life, and are full of zeal and activity, and possess ample means to aid on that grand work.

The Society now is in its *seventy-fifth year*, and promises, to-day, to exert an influence in the coming year greater that it has ever exerted before. The spirit manifested in this meeting is encouraging, and will work out valuable results.

THE PHOTOSCOPIC TABLE COMPANY.

THE NEW INVENTION of this Company is known as the ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION o this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changible pictures, arranged to suit the wishes an desires of each owner of the table,

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

The Company have opened a Suit of Rooms for Exhibition and sale of the PHOTOSCOPIC TABLE at the corner of St. Marks Place, No. 23 KEARNY St., west side, up stairs, to which they cordially invite the public to examine them. 32-1

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. This three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

This represents the prices paid by the dealer to the produce on the wharf or landing places.

[Corrected Weekly, by Editor Farmer.]

San Francisco, March 4.

Grain, &c

The Grain Market is very dull, if such a term can be applied to so great an interest as this is now become in our State.

We have now to show to our grain growers the fact of a falling market in all the Grain Marts abroad and a certainty of the same here for some time to come.

The warm sunshine is bringing forward the Grain in a healthy way although there is much that is late planted, and more that will still be planted especially Barley. Plows are still at work in many fields, and will continue to work for weeks to come.

Thanks, for the glorious sunshine we have enjoyed lately—the sunshine which ripened and that to perfection, the "Queen" of spring fruits, the sweet, delicious, and luscious "*Strawberry*." Such early visitors, speak loudly in praise of this wonderful and astonishing climate. It is all spring and summer, and in some places winter is scarcely known, nevertheless vegetation is not injured by this peculiar clime but if anything advantaged by it, because we realise a second, and in some cases, a third crop of fruit, of apples and pears. —we have had but a poor supply during the past week.

Meats.

(L. Miller & Co.)

With our butchers, trade is good and brisk, but the extreme wide margin in the wholesale department, will confound many of our readers—The reason is simply this, that both cattle and sheep, appear to be slaughtered to save their being starved, in consequence of feed being so scarce this spring. Mutton is of very poor quality, of course there are exceptions; some graziers take a pride and delight in sending nothing but the best, in prime order, whilst others, send anything for the allmighty dollar's sake—The latter may do for White Pine, but will not answer here.

To rely upon having well fed beaves and mutton, root crops, such as Mangolds, Swedes, Turnips, Carrots &c, *must* be extensively grown, so as to have food in stock and at hand, and not have the beast's to wander about over miles of land for food, and then only for a scanty subsistance. Such miserable stock raising is sure to fail. We have any extent of good land well suited for the various root crops, therefore we would strongly recommend our graziers to begin in the right way, to secure credit and wealth.

Prices for the best are firm and good, whilst for the indifferent is somewhat doubtful and uncertain.

Oregon Sugar Cured Hams is becoming a very serious item, and very much sought after. Mess French &co, keep up their stock of upwards of three tuns, so as to supply all demands of their various customers. The Hams are of fine quality and when properly cooked, excell any thing brought to table.

AUZERAIS HOUSE,

SANTA CLARA STREET,

San Jose, Cal.

J. M. STAPLES, PROP'R.

—ALSO—

LAKE HOUSE,

DELMAR AVENUE,

SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,
31-1 Proprietor of the Auzerais House.

Traveling.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southhampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

March 10th—GOLDEN CITY, Capt W. F. Lapidge, connecting with ALASKA, Capt. Gray.

March 18th—MONTANA, Capt. E. S. Farnsworth, connecting with RISING STAR, Capt. Connor.

March 30—COLORADO, Capt. W. H. Parker, connecting with HENRY CHAUNCEY, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman' and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—If desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

oct OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings, Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtil further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9.50 A. M.; Reno at 4.20 P. M.; Wardsworth at 6.30 P. M. Winnemucca at 3.30 A. M.; Argenta at 8.50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12.05 P. M. Reno at 2.10 A. M. Colfax at 9.50 a. m. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6:30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada,

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermitt, Silver City, Owyhee, and all points n Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages or White Pine, and Overland Stages for Salt Lake City and the Atlantic States.

C. CROCKER,
General Superintendent

GOLDEN EAGLE HOTEL.

Corner Seventh and K streets, SACRAMENTO.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

—o—

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PL in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine 'Dr. M Vermifuge, they very frequently get one or other of the many worthless preparations called V now before the public. We therefore beg leave to urge upon the Planter the propriety and ance of invariably writing the name in full, and to advise their factors or agents that they will not other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BRO BURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derange alent in the South and South West, has induced the venders of many worthless nostrums to claim for parations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS ginal and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Pu Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Vermifuge nor Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG, P

DR. M. LANE'S CELEBRATED LIVER PIL

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for L BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER C and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in th South, where, in the majority of cases, the patient is not within the reach of a regular physician, some remedy should be provided, that would not in the least impair the constitution, and yet be safe That such is the true character of DR McLANE'S LIVER PILLS, there can be no doubt. The which has invariably attended their use will, we think, be sufficient to convince the most incredulous our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects they have been so tested, and that the result has been in every respect favorable, we call thousands who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms com deranged state of that organ.

DISEASES OF THE LIVER

The Liver is much more frequently the seat of disease than is generally supposed. The function to perform, and on the regular execution of which depends not only the general health of the body of the Stomach, Bowels, Brain, and the whole Nervous System, shows its vast and vital importance health. When the Liver is seriously diseased, it in fact not only deranges the vital functions of the exerises a powerful influence over the mind and its operation, which cannot be easily described. It connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful that it misleads more physicians, even of great eminence, than any other vital organ. The intimate which exists between the Liver and the Brain, and the great dominion which I am persuaded it exer passions of mankind, convince me that many unfortunate beings have committed acts of deep and crimi or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. The convinced that more than one-half of the complaints which occur in this country, are to be consider their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadeq of which we afterwards feel ashamed; last, though not least, more than three-fourths of the diseases under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful cata

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; a pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is so taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bo ral are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a sensation in the back part. There is generally a considerable loss of memory, accompanied with a p tion of having left undone something which ought to have been done. A slight dry cough is sometim ant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burn complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that an be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts ev Several of the above symptoms attend the disease; but cases have occurred when few of them existed, ination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not or three times by next morning, take one or two more; but a slight breakfast should invariably follow The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight of the Stomach.

DR. M'LANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthr consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer's cause is frequently overlooked, and consequently the proper remedy is not applied. But when the pati fant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to a cause. It ought here to be particularly remarked, that although but few worms may exist in a child over quiescent they may have been previously, no sooner is the constitution invaded by any of the ma of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it happens that a disease otherwise easily m aged by proper remedies, when aggravated by that cause to treatment, udicious in other respects, but which entirely fails in consequence of worms being even in cases of great violence, if a potent and rompt remedy be possessed, so that they could be ex loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, al flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; a circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of occasional headache, with humming or throbbing of the ears; an unusual secretion of saline, tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea violent pains throughout the abdomen; bowe s irregular, at times costive; stools slimy, not unfre with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied cough sometimes dry and convulsive; uneasy and disturbed sleep, wi grinding of the teeth; tem but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ina viding the symptoms attending the sickness of the child or adult warrant the supposition of worms bei In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLA great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled pers palming upon the public counterfeit and inferior articles, in consequence of which the proprietors forced to adopt every possible guard against fraud. Purchasers will please pay attention to the fol of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. M FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PI This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS stamped on the lid of the box, in red wax.

Prepared only by FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box Liver Vermifuge on receipt of forty cents in Government Stamps.

LETTER FROM VALLICETO.

MARCH 3, 1869.

Appearances for a day or two past indicate rain which is much needed. The dry, warm weather of the past few weeks has caused the ground to bake. Grass and grain is very backward; no fruit trees but Almond in bloom yet. The prospect of a large crop of all kinds of fruit is promising but it will not be of much value, as there is no market for it. *Full* fruit will not pay to haul to Stockton to sell at one and a half cents per pound. Winter fruit *cannot* be hauled away on account of mud—therefore we eat what we want, give away what we can, and feed the rest to stock. When will the Rip Van Winkles of Stockton wake up and build a road out of that mud hole to the hard ground? Grapes was sold last Fall from $15 to $20 per ton, and more grown than could be sold at that price. Next Fall there will be a third more raised than last year. Amount of Rainfall to March 1st, is 16½ inches at this place. T.

[We call the attention of our Stockton readers to the above letter and hope they will wake up and see to the importance of the "Hints" of our correspondent.—ED. FARMER.]

THE FUTURE OF AMERICAN AGRICULTURE.

Rightly estimated, there is no higher or nobler calling than that of Agriculture. It is, therefore appropriate that the great majority of men should be devoted to it. But it is not appropriate that the calling to which all men owe their daily bread, should be so little understood as it is. And it is one of the wonderful inconsistencies of mankind, that so few of those who devote their lives to the cultivation of the soil, should take the least interest in trying to discover, or to understand the natural principles that make the seed time and harvest. In the United States the farmers outnumber all others by many fold, and the money value of their labor exceeds both those of Manufacture and Commerce combined; yet farmers do not take that position to which they are entitled, simply because they have not done, neither themselves, or their calling justice.

We are gratified, however, to see many and wide spread evidences of an improvement among the farmers. Higher and more correct views as to the true dignity of farming, are begetting a laudable ambition among those already devoted to the calling and attracting to it many men of capital and large business capacity, for other occupations. Schools and Colleges, too, are beginning to recognize the fact that Agriculture stands in need of many of the sciences and arts, and many are opening the way for her to take her place among the ennobled arts. These are all healthful signs, and promise a brilliant future for American Agriculture. In this onward march, Dixie land must be no laggard. Her place is in the front, abreast of the foremost, and she must neither resign it nor lose it, by indifference. Rich beyond comparison, in all the natural elements of the highest systems of Agriculture, her sons will prove recreant to her and to themselves, if outstripped in the race.—*Dixie Farmer.*

—Agricultural Fairs—Farmers' pretty daughters.

BUCKEYE MOWER AND REAPER AT WORK.

FEMALE LABOR.

Under our former system, household labor among the well-to-do classes of the South was performed almost exclusively by slaves. With the abolition of slavery, the destruction of property by the war, and the comparative poverty which has overtaken most of us, has come the duty of labor. It is a burden laid upon both sexes. Not until this truth is realized can there be any progress in accumulation, from our new starting point. Our ladies must learn to fulfill the duties of their new position; and in order that they may do this successfully, gracefully and without any feeling of degradation, they must have every assistence and encouragement from the stronger sex. Every attainable convenience which modern ingenuity has invented for alleviating the burden of female labor should be brought to bear in their favor. They must have cooking stoves, and washing machines, and sewing machines. The kitchen must be built adjacent to the dwelling, and plentifully supplied with seasoned wood. The well must be located close to the kitchen, and it would be best to use a pump for raising the water. These arrangements will diminish the amount of female labor to be performed and make it much less repulsive.

If you are able to hire servants and thus relieve the females of the family of drudgery, you will nevertheless find that these conveniences will repay the expenditure. It often happens to those who are able to employ domestics, that owing to sickness of some kind, the housewife finds herself without a cook. If these conveniences have been provided, the labor of preparing the food for the family for a few days, until the vacancy may be filled, will not be burdensome. Without them there will be much irritation and unhappiness. Moreover you will find it much easier to procure a tidy and skillful cook, if your kitchen is properly arranged and fitted up.

There is too much household labor employed and paid for. This practice, the remnant of a former state of things, creates a drain on the pockets of thousands of farmers who in consequence are without the means of educating their children. The money expended in one year in the hire and board of a single servant would suffice to fit up your kitchen in such style as entirely to dispel that repulsiveness which now hangs around it and constitutes the chief objection on the part of a refined woman to the operations of the *cuisine*. We say then to the farmers: Dignify female labor and make it attractive. Thus you will overcome the prejudices of education and lead your daughters gently into the true pathway of duty. When this shall become the rule, instead of the exception, our farmers will find that one great leak has been stopped, and the improvement in their circumstances will become regularly more apparent. —*Carolina Farmer.*

LIFE INSURANCE.

It will be seen by the *New Advertisement* of the PACIFIC MUTUAL LIFE INSURANCE COMPANY, that they have moved the Office of the Company to the new and convenient rooms 137 Montgomery street, up stairs.

This Company have done a most successful business since their beginning only eight months ago, exceeding in amount and profits any company that was ever incorporated in the United States.

OUR ILLUSTRATION.

We give in this number, as will be seen by our front page the truly splendid cut of the BUCKEYE MOWER AND REAPER AT WORK. Who would not be proud to drive such a span of horses? They are the genuine bloods—a cross of the "Blackhawks;" see how easy the *work* is done—quietly seated. This span of horses marches on over its 10 or 20 acres per day. See how smoothly it has laid the grain—how easy to bundle! Who would not be a Farmer? Is it not a beautiful picture?

The Buckeye Mower and Reaper has won many a Premium for its excellent work and it looks it too.

Messrs. Adriance, Platt & Co., of Poughkeepsie, N. Y., are the Manufacturers, and their sales have been very immense. The sales the first year of its appearance, was TEN; the last year it was over TWENTY THOUSAND. Such a fact speaks volumes. Messrs. Marcus O. Hawley & Co., 108 and 110, Front Street, are the sole Agents for this Machine. The full particulars of which are in the advertisement in our columns, and circulars of this splendid Implement can be had at our office.

Farmers Remember, all the best and most important Agricultural Implements will be found in our columns. *We will not advertise any but the Best.* Look to our columns always for such.

GRAIN, AND CALIFORNIA FARMERS.

The California *Farmer* says if a ship of the capacity of 1,000 tons was to load with wheat at San Francisco, each day between now and next harvest, the supply in California would not be exhausted. Probably a knowledge of this fact has caused many fields to be sown this year in barley that raised wheat last year. It looks to us as though barley would never be as high again in Reno as it is and will be until next harvest. Probably our State will increase 30,000 in population during the present year. These with the developments which will be made will add to the teams in eastern Nevada, and the demand will be increased over the present and probably over the grain raising capacity of eastern Nevada. But in a State like California, where grew 20,000,000 of bushels of grain last year, and where probably half as much again will be raised the present season, what are a few hundred tons more or less? California farmers are a queer set; last year they all raised wheat, and with an immense surplus on hand the experiment is to be renewed again this season. At the same time butter is worth 47½ cents per pound there, and cheese 20 cents; and to keep up the supply every steamer from Panama brings a thousand firkins or so, though California is as fine a grazing country as there is in the world. California does nothing reasonably; her people do everything by extremes. This year it is wheat, next year it will be grapes, or hops, or sugar beets, or silk. They seem unable to combine and carry along more than one thing at a time.—*Reno Crescent.*

GREAT HOTEL AT SACRAMENTO.—By the news of the day it will be seen that Sacramento is to have a "Grand Hotel." It will be located on Front Street if the proper site can be secured; otherwise about 4th to 7th Streets, or I. Capital Stock, $250,000. This can easily be done, for Sacramento is bound to put on the Robes of Triumph now. Her dark days are past.

—Speak little, speak truth: Spend little, pay cash.

STEAM CULTIVATION.

[MR. REED'S REPORT.]

The Royal Society designated three examining committees for three different sections of the country. Committee No 1, consisted of three gentlemen, of which Howard Reed was chairman, was deputed to inquire and report the results of steam cultivation in the counties of Norfolk, Cambridgeshire, Huntingtonshire, Essex, Surry, Kent, Sussex, and Hampshire. They examined 36 farms on which steam power was used in cultivation, and completed their duties in 22 days in the month of September, 1867. Mr. Reed remarks, in the opening of the report, that the superiority depends not so much upon the power itself as upon the party that wields it. One successful steam farmer said to the committee that he had been over some steam cultivated farms without perceiving any decided advantage, and he had been over many others where he discovered as many advantages as he could show on his own place; hence, in some instances, steam cultivation is not a profitable investment, not from any defect of power or mechanical construction, but because parties do not take the advantage they might and should take in the management of it. Here, as elsewhere, success is obtained only when one combines with right business habits, a fair knowledge of principles. And, Mr. Reed continues, this entirely concurs with our experience everywhere, in steam as in other farming.

Much difference of opinion was encountered as to the character of the soil; almost invariably it was represented as unusually heavy, and for this reason one question was often asked, "How many horses do you use in plowing to a depth of six inches?" The answers, with our personal observations, enabled us to some extent to classify the farms according to the texture of the soils.

Mr. Allen, the owner of one farm examined, spoke very confidently of the increased bulk of his crops since the application of steam; but he experienced just those difficulties with which any one would expect to meet in attempting to cultivate a heavy-land farm not well drained—these hindrances being much increased in a rainy season. The work done by him, during the day of 10 hours, with a steam plow or cultivator, was about 8 acres, plowed 8 to 12 inches deep. After the harvesting of the hay crop, July 1, 323 acres were plowed and cultivated, though not more than 20 acres could have been done without the steam power, and it was all cleaned and in fine tilth for straw or root crops.

Another farm visited was Mr. Harvey's, with soil of such tenacity that three stout horses had enough to do in turning a furrow slice 7 or 8 inches deep. Mr. H. does not agree in the opinion of some of his neighbors as to the unprofitableness of thorough draining. During the first year of his experience with steam he met with every conceivable accident and hindrance, and the expenses for repairs were frightful; yet he stuck to the machine through all adverse circumstances, trained himself and his men to the use of it, and successfully outlived the jeers of those who are always ready to depreciate the efforts of men of progress. Breaks or delays are seldom or never known now; during a day of 10 hours 8 to 10 acres are plowed to the most desirable depth; wheat stubble broken up 12 inches deep, and increased yield obtained. He has done contract plowing for his neighbors 9 to 10 inches deep, at *12s. per acre. In August he plowed in 17 days 113 acres, 10 to 11 inches deep, at a cost of only ¶£26 10s. for the manual labor required in doing it.

Mr. Wallis, another steam farmer, in comparing horse-labor with that of steam, in case of deep work, says there is no doubt about the great advantage of the latter. The Marquis of Tweedsdale's great plow, worked with 12 horses, got over about half an acre a day, but the seven-horse power engine did 3 acres a day to the same depth, with about 50 pounds of steam pressure. Mr. W. thinks that upon farms of 300 acres it will pay to have steam tackle. His experience shows that not only is the yield of wheat increased about 4 bushles to the acre, but its quality is improved and market value increased; the root crops and clover also are improved; the work is not only done with greater dispatch, but with more certainty at the best possible time; once it WAS difficult to say when even four teams would finish a 20 acre field, on account of precarious weather, but now, with steam, the time of finishing a large field can be calculated within an hour.

Mr. Ruston has derived much advantage from steam culture, being able to turn up deep subsoil, with a plow made purposely for it, to the depth of 15 or 18 inches; he claimed largely increased yields, and greater breadth cultivated, since he employed steam; he says he obtained full one-fourth more an acre of barley and wheat; he also realized the advantage of dispatch and seasonable work; steam had saved his crop more than once, and given him the benefit of having his seed put in properly as well as seasonably.

Mr. Smyth, Newsellsbury, county of Herts, was visited in September. His farm consists of 700 acres arable land, and 50 acres of pasture; extending over an undulating surface, with many steep inclines, part loam, light soil, and stiff clay; part could be plowed with two horses, and portions required three horses to plow 5 inches deep. Water was scarce, being brought three miles for the engine. He says steam enables him to get crops where before he had to fallow one season. By deepening his soil he gets increased crops and better quality, with greater breadth cropped.

After having gone over and completed the examination of this list of farms of various soils and locations, Mr. Reed proceeds to state at length the conclusions arrived at by the committee, which have been condensed as follows: Upon heavy and medium soils the benefits of steam cultivation are greater and more apparent. A deeper culture is effected than it is possible for horses to make, producing a highly beneficial change in the texture of the soil. It secures additional efficiency of drainage; augments the value of manures applied; brings into operation from below latent properties of fertility; fits the land for the growth of greater variety of crops; renders it more fit for pasture; and allows of a greater number of continuous crops.

Instances of these improvements and their advantages are not single or unfrequent, but general wherever tried. Another perceptible result is the rapidity with which farm work is accomplished; not only are the operations done quicker, but better, and at less expense; all collateral movements have imparted to them a speed and a "whir" characteristic of steam; men acquire the prompt, active habit of doing the day's work within the day, and not leaving it for to-morrow.

Steam is thus working a revolution in farm practice, and in the character of the rural population, who are being trained for the age of machinery in agriculture; and with celerity of motion will be coupled accuracy, promptness, reliableness, and certainty as to amount and time of accomplishment, which are no small advantages.

To the lighter lands it had been generally considered that steam was not adapted, and its progress hitherto in such districts has been comparatively small; for it seems to have been assumed, but somewhat hastily, that land plowed easily by a team of horses is no place for steam; yet those light-land farmers who have fully tried steam, even with the apparatus adapted particularly to heavy lands, have formed a different opinion, as the deep culture which drains and relieves a wet soil in a rainy season also benefits a dry or burning soil in a dry season, by allowing needed moisture to rise from below, while what little falls on the surface is sooner absorbed and more fully retained. But heretofore steam has been applied to light lands under disadvantages, and no one knows fairly what may be done on such lands until implements adapted expressly to them have been tested.

* Twelve shillings English is $3 per acre.

¶ $135.

A Certificate of Incorporation for a new Woolen Manufactory, at San Jose with a capital of $100,000 has been filed with the Secretary of State. This is well for San Jose. The Trustees are T. S. Beans, J. H. Flickinger, D. Murphy, G. O. Houghton and R. F. Pecham. The Factory to be established at San Jose. Thus we progress. Sacramento has her Woolen Factory—Marysville has her Woolen Factory; now San Jose is on the road to success, and where is Stockton?

Agriculture.

FARM LIFE.

The following beautiful lines from Mrs. Sigourney give a lively and truthful picture of life upon the farm:

Saw ye the farmer at his plow,
As ye were riding by?
Or wearied, 'neath the noon-day toil,
When the summer suns were high!
And thought you that his lot was hard,
And did you thank your God
That you and yours were not condemned
Thus like a slave to plod?

Come see him at his harvest home
When garden, field and tree,
Conspire with flowing store to fill
His barn and granary;
His healthful children gaily sport
Amid the new mown hay,
Or proudly aid with vigorous arm
His tasks as best they may.

The Harvest Giver is his friend,
The Maker of the soil,
And earth, the mother, gives them bread,
And cheers their patient toil;
Come join them around their wintry hearth,
The heartfelt pleasures see,
And you can better judge *how blest*
The Farmer's life may be.

THE VALUE OF MANGOLD WURTZEL AS A SPRING FOOD.

The topic is trite, for the value of mangold wurtzel will be found fully described in every agricultural work, and yet we cannot resist the call we feel to reiterate that which, though recorded, is so little realized and acted upon. We live in a district where the climate is temperate and dry—where the soil is generally highly suitable for the crop, and yet not one farmer in twenty knows the advantage of the mangold or makes any use of it. If asked the reason why, the common reply is, that formerly they were grown, but comparative failure for two or three years in succession checked their enthusiasm; and the conversation terminates with some sapient comparison between a turnip and mangold, which is held to be quite conclusive, and which in reality is simply absurd. How can we compare things that are so totally different? The mangold is never likely to transplant the turnip, because it ripens at a different season. Each has its particular work to do. The mangold becomes valuable at the time when swedes, however carefully preserved, exhibit unmistakeable signs of having seen better days; and especially valuable are they on warm sandy soils, where a first-rate quality of swedes cannot be grown, and where swedes will not keep late into spring. On strong soils, by a judicious selection of seed and care as to the time of sowing, swedes may be grown for spring use, and if left in the ground and covered with the plow will keep well; and in such cases the value of the mangold crop is not appreciated. But on sandy soils a swede is useless after April, and mangolds are in their prime. Now it is quite true that wet, cold summers and the attacks of the "Anthomya beta" caused comparative failures for two or thee years, but all this should only have stimulated to further trials, and the reward would have been ample. It is amusing to listen to the loose assertions dictated by prejudice, and one of the most common slanders to which the mangold is liable is the charge of being washy and watery. The facts are seen in the following table:

	Mangold,	Turnips.
Flesh-forming ingredients (nitrogenised matters)	1.81	1.44
Heat-giving ingredients (free from nitrogen)	11.19	8.47
Mineral matters	0.96	0.62
Water	86.04	89.47
	100.00	100.00

Both the above analysis's are by Dr. Vœlcker.

Like all the other vegetables, mangold goes through the various stages, and when unripe is unfit for food. After a slight fermentation in the heap, great changes occur in the proportion of sugar, gum, woody fibre, &c., so that mangolds in October and May are altogether different, and whilst the former would, as a rule, from its acrid properties, prove of no value and even injurious to cattle or sheep, the latter is extremely useful, and within certain limits the longer we can keep them the more nutritious they become. It is owing to this diversity of character at different seasons that the mangold is so little believed in by many farmers. They have seen them used in an unripe state, and have at once decided against them. Climate has likewise a most important influence on quality. The mangold does not like a moist district, and situations most suitable to the swede are the least adapted to mangold; consequently it is in the dry south-eastern coast that the mangold is most prized; but there are a great variety of soils and situations where it might be grown to a greater extent than is the case now. On a light sandy soil we planted nine acres last year; at the present time we have fully half of the produce unconsumed. Swedes on such soil will not keep beyond the middle of April, and in a dry spring become very wooly and unpalatable. With a large breeding flock and a number of horned stock, where should we be without this reserve? Are we using to strong language in describing them as invaluable? Our fattening sheep are folded on either grass or fallow, and supplied with cut mangolds; our cattle received them pulped with chaff; whilst the ewes and lambs spread over the pastures are much benefited by the few thrown about, and which are eagerly devoured. Yet this is the root passed by with the contemptuous description of wash food.

We prefer spring manuring on light land. The chemist is, no doubt, quite right in theory about preservative qualities of soils, but the proof of the pudding is in the eating, and better crops generally follow spring manuring on light land. In strong soils it is a matter of indifference, and our practice may be guided by convenience. Our own practice is to have the land thoroughly tilled and clean, then draw drills, throw the barnyard manure out of the carts, and sow broadcast our mixture of superphosphate and guano; split, roll, and drill.

Mangolds develope a great extent of root surface; their rapidity of growth depends on the absorbing powers thus possessed; and consequently, in order to flourish, they must be liberally fed. Generally free from serious enemies, they succumbed, some two or three seasons, to the attacks of a maggot (Anthomya beta) which destroyed the leaf; happily this scourge has not prevailed lately, and we must hope for the best. The growth after singling is very rapid, and the horse and hand hoe must be kept constantly at work until the broad dark leaves nearly meet between the rows. The final operation should be of the nature of a grubbing, stirring up of the soil deeply, and thereby admitting air. We cannot hoe two much, provided the land is dry and the plant not too forward.

A few words as to storing, and we have done. It is a mistake to try and get the ultimate growth; we should take up our crop whilst in a growing state and especially is it wise to secure the root before a severe frost, which mangold cannot stand. According to season and weather, the end of October or the beginning of November should be selected, and every available cart and hand employed; indeed, as much energy displayed as in securing the harvest. We are apt to think lightly of roots, because we cannot see so directly what they make; but we doubt whether, as a rule, the corn crop returns more per acre than a good yield of mangolds, and certainly the latter are more perishable. One really severe frost will cause great injury. Select a dry surface and build up a long conical stack, three to four yards at base, and rising with steep sides to the ridge; the steeper the better. The heap as made is covered with short straw to a sufficient depth to assure protection. The straw may be secured by throwing up lumps of soil, and the heap should be left thus until the fermentation is over and all heat escaped; then covered down with 9 in. to 12 in. of soil, or else closely thatched.—*American Stock Journal.*

BEES SWARMING NATURALY.

This usually takes place, in the Northern States from June first to July fifteenth, occassionally commencing as early as the fifteenth of May, and should it be in a region of country where buckwheat abounds, we may expect swarms as late as August.

WHY DO BEES SWARM?

I believe it is allowed by our most scientific bee-keepers, that bees swarm for the want of room inside the hive, although there are occasional exceptions to this rule I have known them to swarm when there was plenty of room in the hive When this does take place I think the cause can be traced to a premature hatching of queens; this does not occur, perhaps, one time in fifty. I think it safe to say, as a general rule, that bees swarm for the want of room and ventilation inside the hive.

SIGNS OF SWARMING.

I know of no infallible sign that we can be guided by in every instance. After the hive is filled, which is usually known by the bees clustering upon the outside, if the weather is pleasant and honey in the fields, we may look for them any day. The piping of queens is sometimes heard a day or two before a swarm issues, and is considered by some as an infallible sign.

The bee-keeper should always be on the watch for new swarms after the first of June, all conditions being favorable, and, if the Middle or Southern States, some weeks earlier than this. Should the weather be cloudy or rainy, and the bees not collecting honey, then we need not look for swarming. The instinctive nature of the bee is such that they will seldom swarm unless the weather is pleasant, and plenty of honey in the fields—the better the honey season the more they will swarm.

TO PREVENT BEES FROM SWARMING.

Some bee-keepers are so circumstanced that they cannot attend to their bees, in case of swarming, and only need a hive or two for their own use. Here perhaps a *non swarming hive* might be desired or one that would prevent their swarming. In such circumstances I know of no better way than to give the bees a plenty of room, by having a hive of large size or one that can be let out into a non-swarming condition as the swarm increases in size.

SHRUBBERY FOR BEES TO ALIGHT ON.

Every bee-man should provide bushes or evergreens for his bees to light upon, if they are not already growing near by. Hemlock, Balsam and Spruce, are the best shrubs for this purpose, if they can be obtained. They should be six or eight feet high, and sharpened, and by means of a crow bar set into the ground sufficiently strong to hold up a swarm of bees. By inserting them into the ground at the commencement of swarming they will usually last for the season. If on very dry ground, they should be watered to prevent the leaves from falling off too soon. Another very good thing to induce bees to alight, when swarming, is to take a block and round off one end, to give it the form of a swarm of bees clustered on a limb; then cover it with old mullen heads, which can be made fast to the block by small nails; then suspend it from some bush or stake near the bee hives and, as it so much resembles a swarm, the bees will be very sure to cluster on it, when they swarm out. If we allow natural swarming, we should always, we have every thing pertaining to their alighting, hiving, etc., in readiness to use at a moment's notice.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so constructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

TRUE'S

IMPROVED

POTATO PLANTER

This is, undoubtedly, one of the most valuable machines adapted to Agricultural purposes ever produced.

It Saves the Labor of Men in Planting Ti

Makes its own furrow, cuts the potato in slices as the farmer may prefer; drops these in the most perfect regularity, and covers them and does all this as fast as a horse can walk ground that can be plowed.

No intelligent farmer can fail to see that ment with which one man can, with the aid of plant six acres of potatos in a day, is of value; because the days in which PLANTING erly be done are very few, while he has all and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER other machines. It affords its aid "in the of time," and gives leisure to its owner for to his other spring work, which would otherwise overwork him or be left undone.

The undersigned have the sale of this Great Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for the ment, and a good Mechanic can make a fortune

Particulars and Catalogues can be had at our

THE WORLD'S PROGRESS.

BY J. G. WHITTIER.

This day, two hundred years ago,
The wild grape by the river's side,
And tasteless ground-nut trailing low,
The tables of the woods supplied.

Unknown the apples, red and gold,
The blushing tint of peach and pear,
The mirror of the Powow told
No tale of orchards ripe and rare.

Wild as the fruits he scorned to till,
These vales the idle Indian trod;
Nor knew the glad creative skill,
The joy of him who toils with God.

O, Painter, of the fruits and flowers!
We thank Thee for thy wise design,
Whereby these human hands of ours,
In Nature's garden work with Thine.

And thanks, that from our daily need,
The joy of simple faith is born;
That He who smites the Summer weed,
May trust Thee for the autumn corn.

Give fools their gold and knaves their power,
Let fortune's bubbles rise and fall,
Who sows a field, or trains a flower,
Or plants a tree, is more than all.

For he who blesses most is blest;
And God and man shall own his worth
Who toils to leave as his bequest
An added beauty to the earth.

And soon or late, to all that sow,
The time of harvest shall be given;
The flowers shall bloom, the fruit shall grow,
If not on earth, at least in heaven.

NUT GROWING.

It is somewhat surprising that with all our nation's love of grain, and the general appreciative admiration of beautiful trees for shade and ornament, we have so few instances where nut bearing trees have been adopted for planting in the place of maple, elm, or linden. The chestnut, butternut, black walnut, and Madeira nut, where the climate will admit, are all beautiful as shade ornamental trees; can be transplanted while young without a loss of over ten per cent.; grow very rapidly, and come into bearing usually from the seventh to the tenth year from the seed. The hickory or white walnut is more difficult of transplanting, but even that we have removed with success by digging deep and obtaining, and again replanting entire, the tap root. This tap root retaining is, in fact, a feature of importance with all the nut-bearing trees, its loss often resulting in the death of the tree, while, if fully retained, a tree rarely dies. It is, however, more certain, and probably most economical, to plant the nuts where trees are designed to stand. This may be done and the ground yearly cropped to corn, potatoes, or small fruits, and at the end of five years or so it may be left in the grass if desired. As a paying productive crop, as a permanent investment, attended with little or no labor in the cultivation, pruning, etc., we know of nothing more reliable than that of an orchard of nut bearing trees. Our native forest trees are being rapidly destroyed; and without the attention of horticulturists to the subject of growing nut bearing, as well as apple and pear trees, we shall soon find the products of our native land, in this particular, more rare than that of foreign shores. Already the chestnut commands a ready sale at from eight to twelve dollars per bushel, while the white walnut sells freely at from two to three dollars; and yearly as time rolls on, the price is enhanced rather than reduced, because of the increased demand and the lessened product by reason of cutting away the native forest trees. We write this, having just come from an orchard of about sixty trees, now about twenty-five years old, and from which the owner last year gathered an average of over one and a half bushels to the tree, paying him a net return, exclusive of labor of gathering, of over six hundred dollars. These trees stand in pasture land, and when the owner was clearing up the forest, were young saplings and left to grow with a hopeful looking forward to the present result. In our earlier days we spent many a day gathering the white walnut, and our recollection is of six to eight bushels of fruit to the tree, for which buyers then paid one dollar a bushel; and as the trees were in pasture land, the product was a clear net gain, extremely acceptable to the owner.—*Horticulturist.*

CULTIVATE AND IMPROVE.

Deterioration in plants and animals, is as possible as improvement. Nations once renowned as the perfection of the human race, by neglect have sunk back into barbarism. Egypt was once so learned, that it is recorded, as a striking mark of her greatness, that Moses "was learned in all the wisdom of the Egyptians." Egypt is now a semi barbarous province of Turkey, so poor that none do her reverence. The Bedouin robber makes his haunts where was once the Alexandrian School, from which has come much of our civilization and science. Tyre, celebrated in Holy Writ for her knowledge in the arts and navigation, has lost her designation as "Queen of the Sea," and scarcely a vestige of her greatness, her arts, or her power remains.

We might extend our illustrations of the truth of our position, at the expense our pride of human progress, but these will be sufficient.

WINES AND LIQUORS

in all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

Messrs. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed. We will make liberal Cash Advances on Merchandise consigned to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco

WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required.—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates.

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD

WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurius Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet. 30-12.

VALUABLE PLANTS FOR SALE.

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

tf *Farmer* Office.

HALL'S PATENT FOR PRESERVING EGGS.

We have refrained hitherto, from saying much upon this subject, until we had the opportunity of demonstrating the claims of the patent for ourselves. We have accordingly, put up a few eggs, to test the matter, and have them now, as put up months ago. We invite parties, to call and see these eggs, and examine for themselves. They possess the whiteness, clearness and freshness of the newly laid egg, and they frost, as a new egg, which cannot be said of any preserved egg we know of.

The cheapness and the saving of time, over every other process, may be considered in its favor. The parties in New York, are making arrangements to secure the Patent in all Europe, and it runs yet, 16 years in the United States. Cost of putting up a barrel—less than 50 cents, and the time, does not exceed 10 minutes. Rights for sale by Warren & Co. Farmer Office, San Francisco.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE.

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant a grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS, making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

PREMIUMS for 1869.

With a hope to enlist a new interest for our Journal and to give to those who co-operate with us a just recompense for their time and labor, we offer the following

Very Liberal Premiums

For the Year 1869,

THE THIRTY FIRST VOLUME,

—AND—

SIXTEENTH YEAR

OF THE

"California Farmer,"

We trust the following Premiums will induce those who desire to receive our Journal, and the accompanying New Year's Gifts, to extend to us their generous influence for the Extension of our Circulation, until every family in the Rural Districts shall have a copy of the

"CALIFORNIA FARMER."

TERMS OF SUBSCRIPTION:

(Payments in Gold or Silver, Always in Advance.)

By mail, one year,.....$5 00
" " six months,.....3 00
When payments are delayed six months,.....6 00

CLUBBING.

To clubs of five, (and extra copy), six for... 25 00
do twenty,..... 75 00
do fifty 175 00

Or, we will give as Premiums, as follows:

For every club of five, and $25, Agricultural Books valued at.....6 00

To every club of Ten, and $50, Agricultural Books valued at..... 15 00

For every club of Twenty, and $100, Agricultural Books valued at 30 00

For every club of Fifty, and $250, Agricultural Books valued at 75

Thus securing to a Farmer, or a Farmer's Club, the nucleus of a good Library—The Books to be at our lowest advertised Gold prices.

Every Farming District in our State could by co-operating with us secure a large and valuable Library, without any other cost save a little labor and co-operation to extend the FARMER'S circulation.

To any Lady who will secure us Ten subscribers, and $50, we will send Magazines or Floral Books to the value of $15 00

For Twenty subscribers, and $100, we will send Books and Magazines, or a Sewing Machine valued at 35 00

For a club of Forty, and $200, we will send a "Howe," or a "Florence" Sewing Machine valued at 65 00

Each and every Premium to be at regular Gold Prices, and the Premium to be selected by the winner.

We hope these offers will be so appreciated that we shall have the earnest co-operation of many friends, and to all who shall interest themselves, we shall be ready to fully remunerate their kindness.

Sample copies will be sent, when desired, to those who wish to canvass among their friends.

Jebb's Patent Churn.

This admirable Churn—one of the best yet invented—and which was pronounced

THE BEST CHURN EXHIBITED AT THE LATE STATE FAIR,

and to which was awarded by the Committee

THE FIRST PREMIUM,

is now offered for sale to the Trade, or at Retail, in lot to suit purchasers at the

CALIFORNIA FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials o character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 5 P. M.

The California Farmer.

SAN FRANCISCO:
THURSDAY EVENING.....MARCH 11, 1869.

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mail, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for *one* insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facie* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress papers are not charged postage in the county in which they are published.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the article they have to sell is wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seed, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office.

A Young Man Wanted!

A live Young Man wanted—one who wishes to *do his duty*, and by his true merit work his way up, and become of value to himself and his employer.

To such a young man, who can bring good recommendations a good situation will be offered in this office.

Apply only between the hours of 8 and 9 o'clock, A. M., and 5 and 6 o'clock, P. M., in the Printing Department of the FARMER OFFICE.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once a our office, or addressing EDITOR FARMER.

CULTIVATE YOUR GARDENS.

("Thou shall *till* the Earth and *subdue* it.")

How few of the pretty Garden spots around us in the country, or in our city are *half cared for*. People seem to think if they *dig the soil once in the Spring*, that is all that it needs, and when the *dry weather comes*, if they keep flooding the surface soil with water, they have done all that is needed.

Our Garden spots need a constant care. They need a *continued cultivation*, and not so much *irrogation*. Water is often the cause of our Gardens being so desolate and wearing such a dried up appearance, and this ruin is caused by excessive *watering* and *no cultivation*.

Whenever the Garden soil is kept deeply and finely pulverized to the depth of 16 to 24 inches it will never dry out, provided the *surface soil* is frequently raked up, so the *sun* and *air* can penetrate the soil and *draw* up the moisture from below.

The great error in the too frequent use of water, is that the surface becomes hard baked and neither the sun, air or water passes down to nourish the roots of the trees or plants.

Whenever Gardens are watered at evening (the only time this work should be done,) the owner should on the following morning have the surface soil nicely and finely raked over, and deeply too so that the sun and air may effect the surface soil and keep it sweet, at the same time the roots of the plants are feeling the refreshing of the night before.

When the surface soil has become baked by reason of repeated watering, this crust becomes like a *heated brick*, burning up the soil below and *scorching* the delicate surface roots of the plants—death is the result.

The grounds of a Garden spot should always be deeply and finely cultivated. Large lumps of earth collect the heat of the sun and burns the soil around them; while finely cultivated, the soil acts as a magnet and when the sun is at its greatest heat, it draws up the moisture from below and feeds all the surface roots.

No Garden spot is worth possession that is not well cared for, and nothing is easier to possess than a *beautiful and perpetual* Garden spot around our Homes, if we will only give to it the necessary care which common sense and a wise intelligence dictates.

THE PLANTING SEASON.

There has never yet been a season so favorable for Planting as has been the present season, and well has it been improved.

The opportunity for plowing and preparing the land has been extended to a later period than ever before. Even now, near the middle of March, thousands of acres are still being plowed—much of it will remain as "Fallowed land," but a large quantity will be planted to various crops, such as Flax, Hemp, Castor Bean, Hops, the Mulberry, and to root crops, and a large number of acres will be wisely planted to Small Fruits, such as *Blackberries, Raspberries, Strawberries, Currants, etc.*, for it is well understood by *wise one's*, that *small fruits* will pay well the next five years, and well will it be for those who have large plantations of these fruits.

There is some fearful ones who are now *croaking about the weather*—"it is too dry," and this is but an effort of speculators to raise the price of grain, or of the thoughtless ones who cannot read nature. Rain will come all in good time. "He doeth all things well." The hopeful and the trusting will now see the "cloud no bigger than the hand" yet it is the "hand of plenty." In a little while the clouds will break and the "Rain Drops" will cast their refreshing fatness upon the upspringing grain. The "Lightnings" too, will flash to purify the air, and the "Thunders" will echo over hill and valley, proclaiming ever that "God is good," giving His "early and His latter rains" alike on the just and on the unjust.

That our season will be one of Plenty no one can doubt for a moment. The early blossoming of our fruit orchards have been delayed, yet fortunately they are now beyond the season of *Frost* and therefore we have reason to be very thankful, for the present signs are, an abundant crop. The trees are now budding forth in their luxuriance, and the earth is putting on its robe of beautiful spring Flowers. "The earth is full of His Glory."

GEN. JOHN A. SUTTER

A Washington letter writer speaking of Gen Sutter, makes the following announcement:

"A combined effort is being made by the Californians here to urge upon the Pacific Coast delegation in Congress the propriety of passing a bill during the present session, granting the old Pioneer, General John A. Sutter, a pension sufficient to place him in comfortable circumstances for the rest of his life. If the Senators and Representatives from the Pacific Coast would only "push things" as they should in this matter, there is no doubt of such a measure being passed by the present Congress."

We most sincerely trust our Delegation both in the Senate and in the Representative chambers will act unitedly and give to this noble old Pioneer the well merited pension he deserves, for it is the *Duty* of our Government to do so.

There is no one citizen on the Pacific Coast that has done so much for the benefit of others, and so little to benefit himself as General Sutter.

A LIBRARY IN EVERY HOUSE.

Now that *Books* are so cheap and *Newspapers* so plenty, there is no excuse for any persons remaining ignorant either of the current "news of the day," or of any valuable information appertaining to the business in which they themselves are occupied daily.

It is deeply to be regretted, that, in this enlightened age, we have so many grown persons who seem to be ignorant of the general subjects which should be familiar to minds of ordinary capacity; yet, so it is, and we regret to find so little desire for information among those whose occupation is the *Cultivation of the Earth*, a class of men who, of all others, should be among the most studious and intelligent that dwell upon God's fair earth.

We are most happy to see that *Libraries* are being established in many of our "Rural Districts," called *School District Libraries*, in which by law, the State aids to a certain extent, in order to furnish an "*Agricultural Department*" on the same, and we are happy to know that several Districts have already established such libraries. It will be well if every district in our State would do the same. We know friends that would gladely aid in this work, and if our country friends wish to do as others have done, and establish *District Libraries*, we will gladly aid the same and facilitate all in our power, especially in the Agricultural Department.

In a land like ours, where knowledge abounds, and where *truths* can be gathered as we walk by the way, from the falling leaf and the golden rocks, there is *no excuse for ignorance*.

One great cause of anxiety and alarm arises from the gross neglect of *Parents* in our cities and principle towns, in permitting their young children and young lads and misses to roam about unguarded, and almost unrestrained. This is the dark cloud over our Political horizon now, for the boys and girls of to-day, are to be the *Future Rulers* of the Pacific Coast *a Quarter of Century hence*; they will at least have an influence that must be felt, for *weal or woe*, just as they are *Educated Now*.

We therefore feel that there is a way to educate the young by placing before them in their daily "Homes" Books of the right kind, and such as will lead them to become good and valuable citizens, and thus keep them from roaming abroad *from home*, and prowling around those *pit falls* that lure the young to certain ruin.

No man has a right to bring up his children without surrounding them with books. It is a wrong to his family. He cheats them. Children learn to read by being in the presence of books. The love of knowledge comes with reading, and grows upon it. And the love of knowledge in a young mind is almost a warrant against the inferior excitement of passions and vices. It is a man's duty to have books. A library is not a luxury, but one of the necessaries of life.

"He who will not provide for his own household is worse than an infidel," this says the Scripture.

STEAM POWER FOR CULTIVATION.

We give the present week a continuance of the subject of Steam Cultivation in Europe, or reports made to the Agricultural Department at Washington, and which has been published to show its value as the means of producing larger crops.

We are satisfied that the European system will never be adopted in our country, at least to any extent. The American people must have an Implement that will march over our soil "like a thing of life," and stationary engines will never do.

We remember well the great exertions made by "Coffin & Standish" to perfect their Implement. We regret their present loss, delays, and trials; yet, we hope for them still. We say to them: "*It will not do to give it up so.*". Others have tried. There have been several machines made, but "the end is not yet."

We copy the Editorial of the *Butte Record*, of the "trial made at Chico." We give the opinion of the Editor, and we regret we could not have been there personally. We have however, received from those who were present, information which satisfies us that however much credit is due to Mr. Locher for his zeal and earnestness, and for his labor and heavy cost, *The present trial of his Steam Plow was not a complete success.*

We regret so to speak, but our words will be found true, and from what we have seen thus far of the Steam Plow results, we are satisfied the RIGHT ONE is not yet made.

There are several Pre-requisites required as the result of Steam Plowing before the great and grand results shall be attained. They are these:

1st. The earth should be turned to a greater depth than is accomplished by any ordinary plow.

2d. The action of the Steam Plow should be such as to *turn over the soil*, as is the case with the common plow, but to a much greater depth. This is absolutely needed so as to let in light and air and bury all noxious weeds that eat out the surface soil, and also to bring up the virgin soil that lies buried below, this is the only possible way that can be devised to resuscitate the soil and prevent it from becoming foul and running out for want of air and food.

3d. The Steam Plow should be able not only to *turn up* and *turn over* the soil, but it should pulverize it finely, breaking it up completely, leaving the soil like *meal*. The ordinary kinds of plows *do not* pulverize the soil; hence, the lessening of our grain crop.

It is a well known fact that our grain lands are not *half plowed*—there is too much of the *scratching* system, 3, 4, and 6 inches. Our lands should be cultivated 10, 12, and 16 inches deep; this would drain wet lands and bring moisture to dry lands.

We hope each of the designers of the Steam Plows that have been tried may still persevere until they attain success and reap the reward due to earnest workmen and ingenious Mechanics.

We hope to hear from all who are interested in these enterprises.

THE CENTRAL PACIFIC RAILROAD.

The successful and very rapid progress which is now making on this great highway, very clearly proves the great efficiency of the President and Directors of this route, and we are glad to know that the Central Pacific Railroad, i. e. the California side is BOUND TO WIN IN THE RACE for the Grand Centre. CALIFORNIA MUST WIN!

The Central Pacific has now progressed nearly 575 miles from Sacramento, leaving only about 150 miles to make before reaching SALT LAKE! Never before in the history of the world has any great "Public Work" made such a glorious and successful advance, and when the public mind shall truly conceive the vastness of the enterprize and more than Herculean labor performed, they will duly appreciate the energy and enterprize of the men who have thus far, against innumerable obstacles so triumphantly carried on this great work.

Let it but be remembered, that in this work now progressing across the *Desert* 400 *miles of this road* has to be supplied with wood, water, provisions, etc., besides the hauling of all the material to build with, and this required the following labor, for every mile of road laid, it required 100 tuns of railroad iron per mile, 2,500 ties per mile, with spikes, nails, etc., and for 40 miles of this distance, special trains are required for hauling water for man and beast. And when it is remembered that there were at work on this road to be thus supplied with water and food, 1,500 animals, and 8,000 men, then the magnitude of the supplies can be comprehended, while portions of this time they had to contend against ice and snow.

The Indians about whose ferocity many statements have been made in other sections, *here on the Central Pacific Road*, no trouble has been had. The *Indians have been treated kindly*, and they have appreciated it; the "Wm. Penn" doctrine of kindness made them *Friends and Helpers*.

The same thoughtfulness has been manifested for the animals working on the road. 1200 blankets were used to protect the horses at work (does any other public work show such care of the Dumb Beast?) In addition to all the material which we stated had to be hauled over the road, we should say all the workshops, the blacksmiths' forges, fires, barns for stock, and shanties for men had to be continually carried forward, as the road swept on at the rate of 2, 3, or 4 miles per day. When all the labor shall be considered, there will be some excuse for the delay of any *freight* that *grumblers* say was delayed on the route.

ABOUT FREIGHT AND PASSENGERS.

Persons and newspapers that know nothing about this road often grumble and complain and say it is a "Great Monopoly." Well, the sins of the ignorant should be winked at, but there is one fact which should be kept in mind by all reasonable men — our laws about Railroad freights are made by mere Politicians who know but little about such matters, and they say these *monopolies* shall have only *so much per tun*—that is enough; but they make no distinction whether it is a *pound of lead* or a *pound of feathers*—they go on the old maxim, a pound is a pound everywhere.

Whenever a *Just Tariff* shall be required by law, there will be a due consideration of the articles to be transported, for a thousand tuns of "pig iron" or granite can be conveyed in less number of cars than the same number of tuns of blankets or wool. One thing is very certain, that *no Legislation* will prevent the President and Directors of the Central Pacific Railroad from acting as much and as truly for the Public weal as any political trio or lobby legislation, for at the present moment this road are doing all in their power voluntarily, to meet the wants of those whose business interests lay along the route. Already they send freight often at less than their tariff, and on return freight they deduct ¼ and ⅓ fares voluntarily.

The Directors of this road know their own true interests are identified with the Public, and the Public mind knows it too. Already the *Bonds* of this Road are at par, and none for sale—all withdrawn from the market. This is a proof of their value.

There will be business enough for this road to do with all the force they can put on, and the business will require a double track at the earliest moment. There are now 110 locomotives at work on the road, and every steamer and clipper ship brings material for this work, which now rushes on with almost lightning speed to its FINAL TRIUMPH.

We have authority to say from information from responsible quarters, that the Road will be completed by May 1. What a glorious *May Day* celebration this would be!

DECLINE OF WHEAT IN NEW YORK.

The decline in the price of wheat is quite noticeable, in twelve months, amounting to 42 cents per bushel in New England, 56 cents in New York, 47 cents in New Jersey, 45 cents in Pennsylvania, 71 cents in Ohio, 77 cents in Illinois, 48 cents in Iowa, with differences less striking in the Southern States, which grow cereals only for home consumption. In the central and populous parts of the West the prices are this year lower relatively to the more Western and Northwestern States than last year; as Illinois compared with Iowa, $1 97 to $1 43 last January; $1 20 to 92 cents now. The price of barley is, on the contrary, higher than in January last, in most of the States. Oats maintain their former rate in some of the New England States, but show a decline in the Middle and most of the Western States, except in Kansas, where they are higher than last year.

CALIFORNIA BORN CAMEL.—On Friday morning last, there was born at Woodard's Gardens, a male camel; the first born on the Gold Coast—he should be named *Francisco*. Who will raise an elephant?

—The Chicago cattle yards have 150 acres floored with plank. There are pens for 75,000 cattle, 20,000 sheep, and 20,000 hogs.

RAMBLES IN THE COUNTRY.

We promised a continuance of our [illegible] which we had some little time since [illegible] Clara and San Jose.

We had spoken of San Jose previously only in part. We had visited Mr. Prevost has since taken steps, as we learn to [illegible] "Los Angeles," whether as a permanent or partially so. We also visited the [illegible] Silk Factory by Mr. Neuman, and very much regret we cannot see arrangements made by this enterprize on a liberal scale. We [illegible] Mr. Neuman would but yield up his own views and feelings, there are men of liberal and feeling, men of capital that would go into the enterprize and make it a grand and unless Mr. Neuman shall do so, they must either wait, or new comers from abroad step in and reap the benefit.

We also visited the Orang Flouring [illegible] the Lumber Yards near by, which by the ness, indicates a rapidly growing place.

We visited the Plaza to witness the [illegible] of the growth of the Trees and Plants, fully designed and planted by Wm. O[illegible] Esq., and contrasted their beauty and [illegible] our own bleak and poor Portsmouth Square Post-Office grounds; both of which more a cemetery than Public Ornamental grounds.

We were also at the Nursery Grounds of Fox & Farney, whom we found busily loading their teams with trees and vines. Nurseries are extensive, and their trees choicest varieties, and the very best [illegible] This firm never sends away a poor article they deal in inferior stock. When they [illegible] that is *not* sound and good, they do not customers, it goes upon the *brush heap*.

Mr. Cox is now planting extensively fruits—some 35 or 40 acres. This very wise move, for all such fruits will at full prices for years to come, for our Apples, Grapes, and other solid fruits will to the Eastern markets *via* Pacific Rail

The collection of choice Fruits exhibited San Jose Fair last autumn by Mr. Fox, Farney, their two collections were the best exhibited in this State, and equal and samples to any yet exhibited in our

Rambles in Napa and Berryessa next week.

Editor's Chair,

[Here we shall hold our special weekly our Readers and Correspondents, and call their attention to such articles in *our Journal*, to which we would direct attention.]

WISDOM IN THE SOUTHERN STATES.—with delight the admirable precepts we ly find in our "Southern Exchanges," lent counsels given week after week in cultural Journals of the South, indicate some state of the *public mind*, that is and it will be well if our *Northern people* take a little of their good counsel. We ticularly to the excellent articles we week on *Female labor*, from the "Corolina and *The Future of American Agriculture*, "Dixie Farmer." We wish our own would have more of the same talk.

CALIFORNIA EXOTIC FRUIT.—We spoke week of some very superior Fruit which to us from Los Angeles.

We know that many fair lands bear ous fruit, but we feel sure that no fairer er was grown, even in the "Garden of

—Learning makes a man fit company self.

TRIAL OF THE STEAM PLOW.

A numerous crowd of people from the surrounding country, with several gentlemen from a distance, were present in town on Wednesday, to witness the performance of the steam plow. No attempt was made to see how much ground it would plow in a given time, although one or two gentlemen timed the plow while it was crossing the field, and then calculated the amount of ground it had turned over. These figures we have not seen, and therefore have no correct idea of the number of acres it might accomplish in a working day of ten or twelve hours. It was run at odd spells during the day, and ploughed some five or six acres. The universal expression of all who witnessed its performance, and with whom we conversed, was that it was a success and from this time forward, we claim the steam plow as a triumph, and for Butte county the honor of originating this great desideratim in agriculture that the inventive genius of the old world has failed to produce. We do not claim perfection for this machine. It is, undoubtedly, as susceptible of improvement as was the first steamer that navigated the inland waters of our continent. Its speed and capacity may be increased, the execution of its work may be improved, and its weight diminished; but it stands to-day, a complete steam plow, capable of entering a field and preparing it for the reception of seed, in a more thorough, expeditious and cheaper manner than it can be accomplished by any other known process. The field where it worked on Wednesday contained an occasional boulder and two or three points were broken. The breaking of one of the three points revolving in a line, did not appear to diminish the thoroughness of the work, the remaining two performing it admirably. The machinery worked well and no accident occurred to interrupt the demonstration of its ability to thoroughly perform the service required of it. In a field properly prepared for cultivation, there should be no boulders left to interfere with the rapid upturning of the soil, and of course there would be no breaking of plow points. A recent trip to Chico, and a visit to some of the magnificent grain fields of that township, where the ordinary gang plows were being used, has about led us to the belief that, if there is anything worth considering in the thorough pulverization of the earth and the sub soil theory, every extensive farmer of that vicinity, by employing this plow, would realize a much larger yield per acre, and that the increased crop of a few hundred acres would pay the expense of the steam plow in a single season. We may be mistaken in this, but, if ground when plowed to the depth of three or four inches, and left in a lumpy condition, will produce thirty bushels to the acre, turning it from a depth of six or seven inches, and thoroughly pulverizing the soil, ought to materially increase the crop. That this can be accomplished by the Locher Steam Plow, was fully demonstrated on Wednesday last. The genius, patience and perseverance that has accomplished this, is worthy of all praise, and we hope that Messrs Locher may realize a fortune, as well as the satisfaction that they now feel in the success of their steam plow; and that the farmers of Butte county may be the first to realize the benefits of this grand home invention.

P. S.—Since the foregoing was in type, we learn the plow was timed while running across the field, and made four hundred feet in three minutes, ploughing a strip twelve feet wide. This is forty-eight thousand superficial feet in three minutes, and at the rate of three acres per hour, or thirty-six acres per day of twelve hours. —*Butte Record*.

MULCHING PEACH TREES.

A correspondent writing from Willisville, says that last year a friend of his threshed his oats in his orchard and then placed the chaff under a peach tree to the depth of 12 or 14 inches. The result was that the peaches on that tree were twice the size of the same variety on other trees. He wishes to know if it would be injurious to young trees to protect them in that manner from severe frosts through winter.

Mulching under most conditions is valuable, and to a small extent practicable, but our large peach orchards must depend mainly on clean, thorough culture for their fine crops. Thorough culture would have presented the same results as did the oat chaff.

In ordinary moist latitudes we agree with the *Prairie Farmer*, from which we clip the above, but here in California we prefer the mulching.

WALTHAM

WATCHES.

The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch wearers, has thoroughly demonstrated the

STRENGTH, STEADINESS, DURABILITY: AND ACCURACY

of the Waltham Watch. To satisfy this class in all these respects, is to decide the question as to the real value of these time keepers.

MORE THAN 400,000

of these watches are now speaking for themselves in the pockets of the people—a proof and a guarrantee of their superiority over all others

THE SUPERIOR ORGANIZATION

and great extent of the Company's Works at Waltham enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is necessary.

WE ARE NOW SELLING

Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

THESE TIME PIECES

combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country, or in Europe, only those were finally adopted with severe testing by the most skillful artisans in our works, and long use on the part of the public demonstrated to be essential to correct and enduring timekeeping.

Among the many improvements we would particularise:

The invention and use of a

ENTR PINION,

of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and Tempered Hair-Springs,

now universally admitted by Watchmakers to be the best, are used in all grades of Waltham watches.

ALL WALTHAM WATCHES

have dust proof caps protecting the movement from dust and lessening the necessity of frequent cleaning, necessary in other watches.

OUR NEW PATENT STEM WINDER

or keyless watch, is already a decided success, and a great improvement on any stem-winding watch in the American Market, and by far the cheapest watch of its quality now offered to the public.

TO CALIFORNIANS

and others living in portions of the United States where watchmakers do not abound, watches with the above mentioned improvements which tend to insure accuracy cleanliness, durability and convenience, must prove invaluable.

Every watch bearing the trade-mark of Waltham is guaranteed to be a thoroughly reliable time-keeper,

To prevent imposition, buyers should invariably demand a certificate of genuineness.

The trade supplied by Messrs. R. B. Gray & Co., San Francisco, Cal., and generally for sale at retail by all respectable dealers.

INDEPENDENT

Action!

IS ALL OF

IRON & STEEL

AND OF REMARKABLY

Light Draft!

THIS IS THE

LIGTEST!

CHEAPEST!

AND

Best Single Mower!

IN THE MARKET.

THE KIRBY MOWER AS SEEN ON LEVEL GROUND.

ONE HORSE can work it by putting on Shafts in place of the Pole and then cut TEN ACRES A DAY. Length of cut, four feet two inches.

When you order EXTRAS for this machine, always state the NUMBER OF THE PART WANTED corresponding with the number on the plates on the list, and also GIVE THE NAME of the part when there is no number on it. By carefully preserving the circular, you can always order your Extras by number and by name. The parts illustrated on this sheet are for the Combined Machine, but the Clipper parts do not differ from them in name except in a very few instances.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose.)

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINTS of your guards LOW by means of the forward bolt in the pole where it bolts to the machine; IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL.

Be sure and keep all the Nuts tight and the Journals well oiled, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the Joint tight where the Pitman connects with the Knife, and then your Machine will work well without trouble or expense.

The nature and working of this Machine may be well illustrated by the following incident:

Our General Agent was in Oregon, setting up and starting a machine for a party that wanted to buy "if it suited and would cut anywhere." He led the way around the field followed by the Agent driving the Machine: as he was led off from smooth ground to where it was rough and boggy, and where it had never been cut over before, the driver simply bore his weight back in his seat, thus elevating the heel of the finger bar and holding it there with his weight, and at the same time elevated the outer end of the bar with the lever at his right, following CLOSE UP to his leader until the level ground was reached again; then he dropped the bar again, having followed the purchaser close all the way through. His curiosity was roused to know how the Machine was brought through without getting STUCK, and the reply was "it was not made to STICK, it was made to go." He followed the Machine around once, and then got on and drove around twice, when a neighbor said: "Mr. Witham how do you like the Machine?" His reply was: "To tell the truth it is a little the nicest Machine I have ever seen, for I can sit here and work my hand and feet and balance the Machine with my weight, all at the same time, I will have to keep it," and paid his money down for the Machine.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down again when smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way, for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with a great strain, and be very liable to break.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

FARMER OFFICE

Country Homes Wanted.

There is wanted at this time, several Homes in the Country, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they communicate with this office immediately

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.

AUZERAIS HOUSE,

SANTA CLARA STREET,

San Jose, Cal.

J. M. STAPLES, PROP'R.

—ALSO—

LAKE HOUSE,

DELMAR AVENUE,

SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,

31-1 Proprietor of the Auzerais House.

Home Miscellany.

GOD EVERYWHERE.

I read God's awful name emblazoned high
With golden letters on the illumined sky;
Nor less the mystic characters I see;
Wrought in each flower, inscribed on every tree,
In every leaf that trembles to the breeze,
I hear the voice of God, among the trees,
With Thee, in shady solitudes I walk,
With Thee in busy, crowded cities talk;
In every creature own thy forming power,
In each event thy Providence adore.

ENCOURAGEMENT.

BY MRS. E. C. KINNEY.

When first peeps out from earth the modest vine,
Asking but little space to live and grow,
How easily some step, without design,
May crush the being from a thing so low!
But let the hand that doth delight to show
Support to feebleness, the tendril twine
Around some lattice-work, and 't will bestow
Its thanks in fragrance, and with blossoms shine.
And thus, when Genius first puts forth its shoot—
So timid that it scarce dare ask to live—
The tender germ, if trodden under foot,
Shrinks back again to its undying root;
While kindly training bids it upward strive,
And to the future, flowers Immortal give.

TRUTH—A BEAUTIFUL STORY.

I witnessed, a short time ago, in one of our higher courts, a beautiful illustration of the simplicity and power of truth. A little girl, nine years of age, was offered as a witness against a prisoner, who was on trial, for felony committed in her father's house. "Now Emily," said the counsel for the prisoner, upon her being offered as a witness, "I desire to know if you understand the nature of an oath?"

"I don't know what you mean," was the simple answer.

"There, your honor," said the counsel, addressing the court, "is anything farther necessary to demonstrate the validity of my objections? This witness should be rejected. She does not comprehend the nature of an oath."

"Let us see," said the Judge; "come here my daughter."

Assured by the kind tone and manner of the Judge, the child stepped toward him, and looked confidently up in his face with a calm, clear eye, and in a manner so artless and frank, that it went straight to the heart.

"Did you ever take an oath?" inquired the judge.

The little girl stepped back with a look of horror, and the red blood mantled in a blush over her face and neck, as she answered, "no, sir." She thought he intended to inquire if she had ever blasphemed.

"I do not mean that," said the judge, who saw her mistake. "I mean were you ever a witness before?"

"No, sir. I was never in court before?"

He handed her the Bible open.

"Do you know that book, my daughter?"

She looked at it and answered, "Yes, sir; it is the Bible."

"Do you ever read it?" he asked.

"Yes, sir; every evening."

"Can you tell me what the Bible is?" inquired the judge.

"It is the work of the great God," she answered.

"Well, place your hand upon this Bible, and listen to what I say;" and he repeated slowly and solemnly the oath usually administered to witnesses. "Now," said the judge, "you have sworn as a witness, will you tell me what will befall you if you do not tell the truth?"

"I shall be shut up in the State Prison," answered the child.

"Anything else?" asked the judge.

"I shall never go to Heaven," she replied.

"How do you know?" asked the judge again.

The child took the Bible, and turning rapidly to the chapter containing the commandments, pointed to the injunction, "Thou shall not bear false witness against thy neighbor."

"I learned that," she said "before I could read."

"Has any one talked with you about you being a witness in court here against this man?" inquired the judge.

"Yes, sir," she replied. "My mother heard they wanted me to be a witness, and last night she called me to her room and asked me to tell her the ten commandments, and then we kneeled down together, and she prayed that I might understand how wicked it was to bear false witness against my neighbor, and that God would help me, a little child, to tell the truth as it was before him. And when I came up here with father, she kissed me, and told me to remember the ninth commandment, and that God would hear every word I said."

"Do you believe this?" asked the judge, while a tear glistened in his eye, and his lips quivered with emotion.

"Yes, sir," said the child, with a voice and manner that showed her conviction of the truth was perfect.

"God bless you, my child," said the judge, "you have a good mother. This witness is competent," he continued. "Were I on trial for my life, and innocent of the charge against me, I would pray God for such a witness as this. Let her be examined."

She told her story with the simplicity of a child, as she was, but there was a directness about it which carried conviction of its truth to every heart. She was rigidly cross-examined. The counsel plied her with infinite and ingenious questioning, but she varied from her first statement in nothing. The truth as spoken by that child was sublime. Falsehood and perjury had proceded her testimony. The prisoner had entrenched himself in lies, until he deemed himself impregnable. Witnesses had falsified facts in his favor, and villainy had manufactured for him a sham defence, but before her testimony falsehood was scattered like chaff. The little child for whom a mother had prayed for strength to be given her to speak the truth as it was before God, broke the cunning devices of matured villainy to pieces like a potter's vessel. The strength that the mother prayed for was given her. The sublime and terrible simplicity (terrible I mean to the prisoner and his perjured associates) with which she spoke, was like a revelation from God himself.

GIRLS ON THE FARM.

If it is necessary to the interest of the farm that the boys remain at home, it is no less important that the girls remain there also. Perhaps keeping the girls at home would be the most successful means of keeping the boys there, as youth is always attracted by beauty and grace. The great call for help in cities and manufacturing districts induce great numbers of our middling class of farmers' girls to leave home or situations in farmers' families and seek employment in shops or factories. Although they may earn nominally great pay in these places, their fancied wants require the expenditure of nearly all their wages; and in numerous instances their health becomes sadly impaired, and many of them return home with pale faces and impaired constitutions, instead of the rosy cheeks with which they left home, and with a growing dislike for the plain and substantial things of the country and farm. It would be much better for farmers' girls to stay at home and help their mothers, and their fathers, too, if he has not boys enough. Although they may not have so many fine clothes, costly jewels, and city fashions, they will possess that which is far more desirable—common sense and robust health.

We have Agricultural Colleges for our boys, and by and by these educated and practical young farmers will want healthy and qualified wives. Therefore our girls must wake up and consider the prospects before them, and embrace every opportunity for fitting themselves for healthy and honorable positions.

It is not unlady-like to be able to superintend the entire domestic concerns of their own households. The servants, if such are employed, are far more likely to be faithful and economical if the mistress knows whether the bread and butter are made right or wrong. The ignorance of the mistress of the house in the details of housekeeping is the great cause of the trouble with the Bridgets, of which we hear so much. When we hear ladies complaining of the ignorance and awkwardness of their help, I am often glad that they do not know what I think is the main cause of all these domestic difficulties. "Good workmen never complain of tools." Good generals are always supported by efficient and reliable officers, and by brave and successful soldiers. Good housekeepers are usually fortunate in securing good help, because they can direct and educate their servants. Housekeeping is an art and science that can be acquired only by much practice. There is no royal road to this, any more than in any other branch of our education. It is not acquired at high schools, nor in shops and factories. In factory and shop work girls expect to serve a more or less extended term of apprenticeship, but as to housekeeping very many young ladies seem to think that no apprenticeship or experience is needed. Is it strange that domestic infelicities and even divorces should be fearfully on the increase? (MRS. TRASK)

Reading, Mass. Nov. 27, 1868. in N. E. Farmer.

A PRETTY PICTURE OF TIME'S PATHWAY.—A pretty girl away upon the prairies of Iowa, writing on New Year's eve, thus beautifully describes how old 1868 came and went in the far Northwest: "The year is almost parted. Spring came and strewed the earth with rosebuds that summer's drapery changed into blossoms: autumn, in her russet robes, garnered what spring and summer left behind, and strewed in their stead mellow peaches and golden pears in her way; then old winter came with his soft, white covering of snow to hide the brown old earth, clasping in his icy arms the laughing brooklet, bidding the cascade cease its noisy flow—and the year is gone."

THE GATE OF HEAVEN.—Death is the gate of heaven. The moving of the funeral, the falling of the clods upon the coffin are but the creaking of the hinges as the gate swings open to admit another soul to eternity.

As it thus opens, we seem to catch a glimse of the glories of heaven—like Christian as he gazed upwards toward the celestial city. But the gate closes again upon the loved one forever, and we are shut out for the present. But soon our turn will come, the gate will open for us, and through the portal gilded with the rays of that light which is unspeakable and full of glory, we will be conducted to our eternal home.

—Very touching and beautiful were the words of the old schoolmaster, as life passed away! "It is growing dark—the school may be dismissed." Down to the very gates of an unseen world he carried his love and regard for the children whom he had trained.

—When children are little they make their parents' heads ache, and when they are grown up they make their hearts ache.

—The Velocipede of which so much is said now, is not a new invention by any means; they were ed nearly one hundred years ago.

THE CURSE OF INTEMPERANCE.

RESPONSIBILITY.—A young man in Virginia had become sadly intemperate. He was a man of great capacity, facination, and power, but he had a passion for brandy which nothing could control. Often in his walks a friend remonstrated with him in vain; as often in turn would he urge his friend to take the social glass in vain. On one occasion the latter agreed to yield to him, and as they walked up to the bar together, the bar-keeper said:

"Gentlemen, what will you have?"

"Wine, sir," was the reply.

The glasses were filled, and the friends stood ready to pledge each other in renewed and eternal friendship, when he paused and said to his intemperate friend:

"Now if I drink this glass and become a drunkard, will you take the responsibility?"

The drunkard looked at him with severity, and said:

"Set down that glass!"

It was set down, and the two walked away without saying a word.

Oh, the drunkard knows the awful consequence of the first glass. Even in his own madness for liquor he is not willing to assume the responsibility of another's becoming a drunkard.

What if the question were put to every dealer, as he asks for his license and pays his money:—"Are you willing to assume the responsibility?" How many would say, if the love of gain and money did not rule, "Take back the license?"

—An exchange estimates merely the time wasted in intoxication, and the destruction of property resulting from the careless and crimes of intoxicated persons at $300,000,000 per annum. And it concludes thus: "This brings our annual taxation for 'free rum' up to $2,550,000,000 or considerably more than the entire principal of the national debt."

RUM IN LONDON.—By the records of that great city nearly 200,000 Englishmen get madly drunk in that city annually.

DOMESTIC SCENE.—"Pretty time of night, Mr. M——, for you to come home—pretty time, three o'clock in the morning; you, a respectable man in the community, and the father of a family."

"Tisn't three—it's only one; I heard it strike, Council always sits till one o'clock." "My soul! Mr. M——, your'e drunk—as true as I,m alive; your'e drunk. It's three in the morning." "I say Mrs. M——, it's one. I heard it strike one as I came around the corner, *two or three times.*"

His spouse could say no more; so she retired.

HAIR GRAFTING.—One Innis, a colored barber in Jersey City, has made the treatment of premature bald heads a special study, and after a series of experiments has demonstrated the fact that hair may be grafted into such a head and made to grow. He takes hair from the head of another person, and examines it with microscope to ascertain if it is perfect and healthy. This hair he inserts into the cavities of the scalp and secures it to its place by bandages which are allowed to remain a few days until the hair takes root.

SWEET POTATO PUDDING.—One pound of sweet potatoes, boiled and mashed fine, or grated while hot, six eggs well beaten, three-quarters pound of sugar, the same of butter, a grated lemon rind, and nut-meg, a wine glass of brandy; line the dish with paste. When it is baked sprinkle the top with pulverized sugar.

—A lady who is given to tattle sent for her doctor, and inundated him with a list of her troubles. "You need rest, my dear." "But look at my tongue, doctor." "Yes—that needs rest, too."

—There are minds which adorn and enrich all they touch, which can learn wisdom from a flower, pity from a blade of grass, can find "sermons in stones, and good in everything."

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO.

24-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world: publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal: its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

Send for a copy, enclosing 10 cents, to

30-22 HENRY E. CHILD, 41 Park Row, New York.

To Take Charge of a Place.

A young man with some capital (from $500 to $1000) can hear of a good opportunity to take charge of a new place and have an interest if he desires.

A person somewhat acquainted with the nursery business is preferred.

None but a steady and industrious young man need apply.

The applicant must be able and willing to work, and have a love and taste for rural life. To such a person a good chance can be given.

A DUTCH CURE.

Ven I lays myself town in my lonely pet-room,
Und dries for to sleep very sound;
De treams ob, how into mine het dey will come,
Till I wish I vas under de ground.

Sometimes, ven I eats von pig supper, I treams,
Dat my sthomack is filt full of sthones,
Und out in my sleep, like de night owl I schreams,
Und kicks off to ped clothes and groans!

Den dare, ash I lays mit to ped clothes all off,
I kits myself all over froze;
In de morning I vakes mit the het ache an koff,
Und I shick from mine het to mine toes.

O, vat shall pe done for a poor man like me—
O, vat for I leat such a life?
Some shays dere's a cure for dis trouble of me—
Dink I'll try it, and kit me a WIFE.

ORIGIN OF THE NAMES OF STATES.

Maine was so called as early as 1623, from Maine in France, of which Henrietta Maria, Queen of England, was at that time proprietor.

New Hampshire, was the name given to the territory conveyed by the Plymouth Company to Captain John Mason, by patent, Nov. 7, 1629 with reference to the patentee, who was Governor of Portsmouth, in Hampshire, England.

Vermont was so called by the inhabitants in their Declaration of Independence, Jan. 16th, 1777, from the French, *verd mont* (the green mountain.)

Massachusetts was so called from Massachusetts Bay, and that from the Massachusetts tribe of Indians in the neighborhood of Boston. The tribe is thought to have derived its name from the Blue Hills of Milton. "I have learnt," says Roger Williams, "that the Massachusetts were so called from the Blue Hills."

Rhode Island was so called in 1664 in reference to the Island of Rhodes in the Mediterranean.

Connecticut was so called from the Indian name of its principal river. Connecticut is a Moeheakanneew word, signifying *long river*.

New York was so called in 1664, in reference to the Duke of York and Albany, to whom the territory was given by the King of England.

New Jersey was so called in 1664, from the Island of Jersey on the coast of France, the residence of the family of Sir George Cartaret, to whom the territory was granted.

Pennsylvania was so called in 1681, after William Penn's daughter—Sylvania.

Delaware was so called in 1703, from Delaware Bay, on which it lies, and which received its name from Lord de la War, who died in this Bay.

Maryland was so called in honor of Henrietta Maria, Queen of Charles I., in his patent to Lord Baltimore, June 30, 1632.

Virginia was so called in 1584, after Elizabeth, the virgin Queen of England.

Carolina was so called by the French in 1564, in honor of King Charles IX., of France.

Georgia was so called in 1732, in honor of King George II.

Alabama was so called in 1814, from its principal river, it being an Indian name, signifying *here we rest*.

Mississippi was so called in 1800, from its western boundary. Mississippi is said to denote the *whole river*, i. e. the river formed by the union of many.

Indiana was so called in 1809, from the American Indians.

Ohio was so called in 1802, from its southern boundary.

Missouri was so called in 1821, from its principal river.

Michigan was so called in 1805, from the Lake on its border.

Arkansas was so called in 1812, from its principal river.

Florida was so called by Juan Ponce de Leon, in 1572, because it was discovered on Easter Sunday; in Spanish, *Pascua Florida*.

Columbia was so called in reference to Columbus.

Wisconsin was so called from its principal river.

Iowa was so called from its principal river.

Oregon was so called from its principal river.

Minnesota, or the Wandering Water.

SLEIGHING IN RUSSIA.

When the roads are rough the continual jolting of the sleigh is very fatiguing to a traveller, and frequently, during the first two or three days of his journey, throws him into what is very properly designated the road-fever. His pulse is quick, his blood warm, his head aches, his whole frame becomes sore and stiff, and his mind is far from being serene and amiable. In the first part of my land journey I had the satisfaction of ascertaining by practical experience the exact character of the road-fever. My brain seemed ready to burst, and appeared to my excited imagination about as large as a barrel; every fresh jolt and thump of the vehicle gave me a sensation as if somebody were driving a tenpenny nail into my skull; as for good nature under such circumstances, that was out of the question, and I am free to confess that my temper was not unlike that of a bear with a sore head. Happily, however, I kept it pretty well to myself, and as my companion was affected about as I was we managed not to disagree.

Where the roads are good, or if the speed is not great, one can sleep very well in a Russian sleigh; I succeeded in extracting a great deal of slumber from my vehicle, and sometimes did not wake for three or four hours. The Government couriers often suffer much from loss of sleep, as they are compelled to maintain the utmost limit of speed without regard to their own convenience. Sometimes the roads are in such wretched condition that one is tossed in his vehicle to the height of discomfort, and can be very much likened to a lump butter in a revolving churn. In such cases sleep is almost, if not wholly, impossible, and the traveller, proceeding at courier speed, must take advantage of the few moments' halt at the stations while the horses are being changed. As he has but ten or fifteen minutes for the change, he makes good use of his time and sleeps very soundly until his team is ready.—*Thos. W. Knox, in Harper's Magazine.*

A COLLECTION OF ITEMS.

ILL-GOTTEN WEALTH A CURSE.—If a man is a fool to expect wealth by dishonest means, he is still a greater fool if he expects that wealth so acquired will render him any enjoyment! What! enjoyment for you—you who have obtained wealth by falsehood—by deception—by extortion—by oppression; you expect enjoyment? Listen, listen to the hearty denounciations of all honest men; to the awful imprecations of those you have injured; to the reproaches of your family, whose name you have dishonored; to the accusation of that conscience whose voice you have stifled; and to the awful thunder of that heaven whose laws you have outraged! Listen to these—these are the *enjoyments* that will attend your ill-gotten wealth. "He that getteth riches and not by right, shall leave them in the midst of his days, and at his end shall be a fool."

INTERESTING EXPERIMENT.—Take a sheet of coarse paper, and after holding it before the fire until it is perfectly dry, fold it into a long strip of about two inches wide. The magnet is now complete. To exhibit the attractive power, cut some strips of writing paper about three inches long and about as wide as one of these lines; place them upon the table, three or four together. Now take the magnet and draw it briskly under the arm two or three times; its electro-magnetism is instantly developed, and becomes apparent when held over the small strips of writing paper, veritably by the wings of lightning.

A CALIFORNIA MILLIONNAIRE.—A letter from San Francisco, speaking of the richness of the White Pine Mining District in Nevada, says there is now in that city a middle-aged man, who a year since was at work by the month as a mechanic, and not worth a dollar. To-day he is worth at least $1,000,000 in hard coin, and his income from one mine alone in White Pine is over $10,000 per day. He is investing his money in real estate, in San Francisco. The other day a friend was joking him on the subject of marriage, remarking that he could now marry any young lady in San Francisco, to which he replied: "Well, I know a gal out West who was willing to marry me when I hadn't a cent, and now I'm able, I'm going to marry."—*Boston Herald.*

A green looking chap from the Green Mountain State went over the line and on to Montreal, "to look around a leetle." Going into a large and handsome dry goods store, his verdancy attracted the attention of the proprietor, who attempted to quiz him but unhappily having an impediment in his speech he had to give it up, and his clerk came forward to speak for him. He began:

"Mr. Bull wishes to know if you can tell him why Balaam's ass spoke?"

"Waal," said Jonathan, I rather guess as how Balaam was a stuterin' man, and his ass had to speak for him."

Good for Jonathan.

—"Billy, how did you lose you finger?"

"Easy enough," said Billy.

"I suppose you did, but how?"

"I guess you'd a lost yourn, if it had been where mine was."

"That don't answer my question!"

"Well if you must know," said Billy, "I had to cut it off or else steal the trap."

—A good story is told of a hard-shell Baptist missionary in Medina, who had become mixed up in land speculations in Minnesota. On entering his pulpit recently, he announced to his congregation at the opening of divine service, that his text would be found in "St. Paul's epistle to the Minnesotians, section four, range three, west."

—If a man fails to the amount of a million, it is all right; but let him fail to the amount of his board bill, and he is a scoundrel.

—"How do my customers like the milk I sell to them?" "Oh, they'll all think it of the first water."

—Many people who drop a tear at the sight of distress, would do much better to drop a six pence.

—Solomon advises the sluggard to go to the ant, but the shiftless of the present day go to their uncle.

—The anxiety that a man feels for the want of funds, is called CAPITAL punishment.

THE PHOTOSCOPIC TABLE COMPANY.

THE NEW INVENTION of this Company is known as ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest effect of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION of this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changible pictures, arranged to suit the wishes and desires of each owner of the table,

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

The Company have opened a Suit of Rooms for Exhibition and sale of the PHOTOSCOPIC TABLE at the corner of St. Marks Place, No. 23 KEARNY St., west side upstairs, to which they cordially invite the public to examine them. 32-1

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L.

AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum;

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the antifriction will adhere to and keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

Or to I. FRIEDLANDER,
112 California street.

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

B. B. REDDING,
Land Agent C. P. R. R. Co., Sacramento.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer on the wharf or landing places.

(Corrected Weekly, by Editor Farmer.)

San Francisco, March 4.

Grain, &c

The Grain Market this week shows conclusive evidence of a still further decline abroad which must most materially effect our interests at Home—The Liverpool quotations come to us at 10s. 3d. being the lowest point for a long time, while New York quotation have receded from $2,20 back to $1,80 per bushel currency, in about one month.

Such facts as these should show our grain growers that there is but one sure way for them, always sell their crops at the "Harvest time"—Let them go back for the entire period of California culture, and they will find the average best at the Harvest.

There may be local causes that would cause a rise at other seasons, but the only safe course for the Producer is to sell at the *Harvest time*. We have watched these interests for nearly *sixteen years* and we can aver with a certainty that the safe course is that we have pointed out.

The information that comes to us from Europe and the Eastern States clearly show that little or no grain will be sent abroad, unless of a lower rate, than formerly.

Our Grain growers may be well satisfied if the opening season will secure to them any certainty for 1½c for their very best wheat, the average price cannot exceed 1½c, for the amount planted this season is beyond all conception great.

Were we to say to our grain growers that the large amount of surplus wheat now on hand in this State would require *one hundred and fifty vessels to carry it away*, it would be esteemed a large or excessive statement yet it would not alter the *Facts* of the case, and the prospective crop of 1869, added to what is on hand will require Six Hundred Ships, to Export the same. What then will be the condition of our Grain Market here the coming Summer and Autumn?

We speak from knowledge of the amount planted, and the present prospect of an abundant crop, for it is very certain that the grain was never planted in a better manner, nor has it ever promised so well as at the present moment.

That the amount planted is very large, we can name many amounts from 5,000 to 8 and 10,000 acres each, and there are single planters as high as 12,000 to 17,000 acres each.

We are glad to know that the favorable weather during January and late into February, induced quite a liberal planting of Barley which we think will pay the planter well.

Our Grain growers who read the Daily papers will see that we have nearly *Thirty Vessels* in port waiting freight, but little or no grain going forward.

Our advices are favorable from the East for the Spring clip of Wool which will be very large in California this year and of a superior quality.

Retail Prices in the Fruit Market.

During the past week our Fruit Market has been brightened up with a good supply of Pine Apples, Bananas, Oranges, Citrons, Lemons and Limes. The Pine Apples in some instances were exceedingly fine, and well ripened, and handsome. Often have we given ten, fifteen and as high as twenty dollars each, in Covent Garden Market, London, for Pines not better than what can be purchased here at one dollar each.

Strawberries have come rather sparingly to hand this week. We observed some pretty specimens of the "Burre gris d'Hiver Nouveau Pear," it is an excellent variety of rich flavor, and a free bearer. it is well worth the attention of our orchardists, on account of its keeping qualities; with care the pear can be preserved until May. Apples as a rule are very indifferent in quality, and not over plentiful.

Retail Prices in the Vegetable Market.

The Market has been well supplied with salads of the leading varieties; also, with cabbages and Broccoli, the latter of which are unusually fine, more particularly the "Chappells Cream Broccoli" one we measured at Messrs. Stewart & Buckley's, was sixteen inches in diameter and close upon fifty inches in circumference, when cut it weighed upwards of sixteen pounds. They had a large stock on hand and many equally fine. These were grown by a gardener near this city, and one who knows from experience that good gardening pays best. The Broccolis were richly manured and planted a fair distance a part; hence, the fines of them and the good price they realized—it will be observed from the prices below, that the Spring is making rapid strides upon us. Green peas have fallen from one dollar to twenty-five cents per pound, and other articles in proportion.

Fish

(Tessmore and Hayes.)

The extreme warmness of the season has caused an unusual demand for lighter food in shape of Fish, and thanks to our brave boys who have kept up the supply. Salmon (at this period of the season) was never known to be so cheap—in fact it is the cheapest variety in the market, and of course the best. One pound of Salmon is equal to two or three pounds of most other sorts. Our Golden Gate and its connexions must be too rich for the commoner sorts of fish, such as Herrings and Sea Bass, for at present and for some time past there has been none in the Market.

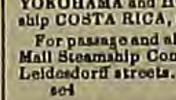
STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS



Leave Wharf corner First and Brannan streets, at 12 o'clock, M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans-Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southhampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates as given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

March 10th—GOLDEN CITY, Capt W. F. Lapidge, connecting with ALASKA, Capt. Gray.

March 18th—MONTANA, Capt. E. S. Farnsworth, connecting with RISING STAR, Capt. Connor.

March 30—COLORADO, Capt. W. H. Parker, connecting with HENRY CHAUNCEY, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

oc1 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtill further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9 50 A. M.; Reno at 4.20 P. M.; Wardsworth at 6.30 P. M. Winnemucca at 3 30 A. M.; Argenta at 8 50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12 05 P. M. Reno at 2 13 A. M. Colfax at 9 50 A. M. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6:30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermit, Silver City, Owyhee, and all points n Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages or White Pine, and Overland Stages for Salt Lake City and the Atlantic States.

C. CROCKER,
General Superintendent

GOLDEN EAGLE HOTEL.

Corner Seventh and K streets, SACRAMENTO.

Carriages, to and from the Hotel to the Railroad Cars and Steamers, at all times, Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

—o—

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND Planters in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLane's Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuge, now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not accept other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROTHERS, PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Take no Vermifuge nor Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG,

DR. M. LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Hepatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the South, where, in the majority of cases, the patient is not within the reach of a regular physician, some remedy should be provided, that would not in the least impair the constitution, and yet be safe. That such is the true character of DR McLANE'S LIVER PILLS, there can be no doubt. The cures which has invariably attended their use, will, we think, be sufficient to convince the most incredulous of our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects they have been so tested, and that the result has been in every respect favorable, we call thousands who have experienced their beneficial effect.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms and deranged state of that organ.

DISEASES OF THE LIVER

The Liver is much more frequently the seat of disease than is generally supposed. The function to perform, and on the regular execution of which depends not only the general health of the body of the Stomach, Bowels, Brain, and the whole Nervous System, shows its vast and vital importance health. When the Liver is seriously diseased, it in fact not only deranges the vital functions of the exercises a powerful influence over the mind and its operation, which cannot be easily described. It connection with other diseases, and manifests itself by so great a variety of symptoms, of a most that it misleads more physicians, even of great eminence, than any other vital organ. The intimate which exists between the Liver and the Brain, and the great dominion which I am persuaded it passions of mankind, convince me that many unfortunate beings have committed acts of deep and or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I convinced that more than one-half of the complaints which occur in this country, are to be consider their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling causes of which we afterwards feel ashamed; last, though not least, more than three fourths of the diseases under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side pain is felt under the shoulder blade, and it frequently extends to the top of the shoulder, and is taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the coal are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with sensation in the back part. There is generally a considerable loss of memory, accompanied with a tion of having left undone something which ought to have been done. A slight dry cough is sometimes ant. The patient complains of weariness and debility; he is easily startled; hi feet is cold or he complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts Several of the above symptoms attend the disease; but cases have occurred when few of them exist ination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when Quinine, are productive of the same happy results. No better cathartic can be used preparatory to Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not or three times by next morning, take one or two more; but a slight breakfast should invariably follow. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight of the Stomach.

DR. McLANE'S American Worm Specific Vermifuge

No diseases to which the human body is liable are better entitled to the attention of the philanthropist consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer's cause is frequently overlooked, and consequently the proper remedy is not applied. But when the infant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to causes. It ought here to be particularly remarked, that although but few worms may exist in a child, however quiescent they may have been previously, no sooner is the constitution invaded by any of the forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, to treatment, ridiculous in other respects, but which entirely fails in consequence of worms being over even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be, loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, at flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; a circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the occasional headache, with humming or throbbing of the ears; an unusual secretion of saliva, tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea, violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unlike with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; but generally irritable, &c.

Whenever the above symptoms are found to exist, DR McLANE'S VERMIFUGE MAY BE RELIED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves that viding the symptoms attending the sickness of the child or adult warrant the supposition of worms. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening, or a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors are forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McLANE and FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PITTSBURG. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have a red wax stamped on the lid of the box, in red wax.

Prepared only by FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLane's Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, on receipt of Forty cents in Government Stamps.

CALIFORNIA FARMER AND JOURNAL OF USEFUL SCIENCES.

VOLUME XXXI. SAN FRANCISCO, CALIFORNIA: THURSDAY EVENING, MARCH 18, 1869. NUMBER 9.

The California Farmer AND Journal of Useful Sciences.

PUBLISHED EVERY THURSDAY EVENING

BY WARREN & CO.

Office—No 320 *Clay street (up stairs), below Battery.*

SAN FRANCISCO.

TERMS OF SUBSCRIPTION.

By mail, for one year, $5; for six months, $3. For a Club of five new subscribers, a sixth copy will be sent gratis. When payments are delayed six months $1 additional per year will be charged.

To City subscribers, delivered by carrier, 12½ cents a number or $6 a year in advance.

☞ Advertisements and Subscriptions must be paid for in advance. Payments in Gold or Silver.

☞ All letters on business connected with the office should be addressed to WARREN & Co. PUBLISHERS.

STEAM PLOWING IN THE UNITED STATES.

With the mass of incontestable proofs before us of the profit, utility, and large employment of steam cultivation in Europe, it is surprising that it has not been more widely adopted in this country. Certainly this region, for several reasons, is the most favorable for its application. Our working, or dry seasons, are longer, we have larger territory of arable lands and broader surface of level fields, with greater scarcity of manual labor and fewer working animals, hence are subjected to higher prices for labor. Our people are notedly progressive in all other matters, and steam culture will, *must*, become successful here. It is a necessity, and steam will yet be applied generally in our agricultural operations. The experiments, with partial failures, of Fawkes have not yet lessened confidence.

In 1855 Obed Hussey, of Baltimore, invented and put into operation a steam plow, which performed to some extent, but not satisfactorily; but sufficiently succeeded to lead him to believe that, with some alterations, it might become a practical success; he therefore made some changes, and in October, 1856, he made another trial with his machine at the Indiana State fair, Indianapolis, for which he received the society's premium of a silver cup. It cut six furrows across the field, seven inches deep, through heavy sod, doing the work reasonably well, yet the machine proved to be imperfect. Since that time I have heard nothing of Mr. Hussey's undertaking with steam, though he has been the inventor of other useful farming implements.

Even earlier than this, Mr. Bronson Murray, of Illinois, had suggested, and confidently predicted, that steam plowing must, and soon would, become general in the great prairies, to follow, as a necessity, the important success of harvesting and mowing machines, with seed drills, already largely in use on the farms in that region; and every thinking man felt that some more tireless power for plowing than animal muscles was an essential desideratum in this almost boundless region of arable land; and in this spirit the Illinois State Agricultural Society, in the winter of 1858, offered a premium of $5,000 to be awarded to the producer of the best steam plowing apparatus that should be exhibited for trial at their next State fair, to be held at Centralia in the following September.

Under this inducement Mr. J. W. Fawkes, of Lancaster, Pennsylvania, entered the apparatus of his invention and manufacture, being a traction engine, drawing six or more plows, so attached on beams to the rear of the locomotive that they could be at pleasure quickly raised from the ground by chains running over pulleys, all by the steam power, when not desiring to cut furrows while moving.

The writer of this article was on the ground at the first trial, in September, 1858, and saw the first furrow turned by this remarkable machine, and never will he forget the pride and pleasure he experienced, the high hopes excited, and the admiration and respect he felt for Mr. Fawkes from the performance of this machine, with the vast benefits which he confidently anticipated would occur to agriculture generally by its employment, but especially to the broad, limitless prairies then before him.

More recently, May 10, 1868, Mr. P. H. Standish of Martinez, California, has patented a new steam plowing apparatus, which is quite novel, and for which its friends claim much merit, though, of course, it has not yet passed the ordeal of extended practical test, and must have time and experiment to prove whether it may be a success or not. It is propelled by an ordinary steam engine, placed upon a form or frame-work stationed on wheels to carry and guide it, while the digging apparatus is geared directly to the engine by crank, drum, and pinions, so that less power is required to work the machine. The peculiar feature of this apparatus consists in the manner of cutting or breaking the ground; it is not done by shares turning furrows, nor by spades lifting and dumping the earth, but by four knives or spits, set at right angles vertically in a head-block of cross bars, revolving horizontally on a perpendicular shaft, tearing and stirring the earth in a transverse direction to the movement of the machine, something in the manner of a revolving harrow. Two, three, or more of these implements are worked and follow the engine, according to its power and as may be desired.

Certainly this mode of stirring and pulverizing the soil is much better than simply turning it over with the plowshare; the plow, by the pressure or friction in running, has the effect, more or less, to pack and harden the subsoil or bottom of the furrow, on which account spading leaves the ground in the best condition. But it is a question whether this machine will work well in sod or turf, or original breaking up.

In addition to the efforts and inventions of our countrymen from time to time for supplying this great want by adapting steam-power to the profitable and pleasant cultivation of our lands, several Europeans have, at different times, introduced their tackle into this country, with little success. I shall be proud to see our own people succeed and take the palm, yet let us have success, even though it may come from across the water.

CONCLUSION.

I cannot too earnestly impress upon the minds of those interested—the farmer needing the implements and the mechanics to invent and make them—the vast importance of the subject of steam cultivation. In no country is it so much needed as in ours; nor is any other so largely and happily adapted to its employment. The surface of our lands and the texture of the soils are decidedly favorable, particularly the broad prairies, and the older cultivated farms of New York, Pennsylvania, and New Jersey; the flats of Genesee, the Mohawk, the Connecticut, and of some other rivers, are all waiting for the steam plow.

One of the greatest benefits to result from the employment of steam in the cultivation of our lands, and that which constitutes its most charming feature, is, that in order to realize its fullest and highest advantages, lands and implements, must be kept in the very best condition, all the operations must be performed in the most skilful manner, and the whole business of the farm conducted with systematic arrangement; thus exciting habits of thought, care, and order, which in the end render all business more successful, profitable, and attractive. System not only promotes efficiency and promptness, but it also prevents annoyances and avoids disappointments. Thus mental elevation as well as pecuniary gain, and by both increased happiness, is sure to be secured by the introduction of improved powers and machines into our agricultural business.

Perhaps the chief reason why steam plowing has not succeeded in this country, and become generally employed and popular, as in Europe, are the want of more general information on the subject, and the lack of capital among farmers for ready outlay for expensive implements.

Were agriculturists more fully informed in regard to the capacity of steam power for this purpose, and better acquainted with the results, where it has been thoroughly used and proved, it would be generally adopted in the country. Those having the needed capital would purchase; and where individuals lacked means several would club together and purchase; or, as is the case now, with break-up teams and threshers, some one having the capital would procure and fit out a complete steam-plowing tackle for plowing, cultivating and harrowing, and do the work for a township or neighborhood, a practice frequently adopted even in England.

In some portions of our country, as on the large prairies, it has been urged as a special hindrance to the introduction of steam-power on the farms, that there is a lack of water and fuel, which are to be obtained only at an expense that will not warrant their consumption by the steam engine; but the uniform testimony of those who have made the trial, is, that the expense at highest figures, of feeding the engine is far less than that of feeding animals enough to do very much less work in an inferior manner. Besides, the difficulty referred to may to a great extent be avoided by the use of Ericsson's caloric or hot-air engines, which require no water and very little fuel, while there is no liability to explosions, and much less danger from fire than with the ordinary steam engines.

Davison's Thornless Black Cap Raspberry.

The principal and positive advantages derived from the use of steam in plowing, as shown by the foregoing pages, may in brief be summed up as follows:

It will plow and cultivate deeply, cheaply, and rapidly, leaving a deeper, mellower, and warmer soil.

Its rapidity of execution enables the farmer to cultivate a larger area at exactly the time to secure the best product.

It excites greater activity and promptitude among farmers in other matters, and leads to habits of system and order in all their operations.

It substitutes artificial or machine-power, always attainable to any extent, for animal power and manual labor, which are often unattainable to the needed extent.

It secures uniform seeding and ripening of crops, for the same engine can at the time of plowing also sow and harrow the ground by having power enough to draw all the implements at once.

With the stationary engine some spots and marshes can be drained and plowed, and rendered highly fertile, which cannot possibly be done with horses, for want of power, and footing on which to walk; and hence, inaccessible lands, almost useless, can be reclaimed and become the most productive, as has been repeatedly done in the Old World.

Thus, in this mode of cultivation we find pleasure united with profit, ease with enhancement, new lands are added to old fields, the dormant earth below is brought to mix with and revive the exhausted soil above, and all improved; and in all this process the mind, as well as the purse, is filled and benefitted.

Finally, deep plowing or spading of land, by which a warm, dry, mellow soil is produced, is the true acme, the real charm and test of good farming; and is not second even to a wise adaptation of seeds to soils. A tree or plant can no more live and thrive with its feet in the wet and cold than a man can. Deep plowing and thorough drainage allow the air more completely to permeate all parts of the soil, which aids greatly in warming and pulverizing the ground, and stimulates a healthy growth of the plant, both in its early germination, and in its successive progress and fruitage. The beautiful and healthful operation of producing a kindly, fertile soil, as all intelligent testimony assures us, can in no other way be so surely and economically accomplished as by the employment of steam cultivation.

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Gardens Corner of Mason and Pacific Street*, in this city, or address EDITOR FARMER.

—Agricultural Fairs—Farmers' pretty daughters.

COULDN'T SELL NO MORE.

The far famed Robert Heller cannot be satisfied with his legitimate triumph before an audience, but occasionally does a neat thing for his own amusement, very much to the surprise of those who happen to be present.

Recently, while passing an itinerant vender of cheap provisions, Mr. Heller suddenly paused and inquired:

"How do you sell your eggs, auntie?"

"Dem eggs," was the response, "dey am a picayune apiece—fresh, too, the last one ov me; biled em myself, and know dey's fust rate."

"Well, I'll try em," said the magician, laying down a bit of fractional currency. "Have you pepper and salt?"

"Yes, sir, dare dey is," said the sable saleswoman, watching her customer with an intense interest.

Leisurely drawing out a penknife, Mr. Heller proceeded very quietly to cut the egg exactly in half, when suddenly a bright new twenty-five cent piece was discovered lying imbedded in the yolk, apparently as bright as when it came from the mint. Very coolly the great magician transferred the coin to his pocket, and taking up another egg, inquired:

"And how much do you ask me for this egg?"

"De Lord bless my soul! Dat egg? De fact am, boss dis egg am worth a dime, shuah."

"All right," was the response, "here's the dime. Now give me the egg."

Seperating it with an exact precision that the colored lady watched eagerly, a quarter eagle was most carefully picked out of the egg and placed in the vest pocket of the operator as before. The old woman was thunderstruck, as well she might have been, and her customer had to ask the price for the third egg two or three times before he could obtain a reply.

"Dar's no use talkin' mars'r," said the bewildered old darkey, "I can't let you hab dat egg nohow for less dan a quarter, I declare to de Lord I can't."

"Very good," said Heller, whose imperturbable features were as solemn as an undertaker, "there's the quarter and here's th- egg. All right."

As he opened the last egg a brace of five dollar gold pieces were discovered snugly deposited in the heart of the yolk, and jingling them merrily together in his little palm, the savant coolly remarked:

"Very good eggs, indeed, I rather like them: and while I am about it, I believe I will buy a dozen. What is the price?"

"I say price!" exclaimed the astonished daughter of Ham! "You couldn't buy dem eggs mars'r for all de money you's got. No, dat you couldn't, I'se gwine to take dem eggs all home, I is; an' dat money in dem all belongs to me. It does dat. Couldn't sell no more of dem eggs, nohow.

Amid the roar of the spectators, the benighted African started for her domicil to "smash dem eggs," but with what success we were unable to relate.

LABOR AND STUDY.

Few persons are aware how great a promoter of study physical labor is, if not carried to excess, among those of fair intelligence and good habits. Those whose occupations are of the intellectual kind often become "brain-weary," and this kind of weariness is very exhausting if carried too far, and is also exceedingly painful to bear. The tired feeling which the laborer who uses only his muscles experiences as he comes from his toil at night, bears no comparison with the feelings of one who is brain weary, and the latter class might learn a useful lesson, if they would, in this desire for knowledge and love of study shown among a certain class of working people.

The brain needs rest, and gets it most effectually in muscular toil, and it returns to study with a keen appetite. If the brain workers of any city could have one day of every week for physical labor on a farm, or in a shop, they would retain their health much longer, and posess more intellectual vigor than they do where every day is given to intellectual effort. It would not, it seems to us, be difficult for brain workers to have in their own homes a workshop, where they can daily spend an hour in such labor as will rest their brains and strengthen their bodies. In this way, they would develope more harmoniously, and maintain a balance between body and braid that is now often lost. This habit of work should be formed early in life, if we would have it a source of pleasure. Work is the greatest educator and blessing that we have, or are likely to have.—*Prof. Tyndall.*

MR. DICKENS ON FARMING.

Mr. Charles Dickens, in a recent number of his paper (All the Year Round,) says:

"The part of the holding of a farmer or land owner which pays best for cultivation, is the small estate within the ring fence of his skull. Let him begin with the right tillage of his brains, and it shall be well with his grains, roots, herbage and forage, sheep and cattle; they shall thrive, and he shall thrive. 'Practice with science,' is now the adopted motto of the Royal Agricultural Society."

It must be allowed that no one should know better than Mr. Dickens the money value of brains. He took home from a few months harvest in Yankeedom, a hundred thousand dollars or so of gold the price of the brain work of one small head.

There is sure profit in brains well used. The talk about farming being unprofitable, and country life stupid and uninteresting, is the merest nonsense. Farming is profitable where brains are rightly used upon it, and where the contrary is the case, there is either want of brains or want of their proper application. If a man *has* a head, and it is not a good one for farming, let him turn it to some other purpose, for brains will surely tell somewhere. If he has none, or only an indifferent good one, let him admit that fact, and not make it more apparent, by insisting that there is no profit in farming.

There is profit enough to gratify a reasonable, that is, a moderate desire for wealth. Those who make haste to be rich, go to cities, and make haste more commonly to their ruin. But there is moderate profit on the farm for the mere hand labor of a diligent young man, and increasing profit in exact proportion to his increasing knowledge of his business and the prudence and judgement with which he applies that knowledge.—*American Farmer.*

LEAKS IN FARMING.

This has continued under discussion by the Little Falls Farmers' Club, and a correspondent, Mr. Whitman, writes to the *Country Gentleman* that its agitation has proved very interesting:

"Being behindhand with work, and the want of good farm implements and proper care of them, were well presented by Mr. Chas. Van Valkenburg, by showing that a man once fairly behind his work would seldom overtake it through the season—ground not well prepared, fences out of order, crops put in late, haying not commenced soon enough, and crops secured out of season—and all done at a great loss. He also showed that there is loss in not having grass cut and secured as early as the last of July, and that farm implements should be housed when not in use. By proper care he had used a Wood's mower nine years, and it does good service yet, Bullard's hay tedder four years, and thought it would last him twenty years longer, and Seymour's grain drill three years, with but trifling decrease in its value."

STATUES IN BOOTS.—The *Morning Call* reports that "Burglars broke into the basement of Aiken & Luce's workshop at Sacramento, on Saturday night last, and helped themselves to seventy-five dollars worth of *boots*." Will the *Morning Call* please inform the public, if the *theives* stole the boots from the *figures on the monuments*, as Messrs. Aiken & Luce are eminent MARBLE WORKERS, and make fine Statues and Statuetts occasionally, but we never yet have seen *their* work clad in *boots*. Perhaps the learned *Call* can explain.

Agriculture.

BEAUTIFY HOME.

To owners of very small places, who still wish them to look well, the safest counsel is, do not plant large trees—not one even; keep your grass continually shorn, your hedge evenly trimmed, your little flower-bed in perpetual order. Set out such flowering shrubs as will from spring to autumn give you a constant renewal of blossoms.

So continually are new varieties now introduced from all parts of the world by scientific botanists, that it is quite unnecessary to name a choice; and when differences of climate and soil are to be considered, much better advice can be given on the spot by a practical seedsman, than by a review destined for all latitudes. Still of hardy ornamental shrubs we may safely suggest the Althæas, the Deutzias, the Persian Lilac, the Pyrus Japonica, and especially the Montan Peonies and the Weigelias, the last two introduced from China, by Mr. Robert Fortune.

The flower garden in its perfection is, of course, unattainable without great care and expense; but five dollars a year judiciously laid out in seeds and bulbs, will, from one tiny plat, yield, from the first crocus to the last crysanthemum, a perpetual joy.

ROADSIDE IMPROVEMENTS.

Too often as we have travelled over this country have we witnessed a fine house, good buildings and fences, but the road outside of the fence line contained more or less rubbish, evidently the gatherings and prunings of the garden and lawn trees. Sometimes the street or roadway is clear of this; but while the grass is clipped inside the fence, the outside is left to grow long and rank, with more or less coarse weeds, presenting just that appearance to the man's ground that the finding of a heap of dirt under the lounge would to the housewife, and, giving him in our view no claim to a better name than would be applied to such a housewife.

Our readers should each and all strive to make the outward appearance of their grounds clean, neat, and tasteful, first, by keeping away all rubbish from the street, next by frequent mowing and destruction of weeds, and lastly by planting and careing for shade trees and flowering shrubs, giving themselves pleasure, and attracting notice from every passer by; and again, as an example to those of their neighbors, who not being readers, or not having learned to move out of their original tracks continue to make brush piles, keep hog-pens, and grow thistles, mullein, etc., in front of their houses.

ALWAYS BE PLANTING A TREE.

Considering the cost, and small amount of labor, there is no one thing that so amply repays as the planting of a tree. Well grown, it becomes always an object of beauty, a source of joy to the owner and his family—a pleasure to visitors and to the residents of a neighborhood—adds an appearance of increased value to the premises—improves the general effect of the scenery—becomes a protection from cold winds—reduces the severity of the temperature—enhances the rental value of a residence—often more admired than the most costly building, and finally, can never be viewed without a thought of the supreme creative Power which "doeth all things well."

MULCHING PEACH TREES.

A correspondent writing from Willisville, says that last year a friend of his threshed his oats in his orchard and then placed the chaff under a a peach tree to the depth of 12 or 14 inches. The result was that the peaches on that tree were twice the size of the same variety on other trees. He wishes to know if it would be injurious to young trees to protect them in that manner from severe frosts through winter.

Mulching under most conditions is valuable, and to a small extent practicable, but our large peach orchards must depend mainly on clean, thorough culture for their fine crops. Thorough culture would have presented the same results as did the oat chaff.

In ordinary moist latitudes we agree with the *Prairie Farmer*, from which we clip the above, but here in California we prefer the mulchin

BONES FOR FRUIT TREES.

Bones collect in considerable quantities about every household, and in villages many have no use for them. They may be had for the gathering oftentimes, or for a small consideration. A tree-planter can make no better investment of a few dollars than to purchase these old bones, and after crushing them into inch pieces, put a bushel or two into each border where a tree is set. They are also an excellent dressing for trees already planted, and may be dug in around the roots. Old trees that have become stunted and unfruitful are often started into new growth and fruitfulness by this means. It sometimes remedies the cracking of pears. All the bones about the premises should be saved for the fruit trees.

Green Japanese Silk Worms.—The Los Angeles News of the 6th, says, we were shown, yesterday, Dr. Franklin, a card containing 40,000 Japanese silk worms of the green variety. The worms produce a natural green silk of the most brilliant hue, and is an annual. Covert & Franklin have just completed the planting of eighteen acres of mulberry plants and seeds at their nursery, one Mile west of the race track, and are going into business in a proper manner to insure success.

KEEPING SWEET POTATOES.

Fayette County, Tenn.—The sweet potato is one of the crops upon sandy loamy soils that yield incredibly where attention is paid them, and return a fine profit, selling usually at the beginning of the year at from $1 to $1 50 per bushel, and from $2 to $5 at bedding season. Great difficulty is encountered in keeping them, as they must be kept at uniform temperature, and are very sensitive to frost. The most successful mode for keeping them is the old pioneer "*dirt bank*" or hill, covered with common boards to protect from weather and rain, after this manner: Elevate the bed upon which the potatoes are to be placed about six inches above the surrounding level; upon this put about two inches of dry hay, then place three boards upright so as to form a tri-angular tube, and around this pour the roots selected, excluding all that have been injured in digging or prematurely rotted. After this requisite quantity is placed on the hill, cover with dry straw about two inches and cover with dirt about six inches, leaving the tri-angular tube open for the heated air from the usual sweating process to escape; and when this sweating has ceased, and when the weather becomes cool or cold, stop up the tube with hay to regulate the temperature, keeping them cool and dry; and when cold freezing weather begins put on an additonal layer of earth, at least 12 inches, and more hay on the tube. Having placed a cover over the hill, inclined to the north as low down as the hill will permit, open the hill only on pleasant days on the South side, and replace as soon as practicable the straw or hay and earth.

ACCURACY IN FARM EXPERIMENTS.

On a great variety of subjects connected with farming, very much can be learned by simple experiments such as farmers can try with little expense and trouble. Questions as to the depth seeds should be planted, or the distance between the plants, the time for performing different farm operations, the comparative yield of different varieties, the kind, quantity and quality of food for animals, etc., can be settled much more satisfactorily by experiments than by reasoning on general principles, or theorizing, valuable as these may be. But care should be taken to have the results fully established before accepting them finally. A common mistake is in drawing conclusions from perhaps a single experiment when a considerable number should have been tried.

Such experiments lose much of their value if there be any guess work abo the preparation or the result. We remember to have had an account sent us of an experiment, in which "about a pint of wheat had been sown in rows about a rod long and the yield was a little over," etc. Had just one pint been sown in rows exactly a rod long, and at an exact distance from each other and the exact result accertained, some practical value would have been attached to the experiment.—*Mass. Ploughman*

Hardening the Mould Board of Ploughs.—A new method has been discovered for the manufacture of the mold-board of ploughs, which gives them all the hardness and temper of steel, in combination with the toughness of iron. The mould-board (good iron) is heated and dipped into molten iron. It remains there ten seconds, when the two surfaces become heated to a white heat, while the centre is not heated through. It is then immediately dipped into water; the surface comes out harder than the highest tempered steel, while the interior is still iron and retains all the toughness and strength of the iron. The advantages claimed for this invention is, that the ploughs made by this process will take the finest and hardest polish, while they will be tough enough to endure any reasonable knocking about in stony soils.

About Horses.—From the *Rochester Union* we take the following:

Horses as a general thing get too much licking and too little feed. If a man loses his hat while driving his horse, he licks the horse to pay for it. If he runs into another wagon through his own carelessness, he licks his horse to make it all right. If his horse slips or stumbles, he gets licked for it—if he does anything he gets the same. A great many horses know "a sight" more than their drivers, and if they could change places with them, society at large would be the gainers, and so would horses.

The *Vermont State Journal* says that Mr. Salmon Pierce, of Calais, wintered two geese and a gander from which, the past season, he raised 27 goslings. When fattened for market they weighed 278½ pounds, bringing $55.66; 17 pounds of feathers sold for $1.25; total, $56.90.

Those who object to farmers getting good prices will probably discover that there is now an "onion fever." That valuable escolent is now selling at eight or nine dollars a barrel, and onion seed is scarce at five to six dollars a pound. So says a Connecticut paper.

A farmer near Mattoon, Ind., raised 5,000 bushels of corn, 2,000 bushels of Irish potatoes, 1,200 bushels of oats, and a good deal of other "truck," the past season, and paid less than $400 for labor.

The State Agricultural College of Kansas teaches women and has 71 young lady students A military drill is part of their education.

A black walnut tree was cut in Putnam county, Ohio, the other day, which turned out $1,000 worth of lumber.

Reader! have you those loved ones whom to leave destitute would embitter your last hours?—Then go to day and secure a *Life Policy for their good.*

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so consstructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS,

Pioneer Agricultural Warerooms,

30-24 **STOCKTON, SAN JOAQUIN COUNTY.**

Miscellaneous.

TRUE'S

IMPROVED

POTATO PLANTER

This is, undoubtedly, one of the most valuable machines adapted to Agricultural purposes, produced.

It Saves the Labor of Men in Planting Th

Makes its own furrow, cuts the potato in slices as the farmer may prefer; drops them the most perfect regularity, and covers them and does all this as fast as a horse can walk ground that can be plowed

No intelligent farmer can fail to see that ment with which one man can, with the aid plant six acres of potatos in a day, is of value; because the days in which planting erly be done are very few, while he has and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER other machines. It affords its aid "in the of time," and gives leisure to its owner to his other spring work, which would otherwise overwork him or be left undone.

The undersigned have the sale of this Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for ment, and a good Mechanic can make a fortune

Particulars and Catalogues can be had at

MY GARDEN.

[We clip from the *Willamette Farmer* the following very beautiful Sonnett to "My Garden," written by Miss Belle W. Cooke, of Salem, Oregon, for that journal.

The *Willamette Farmer* may be justly proud of such a Poem to grace its Number One. Never may our new Cotemporary have its Poetical corner occupied by any Poetry of an ordinary character after so handsome a commencement in its career of Journalism.—Ed. California Farmer.]

Ah! when the Spring, returning,
Sweet with the breath of flowers,
Calls at my open window,
And whispers of by-gone hours,
I long for my pleasant garden,
To work in the warm brown earth,
To nourish the wee green children,
And watch for the seedlet's birth;
To breathe in the cool of evening
The odors of balm and spice;
For, to dress and keep a garden,
Was the work of Paradise,
And is not this a reason
For the wish we always feel,
To plant in the shining seed-time
Earth's treasures to reveal;
To join in the great procession,
Earth's workers moving on,
And help, though o'er so little,
The hand of the Mighty One!
Oh, you who long thus, vainly,
May often ease your heart,
By planting Charity's blossoms
In the city's busy mart;
Blossoms that spring up gladly
In the hearts of the hungry poor,
By plentiful tears well watered,
To smile at your open door;
Blossoms that feed on sunshine,
The sunshine of human smiles,
And yield a grateful fruitage,
To be plucked in the blessed isles.

LEWISIA REDIVIVIA.

This is a plant supposed to be found in California or on some portion of the Pacific coast, we think it is known in "Washington Territory," and also in British Columbia,

Dr Hooker of the Royal Botanic Gardens at Kew, London) says: Among the plants eaten by the Kootanier, Colville, and other tribes in that part of British Columbia and Washington Territory, is the beautiful Lewisia Redivivia, the roots are gathered in great quantities, and boiled or eaten like *Salep* or Arrow-root. In this state they are not unpleasant to the taste, slightly bitter, but are valued by the Indians as a nutritious food for carrying on long journeys, two or three ounces a day being sufficient for a man even though under great fatigue.

These Indians call it "*Spat Lum*" or "Ptleem-asd-lise-ne-mare," and look upon it as one of the great gifts of the "Supreme Master of life.

We desire to learn where this root can be found, and shall esteem it a great favor if those who shall read this article and know of its location, will be so kind as to address a letter upon the subject, to the Editor of the California Farmer.

Healthfulness of Apples.—There is scarcely an article of vegetable food more widely useful and more universally liked than the apple. Why every farmer has not an apple orchard, where the trees will grow at all, is one of the mysteries. Let every good housekeeper lay in a good supply of apples, and it will be the most economical investment in the whole range of culinaries. A raw, mellow apple is digested in an hour and a half, while boiled cabbages require five hours. The most healthful dessert that can be placed on the table is a baked apple. If eaten frequently at breakfast, with coarse bread and butter, without flesh of any kind, it has an admirable effect on the general system, often removing constipation, correcting acidities, and cooling febrile conditions more effectually than the most approved medicines. If families could be induced to substitute ripe, sound apples for pies, cakes, and sweetmeats with which their children are too frequently stuffed, there would be a diminution in the sum total of doctors' bills, in a single year, sufficient to lay in a good stock of this wholesome fruit.—*Mass. Ploughman.*

Collecting Manure.—The collection and application of manure should go on continually, for the grasses and cereals and all kinds of cultivated plants make an annual draft on the soil for the ingredients which enable them to build up their stems, foliage and seeds.

No liquid or solid manure suited for enriching the soil, should be allowed to go to loss about the homestead. Soapsuds, woodashes, soot, charcoal, sawdust, etc., may be applied to the soil with much benefit to the crops. Leached woodashes are very useful for top dressing grass land, deepening the color of the plants and increasing their productiveness, so much as to double the acreable yield of hay whenever they are applied in sufficient quantities.

The *Gardner's Monthly* says that if the people of the United States all care to become successful grape-growers they must recognize the fact that the roots of the grape vine can scarcely be kept *too dry*—and that the very best way to accomplish this on flat land is to raise the soil above the natural level.

—Speak little, speak truth: Spend little, pay cash.

in all the States east of the Rocky Mountains. We are prepared to do a General Commission business in New York, which will be under the management of

Messrs. MORROW & CHAMBERLIN,

whose business capacity, well known to the Merchants of San Francisco and the Interior, is sufficient guarantee that all business intrusted to them, whether of buying or selling, will be promptly and efficiently executed. We will make liberal Cash Advances on Merchandise consigned to

MESSRS. WILSON, MORROW & CHAMBERLIN,

and forward the same free of Commission when shipped from San Francisco

WILSON, MORROW & CHAMBERLIN

will forward Consignments to us in San Francisco, free of Commission, and make advances there if required.—Eastern orders for Wheat, Flour, etc., will be filled by us at lowest market rates.

We desire to call the attention of Wine Consumers to our

LAKE VINEYARD AND MOUND VINEYARD

WINES AND BRANDIES.

These Wines have already acquired reputation in the principle markets of the world, and in California are acknowledged to be superior to the productions of any other Vineyards. As many Dealers here and at the East have used our name to facilitate the sale of Spurious Wines, we have deemed it necessary for our own protection to place our Trade Mark on every package or case that goes out of our hands. You will please observe that no Wines purporting to be ours are genuine unless they bear on the package the Trade Mark at the head of this sheet. 30-12.

VALUABLE PLANTS FOR SALE

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

HALL'S PATENT FOR PRESERVING EGGS.

We have refrained hitherto, from saying much upon this subject, until we had the opportunity of demonstrating the claims of the patent for ourselves. We have accordingly, put up a few eggs, to test the matter, and have them now, as put up months ago. We invite parties, to call and see these eggs, and examine for themselves. They possess the whiteness, clearness and freshness of the newly laid egg, and they float, as a new egg, which cannot be said of any preserved egg we know of.

The cheapness and the saving of time, over every other process, may be considered in its favor. The parties in New York, are making arrangements to secure the Patent in all Europe, and it runs yet, 16 years in the United States. Cost of putting up a barrel—less than 50 cents, and the time, does not exceed 10 minutes. Rights for sale by Warren & Co. Farmer Office, San Francisco.

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

Thornless Raspberries.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The Thornless raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. John Gage.

From the American Horticultural Annual, for 1868 page 102:

"Davison's Thornless.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant a grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are propagated from tips, making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

is now offered for sale to the Trade, or at Retail, in lot to suit purchasers at the

CALIFORNIA FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials o character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:
THURSDAY EVENING.....MARCH 18, 1869.

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for *one* insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination, hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

THE LAWS OF NEWSPAPERS.

1. Subscribers who do not give express notice to the contrary, are considered as wishing to continue their subscription.

2. If subscribers wish their papers discontinued, publishers may continue to send them until all charges are paid.

3. If subscribers *neglect* or *refuse* to take their papers from the office or place to which they are sent, they are *held responsible* until they *settle* their bills and give notice to discontinue them.

4. If subscribers move to other places without informing the publisher, and the paper is sent to the former direction, they are held responsible. Notice should always be given of removal.

5. The courts have decided that refusing to take a paper or periodical from the office, or removing and leaving it uncalled for, is *prima facie* evidence of intentional fraud.

Postmasters would oblige, by a strict fulfillment of the regulations requiring them to notify publishers, once in three months, of papers not taken from their office by subscribers.

Under the law of Congress editors are not charged postage in the county in which they are published.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the article they have to sell is wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seed, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

ASPARAGUS.

Well! will you buy the *White* Asparagus that is absolutely *poisonous*, and of which you can only use *one-fourth* in weight of what you purchase, or will you buy the *natural esculent* that is green, tender, melting and rich, and of which you can eat seven-eighths of the amount purchased; besides there is more nourishment and palatable food in *one pound* of the Green Asparagus than in *ten pounds* of the White.

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed WARREN & CO.,
California Farmer Office.

A Young Man Wanted!

A live Young Man wanted—one who wishes to *do his duty*, and by his true merit work his way up, and become of value to himself and his employer.

To such a young man, who can bring good recommendations a good situation will be offered in this office.

Apply only between the hours of 8 and 9 o'clock, A. M., and 5 and 6 o'clock, P. M., in the Printing Department of the FARMER OFFICE.

RAMBLES IN THE COUNTRY.

NO. 3.

NAPA, AND BERRYESSA VALLEY.

We took a leisure trip to see the "Berryessa Valley," of which reports came the last year of a yield of seventy five bushels of wheat per acre, and where many little fortunes were made.

Napa County is truly a rich district, and bears clear proof that it is in a very prosperous condition. Napa city keeps pace with other cities in the march of Improvement. Many new buildings are being erected as business stores in the city proper, and fine residences are springing up in many places in the suburbs. Real Estate is rising, and land increasing in value. Hotels are doing a good trade—the "Napa Hotel" seems to be doing the principal trade. This Hotel is under the control of the energetic proprietor, J. Hogan, Esq., and has been much improved. A large addition has been made to the hotel of some *twenty rooms*, to fit it up for the Summer traveling patrons. These rooms are in suites, for families, are spacious and handsomely furnished. Mr. Hogan keeps a good Hotel, Rooms and tables will always be found satisfactory to the traveller. The access to Napa city is now by steamer to Vallejo; thence, by Railroad to Napa, about *three hours time* from San Francisco to Napa. The cars extend to Calistoga, which will, with its many improvements become a famous place of resort the coming Summer. From Napa, with a friend, we took a fine span of horses in a buggy—preferring this to the saddle, on account of the roads, and made the excursion some thirty miles above, to the different portions of this district and into the "Berryessa Valley."

From Napa to "Monticello" the road, after a few miles is very rough, being cut into the high hills and along the sides. Many of them being only half made roads. For some miles the usual fertility attendant upon cultivation, is seen, but eight miles brings you to the high hills which are only for grazing stock.

Eight miles from Napa we come to "Woden Valley," a very pretty spot indeed, bearing all the marks of a rich and fertile valley, but having but few residents. The valley is about 4 or 6 miles long and two to three wide. The land seemed to be well cultivated—portions of it recently plowed and showing it to be of excellent quality for moisture and richness.

The principal residents in this valley, are John Woden Sen, and J. Woden Jr, A. Farley, C. Gardner, C. H. Berger, Mr. Griggsby and Mr White. The valley is susceptible of great improvements, and situated as it is, so finely sheltered would make a fine place for *Orchards and Vineyards*; these, if planted now, would do well the present year. We regretted we had not time to visit every residence, but business called us above.

From "Woden Valley" for twenty miles it is a lonely and barren road, hilley and mountainous, rough and deserted almost, for among some half a dozen houses, they seemed all tenantless, this appearance too, with a very bad, and even dangerous road. We found nothing worthy of *commendation*, unless it was *this very road*, which we most specially commend to the particular attention of the *Road Overseer* of that district,—more particularly *two large land slides* that blocked up the road just above "Woden Valley."

We passed the "Black Ranch," and the "Murphy Ranch", and several others, too desolate to invite much note; then on to the "Putah Creek," from which the Bridge was carried away, but low water permitted us to cross easily, and we soon made "Monticello," a very good name, but we failed to learn its origin here, for we do not think "Thomas Jefferson," were he living would permit the entrance of the Town to be without a Bridge so long.

Berryessa Valley will become a very prosperous place. The soil is good—the climate, excellent, closed in by high mountains on all sides, where good ranges are found for stock, and with the proof that the soil yields from thirty to sixty and even seventy-five bushels of wheat to the acre. It must soon become a thickly settled Valley, unless the present large *land owners* prevent this by asking *too much for land*. It is this that hinders the growth and prosperity of every place.

Berryessa Valley is 14 miles long, by 2 to 3 wide in its principal body. The inhabitants are widely scattered. Monticello, contains two Taverns, two Stables, two Blacksmith Shops, one Wagon Shop, one Saddler Shop, one Shoemaker Shop, one School House, NO Church. Welles Fargo & Co. have their office here, J. N. Vannoys Esq., Agent, who has a general Family Store, and is a very courteous and affable gentleman; also, Postmaster.

This district polled 112 votes at the last election, and there are 160 children in the District School. Little or no attention is yet paid to the raising of vegetables, or fruit, as the lands are not divided or fenced. Potatoes sell at 2cts, and Flour $8 per bbl, Hay $15 per ton and Wood $3 per cord, Eggs 25cts per doz., Butter cheap.

The principal Farmers that we learned of, are J. H. Bostwick, a large land owner, he has 1,500 acres in wheat this year. Many other large fields of grain, among the cultivators, we name Womac & Bro., Jewell & Goodwin, Mr. McCall, Ab. Clark, Maj. Seawell, J. Tinnell, S. Beaufort, Mr. Burtoff, J. Adams, J. Houghton and others. There is about 15,000 acers of wheat planted in this Valley this year. This is a very good place for *new comers*, if the owners of land will be liberal.

We commend the "Monticello Hotel," kept by Mrs. King, as a place where good food and well prepared can be found, much better living than is found in many of our larger Hotels.

We must not forget to say that they have but *one Doctor*—he is a good one, for there is but little sickness, and wonderful to report, *there is not a a Lawyer in the place*; this is a sure indication that the people are all of one mind.

"Let us have Peace."

THE BLOSSOMING TIME HAS COME.

Everything in nature seems most propituous the present year, and more especially for the *Fruit Crops*.

The "early and the latter rains" have fallen upon the earth to make *Root*, *Bud* and *Blossom* perfect. The sharp grip of "Jack Frost" has not been among the buds this year, and we have reason to feel confident, danger from this source has past; the present appearance of all *fruit trees* are most favorable for a most abundant harvest of fruits the present year.

There is, however, a very important duty for orchardists to perform now. Every fruit tree needs care; the "Mealy Bug," the "Bark Louse," the "Borer,"—these insidious enemies of the fruit tree are like the *thief in the night*; they need watching. Many branches that need pruning, that may have escaped previous care; the "suckers" that spring up from the roots of many trees; the *unsightly* and uneven branches; these *must* be cut away, and the "Blossom Time" will be fairer, and the *Fruit* will be larger, sweeter, and better for all the care bestowed.

CONTINUE PLANTING.—THE RAIN.

Never have we had a more favorable season for *continuous planting* than the present. For weeks we have had genial sunshine, with occasional showers, and now, for days of the present week, we have had gentle and refreshing showers. In some districts the rain has been quite copious. The prospect now is of quite a generous *"latter rain."* Where dwells there a heart that does not feel the good influence of these blessed showers?

It will be remembered that in our last issue we expressed our confidence in a near approach of *Rains*, with "Lightnings and Thunders." All of these have occurred, and will occur again several times during the spring-time and summer. *Such is our firm belief* derived from a constant study of NATURE'S LAWS.

We therefore urge upon all who can, to *continue to plant*.

Trees, Vines, Small Fruits, Flowering Plants, and Flowering Seeds, and also all kinds of Garden Vegetables, these will all do well with our propitious season, and more especially so if due care is given to them of *good cultivation*, because the moisture now being given to the soil, with the warmth of the sun, will cause them to vegetate quickly and grow rapidly—the main thing to secure success will be good and proper care.

SPLENDID ORCHARDS.

The certainty that for many years to come, all kinds of choice Fruits will command a *high price* in our markets, should induce those who have orchards, to bestow upon them the greatest possible care and attention; for as sure as the earth rolls round, so sure will our *best Fruits* be sent to the *Eastern Markets*, via. the Pacific Railroad.

Orchardists and Amature Cultivators should, therefore, pay particular care to their fruit trees, and vine growers to their vines, for all we can grow will pay well for careful culture.

New orchards and vineyards can be planted *now*, as the season is very favorable.

An orchard of choice and well selected fruit trees—those that have been kept back in the nursery, will come into bearing in *two years*, and the *third* year pay all their cost and cultivation.

Vineyards can be planted now with safety, if the proper care will but be given to the work, and such an enterprize will pay better than *feet* in *White Pine*.

GRUMBLING AT THE RAIN.

It seems utterly impossible to please all; no sooner does the genial sun warm up the earth, bidding grass and grain send forth first the bud, then the blade, then the full ear in the ripening stock, before the thankless ones begin to grumble at the *sunshine*. Everything will be burned up; is their cry; a Drouth! a Famine! Loss of crops, ruin, etc.; then if a kind Providence sends the genial showers to moisten the earth and give greater *vigor* to everything upon the earth—if the rains continue for a little season, the same grumblers set up their wailing cry at the same: *We will have too much*, it will *rust* the grain, it will blight the blossom, it will rot our late planted seed, and thus the houghtless and the ungrateful ever murmur. We have already heard these murmurings, and fear expressed lest the rains of this week should continue, and bring on the usual storms of the Equinox, this will only be in accordance with the laws of "Nature" and for the preservation and salvation of the earth and all that grows upon it and for the good of man.

Never, as we have elsewhere said, have we noticed a more propitious season than the present, and the tillers of the soil should sing a "Te Deum" of Praise to God for his goodness to them.

STEAM CULTIVATION.

We hope our Farmers will read the Report on *Steam Plows and Plowing*, and on the value of Steam Power culture generally, which is admirably set forth in the matter published *this week*, and matter which, also, appeared in the last *two numbers of the Farmer*. These three numbers contain the Reports of the TRIAL OF THE STEAM PLOW IN BUTTE COUNTY; and also, several Reports upon Steam Plows and the value of Steam Culture abroad, which reports, have from time to time appeared in the English Agriculture papers, and latterly, in the Reports of the Agricultural Department at Washington, from which we have taken a portion of our facts.

A STRAWBERRY SHOW IN CALIFORNIA.

Why should not the "Strawberry Growers" of California have a GRAND EXHIBITION of this Fruit in its season as well as Cincinnati, New York, Boston or Philadelphia?

We call the special attention of our "Strawberry Growers" to the action of the Horticulturists of Cincinnati. They appreciate the value of this delicious fruit, and they win the Public attention to it, by an ANNUAL SHOW in its Season. Cannot the Strawberry growers of the Pacific Coast create an equal interest for this Fruit? Strawberry growers will bear in mind that the *Lovers of Fast Horses* find no difficulty in procuring the gift of $1,500 annually, from our Merchants for a RACE AT BAY VIEW PARK. They are ever ready and liberal. Why not have a STRAWBERRY Show in California this season? Who will move in the work? See what Cincinnati has done. See another column. Their example is worthy of investigation. Who will offer the *First Premium for a Strawberry Show?*

WHITE PINE.

Like the "Velocipede Fever," the rage is now for "White Pine," and men are taking up their *beds* and their "tents" and *making tracks* for *White Pine*.

Well! let them go! "Experience is a good schoolmaster," and White Pine *must* be a rich place; *Silver* must be abundant, for already, if the Records of the Corporations formed are true, they amount to over *One Hundred and Seventy-five Millions of Dollars*. What a nice little sum!

But never mind, were the angel Gabriel to come with his trumpet and blow his signal *now*, we verily believe there are men so unwisely taken up with "White Pine," that they would offer Gabriel *several chances* in their *stocks*, if he would only let them have the use of *their own feet* a little longer to go to "White Pine."

"LET WELL ENOUGH ALONE."

When will our business men and our mechanics learn wisdom, and "let well enough alone" be their counsellor. Where is "Frazier River?" where "Gold Run?" where "Gold Lake?" and where a dozen places, that, like White Pine, may have enriched a *dozen* shrewd and *cunning persons*, but which has empoverished thousands of families, and sent hundreds to an untimely grave, in their "haste to be rich."

Our counsel ever has been, and ever will be, to every business man and mechanic who now can earn a good living, *"let well enough alone."*

CALIFORNIA CHAMPAGNE.

A large amount of money is annually sent out of our State for FOREIGN WINES. This drainage of our wealth is wholly unnecessary, for if our people that drink Champagne would but make a *fair test* of the comparative merits of California Champagne, they would not be so unwise as to pay $24 to $36 per dozen for Foreign Champagne wine, when such sparkling wines as are made by I. Landsberger Esq., on Jackson Street, can be had for *less than half* that sum, and Wines too, that will not cause the *head* or *purse* to suffer comparatively at all.

The examination which has been had at different times by the BEST JUDGES of Champagne Wines have invariably awarded to Mr. Landsberger, the superiority over all Wines made on this Coast.

These sparkling Wines of Mr. Landsberger bear a high reputation not only here at Home, but in the Eastern States and wherever they have been shipped or wherever used they have won the most unqualified approval as pure and most agreeable Wines.

These *Sonoma Champagnes* as they have been termed must not be confounded with any other Sonoma Wines. Mr. Landsberger, though of long years experience, and formerly dealing in the Wines of the "Vinticultural Society" of Sonoma, is now entirely independent of any connection with that Company, having his own Vineyards and Manufactories and managing his own Wine Department upon his own knowledge and his experience of years, and those who desire to test the genuine sparkling Wines of California, should call at 429 Jackson Street, and procure them of Mr. Landsberger.

Mr. Landsberger has associated with him, in the Manufacture of his Champagne and other Wines, Arpad Haraszthy Esq, who spent years in Europe among the Wine Makers, and understands thoroughly all the art of preparing Pure Wines. Our readers will remember Mr. Haraszthy's letters to the FARMER from France for nearly two years.

THE RAIN STORMS.

The late rains have very much astonished even those who consider themselves *weather-wise*. Their steadiness and continuance rather puzzles those who only expected or even hoped for *gentle showers*.

By reports received, we learn that these rains have been quite general, visiting all sections of our State, even to the mountains, where the rain was changed for the Snow White Robe.

Soon now, a few days only, and the genial sun will make the earth put on its Bridal Robes of Spring blossoms, and send forth their fragrant healing breath, like the "Balm in Gilead."

STRAWBERRY PLANTATIONS.

There has been no better time this season to make Strawberry Plantations than the present time. The earth has been warmed, and then again refreshed with rains, and the earth has been mellowed and most peculiarly fitted for the quick growing of the strawberry vine. Beds made now upon good deep and well prepared ground, will produce a crop the present season. Those who desire to enjoy this delicious fruit should lose no time in making their plantations.

OLIVE CUTTINGS.—The Santa Barbara Post says, there were 200,000 cuttings from native Olive trees planted in that county this season.

Editor's Chair.

[Here we shall hold our special watch... our Readers and Correspondents, and ... call their attention to such articles in ... *our Journal*, to which we would direct ... attention.]

PREMIUMS OF THE MASSACHUSETTS AGRICULTURAL SOCIETY.

FISH CULTURE.

The Massachusetts Society for Promoting Agriculture, will, on March 1st, 1872, award two prizes, respectively of $300, and of $200, for the two best establishments for the culture of Food Fishes witnin this State.

A Committee of the Trustees of said Society will determine the awards, and reserve the right to withhold them, if, in their opinion, none of the establishments are worthy of them.

All competitors must send their names and addresses to the Secretary of the Society, before December 1, 1872.

In determining the awards, the Committee will be guided by the following qualifications:

1. The number of species of Fishes cultivated.
2. The number of individuals, and their size and condition.
3. The number of eggs hatched in the establishment, and of the young reared from them.
4. The neatness and economy of the establishment, and the excellence of the fixtures.

PETER C. BROOKS, JR., *Secretary*

Boston, Jan. 18, 1868.

STRAWBERRY CULTURE.

SPLENDID PREMIUMS OFFERED AT CINCINNATI.

For the best New Seedling Strawberry, a Silver Goblet, valued $50,00
Presented by W. Wilson McGrew.

For the best display of Strawberries . . $50.00
Presented by Longworth's Wine House.

For the best display of Strawberries in pots in fruit $25.00
Presented by the Pennsylvania and Ohio Anthracite Coal and Transportation Co.

For the best Three Varieties for Amateur Cultivation, the Plants to be Exhibited in pots in fruit, and with at least one pint of fruit of each variety $25.00
Presented by Robert Clarke & Co.

For the best variety for Market Culture, a plant n pot in fruit, and at leat one quart of berries to be exhibited $20.00

For the best quart of any variety, not provided for in this premium list, and worthy of a premium $5.00
Presented by American Farmer's Magazine.

For the smallest number of berries, not to exceed fifteen, that will weigh one pound . . $15.00
For the best quart Golden Queen . . $5.00
For the best quart Fillmore . . $5.00
Presented by T. W. Sprague & Co.

For the best two quarts of Fruit of any Variety $10.00
For the best quart Triomphe de Gand. . $5.00
For the best Quart Jucunda . . $5.00
For the best quart Agriculturist . $5.00
Presented by T. &. Pickering.

For the best Plant of any kind in pot in Fruit $10.00
For the best quart of Longworth's Prolific $5.00
For the best quart McAvory Superior . $5.00
For the best quart Wilson's Albany . $5.00
Presented by William Stoms & Sons.

For the best quart Napoleon III . $5.00
For the best quart White Pine . 5.00
For the best quart Hovey . . 5.00
For the best quart Russel's Prolific . 5.00
For the best quart Golden Seeded . 5.00
Presented by Louis Ritz.

SWEEDISH OATS.

Brown County, Ohio.—The pound of white Swedish oats furnished me two years ago last Spring by the Department produced seven bushels, weighing 46 pounds to the bushel. After two years of cultivation I find the quality equal to the original, weighing 45 pounds and yielding largely to the to the acre. The straw is very strong, standing up well against storms and wet, and the variety seems admirably adapted to this climate.

WALTHAM

WATCHES.

The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch wearers, has thoroughly demonstrated the

STRENGTH, STEADINESS, DURABILITY: AND ACCURACY

of the Waltham Watch. To satisfy this class in all these respects, is to decide the question as to the real value of these time keepers.

MORE THAN 400,000

of these watches are now speaking for themselves in the pockets of the people—a proof and a guarrantee of their superiority over all others.

THE SUPERIOR ORGANIZATION

and great extent of the Company's Works at Waltham enable them to produce watches at a price which renders competition futile, and those who buy any other watch, merely pay from 25 to 50 per cent. more for their watches than is necessary.

WE ARE NOW SELLING

Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

THESE TIME PIECES

combine every improv ment that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country, or in Europe, only those were finally adopted with severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring timekeeping.

Among the many improvements we would particularise:

The invention and use of a

PINION,

of peculiar construction, to prevent damage to the train by the breakage of main springs, is original with the American Watch Company, who having had the refusal of all other contrivances, adopted Fogg's Patent Pinion as being the best and faultless.

Hardened and Tempered Hair-Springs,

now universally admitted by Watchmakers to be the best, are used in all grades of Waltham watches.

ALL WALTHAM WATCHES

have dust proof caps protecting the movement from dust and lessening the necessity of frequent cleaning, necessary in other watches.

OUR NEW PATENT STEM WINDER

or keyless watch, is already a decided success, and a great improvement on any stem-winding watch in the American Market, and by far the cheapest watch of its quality now offered to the public.

TO CALIFORNIANS

and others living in portions of the United States where watchmakers do not abound, watches with the above mentioned improvements which tend to insure accuracy cleanliness, durability and convenience, must prove invaluable.

Every watch bearing the trade-mark of Waltham is guaranteed to be a thoroughly reliable time-keeper,

To prevent imposition, buyers should invariably demand a certificate of genuineness.

The trade supplied by Messrs. R. B. Gray & Co., San Francisco, Cal., and generally for sale at retail by all respectable dealers.

For other facts and information, address

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO., Farmer Office.

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR AN *ORANGE PLANTATION*,
Can obtain SUPERIOR SEED at the
FARMER OFFICE.

THE KIRBY CLIPPER MOWER!

IT HAS THE

INDEPENDENT

Action!

IS ALL OF

IRON & STEEL

AND OF REMARKABLY

Light Draft!

THIS IS THE

LIGTEST!

CHEAPEST!

AND

Best Single Mower!

IN THE MARKET.

THE KIRBY MOWER AS SEEN ON LEVEL GROUND.

ONE HORSE can work it by putting on Shafts in place of the Pole and then cut TEN ACRES A DAY. Length of cut, four feet two inches.

When you order EXTRAS for this machine, always state the NUMBER OF THE PART WANTED corresponding with the number on the plates on the list, and so GIVE THE NAME of the part when there is no number on it. By carefully preserving the circular, you can always order your Extras by number and by name. The parts illustrated on this sheet are for the Combined Machine, but the Clipper parts do not differ from them in name except in a very few instances.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose.)

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINTS of your guards LOW by means of the forward bolt in the pole where it bolts to the machine; IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL.

Be sure and keep all the Nuts tight and the Journals well oiled, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the Joint tight where the Pitman connects with the Knife, and then your Machine will work well without trouble or expense.

The nature and working of this Machine may be well illustrated by the following incident:

Our General Agent was in Oregon, setting up and starting a machine for a party that wanted to buy "if it suited and would cut anywhere." He led the way around the field followed by the Agent driving the Machine; as he was led off from smooth ground to where it was rough and boggy, and where it had never been cut over before, driver simply bore his weight back in his seat, thus elevating the heel of the finger bar and holding it there with his weight, and at the same time elevated the outer end of the bar with the lever at his right, following CLOSE UP to his leader until the level ground was reached again; then he dropped the bar again, having followed the purchaser close all the way through. His curiosity was roused to know how the Machine was brought through without getting STUCK, and the reply was "it was not made to STICK, it was made to go." followed the Machine around once, and then got on and drove around twice, when a neighbor said: "Mr. Within how do you like the Machine?" His reply was: "To tell the truth it is a little the nicest Machine I have ever seen, for I can sit here and work my hand and feet and balance the Machine with my weight, all at the same time, I will have to keep it," and paid his money down for the Machine.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down again when smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way, for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with a great strain, and be very liable to break.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

Country Homes Wanted.

There is wanted at this time, several Homes in the Country, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they communicate with this office immediately

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.

AUZERAIS HOUSE,

SANTA CLARA STREET,

San Jose, Cal.

J. M. STAPLES, PROP'R.

—ALSO—

LAKE HOUSE,

DELMAR AVENUE,

SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,

31-1 Proprietor of the Auzerais House.

Home Miscellany.

LOOK TO THE END.

BY MRS. H. A. DEMING.

[The following "Gem" we clip from No. 1 of the *El Dorado*, the new Journal just issued as the *Advocate of Women*. This little Poem, is worthy of a place in any Magazine in our land, and reflects great credit upon the gifted author, a lady of this city.—ED. FARMER.]

Speed onward, press on in the pathway of the right,
Wherever that pathway may tend,
Nor falter, though mountains encumber thy way,
But hopeful look to the end.

Though waves of adversity compass thee round,
And threaten thy bark to o'erwhelm,
With hope for thy beacon, strike manfully out
The fierce rushing torrent to stem.

Use wisely the talents, though many or few
Which God in his goodness has given
To man, to be rendered the Giver, when death,
The soul from earth's fetters has riven.

Waste no priceless moments in idle regrets—
'Twere mingling life's sweetness with gall,
We know the present alone can be ours,
The past we can never recall.

Never swerve from a duty, however severe,
Let the world frown or blame as it may;
Ever follow the dictates of Justice and Truth—
The whisperings of conscience obey.

And when, near the close of life's perilous race
Thy way to the goal thou dost wend,
At peace with thy God, and mankind thou canst
And fearlessly look to the end. [pause.

BETTER CHEER.

Tides ebb again to flow;
Lights pale again to glow;
This, Nature, under-read,
Hath to all creatures said.

And God's is Nature's tongue;
Wherever Faith has sung,
In prose or flowing rhyme,
This truth has grown sublime.

Be ye of better cheer,
Who graveward grope with fear;
From out that silent gloom
Life springs to fairer bloom.

Our woes but crush the weeds
And scatter goodly seeds;
Whose harvest-moons shall rise
In everlasting skies!

(*Overland Monthly.*)

BEAUTY.

Beauty the offspring is of a free soul
And vigorous healthiness. Free tribes of men,
Who have thought nobly, greatly,—simply lived—
Have in the mass been fair. Would'st thou have beauty,
Then give the people freedom, noble aims,
Busy them with great work. Humanity,
Even on the way to freedom, as its thought
Grows freer, nobler, and it sees and lives
Most truly, is already on the way
Into that realm of beauty which one day
Shall bloom on earth; for beauty of the form
Does not express a beauty of the soul.

FATHER WILL LOOSE ALL.

Two brave little boys were drowned last June, in a river which flows through the State of Minnesota, and has the same name—Minnesota River. The two little boys asked some one at home if they could go out walking, and when they were told they could go, went down to the river.—What they did for awhile, nobody knows, for they never came back to tell. By-and-by, one of the two, who was nine years old, went into the water to bathe, but soon he got out too far, and began to sink. The brother, who was older, saw him, and went in to help him out. Instead, however, of being able to help him, both the brothers got into still deeper water, and began to go down to the bottom of the river.

Well, you know that the bodies of those who are drowning almost always rise to the top of the water. So it was now, just as the boys rose to the surface, they saw the third boy—the youngest of them all—running down the bank to try what he could do to save them.

Then it was the middle-aged of the brothers—the one who was only nine years old—acted the part of the hero. In the midst of the waters, trying as he must have been, to get breath, and seeing only death before him, he cried out to the brother on the shore: "Don't come in, or father will lose all his boys at once?"

Was he not a hero in his way as much as many a soldier, whose deeds of glory as they are called, are talked of, praised, and written about in books. He was a tender-hearted boy surely. In the last moment he thought of his father. As quickly as the telegraph flashes the words from city to some near town the thought of this poor father's distress, and how if this young remaining brother should be drowned, their father and mother could not like Rachel be "comforted"—shot through the mind of this noble little fellow.

The youngest stood still upon the shore, and saw his dear playmates go down into their watery grave alive, and then went back to tell the tale, and the message of his hero-brother.

The earthly remains of the little ones were found clasped in each other's arms, in the tight grasp of death.—*N. Y. Observer.*

LYDIA MARIA CHILD ON BOSTON—CHANGES AND INTERESTING REMINISCENCES.

Lydia Maria Child writes from Boston to the Anti-Slavery Standard some time ago as follows:

"A visit to Boston always make me feel extremely old; things in that city are so different from what they were when I was a gal! Houses where I was once a familiar guest have disappeared, and on their sites have risen magnificent stores, through whose windows of immense plate glass all the fashionable extravagances and artistic graces of Europe are exhibited. In fact, stores multiply so fast that they seem to be banishing houses from the city, as the ambitious spirit of trade is banishing our old domestic ideas and habits.

No alterations in Boston strike me so much as the change on the common. In my young days the lower part was an uneven, marshy space, unsightly and desolate. Now it is covered with blooming gardens, picturesque arbors, enclosed parks for deer and artificial ponds, where handsome aquatic birds are floating about, fed by troops of pretty children. I noticed that the white swans and the black swans were swimming together, undisturbed by difference of color; and it occurred to me that civilized man was in some respects more foolish than birds.

I was going to say that the city was now ornamented by various statues of public men; but I hesitate about using that phrase, being somewhat doubtful whether the statues are ornamental. That of Daniel Webster, in ungraceful, ill-fitting costume, gives a poor idea of the magnificent looking man he really was. My first impression of him was received while he was arguing against William Wirt, in the famous Tuttle-Hubbard case, before I thought about slavery. I think it was in 1829.

The statues of Horace Mann, and Edward Everett have one defect in common; in both, an attitude belonging only to the transient motions of oratory is rendered permanent in bronze; and the effect is necessarily ungraceful and constrained. As I paused in my walk to look at the image of Everett various reminiscences flitted through my mind. I recollected hearing him for the first time, in Plymouth, in 1826 or 1827. While all around me were praising his eloquence, I remained silent; and when my friends insisted upon knowing how the speech affected me, I replied: 'It is rhetoric, not eloquence. It plays round the head, but not a syllable of it reaches the heart.' The declaration was deemed heretical, and somewhat presumptuous. But I had answered according to my instincts, and I never changed my opinion.

Some thirty years afterward, before John Brown had begun his march with 'Glory Hallelujah!' Mr. Everett delivered an address on Bunker Hill, where Mason of Virginia also performed, and where Toombs of Georgia proposed to call the muster-roll of his slaves, and with a very promising prospect of realizing his insolent project. The Sunday preceding that memorable occasion, I happened to hear Theodore Parker preach concerning the changes of character in this country since the Puritans. In allusion to the approaching cerimony at Charlestown, he said: 'This week there will be heard on Bunker Hill that most foolish of all noises: the human voice when it means nothing, comes from nowhere, and goes to the place it came from.' As I stood looking at the outstretched arm of the popular rhetorician in bronze, the attitude recalled an anecdote which made me smile.

When Mr. Everett was preparing a lecture or address, he is said to have been in the habit of arranging everything very carefully beforehand. When about to deliver a speech at Lexington, in commemoration of the battle on the 19th of April, 1775, he inquired whether any one who fought on that occasion were still living. Being informed that one old man survived, he called upon him, and, after some conversation concerning the events of the Revolution, he said: 'In my address I shall make an allusion to those who fought at the battle of Lexington. I want you to sit in front of me, and when I begin to allude to those heroes, I want you to stand up.'

The old soldier obeyed his instructions; but as soon as he arose from his seat, Mr. Everett extended his arm, as the statue now does, and exclaimed, 'Sit down, venerable sir! Sit down! It is for us to stand in your presence.'

The aged man obeyed the direction, but in the simplicity of his heart he was quite bewildered by such contradictory orders. He had no idea how effects were produced in oratory, and he afterwards said to a friend: 'I don't know what Mr. Everett meant. First he told me to get up, and then when I got up he told me to sit down.'

All this, and much more, the statues said to me when I was in Boston a few weeks ago. I might repeat various thoughts that passed through my mind while looking at the statue of Franklin, and how I shook my head at it reproachfully, and said: 'Ah, if you had done your duty like an honest man when the Constitution was formed, the horrid war of the rebellion would never have stained our annals.' But when old folks undertake their reminiscences and their wise cogitations, they are in danger of being more lengthy than interesting So I will bid you adieu for the present.

L MARIA CHILD."

—A lady and gentlemen of Troy, N. Y. whose connubial bliss is perfect in everything save the presence of children around the domestic fireside, were examining some illuminated mottoes in a bookstore the other day, when the wife picked out one bearing these words: "God bless our home." The husband thought that very good, but still not exactly what they wanted Looking a little further he picked up this one: "Suffer little children to come unto me," and he assured his wife that was what they wanted.

—Hoops have been compared to obstinate persons, because they stand out about trifles.

—In the languague of flowers—if you wish for "hearts ease," never look to "marry-gold."

INGRATITUDE.

AN OLD MAN IMPRISONED BY HIS WIFE AND SONS.

Many of our citizens remember Mr. James Gibbon, a worthy and respectable farmer, who for a number of years has resided on a farm about fourteen miles from the city. Some months ago he became unfortunate in business, and while laboring under pecuniary embarrassment, made an assignment of all real and personal property to his sons. Time wore on, and as the cloud of adversity which had temporarily covered his fortune passed away, he applied to his children and requested them to relinquish the property which he had assigned to their care. Strange as it may appear this reasonable request was refused, and a system of persecution was at once commenced against the old man, which rivaled in malignity and wickedness the filial ingratitude displayed by the daughters of King Lear, the story of whose wrongs has been immortalized by England's greatest bard. The poor old man, tottering on the verge of the grave, was refused the custody of that property which he had acquired through years of toil, and was daily subjected to persecution and insult at the hands of his unnatural offspring, to whom he had always been a kind and indulgent parent, granting them everything that was in his power to supply. But a few years ago his oldest son emigrated to Idaho, but being unfortunate in business returned to the parental roof, ragged and destitute. The father took him in, gave him his old seat at the family board, and provided him with money and clothing—an act of kindness which the hopeful offspring now repays by the most shocking ingratitude. The conduct of the sons, it seems is sustained by he mother, who turns against her husband and vies with her sons to render his lot a hell on earth. A few weeks ago Mrs. Gibbon preferred a charge of assault and battery against her husband, and on this charge, false in every essential particular, he was brought up for trial before a justice of the peace, and, on the false swearing of numerous witnesses, engaged expressly for the occasion by the plaintiffs, found guilty and fined in the sum of fifty dollars. In vain Mr. Gibbon implored his sons to advance the money and remit his fine, or become his security. With a depth of cruelty and ingratitude that almost surpasses belief, they refused to do either, but allowed the old man to be led away a prisoner to this city, where he is now held in close confinement in the county jail.—*Dubuque (Iowa) Times.*

This is but one case in a thousand which could be illustrated in the Golden-land of "Eureka." What a history of filial ingratitude could be written were the secrets of families to be made known, even in the favored State of California!

MINCE PIE WITHOUT MEAT.—Take figs and rasins, add convenient proportion, chop and add a little lemon juice or chopped sour apple. Stew it before putting it into the crust. This requires no sweetening or flavoring, and is perfectly beautiful. Materials can always be got, and are no more expensive than those which require sugar to sweeten them.

No man has a right to bring up his children without surrounding them with books. It is a wrong to his family. He cheats them. Children learn to read by being in the presence of books. The love of knowledge comes with reading, and grows upon it. And the love of knowledge in a young mind is almost a warrant against the inferior excitement of passions and vices. It is a man's duty to have books. A library is not a luxury, but one of the necessaries of life.

"He who will not provide for his own household is worse than an infidel," thus says the Scripture.

—John Neal says "the eagle has a contempt for all other birds." The owl, however, is more contemptuous still—he hoots at everything.

—Nothing so completely baffles a man who is full of trick and duplicity, as straight-forward and simple integrity in another.

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirous of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO.

94-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world: publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal: its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

THREE OLD SAWS.

If the world seems cold to you,
Kindle fires to warm it;
Let their comfort hide from view
Winters that deform it.
Hearts as frozen as your own
To that radiance gather;
You will soon forget to moan,
"Ah! the cheerless weather!"

If the world's a wilderness,
Go, build houses in it;
Will it help your loneliness
On the winds to din it?
Raise a hut, however slight;
Weeds and brambles smother;
And to roof and meal invite
Some forlorner brother.

If the world's a vale of tears,
Smile till rainbows span it;
Breathe the love that life endears,
Clear from clouds to fan it.
Of your gladness lend a gleam
Unto souls that shiver;
Show them how dark Sorrow's stream
Blends with Hope's bright River.

THE PARIS GIRLS.

At the public balls you will remark the rare beauty of the girls—girls and women of the people. The black-eyed or blonde Parisian, slender, graceful, nervous, all fire and action; or the peasant girl, large, round, soft, ruddy, quiet. One obscure Paris model, I knew, was a tall, blonde Lombard girl, with luxuriant tawny hair, which, always in "admired disorder," was simply drawn back and twisted on the head. She loved Victor Hugo's books, was a Red Republican, and would have fought and sung on the barricades like an Amazon of Liberty, with the same careless spirit that she sang and sat in Parisian studios. She had eyes blue as her own Adriatic, a finely formed full mouth, a fair skin, and a superb neck, well placed. She carried her head like a swan. Although poor, almost homeless, no social slavery had touched her. Her face was wild and free like a Bacchante's. A great painter could have found an immortal type in her large noble face and heroic figure—could have seen under the rags of her poverty an antique virgin, sister of the Venus of Milo. How long would an artist have to hunt in New York or Boston for such a type? We produce one type—"the girl of the period"—who generally overdresses, who is pert and trivial, who is intelligent and vivacious, but dreams just as little as her brother the clerk, or her father the banker. They have but one idea—it is to advance. The girl of the Continent dreams, feels poetry, is impressionable, naive, and has sentiment; if of the people, she is generous, and respects her impulses. I have seen in Paris, at the public concerts, French girls, white and blonde, demure and frail, delicate like New England sunday school teachers; looking at them, you could not expect anything but a tract or a hymn, but they give you something very different.

A type very often seen is the beautiful dark woman, with an oval face, dead olive skin, very pale, Oriental eyes, stained with henna, hair in great flat bands on the temples, coiled and twisted behind, a type admired by Gautier, Baudelaire, and De Musset; the kind of woman of whom De Musset wrote: "Two destroying angles, sweet and cruel, walk invisible at her side; they are Voluptuousness and Death."—*Atlantic Monthly.*

ALL ABO T LOOKING GLASS.

A few years before his death, the Emperor Nicholas of Russia sent a looking glass of rare size and beauty, with an embassy to the Emperor of China. The looking glass had to be carried all the way from St. Petersburg to Pekin by human hands. Despite the immense distance which had to be performed in this manner, the looking glass safely reached China; but, in the meantime, difficulties had broken out between Russia and China, and "The Son of Heaven" neither admitted the embassy, nor did he accept the present. A ~~courier~~ was dispatched to St. Petersburg, and asked the Emperor what was to be done with the looking glass. The Emperor replied that it should be carried back by the same route and in the same manner. When he gave this order, the Grand Duke Michael happened to be present, and offered to lay a wager with the Emperor to the effect that the looking glass would be broken on the way back to St. Petersburg. The Emperor accepted the wager, and the bearers of the looking glass received stringent orders to be as careful as possible. If they should break it on the road, they should be severely punished; but if they should bring it back safely, they should receive a handsome reward. They carried it back with the most incredible care, forty men bearing it by turns, and safely reached St. Isaac's place in St. Petersburg with it, where the Emperor stood with his brother at the window of his palace, and laughed at having won the bet. But on the staircase of the palace one of the carriers slipped his foot, fell down, dragging several of his companions after him, and the precious looking glass was broken into a thousand pieces. The Grand Duke, therefore, won his bet.

A nervous man, whose life was made miserable by the clattering of two blacksmiths, prevailed upon each of them to remove, by the offer of a liberal pecuniary compensation. When the money was paid down, he kindly inquired what neighborhood they intended to remove to. "Why, sir," replied Jack, with a grin on his phiz, Tom Smith moves to *my* shop and I move to *his'n!*"

Lumber at White Pine.—It don,t take much to build up there, Lumber sells at $ 250 to $ 350 per thousand. Why don't some live yankee put up a saw mill, and make his pile."—

——Learning makes a man fit company for himself.

IRON STEAMSHIPS AND HOW TO BUILD THEM.

The days of wooden hulls and sailing vessels are numbered. The iron hull, properly constructed, outlasts, perhaps, half a dozen wooden hulls—the first iron ships, if not running to-day, were only broken up because they were too old fashioned. The iron hull greatly increases strength, durability, carrying room, and capacity for fine lines, heavy enginery, and consequent high speed, with a given displacement. And regularity of arrival and departure, and the consequent economical regulation of all associated business transactions, have rendered steamships preferable to sailing ships, even to carry coal, which of all freights can afford to wait. Wind costs nothing, but time is money, and steam and time, like power and heat, are convertible terms. Few if any wooden or sailing vessels are building in Great Britain, and our leading constructors and merchants admit that iron steamship building must be the leading feature in the reserrection of our ocean supremacy.

The history of iron ship-building in Great Britain is full of instruction, and if our builders are wise, they will profit, not only by the mistakes, but by the talent and experience of European constructors. The early iron ships were well built, of plentiful and good material, but not with the greatest economy of it, and many of them are running to-day. Their wonderful endurance in seaways and on lea shores is proverbial. Afterwards the business was overdone, just as locomotive building was in this country a few years ago, and as a result cheap and bad work; *Royal Charters and Connaughts* were put afloat to the peril of money as well as life. And at last science came to the rescue; less material is so placed as to insure greater strength, and people are beginning to pay good prices and to get good work out of good ships. The successful transatlantic companies do not go to second-class builders; they cannot afford to run cheap ships.

There are no second-class iron ship builders in this country yet, and this is the promising feature of the enterprise. If our builders never turn out work, they and our merchants and the public will be vastly the gainers in the end. We can better postpone iron ship building another decade than to lower the standard of American work.

And still greater reforms and improvements must be introduced. Thick plates where they cannot work, must be abandoned. A rib placed where it can receive a maximum strain, costs no more than a rib placed where it is merely dead weight. A ship is primarily a beam. As a beam it receives every strain of the sea. Now, a bridge or any girder made up of a thin, light web, running from end to end, and great vertical parts without longitudinal connection, would hardly sustain itself. Yet a ship so constructed is expected to hold up the enormous weight of its unsupported ends every time they overhang the trough of the sea, and of its partially supported middle every time the ends are buried in the waves—a constant and powerful vertical and lateral strain upon every joint in the hull. The great strain on a ship is the perpetual pulling apart and shutting together of its bottom and deck in a longitudinal direction, and yet the greater number of iron ships have been built without sufficiently strong bottoms and without any top strength except their sides. Many ships have first broken apart at the top sides and then gone to pieces. Heavy, continuous iron decks along the sides have partially remedied this evil. But the grand reform in this direction is to make the frames, the ribs of the vessel, longitudinal instead of vertical. Now, they are chiefly studs upon which to nail the siding. By making them continuous from end to end, they perform every present function and add their enormous strength, *in the direction of the greatest strain.* Some genius has objected to the longitudinal rib system because the ribs of fishes are vertical. But while the rolling top of the sea forms a constantly varying support for a ship, a fish swims in a uniform medium that would not bend a reed—not on the water, but under it—and it has been observed that ships built like fishes have a tendency to do the same thing.

If our iron ship-builders will place our superior iron only where it can work, so as to use less of it, they can at once and successfully compete with foreign builders in cost and quality, and so revive not only our workshops, but our merchant marine.—*N. Y. Times.*

A scarecrow has been invented down East of so hideous a character that the crows are bringing back the corn they stole last year.

In New York it has been discovered that the beef tongues and beef tea sold there, are made of horse.

THE PHOTOSCO COMPANY.

THE NEW INVENTION of this Company is known as ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture in the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest effect of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION of this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changible pictures, arranged to suit the wishes an desires of each owner of the table,

THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

The Company have opened a Suit of Rooms for Exhibition and sale of the PHOTOSCOPIC TABLE at the corner of St. Marks Place, No. 23 KEARNY St., west side, up stairs, to which they cordially invite the public to examine them.

HUCKS & LAMBERTS'

CELEBRATED PATENT

H.&L. AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

is on the red cover of the package.

Depot, 320 Jackson Street,

HUCKS & LAMBERT,

Inventors and Sole Manufacturers,

146 Natoma street, San Francisco.

THOMAS H. DOUGLAS,
Storekeeper and Wharfinger.
Or to I. FRIEDLANDER,
119 California street.

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

[Corrected Weekly, by Editor Farmer.]

San Francisco, March 18.

Grain, &c

We ask the serious attention of all our grain growers to the true condition of their interests at the present moment—we ask them to give a little serious reflection to this matter *now*, for their real *weal or woe* depends upon their own decision *now*.

Every grain grower in our State should realize his own position, his own interest is at stake. The accounts from Europe, and from the Eastern States, all now show a heavy decline and also, a tendency to a still lower price, and almost a moral certainty of losses to those who have shipped grain and flour from this side for the last few months, and the result of these losses may affect the grain trade here, for there is no telling *where* the "shot will strike;" large shipments and large speculations in "Bread Stuffs" *make or mar* many fortunes.

We would sincerely advise our *Grain Growers* to make up their minds to a low price at the opening season, for with the *very large amount* of wheat that must now be held over, the facts are inevitable, that we shall be largely *overstocked*, and prices must rule low.

Everything rules against high prices for the next *two years*, and the decision now with the Farmers should be, *realize for your Grain crops the best you can now.*

In nearly eight months past, we have foreseen the present state of things and constantly, and steadily we have sent out the "watchword" to Farmers, Sell! Sell!! Sell!!! Those who sold were wise—those who listening to the *unwise counsel* of the Sacramento *Union*, "Hold on," may now count the cost and learn wisdom for the future.

The present copious rains, and the certainty of more than fifty per cent. larger crop than last year should convince our growers of grain that Wheat will be sold at that figure before the new crop comes in.

There are *thousands* and *tens of thousands* of tons of Wheat now on hand scattered through the State, which could have been sold at $1 75 to $1 95, that will not realize $1 50 to-day. So much for the "Hold On" doctrine of the Sacramento *Union*. Our Farmers owe a debt of ———— to the *Union* for their sage counsel?

The wool crop of our State will be large, and promises to pay well. Prices are advancing East.

Retail Prices in the Fruit Market.

During the past week we have had a good supply of Apples from Oregon; also, Bananas and Pines, from Panama, Lemons and Oranges from Los Angeles. The Bananas and Pines were, indeed, fine and excellent. Oranges and Lemons, good. The Apples, as a rule, were of second-class quality. Strawberries come to hand in small quantities, and are comparatively flavorless, which may be attributed to our Spring showers. Good Pears are very scarce, consequently bring very high prices.

Retail Prices in the Vegetable Market.

Vegetables of all varieties in season are plentiful and very moderate in price. Our gardeners are arousing themselves to more active and persevering industry. They are persuaded of the fact that San Francisco Market is becoming more on an equal, with New York, and European Markets. Times are not now what they were years ago, when outrageous prices were to be had for produce. Gardeners in those times, as a rule were indolent, raising just sufficient to keep the wolf from the door, now they have to labor, well knowing that prosperity alone depends upon their own energy, and proud are we in knowing that many are much better off now than they were at the time of high prices. The old maxium is being verified "the hand of the diligent maketh rich" price below.

FISH

(Tessmore and Hayes.)

The Market continues to be well supplied with all seasonable varieties of the Pisces class. Salmon Trout also, are extremely reasonable in price. Herrings have become abundant; nevertheless, the price they bring is very high in proportion to the prices of other Fish.

MEATS-

(L. Miller & Co.)

Our Butchers have not made much of a display during the past week. We presume it is in consequence of good Beeves and prime Sheep being rather scarce.

The fault is with the graziers, and not the retailer of meats. We again assert that the finest and best of Sheep and Beeves can be raised in this State, and with far less expense and trouble than in many other climates—proper and seasonable crops *must* be grown for the purpose of fattening cattle, etc., for the Market.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates a given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

March 10th—GOLDEN CITY, Capt W. F. Lapidge, connecting with ALASKA, Capt. Gray.

March 18th—MONTANA, Capt. E. S. Farnsworth, connecting with RISING STAR, Capt. Connor.

March 30—COLORADO, Capt. W. H. Parker, connecting with HENRY CHAUNCEY, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—If desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

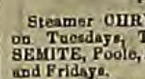
For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

se6 OLIVER ELDRIDGE, Agent.

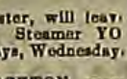
California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL



THE FAST AND SPLENDID STEAMERS



CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings. Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17.13 J. WHITNEY, JR., President

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtill further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9 50 A. M.; Reno at 4.20 P. M.; Wadsworth at 6.30 P. M. Winnemucca at 3 30 A. M.; Argents at 8 50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argents at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12 05 P. M. Reno at 2.19 A. M. Colfax at 9.50 a. m. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6.30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermitt, Silver City, Owyhee, and all points in Idaho Territory.

At Argents with Stages for Austin, and at Elko with Stages for White Pine, and Overland Stages for Salt Lake City and the Atlantic States.

We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

—o—

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PL... in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. M... Vermifuge, they very frequently get one or other of the many worthless preparations called V... now before the public. We therefore beg leave to urge upon the Planter the propriety and ... ance of invariably writing the name in full, and to advise their factors or agents that they will not ... other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BRO... BURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS, ... popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements ... alent in the South and South West, has induced the venders of many worthless nostrums to claim for ... parations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are ... ginal and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the P... Merchant, as he values his own and the health of those depending on him, to be careful in ordering. Do ... Vermifuge nor Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG, P...

DR. M. LANE'S CELEBRATED LIVER PILL...

FOR THE CURE OF

Heptatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for LI... BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER CO... and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the ... South, where, in the majority of cases, the patient is not within the reach of a regular physician, ... some remedy should be provided, that would not in the least impair the constitution, and yet be safe and ... That such is the true character of DR McLANE'S LIVER PILLS, there can be no doubt. The ... which has invariably attended their use, will, we think, be sufficient to convince the most incredulous ... our sincere wish that these Pills should be fairly and fully tested, and stand or fall by the effects ... they have been so tested, and that the result has been in every respect favorable, we call thousands ... who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the popular ... the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms ... deranged state of that organ.

DISEASES OF THE LIVER.

The Liver is much more frequently the seat of disease than is generally supposed. The function ... to perform, and on the regular execution of which depends not only the general health of the body ... of the Stomach, Bowels, Brain, and the whole Nervous System, shows its vast and vital importance ... health. When the Liver is seriously diseased, it in fact not only deranges the vital functions of the ... ercises a powerful influence over the mind and its operation, which can not be easily described. It ... connection with other diseases, and manifests itself by so great a variety of symptoms, of a most doubtful ... that it misleads more physicians, even of great eminence, than any other vital organ. The intimate ... which exists between the Liver and the Brain, and the great dominion which I am persuaded it exerts ... passions of mankind, convince me that many unfortunate beings have committed acts of deep and crimin... or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I ... convinced that more than one-half of the complaints which occur in this country, are to be considered ... their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of ... Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequ... of which we afterwards ashamed; last, though not least, more than three fourths of the diseases ... under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful ca...

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, ... pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; ... pain is felt under the shoulder blade, and it frequently extends to the top of the shoulder, and is ... taken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bow... ral are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a ... sensation in the back part. There is generally a considerable loss of memory, accompanied with a ... tion of having left undone something which ought to have been done. A slight dry cough is sometimes ... ant. The patient complains of weariness and debility; he is easily startled; his feet is cold or burn... complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that ... be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts ev... Several of the above symptoms attend the disease; but cases have occurred when few of them existed, ... ination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when ... Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or ... Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not ... or three times by next morning, take one or two more; but a slight breakfast should invariably follow ... The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they ... to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight ... of the Stomach.

DR. McLANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropi... consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer is ... cause is frequently overlooked, and consequently the proper remedy is not applied. But when the pa... fant, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to ... cause. It ought here to be particularly remarked, that although but few worms may exist in a child ... ever quiescent they may have been previously, no sooner is the constitution invaded by any of the ... of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it ... happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause ... to treatment, judicious in other respects, but which entirely fails in consequence of worms being ... even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be ... loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, ... with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, ... al flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; ... circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the ... occasional headache, with humming or throbbing of the ears; an unusual secretion of saliva, ... tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with ... sensation of the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea ... violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequ... with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied ... cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper ... but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE RE... UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to ... in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffe... viding the symptoms attending the sickness of the child or adult warrant the supposition of worms being ... In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN ... IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest ... most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened ... morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening. ... a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLA... great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons ... palming upon the public counterfeit and inferior articles, in consequence of which the proprietors ... forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following ... of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. McL... FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as ... McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PROP... This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have ... stamped on the lid of the box, in red wax.

Prepared only by

FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLane's Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

AMERICAN INSTITUTE FARMERS' CLUB.

IMPROVED TOOLS FOR ROOT CULTURE.

The same gentleman read a paper on Root Culture and the appliances by which it can be conducted with the least cost. In view of the growing wants of a great and growing people; in view of their ease of production and enormous yield; in view of the partial and, I trust, temporary deficit of the oat and potato crop; in view of so desirable a comfort and convenience to the wants of the table, the more extended and general cultivation of the Root Crop, as it is called is a great national desideratum. Taking into consideration the vicissitudes and casualties of grain-growing, coupled with the enormous price our Eastern lands have reached, as Prof. Cook of the Geological Survey informs us, the average in New Jersey being, according to our last census, more than $60 per acre, grain-growing and grass farming must, in a measure, be remitted to the great prairies of the West. Some writer in a late number of the Tribune very justly remarks that we are "entering an age of ideas." The truth is, our ideas are too aged already. The time has undoubtedly come when progressive improvement is the necessary order of the day. Improved implements of culture must offset the continually increasing scarcity and consequent rise in value of good land, skilled labor, and fertilizers. Hence, that the common farmer must switch off and come up in the right track, or the profit margin will grow beautifully less.

The faults of ordinary management are first: The impoverishment of the soil by continued overcropping; second, the omission of a suitable preparation of the soil by reckless and indifferent plowing.

Such an apparent violation of well-known principles, nature abhors, and very soon asserts her better judgment, by witholding the desired increase. Begging your pardon, gentlemen, I only quote the words of another when I say 'nature knows better than man what the roots want.' Root crops, as they are called, delight in a kindly soil, and gentle and careful treatment. They bask in the sunshine if our most favored season is but a short one. Hence, every possible encouragement should be given. All garden pulse or edible vegetables should have a quick and strong growth to insure that succulent, tender sweetness so much prized. On most farms, after a fair preparation of soil, the crop is planted, in rows of course, but generally too close together for profitable working. The extra labor required comes at just the time when the farmers can ill afford it, and this I consider one of the most serious drawbacks to successful Root-growing. This ambition to compete with the New York City Market Gardens is only a successful failure, as it involves too great a division of interests, a fact too often overlooked. Now, what is the remedy for this defect? Give the crop reasonable space, enough to allow working by horse-power; not less than two feet, and for broad leaved roots even three feet will oftentimes be found practically advantageous. This question of Agricultural labor is becoming a matter of no small importance, as out of it grow 50 per cent of the issues of life or death to farming. It is the farmer's mint where he coins his gains and losses. The hired farm laborer gets say $28 per month, or counting eleven months actual labor performed $308 per annum. It would take but a meager calculation of figures to show that the ordinary farmer who depends upon his profits to make both ends meet, must practice the most stringent economy. The crop planted, of all crops demands, in the most arbitrary manner, timely care and attention, for irrevocable injury will certainly ensue if they become early enveloped in weeds. And with labor above high-water mark, and most thoroughly unskilled at that, he makes a virtue of necessity, procures a skeleton or narrow mold-board plow, "sinks it into the hub," cuts off the feeding roots, and ruins his crop. The preparation of the soil I consider a matter of the highest importance. If we select a site unadapted to fruit, ever so much money, skill, time, and patience, only grievously adds to the breadth and depth of certain failure, and forthwith fruit-growing is deried as a doubtful investment. What incalculable advantages might have been reaped had this point been as deeply impressed upon our mind at the outset of life as years of sad and disastrous failure has fully demonstrated it. Never plant roots in ground ill prepared. Better wait till the "right time of the moon" goes down and comes up again, than plant in soil not properly prepared. It is a well-known axiom also that soils acquire fertility by exposure to the influence of the atmosphere; hence, after a tedious and protracted spell of unfavorable weather how often do we see the whole force of the farm summoned to subdue the army of weeds that are holding wild revel over the infant crop. Now one hour's efficient working of some labor-saving implement would be disastrous, enabling him not only to save his crop, but putting it in his power to do just the right thing in just the right time. For the relative and comparative value of the Root-crop for both nourishing and fattening purposes a few brevities condensed from writers of authority may suffice. One says all roots have "valuable nutritive qualities," some to a surpassing extent. Of the high value of the potato we need scarcely speak. Suffice it to say, 2 pounds of raw potatoes afford as much nourishment as 1 pound of good hay. Yet, I believe better results invariably follow a judicious variation of food to man and beast as well as to land. Five pounds of carrots and six pounds of oats are considered equivalent to ten pounds of oats. The average cost of raising carrots in the old way may be reckoned at 15 cents per bushel. 1,800 bushels of mangolds have been raised per acre at a cost of 7½ cents per bushel, of which, according to experiment, 400 pounds were equivalent to 100 pounds of hay. Allowing 60 pounds to the bushel, the crop produced was equal in nutritive value to 12 tuns of hay. To grow its equivalent in hay on an acre would of course be impossible. Take one more very familiar illustration: An ordinary crop of winter cabbage, planted three feet apart each way, an acre will yield 4,785 heads, which, at the retail price, now selling at 15 cents per head, would be $717 75, and even at 10 cents per head, brings $478 50. I propose to show how this crop may be grown with scarcely one tenth the labor usually bestowed upon it. As a necessary connection, therefore, to the important work of cultivating Root-crops, I suggest the use of a more efficient and labor-saving implement than any known to the trade. Every one knows how much better is the preparation of the garden by forking up and raking than by turning with plows and harrowing, and the implement desired now—in the place of the plow—is one that shall *fork, dig,* and *rake* at one operation; stirring the ground to sufficient depths, leaving it as nearly as possible in the condition of a garden bed prepared with a fork and rake. Such an implement I have invented, and propose to introduce. To this small model of it, I respectfully invite the attention of this Club. The essential features aimed at in the Strawberry or Root Culture is to stir the soil without turning any furrow. Efficiency without complication is the golden rule for farm implements. The faults and vices of complication are prominent causes of many and repeated failures. Simplicity is usually economy, especially in agricultural implements. For obvious reasons farmers are not always mechanics, nor is the field a mechanic shop. The delay occasioned by breakage is a serious source of vexation and loss. On surfaces moderately smooth and clear of fast stones and of roots, the only description of soil where it would be sensible to grow roots, I claim new and remarkable excellencies in the working of Root crops—Strawberries, Corn, Cotton, Tobacco and Hops—for "Day's Improved Cultivator and Horse Hoe." The small models exhibited were examined by various members of the Club, and the principle on which they work was approved. When actual working models are built, a committee will be appointed to make full trial of Mr. Day's improvements.

THE SEASON OF 1868 IN ENGLAND.

The year 1868 is replete with events of no ordinary character, whether we look at the moral, social or political features by which it has been distinguished. But even further, the past year has been an extraordinary one. The summer was remarkable for a degree of drought and heat such as have seldom been experienced in this country, and which has had a marked and varied influence on agriculture. The wheat crops alone have experienced but partial injury from the season, and that on the lighter lands. On the heavy and mixed soils, well cultivated and drained, the crop is an average one. But the spring corn of all kinds, the hay and root crops of ever description have suffered severely, and the prices, especially of barley, have risen beyond all comparison, relatively with wheat as the standard. In fact, taking weight for weight, the price of barley is some shillings higher than that of red wheat, and it is still advancing. It was fortunate for the farmers that the hay crop of the previous summer was exceptionally heavy, many having stacked enough for two years, the excess coming well in aid of the deficiency of the present year. But such has been the want of fodder in numberless instances that the stock have been kept alive only by the hay left over, there being little or no grass in the pastures. The root crops, especially turnips, have with few exceptions, suffered severely. On the light lands the first, and in some cases the second and even the third, sowing of turnip seed did not come until the rain fell after harvest, when the seed vegetated, and, favored by the openness of the autumn up to the present time, the roots have made considerable progress, so as to yield food for sheep and young cattle. Still, the loss of the turnip and mangold for fattening purposes will be severely felt by the farmers and graziers, and will compel them to purchase largely of artificial food, which must considerably enhance the price of meat as the season advances. The price of wheat which at the commencement of the season was high, has gradually given way, but is now considered to have reached its minimum, and the market will probably experience a reaction as soon as the supplies fall off, which will be the case, both with foreign and English grain, until the frost breaks up in the wheat exporting countries. On the whole, the year has been one of varied success with the farmer, and will be long remembered for the almost unparalleled series of dry and warm weather in our usually temperate climate.—*Mark Lane Express, Dec.* 28.

AMERICAN POMOLOGICAL SOCIETY.

The committee and officers of this association convened at the Astor House in New York last week for the purpose of carefully revising the Catalogue of Fruits preparatory to its next regular session, to be held in Philadelphia on the 15th of September. The following gentlemen were present: From Massachusetts, Hon. Marshall P. Wilder, President, C. M. Hovey, J. F. C. Hyde and Robert Manning; from New York, Chas. Downing, P. Barry, George Ellwanger and H. B. Parsons; from New Jersey, Dr. I. P. Trimble, State Entomologist, William Parry and P. T. Quinn; from Pennsylvania, Thomas Meehan of the Gardeners' Monthly, Rev. J. Knox, Josiah Hoopes, H. B. Bockstoce and Mr. Hersteine; from Ohio, F. R. Elliott; and William Saunders and John Saul from Washington.

The President called the meeting to order at 10 A. M. on Wednesday and spoke briefly. He remarked that this was the first National Pomological Society ever formed in the world, and that the example had been followed by England, France, Belgium and other European nations, and that these institutions had exerted an immense influence over their various localities. The American Pomological Society now spreads its banner over the whole of the United States and Canadas, and embodies in its members an amount of scientific and practical information rarely to be met with in any similar association.

The session was occupied in the examination of fruits and communications and in the comparison of ideas and experiences. The conclusions arrived at will be submitted to the Society in Philadelphia, together with such information as may be obtained in relation to the reconstruction of the Catalogue for the Southern States, which reconstruction was suspended by the outbreak of the war.—*Country Gentleman.*

A LIBERAL GIFT.—Mr. Josiah Stickney of Boston, has given to the Massachusetts Horticultural Society $12,000, the income of which is to be employed in increasing the society's library for 30 years, and at the end thereof to be paid over to Harvard College in aid of the Lawrence Scientific School, or to support partially a professor of botany, or for some kindred purpose.

ADVICE TO BEGINNERS IN FRUIT CULTURE

BY A. S. FULLER.

I am in constant receipt of letters asking advice in regard to fruit culture. These requests come mainly from young men who wish to engage in the business, but who have little or no capital to begin with. Many of them appear to think that to secure a fortune it is only necessary to secure a piece of land and plant it with fruit trees or bushes. But, as this is a very erroneous view of the subject, I take this opportunity to point out some of the difficulties which every successful fruit grower has had to overcome before he has been able to make the business pay a profit upon the investment.

The first thing to be decided, after procuring the land upon which to grow the fruit, is what varieties are best adapted to the location and soil. We all have our preferences in regard to kinds; and we may desire to cultivate none but the very best in quality, or those of large size. But in fruit culture climate and soil are very often all powerful; and we are compelled to grow what we can and not what we most desire. It is just here that we find the great stumbling block of pomology.—Hundreds of men have gone into fruit culture with more enthusiasm than wisdom. Consequently, they had no time to seek advice, nor to consider whether certain varieties or species were adapted to their location or not; but they planted largely of everything that was known to be good. Now, is it any wonder that such men fail in making fruit culture a profitable business? They certainly would not succeed in any other employment if they were to adopt a similar system. It is quite probable that the principal reason why beginners in fruit culture make so many blunders is that they start out with the idea that it requires but very ordinary skill to accomplish the greatest feats ever performed in horticultural science; the acorn becomes an oak without the aid of man; the wild grapevine climbs the tall tree, and this produces fruit, although never pruned or cultivated. Then, why should we talk so much about the science and practice of horticulture, when it all is so very natural? Almost every novice in fruit culture takes this view of the subject; and I regret to say that there are a few men having some experience who do much toward leading beginners into the same path by recommending little or no cultivation, forgetting that nature has one aim in producing her fruits, and mankind, usually, quite another.—Now, my advice on this point is, never think of planting anything that is not worthy of the best care. But the question may be asked, how is one to know what kinds are worth cultivation until they have been tried? Of course, it is only by experience that we determine the value of the different varieties. Still it is not necessary for every man to make separate experiments for the purpose of deciding upon the value of particular kinds of fruits; for, if it were so, then we would make very slow progress.

A man who is about engaging in fruit culture should read a few of the best works to be found on the subject. This will give him a general idea of the business. He should then make up his mind as to what one or more families of plants he will cultivate. But, before this decision is made, it is well to know whether his soil or location is well adapted to the cultivation of these kinds; for it must not be forgotten that one section of the country, without any regard to soil, is often better suitted to certain kinds of fruit than another. In the older States a man need not go astray; for the experience of our older horticulturist is a pretty safe guide. For instance, if a young man has made up his mind to make grapes a specialty, he should then visit some of the most successful grape regions of the country, and examine the soil, location, varieties, and the mode of culture; and then judge for himself whether his own location or soil is a favorable one or otherwise. If he be desirious of growing the different kinds of small fruit, let him adopt the same plan, visiting the nearest fruit grower, and learn from him which are the most profitable varieties.

There may be men who will recommend certain varieties, because they have plants of the same to dispose of; therefore, I would say, go and see the plants when in fruit, and satisfy yourself as to their value, before purchasing. A man had better travel a thousand miles, if by doing so he can decide as to the value of a fruit which he desires to cultivate extensively.

There is another point worthy of some consideration, which is, whether it is best to cultivate several varieties or only the best one. It is an old adage that, if a man has several irons in the fire, some of them are likely to burn. But, if we have only one iron, and that burns, our occupation is gone. I believe it better to make a specialty of certain kinds; but not to trust all upon one. If we grow nothing but pears, and a late spring frost kills the flowers, our income, for that season, is gone; but the expense of cultivation is the same, whether the trees produce fruit or not. It is just the same with other kinds of fruit. But it is seldom that all fail in any one season. I have known strawberries to be entirely destroyed, while raspberries and blackberries were uninjured. This season blackberries are exceedingly scarce, but strawberries were abundant. Consequently, the man who has both is on the safe side.

In cultivating the small fruits, I believe it to be the best policy to make the division about equal between the strawberry, raspberry and blackberry, as a general rule.

Early strawberries are sometimes killed by late spring frosts. Therefore, one should have at least one early and one late variety. When the strawberry is past, the black raspberry should succeed it. This is always a safe crop, and as a general thing always pays a handsome profit. There are also early and late varieties of this berry; but the grower must decide for himself which one is most desirable, for markets differ. In some instances they are in greater demand at one time than another. The red raspberry and blackberry follow close upon the former, thus giving a succession for nearly or quite three months. Now, the same boxes, baskets and crates used for one of these berries may be used for all; and, by growing several kinds, we are enabled to keep the capital invested in the marketing apparatus constantly employed for several months, instead of a few days, as would be the case if only one kind were cultivated.

Besides the above named advantages, a less number of hands are required to take care of a certain number of acres when occupied with several varieties than when but one is grown. It will require the same number of days' work in the season, but distributed over a longer period of time. A man may be able to obtain ten hands at one time, but not twenty; and it is well for a fruit grower never to place his property at the pleasure or mercy of hired help. I have always observed that the man who so arranged his plans that he was sure of a steady income was far more likely to get rich than the one who was on the lookout for large sums at one time; and this is the principal reason why I advise beginners in fruit culture to grow a few of the best known varieties and cultivate them well.

THE NUTRIMENT OF BEER.—People who drink their beer and ale are very fond of telling how much nutriment they derive from them. Because they are manufactured from grain, many have the idea that the concentrated virtues of the grain are in the drinks. This is an entire fallacy. Prof. Liebig, one of the most eminent chemists in the world, assures us that 1,460 quarts of the best Bavarian beer contain exactly the nourishment of a two-and-a-half pound loaf of bread. This beer is very similar to the famous English Allsopp's and our more popular American beer. The fact is, the nutritious portion of the grain is rotted out before the beer can be made; and if the fermentation of the beer has been complete, Prof. Lyon Playfair declares that no nourishment whatever remains in the fermented liquor; and, as the English Alliance News says, "No chemist now disputes this assertion; for, except to flavor and amount of alcohol, the chemical composition of all kinds of beer is alike, and brewers must laugh to hear doctors advising porter as more nourishing than beer, when porter is nothing but beer colored by burnt malt, and often when beer goes wrong in making and is unsaleable beer, it is converted into fine porter, the mere color covering many defects."—*Journal of Chemistry.*

LASSOEING A LOCOMOTIVE.—The Sacramento *Reporter* says it is currently reported that a new tribe of Indians has been discovered near Independence, on the line of the Central Pacific, who would not seem to be as well posted in regard to railroad matters as their redskin brethren of the plains. The other day a locomotive having passed by, to their bewilderment, they resolved to lay in wait or pursue and lariat the monster. Accordingly they made a very strong lariat, and perceiving the mystery approaching, stretched it across the track, either end being held firmly by 20 or 30 of the would-be captors. The engine came thundering along, the lariat was struck just below the head light, and it is said the Indians exhibited greater feats of ground and lofty tumbling than were ever seen in a first class circus.

WORK ON THE WESTERN PACIFIC RAILROAD.—Seven hundred graders are at work at various points between Stockton and Livermore Pass, the bulk of them being near the latter place, where the heavy work extends for about eight miles. The tunnel is to be 170 feet below the surface of the summit, and 1,400 feet long. It is in 75 feet at each end, and will be finished, it is expected, by the middle of July.—*Watsonville Pajaronian.*

—It appears that no less than 139 new journals were started in Paris in the course of the past year, but only two have survived the year. This is remarkable, but is in some measure followed all over the civilized world where the population warrant it. There is as much money lost perhaps in these enterprises as in any others.

Agriculture.

WORK A BLESSING.

Many young people who have wealthy parents have no ambition for themselves, beyond a butterfly existence. They affect ignorance or contempt of the blessings of a life of labor. They scorn a trade and slight a profession, and think agriculture fit for boors. Some one has well said, "a man that is too well born for a trade is very well born for the gallows!" The best safeguard against the many temptations which assail our youth of both sexes is a well defined, systematic habit of industry, according to circumstances, tastes and duty.

There are *some* parents who encourage their children in idleness, by rearing them with a contempt for all useful occupation. If parents are so well off that they do not require assistance from their children, either in the house or elsewhere, they can at least teach them how to use well and beneficently the wealth which has been acquired for them.

A gentleman of means and positon, of the writer's acquaintance, has two children, a son and daughter, grown to man and womanhood, well educated and of good abilities. Possessed of the natural restless activity of youth, and of some mental calibre, they desire to take some useful part in life's arena. So they have tried to persuade the father to permit the son to go into merchandise and the daughter to instruct a few pupils in music or accept a situation as teacher in an academy. But no! they must stay at home and be supported as befits their means and position! As a consequence, the young man falls into dissipation and disgrace, and is only rescued by the timely efforts of the Young Men's Christian Association, vigorously made in his behalf. He at last breaks away from home with his father's displeasure, and without means, to prove at last "work a blessing." God speed the right! The daughter, cut off from that active and useful life which her healthy nature craved, sank into supineness and a morbidly low-spirited state; thus quenching powers of usefulness and enjoyment in the turbid waters of indolence and uselessness.

Parents! if there is one underlying principle, more important than another, to be taught your children as they stand upon the threshold of life, it is this: "*Man is born to work.*" Seek to disprove this, and you cut off the motive power to duty and self-reliance, and give the baser instincts of the soul mad license. You have in your children, instead of the beautiful, well-formed tree of many branches, rich with foliage and succulent juices and bearing much fruit, naught but a leafless trunk, scarred and blackened and blasted, which men refuse, even to burn.

One deeply versed in human nature's needs says, "The baptism of work is a baptism of blessing!" Believe it, oh weary toiler and keep heart.

"Not many lives have we,
But only one;
How sacred should that one life ever be!
Day after day filled up with blessed toil,
Hour after hour bringing in new spoil!"
—*Day Book.*

HONEY PRODUCT.

The amount of honey shipped to the New York market by one firm, (Little Falls line,) amounts to 90 121 pounds the past season. A small section of the Mohawk Valley—thirty miles in length by an average of about fifteen in breadth—furnished it all. This weight includes the packages in which it was sent; at least 60,000 pounds were in glass boxes—the balance strained honey and packages. This is but a small part of what might have been collected on the same area, had there been bees enough properly managed; yet there is enough to encourage increased effort, however, to collect a greater portion of what is wasted. Our State contains 47,000 square miles. This will divide into about one hundred squares of 15 by 30. If each square produced no more than 60,000 pounds, it would make 6,000,000 pounds, worth, at prices for the last few years, some $2,000,000—an item worth looking after by the farmers of New York. What this section has done, other sections can do—not that this section has done its best, but it is an encouraging beginning. One-third of this amount was collected on a square of about six miles.

Six millions of pounds wasted, neglected, benefiting no one! What steps can be taken to save it? What have our Farmers' Clubs and Agricultural Societies done towards it? Bee-keepers might at least do something; get up a club, an association; divide the State into sections 6 by 10 or 20 miles square, and each bee-keeper contribute a premium fund for the section producing most honey, or something like it. Save some of the money thrown away on patent hives, and get an education in bee culture. Who will move in this matte?

M. QUINBY.

A MODEL FARM.—We improved the occasion a recent trip to Chico, to visit the farm of Harmon Bay, Esq. He has about a section of land, laid off in appropriate fields, and all in a high state of cultivation. His farm buildings are neat, substantial, and appropriate, just enough of them, and well located and arranged. He has some fine blooded stock on his ranch, and is surrounding himself with everything that can contribute to the comfort and convenience of the independent farmer. His is a model farm, and worthy the attention of those who appreciate good taste and thrift.—*Butte Record.*

PRESERVING TIMBER.

The chief cause of the decay of timber lies in the fermentation or decomposition of the albuminous matter contained therein. This matter may be neutralized by chemical agencies, as by the well known processes of Burnetizing, Creosoting, etc., or it may be coagulated and destroyed by heat, which also hardens the wood. The charring plan is, however, for obvious reasons inapplicable for general use. The albumen may also be expelled or nullified by thoroughly steaming the wood.

Says the "American Artisan": Where time can be allowed therefor, it will be found quite efficacious, and more economical, to saw the timber to sizes but little larger than those to which it is to be wrought, and then place it, for a few weeks or months, in a stream or pond, where the water will gradually dissolve and wash away the nitrogenized or albuminous substances. The wood must then be thoroughly dried, slowly, as a too speedy expulsion of the moisture would be apt to induce checking; the ordinary method of piling the stuff is, however, sufficient, the pieces of timber being kept at slight distances from each by sufficient intervening strips, and the whole, when possible, protected from the sun and from strong currents of air. Inasmuch as the moisture will pass off less readily as the pores at the surface of the wood become closed by drying, it is well to complete the seasoning system by a process of kiln-drying, which at this stage will not check the timber.

The method of creosoting timber, which was lately invented by Professor Seeley, of New York, consists of subjecting the wood to be saturated to a temperature of about 230°, while in a bath of creosote oil, for a sufficient time to expel all the moisture, and to coagulate the albuminous matters of the wood. When the pores are thus freed from the water, and contain only steam, a cold bath is substituted, so far as to reduce the temperature from 230° to 65° or 70°, by means of which change the steam in the pores of the wood is condensed, and a vacuum formed, into which the oil is forced by an atmospheric pressure.

The process, says the "Detroit Post," has all the advantages of the method which has been in use in England and on the Continent for many years (and experience has demonstrated that creosoted timber is still sound after being in use more than 22 years,) and is much more simple in its application, and consequently more economical and expeditious than the English process.

Among the advantages claimed is the very important one that green wood can be treated as successfully as dry. The apparatus for creosoting, which has already been shipped to the Flats, and is now being erected on the dikes of the canal, was built in this city, and consists of a cylinder 45 feet long and 8 feet in diameter, with a steam coil in the bottom and a movable head. The cylinder rests upon substantial timbers, and when the head is removed the lumber is run into the tank upon trucks. In addition, there are 2 receiving tanks for oil, each 15 feet in diameter and 6 feet high, with engine and boiler, connecting pipe, pumps, etc.

It is expected that this process will be applied to the timber to be used in the government works about to be begun at Toledo. Mr. Pelton has also similar works now in successful operation at Chicago for treating railroad ties and dock timber.

The Chicago, Burlington, and Quincy Railroad Company are preserving all their sleepers. They have at the Aurora shops a tank of boiler iron 10 feet square and 7 feet deep. This is filled with ties and closed with a tight cover, when carbolic acid sufficient to cover them is let in, and raised to a temperature of 245° by the application of steam. Here the ties remain for 30 hours, at the close of which they are thoroughly permeated with the carbolic acid and become as black as charcoal.

As to the duration of creosoted sleepers, the "Railroad News" says: According to experiments and accurate records kept in Germany, sleepers of uncreosoted or natural oak last, upon the average, 15 years. By creosoting or impregnating them with other preserving substances, they endure for upwards of 22 years. From the same authority we learn that creosoted fir sleepers have a duration of about 13 years, while pine and beech will not last longer than 9. The lighter description of traffic prevailing over the German lines, which have furnished the above results, is the real cause of the sleepers lasting so long. It is needless to remark that upon our heavily worked railways they do not enjoy so long a life, but succumb, in the majority of instances, to wear and tear in about half the time, and in many instances much sooner.—*Van Nostrand's Eng. Magazine.*

LIQUID MANURE.—In every one hundred pounds of cow's urine there are sixty-five pounds of water, five pounds of urea, five pounds of phosphate of lime, twelve pounds of sal ammoniac and muriate of potash and ammonia—while the solid excrements obtained from one cow are estimated to manure three times the amount. Our dairy farmers will see, therefore, how important it is to have tanks connected with their stables, in which to deposit this material, or a good supply of sawdust, dry earth, or muck for absorbing it in the gutters of the stable. Urine is more efficient on light soils than on clay lands and strong loams; on the latter much of its carbonate of ammonia is evolved before it can penetrate into them.—*Utica Herald.*

AN EXCELLENT HORSE LINIMENT.—Take 1 pint Alcohol, ½ ounce Castile Soap, ½ ounce Gum Camphor, ½ ounce of Sal Amoniac. When these are dissolved, add 2 ounces of Laudanum, 1 ounce origanum, ½ ounces oil Sassafras, and 2 ounces Spirits of Hartshorn. Bathe freely. Excellent for strains, bruises, sprains, and windgalls.

—An exchange says that a fellow in that locality is riding a hog through the streets, as a preparatory practice to managing a velocipede.

GENERAL PURPOSE HORSES.

In the excellent survey of the Agriculture of Delaware County, Ohio, by Judge Jones, to which we have already more than once referred, there are some very good remarks upon the sort of Horse in most demand among our farmers. (By the way, to what the Judge says of *mules*, we take exception—we have seen many that were neither "forlorn and miserable in aspect," nor so far as we could ascertain, "eccentric" in disposition and character.) Breeding horses for *weight* alone, is proceeding on quite the wrong standard—"we want a horse that will answer to ride, or drive in a buggy, as well as to do the plowing and other farm work," a horse capable of doing more work in a day, and at less expense because with less feed, and at the same time "with good action, carriage and endurance." Excellent animals of Percheron descent have been owned in Ohio, but Mr. Jones thinks the best is to be had "by breeding a thorough-bred horse to a stout, compact mare of the common sort, or one that is half or quarter blood French." The thorough-bred stallions and mares taken to Ohio thirty or forty years ago have left a record strongly in support of this opinion, as indeed is the case in this and other States—leaving "very superior stock, and, as is generally the case with good breeding animals, a better reputation after they were dead and gone, than when they were alive and their services obtainable."

And this brings up, incidentally, the much mooted question of "the trials of speed," now so much in vogue, and in regard to which we are urged by members and managers of agricultural societies to remonstrate against the current fashion of the day, much more frequently than we have time and space to renew the subject. In discontinuing the horse-racing of an earlier day on account of the gambling practices which rendered it objectionable, we have, after its abandonment but a little while, rushed into another kind of excitement, "in every respect as demoralizing, and with none of the benefits of the old races in testing the merits of our horses." The bottom, endurance, courage, strength, of the animal were fairly on trial in the long heats of the running race, while, to a great extent at least, Mr. Jones is undoubtedly correct in saying that trotting short distances at high rates of speed, is the artificial result of training, depending not upon form or breed, not requiring excellence of structure in bone or muscle. The trotter that will carry off the purse in mile heats, not only may be quite inferior for common service, but in fact is so, in the majority of cases, while "to trot twenty or thirty miles at a high rate of speed," (which involves just the characteristics we require in what we call a general purpose horse,) "requires such conformation as will produce true and easy action, solid compact bones and sinews, with spirit and courage—in a word *blood*, the blood of the English race-horse."

There are many purposes for which we may advantageously devote more attention to a class of regular draught horses, either of English or French descent, and we should be glad, as we have often said, if they could receive a greater share of attention. For greater activity as workers and roadsters, for thorough-going life and bottom, we must go for improvement to the blood horse, while horses that are bred and trained merely for jockeying and gambling, to use an expressive Southern phrase, are of "no account," unless it is to bet on.—*Country Gentleman.*

HENS FOR FAMILY USE.

The *Journal of Agriculture* says: "The most successful way to keep a few hens for family use is to keep a few Brahmas for winter laying, and a few of the Black Spanish, or some other good laying kind, for summer, as many of each as are necessary for the season. Keep an old mother Brahma to do the breeding. The Brahma is eminently domestic, like the Arabian horse; and, like him in pedigree, is no doubt accustomed to the house, a member of the family. Keep a rooster of each kind and keep the hens separate. The Brahmas will bear close quarters, and it matters not if they are pretty old—it will not seriously affect their laying. You will say, for a few hens it will not do to keep two roosters. But this is not so. Hens do better with a mate of their kind, and the stateliness and beauty of the black cock are certainly worth their cost, for a finer and handsomer fowl is not to be found on the dunghill. Either of the two breeds will do better for the table, though the Asiatic is probably the best So their eggs are of the largest kind, and are the rich, well flavored eggs. We do not like this mixing of breeds, and this bothering about hatching. Keep the non-setters for summer, and orientals for winter. Treat well, without any special formula. Give enough to eat and drink, regularly, dust of some kind for egg shells and to wallow in, and plenty of light; a hen loves the light, and will do better where it is warm. Dispose of your pullets at a year old.—They will then have laid, if they have been properly (generously) brought up, six months. It seems natural for them, at least for many, to rest then. Then the flesh is good. Thus keep your stock young and vigorous, which you will do if you have a relish for the thing. If you have not the relish, do not trouble yourself with hens.

TAPPAHANNOCK WHEAT.

Anglaize County, Ohio.—I had from the Department three years ago a quart of Tappahannock wheat which had increased in 1868 to seven bushels in two seasons. It is the finest and earliest variety we have ever had in this section. The farmer who sowed it thinks he will have over 100 bushels for sale next season. He was offered $4 per bushel for it last fall.

Georgetown, S. C.—The Tappahannock and Mediterranean wheat sent me last year failed entirely from rust.

[This was not the result of the character of *the* wheat, but the nature of the soil where it was planted, being two wet.—ED. FARMER.]

Miscellaneous.

TRUE'S IMPROVED POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes ever introduced.

It Saves the Labor of 12 Men in Planting Time.

Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed

No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.

This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.

The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.

We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it

Particulars and Catalogues can be had at our office.

WARREN & CO.,
320 Clay street, up stairs.

New Strawberries, Raspberries, Grapes &c.

WALTHAM
WATCHES

The extensive use of these watches for [illegible] years by Railway Conductors, Engineers, and men, the most exacting of watch wearers, [illegible]ly demonstrated the

STRENGTH, STEADINESS, DURABILITY, ACCURACY

of the Waltham Watch. To satisfy this [illegible] these respects, is to decide the question as [illegible] value of these time keepers.

MORE THAN 400,000

of these watches are now speaking for themselves in the pockets of the people—a proof and a [illegible] their superiority over all others.

THE SUPERIOR ORGANIZATION

and great extent of the Company's Works [illegible] enable them to produce watches at a price [illegible]ders competition futile, and those who buy a watch, merely pay from 25 to 50 per cent [illegible] watches than is necessary.

WE ARE NOW SELLING

Waltham Watches at less prices in gold [illegible] the gold prices before the war. There is no [illegible]ufacture of any kind in the United States [illegible] can be said.

THESE TIME PIECES

combine every improvement that a long [illegible] proved of real practical use. Having had [illegible] of nearly every invention in watchmaking [illegible] in this country, or in Europe, only those [illegible] adopted with severe testing by the most skilful [illegible] in our works, and long use on the part of [illegible] demonstrated to be essential to correct [illegible] timekeeping.

Among the many improvements we would [illegible]ize:

The invention and use of a

CENTRE PINION,

of peculiar construction, to prevent damage [illegible] by the breakage of main springs, is only [illegible] American Watch Company, who having [illegible] of all other contrivances, adopted Fogg's [illegible] as being the best and faultless.

Hardened and Tempered Hair-Springs

now universally admitted by Watchmakers [illegible] best, are used in all grades of Waltham [illegible]

ALL WALTHAM WATCHES

have dust proof caps protecting the [illegible] dust and lessening the necessity of frequent [illegible] necessary in other watches.

OUR NEW PATENT STEM WIND

or keyless watch, is already a decided [illegible] great improvement on any stem-winding [illegible] American Market, and by far the cheapest [illegible] quality now offered to the public.

TO CALIFORNIANS

and others living in portions of the Union [illegible] watchmakers do not abound, watches [illegible] mentioned improvements which tend to [illegible] cleanliness, durability and convenience, [illegible] valuable.

Every watch bearing the trade mark [illegible] Waltham is guaranteed to be a [illegible] reliable time-keeper,

To prevent imposition, buyers should [illegible] mand a certificate of genuineness.

The trade supplied by Messrs. E. E. [illegible] San Francisco, Cal., and generally for sale [illegible] all respectable dealers.

NEW VARIETIES OF FRUITS.

The tendency is more or less common with all plants, when successively produced from seed, to depart from the character first stamped upon them. These departures give rise to new varieties. In their native forests, many trees and plants do not exhibit these changes, either because they are slight and obscure, or in consequence of the inflexible nature of the species. With others, varieties are conspicuous examples of which may be seen in the White Spruce, a part of the trees presenting rigid, erect branches, in contrast with the drooping aspect of others; in the American Elm, the branches, in rare instances, being as pendant as the weeping willow; in the more brilliant glow of red flowers on some trees of the Red Maple; and in the diversity of size, form, and flavor of the wild plum of the woods.

This tendency to vary is increased as plants are removed from their native localities; and in an eminent degree by cultivation. Planted in gardens, and subjected to high culture, repeated and successive sowings often develope striking changes from the appearances which for previous centuries had remained unchanged. By a constant selection of seeds from the best, a gradual improvement on the original is effected. Most of our finest fruits, doubtless owe their existence to this improving process."

"If," says Downing, "we sow a quantity of seed in garden soil, of the common black mazzard cherry, we shall find that, in the leaves and habit of growth, many of the seedlings do not entirely resemble the original. When they come into bearing, it is probable we shall also find as great a diversity in the size, color, and flavor of the fruit, though only a few, perhaps only one, may be superior to the original species.

Exactly in proportion as this reproduction is frequently repeated, is the change to a great variety of forms, or new sorts, increased. It is likely, indeed, that to gather the seeds from the wild mazzard of the woods, the instances of departure from the form of the original species would be very few; while if gathered from a garden tree, itself sometime cultivated, or several removes from a wild state, though still a mazzard, the seedlings will show great variety of character.

Once in the possession of a *variety* which has *moved out* of the natural into a more domesticated form, we have in our hands the best material for the improving process. The fixed original habit of the species is broken in upon, and this variety which we have created, has always afterwards some tendency to make further departures from the original form. It is true that all or most of its seedlings will still retain a likeness to the parent, but a few will differ in some respects, and it is by seizing upon those which show symptoms of variation, that the improver of vegetable races builds his hopes."

While a few of the seedlings from such improved variety, may become still further improved, a far greater number will probably approach towards the original or wild state. The more highly improved the fruit, the greater the difficulty to find one of its progeny which shall excel or equal the parent. In ten thousand seedlings from those highly flavored apples, the Swaar and Esopus Spitzenburgh, it may be quite doubtful if any shall equal in quality those fruits themselves, while most may fall considerably below them.

The improvements effected in former ages were doubtless the result of accident, as the ancients were ignorant of the means for their systematic accomplishment. The greatest progress in the art made in modern times, was effected by Van Mons in Belgium, and Knight in England.

Van Mons, who directed his labors chiefly to the pear, produced many new and excellent varieties, by a constant and successive selection of the best seedlings. He first made a large collection of natural stocks, or wild pears, choosing those which from the appearance of the wood and leaf, he had reason to believe, would be most likely to produce the best fruit. As soon as the first of these bore, he selected the best, and planted the seeds. Selections were again made, from the first of these, and so on in continued succession; the best and soonest in bearing were uniformly chosen. He thus obtained fruit from the eighth generation; each successive experiment yielding an improved result on the preceding. At the fourth generation many of the fruits were good, several excellent, but a smaller number still bad. He had, in the early part of this series of experiments, no less than eighty thousand trees; hence in selecting from so large a number, his chance for fine sorts was far greater than from a small collection; and hence too the reason why, after seven or eight improving generations, he had obtained so many good varieties. In the early stages of his operations, he found "that twelve or fifteen years was the mean term of time, from the moment of planting the first seed of an ancient variety of the domestic pear, to the first fruitification of the trees which sprung from them. The trees from the second sowing, yielded their first fruit at an age of from ten to twelve years; those of the third generation, at an age of from eight to ten years; those of the fourth generation, at an age of from six to eight; and those of the fifth generation at the age of six years. Van Mons, being actually at the eighth generation, has informed me that he has obtained several pear trees which *fruited at the age of four years*."† When his seedlings were at the age of three or four years, he was able to judge of their appearances, though they had not as yet borne; such only were taken for further trial, as exhibited the strongest probability of excellence. It is hardly necessary to remark that in all these trials, the young trees were kept in the highest state of cultivation.

Van Mons maintained that by selecting and planting the seeds of the first crop on the young tree, the product would be less liable to run back to the original variety, than where the seeds were taken from the fruit of an old bearing or grafted tree; and to this practice he chiefly ascribed his success. The many instances, however, of fine seedlings from old grafted sorts, throw a shade of doubt over this theory.

* The distinction between *species* and *varieties* should be well understood. A single species, or original, distinct, individual plant, often includes many varieties. All the varieties of one species, are from the same original plant; the thousands which have been named of the single species, the apple, are but a small portion of the myriads which have been actually produced. Successive plantings have given us sorts as different in size as the Monstrous Pippin and the minute Lady Apple; or as remote in flavor as the harsh and astringent Hewes Crab, and the rich and heeled Bough. But widely different as these may be, they can never pass the boundary of the species—an apple can never be changed to a pear, a cherry to a plum, nor a gooseberry to a currant.

HALL'S PATENT FOR PRESERVING EGGS.

We have refrained hitherto, from saying much upon this subject, until we had the opportunity of demonstrating the claims of the patent for ourselves. We have accordingly, put up a few eggs, to test the matter, and have them now, as put up months ago. We invite parties, to call and see these eggs, and examine for themselves. They possess the whiteness, clearness and freshness of the newly laid egg, and they frost, as a new egg, which cannot be said of any preserved egg we know of.

The cheapness and the saving of time, over every other process, may be considered in its favor. The parties in New York, are making arrangements to secure the Patent in all Europe, and it runs yet, 16 years in the United States. Cost of putting up a barrel—less than 50 cents, and the time, does not exceed 10 minutes. Rights for sale by Warren & Co. Farmer Office, San Francisco.

VALUABLE PLANTS FOR SALE

☞ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us. WARREN & CO.,

tf *Farmer Office.*

New Advertisements.

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE.

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

San Francisco, Cal.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the article they have to sell is wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seed, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise.

All Letters, Orders, Parcels, &c., intended for this office should be addressed **WARREN & CO.,**
California Farmer Office.

A Young Man Wanted!

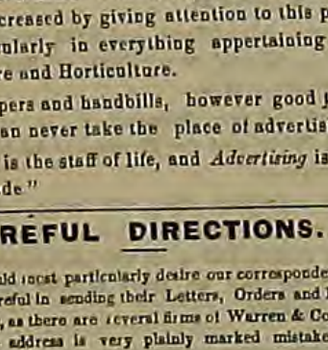
A live Young Man wanted—one who wishes to *do his duty*, and by his true merit work his way up, and become of value to himself and his employer.

To such a young man, who can bring good recommendations a good situation will be offered in this office.

Apply only between the hours of 8 and 9 o'clock, A. M., and 5 and 6 o'clock, P. M., in the Printing Department of the FARMER OFFICE.

ONE THOUSAND PLANTS.

Those who are planting Gardens, and wish *collections* of choice plants, can buy them in quantities at a very low rate, if they visit the *Gardens Corner of Mason and Pacific Street*, in this city, or address EDITOR FARMER.



FLORENCE

The Best for Family Use,

Having the Celebrated

REVERSIBLE FEED AND
SELF-ADJUSTING
SHUTTLE TENSION

To the President of the California State Agricultural Society:

Your Committee on Sewing Machines beg leave to report that we have examined the several Sewing Machines on exhibition—the Wheeler & Wilson, Grover & Baker, and FLORENCE—and find that for general family use the FLORENCE IS THE BEST.

J. N. ANDEWS,
THOS. C. McHALE,
L. ELKUS.

CENTRAL PACIFIC RAILROAD.

On! On!! On!!! is the watchword that echos over the snow capped mountains, as the Cars sweep up and over the lofty glaciers that seperate the Pacific from the Atlantic shores. Ring! Ring!! Ring!!! and as the bell of the Engine announces its *Onward* and *Triumphal* march to the dividing line, the Goal of its ambition and its labors, every sound of the bell sends the musical echos farther and farther, saying, *Coming! Coming!! Coming!!!*

The *Present Week*, the Central Pacific Railroad will have completed its SIX HUNDRED MILES from the City of Sacramento, leaving only a small space of some *fifty miles* between their Cars and "Salt Lake City.

TINKLE, *tinkle!* RING, ring! echo mountain bell,
Every tinkle, every echo, utters "All is Well."
Onward, onward, over mountains, to the East tern Shore,
Shall the Horse with flaming nostrils, rush on ever more;
Through the Forest, o'er the Desert, where the "Fountains play,"
Aye that Desert, Prophets told us, now God's great Highway.
Mountains leveled, Valleys filled up, Roses blooming there,
Marks *this age of Great Progression*, under HIS wise care.

How few of us who are the early Pioneers, ever *dreamed* of what has taken place, or of what will soon take place, when the Pacific Railroad shall bring us so near the old States, and so near Europe. Who among us can possibly realize the *Revolution* that will take place in all that appertains to the *Business Relations* of men here?

It is time people were preparing for this event, for the changes will be many and very great, for *Thousands* and *Tens of Thousands* of people will come to our Shores. *All will come that the Cars can bring*, for we do not believe that the ordinary preparations of the trains will be able to do the business that will be required, nor will the Company be able to bring *half the passengers ready to come.*

Another event will occur for which our people are not yet prepared, we mean THE RESUMPTION OF SPECIE PAYMENTS.

We are satisfied, that as the "Gold of California" was so important in sustaining our Government during the late war, as it was the *saving means* that aided our Government to carry on its mighty operations, and at the same time, fill the vacuum that was made by the drain of some *Fifty Millions Annually* to Europe, so now, on the opening of the GREAT PACIFIC RAILROAD, California with her "Gold and Silver," and with her "Golden Grain," her "Fleeces of Wool," her "New Wines," and her other rich products that shall flow like a river over this Great Highway, will most materially aid our Government in the work of a speedy resumption of Specie Payments. And to this great event, the eyes of all intelligent minds are turning for *something new and wonderful*, and we do not hesitate to *Prophecy*, that, upon the opening of this Highway to the "World of Commerce" that shall flow over it, and to the rapid communication that must flow from it, will indeed be *the* means that shall bring about the result we now name.

This accomplished, and our country marching on in her career of the most wonderful prosperity the world ever saw, our own State must necessarily come in for her portion of this prosperity. Then will be seen the value of this Great Highway, and then due credit will be given to those who have so nobly and so successfully carried on this Grand Enterprize to its Triumphant completion.

Let us all then prepare for this GREAT, GRAND and NOBLE event so near to us, and be ready to "Hail it with Joy."

LOOK TO YOUR GARDENS.

Now again do we invite all who desire to have their *Garden Grounds* prosperous during the Summer, to see that proper attention is given to them at once.

The late very copious rains to a greater or less degree, (just in proportion as the ground had been deeply or lightly cultivated,) will have beaten down the soil and made the surface compact and hard. This surface soil should now be carefully loosened and then finely raked, breaking up every lump of soil and making it fine and maleable.

If the soil *has not* been dug deeply, now is a good time to do this work, as the rains will have prepared the way for it.

Unless this duty is attended to now, before this improperly neglected ground shall dry and bake hard, it will be too late, and the beauty of the summer grounds will be lost. A little labor now, judiciously bestowed, will well repay for the time given to it.

SAINT PATRICK'S DAY.

This notable Day occurred the last week, and was celebrated with considerable show and parade and with a very earnest spirit by all who claim to be followers of Saint Patrick, and true Irishmen.

A military parade quite extensive and imposing; Orations, Poems, with Public Dinners and Grand Balls, gave to the Day quite a Jubelatic appearance.

Although it was quite a stormy day, it only dampened the *outside* of men—their warm hearts were not *chilled*, for their spirits within were merry and happy, and the occasion passed off very happily to all concerned.

THE NEW PUMP.—We call attention to the New Pump advertised in our columns this week by Mess. Whig & Dewey. It seems to promise good things, and the Proprietors promise soon to furnish Illustrations of the same, so as to enable those at a distance to comprehend its excellence at a glance.

BOOKS FOR LIBRARIES.

Why need our friends in the country want for good reading matter when books are so plenty and so cheap; and books too, all fully imbued with the progress and the spirit of the age, and upon every subject that should interest the mind of man.

No person need remain in ignorance upon any subject now. Art, Science, Literature, Religion, History, and of the general and rapid progress the world is making, in all that tends to make mankind better or happier.

Public Libraries are being now established in every city in our land; and our private citizens are making collections of Books and works of Art and taste for their Homes. These all add to the usefulness and they promote the happiness of those who are to come after them and take their places when they shall have passed away.

Good Books in the pathway of the youth of our land are the "Guide Boards" that will lead them on in the pathway of life. If this guide is right, then their road to prosperity and happiness is sure; and upon the Parents and Guardians of the young this *responsibility* will rest, and as "Knowledge is Power," it is to be hoped the right kind of knowledge will be given to the youth of the present day, for upon them will devolve the great responsibility of Guiding and Controlling the destinies of the Pacific Coast. And this Coast is surely destined to have a powerful influence in ruling and controlling the destinies of our country in the future.

Books, therefore, should be given freely to the Young, given as their *daily bread;* but do not *give them a stone, when their young minds ask for Bread.*

The Libraries in our City are large and valuable, and this is to our credit, and our citizens are liberal to make them so. *What we very much want now, is, Libraries in all our Country Towns and Villages.* Books are cheap, and knowledge can be had readily, so that the young though they run, yet they may read; and it is to be hoped that exertions will be made to establish DISTRICT LIBRARIES in every district in our State, so that families who cannot have a library of their own, may have access to *Books* that shall be free as air.

If citizens in the country would act in this matter, Libraries would be established everywhere and the people take an interest in this matter. It would prove the best *Insurance for the Youth* against their going astray that could be devised.

FIVE THOUSAND VOLUMES OF BOOKS of the very best and most interesting kind, are now offered by Mess. A. Roman & Co., at very reasonable prices, for the special purpose of DISTRICT LIBRARIES and FAMILY LIBRARIES, and we sincerely hope that our friends in the country, *our Farmers, our Mechanics*, and families generally will improve this opportunity to secure these valuable aids to Knowledge.

RAINS CONTINUED—CROPS, ETC.

The continuous rains, followed by repeated sunshine, gives to the skies above us a picture of the human face, which is so often changed from doubt and difficulties that affect the mind, to joy and hope when relieved from anxiety; so is it now with our Farmers. *It is all Sunshine* with them now, for the "Blessed Rains" have put all doubt of a glorious Harvest at rest.

From every portion of our State come the *glad tidings* of a certain prosperous season, a season of *Bounteous Crops*. Now let the heart of all that cultivate the earth be full of *Gratitude* to the "Giver of all good," for the year of Plenty now before us.

Never, never before has our State seen so large and so wide extended area of cultivation, nor has the promise been so great, and although the value of the produce may not be so great in value *per pound*, let all remember the amount per acre will be greater, so the *results* will even be better than ever before. In Heaven's name, then, let no lips murmur, for now the "Earth is full of fat things."

WEBSTER BROTHERS, STOCKTON.

Some idea can be formed of the vast extent of the Agricultural wealth and influence of the great SAN JOAQUIN DISTRICT, by the Immense Sales of Agricultural Implements of the Pioneer Agricultural Warehouse of Messrs. Webster Brothers of Stockton.

Some time since, we reported their sales of Gang Plows alone, at over *Eight Hundred*, and over *One Hundred and Fifty* other kinds, making over *One Thousand Plows* this season, of the largest kind.

Messrs. Webster Brothers are determined to keep pace with the progressive spirit of the Farmers in that rich section of the country, and they are now preparing the most extensive collection of HARVESTING IMPLEMENTS ever offered on this Coast, to which they call the special attention of the Farmers, by their *Large Advertisement* in our columns.

If our Farmers will read the several valuable articles in this week's Farmer, they will see the great importance of always procuring the *Very Best Implements*, and these can be found at Webster Brothers' Warehouse.

VELOCIPEDE MANIA.

Bound to have its run, the Velocipede mania is like to every other mania, that for a while *stimulates the public mind*. It is like every other evil. Those who can "turn a penny" by it will "laud it to the skies," but those who can "see the end from the beginning" will only smile at the credulity of those who expect to *make a fortune*, or those who expect the world to make great advances by the new discovery.

Velocipedestrianism is beginning to *run out*, and in a few months, "a year at most," it will be among "the the things that were."

—No man can tell whether he is rich or poor by turning to his ledger. It is the heart that makes a man rich. He is rich or poor according to what he is, and not according to what he has.

The potato is a great absorber of potash. Therefore wood ashes are a good manure for it.

CHANGES WROUGHT IN FRUITS BY EXTERNAL CAUSES.

The importance of attention to the variation in fruit wrought by a change in climate, soil, and cultivation, appears to be much underrated. While the peculiar or essential character of a variety remains unchanged, the quality, or degree of excellence, is variously modified. This is sometimes so great that serious disappointment results; and high expectations, caused by success in one case, are defeated by different circumstances in another. Hence the necessity of understanding these modifying influences.

The changes produced by *climate*, are greater in some classes of fruits than in others. The cherry varies but little in character and quality; the fine varieties originated by Thomas Andrew Knight near London, are also among the finest when removed to the Northern States of America. This may be owing in part to their period of maturity, which, occurring early in summer, could not be influenced by the length of the seasons. But with the apple, pear, and peach, the case is quite otherwise. Very few of the whole British catalogue of apples, are first in quality here. The White Astracan, an apple of high reputation in Russia, becomes very inferior in England; and a similar loss takes place on the removal to England of some of the finest apples of Italy. Some of the best peaches in the neighborhood of Philadelphia, become second or third rate in western New York, the shorter and cooler summers of the latter region not being sufficient to give full flavor to many of the more southern varieties. American peaches taken to England lose still more. Of fifty sorts, from the Middle and Western States, tested at the great Chiswick garden, all but two were pronounced "worthless."

But the influence of seasons alone produce sometimes extraordinary results. In the year 1842, the Wurtemburg pear was regarded in western New York as the finest foreign pear among several which had then just fruited; but the two succeeding seasons it was nearly worthless. The Bezi de la Motte, about one year in seven, in some localities, is a delicious melting pear, and at other times dry and tasteless; in other localities, it is uniformly good. Some striking cases were mentioned by the late Robert Manning of Salem. The Beurré Duval, which has a high reputation in Europe, produced, the first year of bearing, beautiful fruit; but on ripening, they were found tasteless and worthless. The next year the same tree produced fewer pears, half the size, different in shade of color, and delicious in flavor. In another case the Hericart yielded fruit which proved melting and high-flavored. The next year it not only varied in size, shape and color, but was so tasteless as to be immediately rejected. Again, the Calabash pear produced in two seasons, oblong fruit with projecting ridges, the color being bright russett, and the flesh breaking, melting, and very good. The next year the fruit was more abundant, of larger size, of a bright yellow color, without ridges, and the flesh very insipid. But these were unusual cases. They serve to show, however, the extreme caution to be used, both in describing fruit, and deciding upon the merits of new kinds. They also show the propriety of aiming to select such as are little affected by such influences, as the Madeline, Bartlett, and Seckel.

It is this liability to change, and occasionally to become valueless, that has induced *the opinion that varieties are worn out by old age;* but this is disproved by the fact that the same varieties flourish elsewhere with undiminished excellence, and that some of the new sorts, when removed to ungenial localities also exhibit precisely the same symptoms of "running out" and decay.

THE JEALOUSY OF GIRLS.—Girls, too, are awfully jealous of each other. I should call this the girl's distinctive fault. See them when they are introduced, or when they first meet at a ball or croquet-party; see how coldly critical they look at each other, how innocently their eyes rove over every portion of their rival's dress; read in their faces the outspoken scorn as the result of their scrutiny: "You think you have done it very well, but you have made a fright of yourself, and I am much better than you!" Watch their disdain of the more admired among them; and how excessively naughty for attracting so much attention they think that Ada or Amy is about whom the young men cluster. How bold she is!—how overdressed she is!—how affected she is!—and, oh! how ugly she is! Sometimes, if they are deep, they will overpraise her enthusiastically; but the ruse is generally too transparent to deceive any one, and simply counts for what it is—a clever feint that doesn't answer. It is quite a study to watch the way in which girls shake hands together, or take hands in dances. The limp, cool, impatient way in which they just touch palms, then let their arms fall as if paralyzed, tells a volume to those able to read the lettering.

TO REMOVE MILDEW FROM CLOTHES.

Mix soft-soap with powdered starch, half as much salt, and the juice of a lemon; lay it on the part with a brush; lay it on the grass day and night till the stain comes out. Iron stains may be removed by the salt of lemons. Many stains may be removed by dipping the linen in sour buttermilk, and then drying it in a hot sun; wash it in cold water; repeat this three or four times. Stains caused by acids may be removed by tying some pearlash up in the stained part; scrape some soap in cold soft water, and boil the linen till the stain is gone.

There are two periods in the life of man, at which he is too wise to tell woman the exact truth; when he is in love, and when he isn't.

A man telegraphed another for a shipment of beans. He received for a reply, "N. B." (*Nota Bene*)

What word is that composed of five letters from which you take two one remains? Stone.

Editor's Chair,

[Here we shall hold our special weekly [illegible] our Readers and Correspondents, and [illegible] call their attention to such articles in [illegible] our *Journal*, to which we would direct [illegible] attention.]

We welcome our old correspondent [illegible] Bay," who comes to us with the sketch [illegible] ern life in "Jennie Green," which will be [illegible] ed in our next.

We call special attention to the *Del[illegible] American Institute Farmers' Club* as [illegible] very interesting information for all Farm[illegible]

Farmers! Read Seasons in England [illegible]

OVERLAND MAIL.—When the mails shall [illegible] we hope a rich treat to our readers from [illegible] ation from abroad."

Splendid Orchards for sale in the [illegible] worthy the attention of *Capitalists*—[illegible] ment than White Pine.

We have a Box of Samples from the [illegible] Wine Co.," of which we shall speak in [illegible]

We have a small parcel of Seeds from [illegible] partment at Washington. Shall report [illegible] our next in detail.

We have several letters from the [illegible] ceived too late for this issue.

Acknowledgements.

Articles Received at the California Farmer [illegible] Rooms, No. 320 Clay Street.

Books Received.—We have volumes from [illegible] ricultural Department at Washington, [illegible] Commissioner, for which we return thanks.

We acknowledge favors from Hon. [illegible] M. C., for which we are grateful.

The Table Talk and Opinions of Napoleon [illegible] —This little volume contains many sketches [illegible] life and character, and many anecdotes [illegible] fore published. Many single incidents [illegible] each of which contain a truth, the value [illegible] one will more than repay the cost of the [illegible] many times. Reader, go and purchase [illegible] volume.

Ab-Sa Ra-Ka, or Home Among the Indians.—This is a very interesting volume, containing [illegible] experience of an officer's wife on the Plains.

This little volume gives a sketch of [illegible] pleasures during the occupation of the [illegible] to Virginia City, Montana, etc. comprising [illegible] of 1866 and '7, during the period of the [illegible] of the Indians, and gives some glowing [illegible] of a soldier's life, and his perils during [illegible] with the "Red Men." Every family should [illegible] an interesting *historical book*, one that will [illegible] terest the young. The volume contains [illegible] the route, and data of importance.

Roman & Co. have both the above [illegible] sale.

The Life of Schuyler Colfax.—However we may feel politically, any sketch of the Vice-President of our Nation should be of interest, and should be read; for every citizen should become familiar with the life and character of our rulers. This Life of Schuyler Colfax is written by Hon. J. Y. Moore, and dedicated to the Methodist Church by the author. It contains a fine likeness of the Vice-President. The book is indeed a valuable place in the family library.

It is for sale by Roman & Co.

Omnipotence of Loving Kindness.—We would gladly go and purchase such a treasure. The book will prove to its every reader.

Although this book is but the history of a woman's efforts to reclaim and save [illegible] it shows the *Almighty Power of Love* as an instrument stronger and more powerful than those who are in error, than any other that could be used.

The book has been prepared by Rev. [illegible] of Park Church, Hamilton Drive, [illegible] land, and published by Robert Carter [illegible] and for sale by Roman & Co., this city.

Overland Monthly.—Several days [illegible] its time comes our most excellent [illegible] ological, the OVERLAND MONTHLY for April.

Better! BETTER!! BETTER!!! stamped upon the very face of the [illegible] *Dove colored messenger of good things*, [illegible] much may be said of the excellencies of our [illegible] pers," the "Atlantic," the "Godey," and [illegible] the valuable magazines that now fill [illegible] their Pearls of Knowledge, and shower [illegible] tiful thoughts, our own *California* [illegible] "Overland Monthly" is over them all. [illegible] should we all be to have such a magazine [illegible] in our midst, and prouder still should we [illegible] ly be to enroll their names as the [illegible] supporters and sustainers of our Home [illegible]

Mess. Roman & Co. deserve great credit [illegible] enterprize in sending forth so noble [illegible] the Genius and Literature of our State.

DIAMONDS! DIAMONDS!

We know a House in this city [illegible] Tucker & Co. in *Diamond work*, [illegible] Tucker boasts of the finest Diamonds [illegible] country.

We call our readers' attention to the [illegible] mond Advertisement of the "Florence Machine," and these Machines are the [illegible] and the "Hills" are sending them out [illegible] ple by scores and scores.—*See Card.*

AXLE GREASE.—We call attention to [illegible] J. J. Hucks, Esq., to the subject of his [illegible] lent Invention, the H. & L. Axle Grease.

It will be seen Mr. Hucks gives a [illegible] lenge of *One Hundred Dollars* to find [illegible] that can Equal it. Mr. Hucks might [illegible] *One Thousand* or *Ten Thousand*, and [illegible] be no chance of losing, for the H. & L. [illegible] thoroughly tried, that no one desires [illegible]

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

s of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

ith the present indications arising from the Knowledge of Large Land Sales to Farmers, many em new comers to our shores, and from the assurance we have of a Successful Planting Season, on of abundant rains, we know that the acre-age will nearly if not quite double the amount of , while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

r the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

or Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with at ease, almost noiseless, and with little or no friction, consequently with sure speed. It has inably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs when- r exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. e warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or Haine's Gearing,' or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so consstructed that after the Harvest Season is over, they can be used on e Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125 Also dinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, id Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, ius saving $300 in labor each season. These Threshing Machines will be the most perfect Implement er yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of ower save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the rain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ver yet introduced on this coast.

We have also

Hardware and Garden Tools,

ogether with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

WEBSTER BROTHERS'

Pioneer Agricultural Warerooms,

30-24 STOCKTON, SAN JOAQUIN COUNTY.

THE KIRBY CLIPPER MOWER!

IT HAS THE

INDEPENDENT

Action!

IS ALL OF

IRON & STEEL

AND OF REMARKABLY

Light Draft!

THIS IS THE

LIGTEST!

CHEAPEST!

AND

Best Single Mower!

IN THE MARKET.

THE KIRBY MOWER AS SEEN ON LEVEL GROUND.

ONE HORSE can work it by putting on Shafts in place of the Pole and then cut TEN ACRES A DAY. Length of cut, four feet two inches.

When you order EXTRAS for this machine, always state the NUMBER OF THE PART WANTED corresponding with the number on the plates on the list, and so GIVE THE NAME of the part when there is no number on it. By carefully preserving the circular, you can always order your Extras by number and by name. The parts illustrated on this sheet are for the Combined Machine, but the Clipper parts do not differ from them in name except in a very few instances.

Be sure to place the driver's seat so as to BALANCE THE POLE and to RAISE and LOWER the FRAME and the heel of the mowing-bar with it (the driver's seat acts as a lever for that purpose.)

With the lever in your right hand, you can raise or lower the outer end of the mowing-bar. When the GRASS IS TANGLED OR LODGED set the POINTS of your guards LOW by means of the forward bolt in the pole where it bolts to the machine; IN ORDINARY CUTTING set the guards so they will be NEARLY LEVEL.

Be sure and keep all the Nuts tight and the Journals well oiled, and see that the oil holes don't get filled up, so the oil cannot get to them; also keep the Joint tight where Pitman connects with the Knife, and then your Machine will work well without trouble or expense.

The nature and working of this Machine may be well illustrated by the following incident:

Our General Agent was in Oregon, setting up and starting a machine for a party that wanted to buy "if it suited and would cut anywhere." He led the way around the field followed by the Agent driving the Machine as he was led off from smooth ground to where it was rough and boggy, and where it had never been cut over before, the driver simply bore his weight back in his seat, thus elevating the heel of the finger bar and holding it there with his weight, and at the same time elevated the outer end of the bar with the lever at his right, following CLOSE UP to his leader until the level ground was reached again; then he dropped the bar again, having followed the purchaser close all the way through. His curiosity was roused to know how the Machine was brought through without getting STUCK, and the reply was "it was not made to STICK, it was made to go!" He followed the Machine around once, and then got on and drove around twice, when a neighbor said: "Mr. Within how do you like the Machine?" His reply was: "To tell the truth it is a little the nicest Machine I have ever seen, for I can sit here and work my hand and feet and balance the Machine with my weight, all at the same time, I will have to keep it," and paid his money down for the Machine.

The KIRBY has no equal in the facility with which it can be made to cut high or low while in full motion. It can be raised with ease to any desired height without any extra strain or friction, so that rough and boggy places may be passed over and cut evenly and thoroughly, and the bar can be dropped down again when smooth ground is reached.

There is no JOINTED BAR Mower that can be handled in that way; for although the mowing bar can be thrown over an obstruction, yet they cannot be run any distance in this way, from the fact that their bar would have no support and would flop and jump along with a great strain, and be very liable to break.

TREADWELL & CO.,

Sole Agents for the Pacific Coast.

30-22—no1

OUR HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact), and the probability that unless checked this large sum of money will be increased each year until, in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS, or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and foster BY ITS INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION *whose capital and assets will not be impaired or injuriously affected by the change in values that will sooner or later occur by a return to specie payments in the other States of the Union.* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

THE CALIFORNIA

MUTUAL LIFE

Insurance Company

Of San Francisco.

All policies issued by this Company are, by the laws of California, EXEMPT FROM ATTACHMENT OR EXECUTION OF DEBTS, whether the policy be in favor of the *party assured*, or of *any other person*.

Policies are made non-forfeitable after two annual payments.

ALL PROFITS divided among the assured.

One half of the annual premium loaned to the assured *at any time* when desired.

Thirty days' grace allowed in the payment of renewal premiums.

This Company offers to those who have paid up their premiums in cash for two or more years, the advantage of giving notes for the whole amount of their annual premium, for a period *corresponding* to the time they have paid all cash, by merely giving their note, and paying the interest in advance.

Wm. R. WHEATON, General Agent.

AVERY PUMP WELL

COMPLETE FOR USE

THE TUBE WELL IS FOUND BY DRIVING prepared Iron Piping into the ground with a sledge Although of comparatively recent invention. These Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well. All surface water, dirt etc. being excluded. The Tubing is coupled together in lengths of six or eight feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Light Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. For circulars, etc., address Postoffice Box, 17. WHIG & DEWEY.

Office at 318, Pine street. 31-10.

Home Miscellany.

A SWEET SECRET.

(Stolen from Zeta.)

There's a secret in my heart—I can tell it unto none;
And only softly to myself, when I am all alone.
It nestles in my bosom, as the bee within the rose;
All its perfume, all its sweetness from that hidden centre flows.

But I whisper it unto the waves of gently flowing streams,
To forest birds and flowers, and to angels in my dreams;
And to me the birds' gay carolling seems softer, sweeter then,
And the murmur of the streamlet is my whisper back again.

Yes, all the world of Nature, now, my precious secret knows;
I have told it to the summer sun, and to the winter snows;
To the glad green earth around me, and the bright blue heaven above,
I've opened my heart exultingly, and cried! I love! I love!

The world is far more beautiful than it was wont to be:
Has there a change come o'er the earth, or is it only me?
There seems more music in the air, and brightness in the skies!
Or is the music in my heart, the sunshine in mine eyes?

And there's another secret yet, within this breast of mine;
'Tis only since it entered there, that life has been divine;
It burst upon my soul with joy, so keen 'twas well nigh pain—
Ah! it was heavenly bliss, to know, that I was loved again!

Mayne Reid's Magazine.

THE HELPLESS.

The hen-bird beats her pinions on the snare;
Her mate the goshawk's crooked talons tear;
Over the callow nestlings, weak and lone,
What wings shall spread when darkness gathers?—
Poor little birds! [None.

The Shepherd's dog with age lies dead and cold;
The wolf steals down upon the trembling fold;
The last pale crimson streak of sunset's gone;
Who guard's the flock until the morning?—None.
Poor little lambs!

The father in the felon prison lies;
The mother in the spital shuts her eyes;
Sharp hunger sickens; day is almost done;
Who watches by the squalid cradle?—None.
Poor little babes!

Harper's Weekly.

ANECDOTE OF LORD ELDON.

The Chancellor was sitting in his study over a table of papers, when a young and lovely girl, somewhat rustic in her attire, slightly embarrassed by the novelty of her position, but thoroughly in command of her wits, entered the room, and walked up to the lawyer's chair. "My dear," said the Chancellor, rising and bowing with the Old-World courtesy, "who are you?" "Lord Eldon," answered the blushing maiden, I am Bessie Bridge, of Weobly, the daughter of the Vicar Weobly, and papa has sent me to remind you of a promise which you made him when I was a little baby, and you were a guest in his house on the occasion of your first election as Member of Parliament for Weobly." "A promise, my dear young lady?" interposed the Chancellor, trying to recall how he had pledged himself. "Yes, Lord Eldon, a promise. You were standing over my cradle when papa said to you, 'Mr. Scott, promise me that, if ever you are Lord Chancellor, when my little girl is a poor clergyman's wife you will give her husband a living; and you answered, Mr. Bridge, my promise is not worth half a crown, but I give it to you, wishing it were worth more?" Enthusiastically the Chancellor exclaimed, "You are quite right; I admit the obligation; I remember all about it;" and then, after a pause, archly surveying the damsel, whose graces were the reverse of matronly, he added, "But surely the time for making good my promse has not yet arrived? You cannot be any one's wife at present?" For a few seconds Bessie hesitated for an answer; and then with a blush, and a ripple of silver laughter, she replied, "No, but I do so wish to be somebody's wife! I am engaged to a young clergyman, and there is a living in Herefordshire, near my old home, that has recently fallen vacant, and if you give it to Alfred, why then, Lord Eldon, we shall be married before the end of the year. Is there need to say that the Chancellor forthwith summoned his Secretary, that the Secretary forthwith made out the presentation to Bessie's lover, and that, having given the Chancellor a warm expression of her gratitude, Bessie made good speed back to Herefordshire, hugging the precious document the whole way home.

—Several English surgeons have given their opinion that Chang and Eng, the Siamese twins, cannot have the ligament cut without causing death. They are to consult the celebrated Dr. Nelaton of Paris.

—Charles Dickens says he can always judge of the character of a hotel or restaurant by an inspection of the castor. The mustard pot and oil cruet are infallible tests.

LETTER FROM OUR LADY CORRESPONDENT.

JENNIE GREEN. CHAP. I.

THE MORNING WALK.

Down the lane, over the the smooth lawn, through many a winding in and out, wandering, gathering flowers and beautiful leaves and curious gems of nature's garden, went two Southern girls. One, a sylph-like, spiritual creature, a girl of fifteen, warm as summer, white and pure as the fallen snow; the other is about twenty-one years of age, not less beautiful, with her saintly-white, spiritual face, and queenly grace that inspired every move of her person and every tone of her voice, and made her surpassingly beautiful—one whom we might worship as we would an Angel, who might have walked in her. That was Belle Guye Stewart, the governess; the other was Jennie Green, the worshiped daughter of a man of wealth, who had no other daughter—but two sons. They were sons of the South, of whose trials and exploits I might write to Belle Guye, the lovely betrothed of the elder, and to Jennie their lonely and loving sister. So they wandered on together, trying to forget the reign of terror that was sweeping over their precious homes, making them so very desolate.

I will soon find them with their rival; one whose presence was to them strange and beautiful as a dream, and cruelly mawkish as a lovely person that is by your side—only to give you a glimse of a life that might be, and then vanishes and leaves you to your own dream and alone.

I am weary, dear Belle, of these sick dying flowers and this cold moss; we are walking too far, and these sad times have made me feel afraid—afraid as I may be of real harm, afraid of the thick shade once in happier times so inviting, now, full of shapes of awe and shades of the troubled spirits.

Belle looked with tearful eyes upon her lovely charge, heartsick with unutterable grief. We are in mourning, said Belle, for our lost and loved ones, and can only rest our hearts on the mystery of death and of the resurrection, and blessed fullness of eternity, for balm for our bruised hearts—we must not, may not, give them the love and the worship we owe unto our divine Creator.

I love them, may love them forever, said Jennie passionately, and a thousand times more than I could in this imperfect world; for I love them with the love of the Angels in Heaven. Heaven help us, rejoined Belle sadly, as a shadow of some third party fell across their way, unseen, like a shadow gliding after them, always seeing, never till now seen. It was the wandering artist, smiling as he looked down at his portifolio and half-finished sketch, a bird fluttering around a shining serpent that lay coiled, half hidden in a clump of green.

In another moment the shadow defined the man to the half frightened girls. Nothing to warn of danger to come, an Apollo in manly beauty, who should not be described to rival with the betrothed of Belle Guye, who has not now a part in our story.

The army of the North seemed to walk in the person of the artist Grayson, and the spirit of the North looked through his blue eyes and glanced out upon his face; as he stood before the young ladies, he might have been pictured as an emblem of the North to them. They forgot the caps of their soldiers as they gazed upon the stranger, with wonderful, crisping curls rolling, like a crown of gold, from a white brow. He met the ladies with respect, for in all the sunny South he had not seen the face of loveliness and the brow of beauty that rivalled with them in the imagination of his heart; and he was a young man fond of admiration as any young man from the North, and became their protector and companion at that time, with all the tender regard of a lover, whose every other sentiment was political.

Jennie could prattle like a child to hide her confusion, and Grayson walked with them till they returned, and parted with them at their own home.

We see ladies often with, and part from men who are young and possessed of all the charms of youth and personal beauty, with the interest of a passing moment. But Jennie and Belle sought their own room to dream of what had passed, and Grayson went away regretting he was in love.

BERTHA BAY.

TO REMOVE MILDEW FROM CLOTHES.

Mix soft-soap with powdered starch, half as much salt, and the juice of a lemon; lay it on the part with a brush; lay it on the grass day and night till the stain comes out. Iron stains may be removed by the salt of lemons. Many stains may be removed by dipping the linen in sour buttermilk, and then drying it in a hot sun; wash it in cold water; repeat this three or four times. Stains caused by acids may be removed by tying some pearlash up in the stained part; scrape some soap in cold soft water, and boil the linen till the stain is gone.

To Prevent Wounds from Mortifying.—Sprinkle sugar on them. The Turks wash fresh wounds with wine, and sprinkle sugar on them. Obstinate ulcers may be cured with sugar dissolved in a strong decoction of walnut leaves.

"Doctor," said a gentleman to a physician, "My daughter had a fit this morning, and afterward remained for half an hour without knowledge or understanding."

"Oh," replied the doctor, "never mind that; many people continue so all their lives."

An old minister the other day asked a woman what could be done to induce her husband to attend church. "I don't know," she replied, "unless you were to put a pipe and a jug of whisky in the pew."

Josh Billins says: "When a young man ain't good for any thing else, I like tew see him carry a gold-headed cane. If he can't buy a cane, let him part his hair in the middle."

—Agricultural Fairs, Farmers' pretty daughters]

DOMESTIC COMFORTS.

PREPARATION FOR THE TABLE.

Knife Rests.—There should be a pair of these placed at each end of the table, at the sides of the two principal dishes, for the purpose of receiving the knife and fork when the carver lays them down, instead of putting them into the dish. They are sometimes of china, corresponding with the dinner set, and very frequently of silver.

Butter Knives.—Beside each butter plate should be placed a knife, as no person accustomed to genteel society will help himself to butter with his own knife. There are knives with silver blades made expressly for this purpose. They are best with silver handles; as those of mother-of-pearl are very liable to break, or come off.

Finger Glasses.—These are generally blue or green, and are filled with water and set round the table, just before the cloth is removed, for the company to dip their fingers in, rubbing them with a slice of lemon or orange leaf, that is put into each glass for the purpose. Every glass is placed on a folded doily. The disgusted European custom of taking a mouthful or two of the water, and, after washing the mouth, spitting it back again into the finger glass, has not become fashionable in America. Neither is it usual in our country to place tooth-picks on the table for the benefit of the company; most gentlemen preferring to pick their teeth and wash their mouths in private.

Table Linen.—If the circumstances of the family will allow the expenditure, it is advisable always to get the table linen of the best quality; as that which is fine and thick will last much longer and look much better than if comparatively coarse and thin. There is nothing of the sort superior to the best double French damask; it being not only fine and thick, but soft and glossy, like satin; and it looks as well after washing as before. The appearance of all table-linen is improved by being mangled in a machine, instead of ironing. A table-cloth ought to be considerably larger than the table, so as to hang down all round.

Napkins.—There are few genteel families who are not in the practice of using napkins at table, to spread on the lap while eating, and for wiping the mouth and the fingers. The best size is about three-quarters square. It is now more customary to hem the napkins than to ravel them into a fringe. If fringed, they must be afterwards whipped with a needle and thread, to secure them from ravelling still farther. Napkins with colored borders look less genteel than those that are all white. The fine French double damask are the best and handsomest, and will last twice as long as any others. For a dinner party it is customary to place the napkins on the table, nicely folded in squares or diamonds, of which there are a variety of ingenious forms. But when the family dine without company, or with only two or three guests, the napkins are usually folded square, and then rolled up tightly and slipped into a ring of silver, ivory, ebony, or box-wood. These rings are generally numbered or lettered; and care should be taken to place the napkin of each person in his own ring.

All table linen should be marked in full with the whole name of the family.

Doilies.—These are small napkins intended for wiping the fingers after eating fruit, and are placed around the table for that purpose. They are very generally of colored cotton, with a border; the colors are dark, that the stains may not be conspicuous on them. Unless they are washed very frequently, they acquire a rather unpleasant smell, and are not agreeable to use. We think it best to have white ones, as they are much nicer, and the stains can easily be removed from them. Doilies are always fringed.

BEST LIGHT FOR PAINTINGS.

If you have fine pictures, (oil-paintings,) they will be worth taking every means of showing to advantage. Therefore, as bright colors around them would over-power their tints, let the walls be one uniform shade of a quiet and sober color, something like pale gray, or stone color, or pale olive; on no account any thing of a blue, red, green, or yellow tinge. On each side of all the principal pictures it is well to place a bracket supporting a lamp; thus doing justice to the work of the artist, and assisting at the same time to light the room. Where there are no pictures, or only engravings, the walls may be painted of a *very pale* pink or blossom color, an extremely delicate light green or blue, or of any buff or yellowish tint that will not interfere with the gilding of the mirror frames, etc. Generally, however, the safest color to set off the furniture is one of the various tints of gray, including light stone color and dove-color. The curtains, etc., should always be darker than the walls; otherwise the effect will be dull and insipid, for want of contrast.

India Rubber Sponge.—One of the most ingenious and useful applications of india-rubber which we have seen, for a long time, has been forwarded to us. It consists of a highly porous, cellular mass of vulcanized india-rubber. The material is, at present, only supplied in oblong, rectangular tablets, stiffened at the back by a plate of solid india rubber. This renders it more effective for cleaning paint, windows, etc., but somewhat detracts from its use as a substitute for a bath sponge. If the makers would supply the material in oval tablets or large masses, without any solid stiffening, it would form a most perfect imitation of sponge, and would have the great advantage of being almost indestructible. It can be used either with or without soap.—*The Chemical News.*

An Irishman complained to his physician that he stuffed him so much with drugs, that he was sick a long time after he got well.

Miscellaneous.

Santa Clara College, S. J.

SANTA CLARA, CAL.

Conducted by the Fathers of the Society of Jesus.

THE EIGHTEENTH ANNUAL SESSION OF THIS INstitution will commence on THURSDAY, August 27th, 1868.

TERMS—Tuition in the Classical and Scientific Departments; Boarding and Lodging; Washing and Mending of articles; School Stationery; Medical Attendance and Medicines; Fuel, Light, Baths, etc., per session of ten months.....$35

24-3 REV. A. VARSI, S. J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights of labor. It has the best agricultural department of any paper in the world: publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal: its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world.

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

MY GUEST.

The following Gem of Poetry from a Lady's pen was sent us with request to publish. It contains much that is beautiful, and will be read with interest. The Author's name is not given.—[Ed. Farmer.]

The fire is dead in the gloomy grate,
And the shadows are heavy along the walls,
I sit alone in my study-chair,
And look on the cold dead ashes there—
My wife has gone to the ball.

She came in, more than an hour ago,
In flounces and satin and costly lace,
And stood one moment to be admired
By this chair of mine—I was worn and tired,
But I smiled at her lovely face.

She never blushes—her cheek was cold
With the pride and grace that are always there,
But her eyes were dimmed in wells of light,
And I swear the flowers seemed stars to-night
In the sable of her hair.

She will dance, of course, with the Foreign Count,
And all the lions who grace the hall,
And many, I know, will envy the one
Who is silently watching her alone
The shadows upon the wall.

She is petted and flattered everywhere—
Her life is the world's, and the world her life;
And she laughs sometimes, with a careless glee,
And says 'tis honor enough for me
That she is my peerless wife.

Perhaps it is, but a dull, dead pain
Will come at night, as I sit alone—
A dead pain born of the early tears
Shed long ago, and I dream of years
That are all of the past and gone.

And sometimes into the chair of my wife,
That stands on the other side of the grate,
A slender shadow will softly glide—
A something that comes at eventide
To sit with me as I wait.

So tender a face you never saw,
All shady with tresses brown and gold;
The red curved lips, and the sunny eyes,
Half raised, like a child's in their sweet surprise,
And the brow that never grows old!

It comes from whence I cannot tell—
It goes like a breath of the idle wind;
It's steps is noiseless, its lips is still,
But a prayer, like mine seems to fill
The air it leaves behind.

Always the same through the lonely hours—
A shadowy thing in that empty chair;
Lingering just where the light is red,
And fading away with the first faint tread
Of my wife upon the stair!

My darling—mine! no other eye
Has ever looked on this midnight guest—
This haunting dream of a boyish love
Returned to my heart, as a wandering dove
To a long forsaken nest!

Long is the time since I heard her voice—
That best and dearest of all things dear!
The gay June roses have unclosed and blown,
And the long green grass, I know, has grown
On her grave for many a year.

And I dream of the stile, and the garden-gate,
And I hear the reaper's songs in the grain,
And see once more in this chair by this grate
The same sweet lily that used to wait
For my steps in the orchard-lane!

O, could I live over the years again!—
Hush! hark! 'tis the step of my wife in the hall!
She has danced with the Count, and she comes to me
The peerless Queen of the ball.

And my guest is gone—I am left alone
To miss the gleam of her golden hair,
And yearn for the pure sweet face again,
When I hear the drop of the midnight rain,
Or sit in this sturdy chair!

I know what it is—what *might* have been!
Will it ever better my life to say?
When I look on my wreaths, shall I think of their cost
The golden honey forever lost,
And the red wine flowed away?

THE PALACE BASILEWSKI, PARIS.

The Palace Basilewski, which has just been purchased by Queen Isabella, is considered one of the pearls that adorn that rich casket which is called New Paris. It was built three years ago by Count Basilewski, who gave the architects and artists *carte blanche* to erect a palace worthy the city which is called the capital of the world. The palace is on the Avenue of the King of Rome, at the angle of Rue Pauquet. Six doors open into the courtyard. These doors are flanked by two stone pillars, supporting allegorical figures, from the chisel of Bloche, representing the four quarters of the globe. The hotel, which is two stories high above the basement, is composed of three pavilions, the centre one of which is fronted by a portico sustained by eight columns of composite order, these surmounted by the heraldic shield of Count Basilewski. The vestibule is all white marble. The furniture, of severe simplicity, was brought, it is said, from the Chateau de la Granha near Madrid. It is supposed that the apartments to the left of the vestibule will be occupied by King Don Francois d'Assise. The apartments on the first story are reserved for the Queen, and the second story is intended for the household. In the other wing of the hotel, seperated from the Queen's chamber by the stairway, are the apartments intended for the young Prince of the Asturias. This palace, no doubt, is not as fine as the Escurial, but nevertheless, it presents a habitation not unworthy the exiled Queen.—*Frank Leslie's Illustrated Newspaper.*

Almost every heart possesses some one deep memory, some one powerful feeling, which has its harmonious connection with a particular hour and a particular scene.

Miscellaneous.

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME,

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the Farmer. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO.

AUZERAIS HOUSE,
SANTA CLARA STREET,
San Jose, Cal.

J. M. STAPLES, PROP'R.

—ALSO—

LAKE HOUSE,
DELMAR AVENUE,
SAN JOSE.

The undersigned has also leased this hotel for a term of years, and will open it for the accommodation of families on the 1st of March, and is to be kept in connection with the Auzerais House. It has a Park and Garden of some five acres of ground adjoining, beautifully laid out in walks, and ornamented with Fruit Trees, Flowers, and Shade Trees.

The house is built of wood, with galleries surrounding on each story

Families who desire quiet hotel accommodations combined with elegant pleasure grounds, will find the LAKE HOUSE a most agreeable place of resort. Parties wishing rooms and board will please apply to J. M. STAPLES,
31-1 Proprietor of the Auzerais House.

GOLDEN EAGLE HOTEL.
Corner Seventh and K streets,
SACRAMENTO.

THIS HOTEL IS OFFERED TO THE PUBLIC AS a "Home for Families," and for the Traveler.

The Proprietor has spared neither expense or care to make his Hotel one that shall always be acceptable and pleasant to all that may favor him with a call.

With ample accommodations by means of spacious Suites of Rooms for Families, and by recent enlarged accommodations, he is confident that visitors will always be satisfied and feel at Home.

Particular attention will always be paid to the comfortableness of the apartments, by well ventilated Rooms, clean Beds and Bedding, and strict attention to the wants of Boarders; while the TABLES will be provided with the very best the season affords.

Carriages, to and from the Hotel to the Railroad Cars and Steamers, at all times, Free of Charge to the Patrons of the Hotel. Hotel open all night.

☞ Connected with the Hotel is a Fire-proof STABLE expressly for the care of Horses and Carriages of the Patrons of the House.

D. E. CALLAHAN,
PROPRIETOR

Valuable Patents FOR SALE

We invite the attention of energetic Mechanics' to several very

VALUABLE INVENTIONS

for which we hold the

PATENT RIGHT

of this State and coast for the same.

They are each and all of a practical and useful character, and are such as a handsome return for labor and capital can be made from.

WARREN & CO.

Country Homes Wanted.

There is wanted at this time, several Homes in the Country, in good and pleasant locations, where the scenery and surroundings are also pleasant.

These estates should contain from 10 to 50 acres each, some of 100 acres, all suitable for families who want permanent homes.

Those who have such places for *sale*, or to lease for a term of years, can find the parties that will buy them if they communicate with this office immediately

None but good bona fide sellers need apply as the parties requiring these places have the means to carry out all their agreements. Addres the FARMER OFFICE.

BOUND VOLUMES FARMER

☞ Volumes of the "California Farmer" for The last EIGHT YEARS, uniformly bound, can be had at the Farmer Office at $3 per Volume.

These Eight Volumes contain more useful matter touchin the practical workings of Agriculture as adapted to California Culture than any Book or Books Extant, as they comprise hundreds of Experiments, Letters and Essays upon the Culture of Cotton, Rice, Coffee and Tobacco; Grapes, Strawberries, and all other Fruits, with the Culture of Hops, Castor Beans, Flax, Hemp, &c. and the Whole series of Essay of L. Prevost on Silk Culture, from early beginning.

This set of Volumes would be a Library of itself and is valuable to the Cultivator of the Soil.

Orders sent to Farmer Office will be promptly attended to

HUCKS & LAMBERTS'
CELEBRATED PATENT
H.&L.
AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum;

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.,

is on the red cover of the packages

Depot, 320 Jackson Street,

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. This three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This report exhibits the prices paid by the dealer to the producer on the wharf or landing places.

[Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, March 23.

Grain, &c

Well, Farmers! what do you think now? Was the advice and counsel that this Journal has given from *June last* up to the present time true and judicious? Would it not have been for your interest to have taken that counsel and to have sold your crops? Has there been a period of time since the high price of July and August, when you have been satisfied by the "Hold On" policy of some Journals that gave you that advice?

Farmers, you that have planted largely this year—you that should now be advised of the heavy stock of *Old Wheat still on the Market* and the prospects of an immense prospect this year; what will you do now—will you still "Hold On" to your last years' crop—pay interest, storage, ratage, leakage, wastage, and *per centage*, until it is all *eaten up by expenses?* or will you like wise men *sell now* for what it will bring?

We can aver that the amount of surplus grain and flour left over—together with the prospective crop of 1869 when it shall be harvested, will astonish you! Where are the ships to come from to take it away, provided there should be a sale for it? Can any one estimate the shipping required? We venture to say that if *two ships per day* should begin, July 1st, the commencement of the new Harvest, and load regularly for *Twelve Months* to come, they could not take away the Grain and Flour that California will have to spare. This may seem to some a large estimate, but if we place it at 1,500 tuns per day and load ships every day but Sundays, we should only get rid of FIVE HUNDRED AND TWENTY-EIGHT THOUSAND TUNS, and we are confident that our State will have an aggregate of more than SIX HUNDRED AND FIFTY THOUSAND TUNS.

With such a crop Farmers, is it not wise to reflect upon what it is best to do now, and then act wisely and promptly.

The Wool crop promises to be a large and a good one, and to promise a fairer price than last year to the grower.

Retail Prices in the Fruit Market.

With the exception of a fresh supply of Oranges, Lemons, Limes, Bananas and Pines, our Fruit Market retains a similar appearance to last week. Prices about the same and trade dull in consequence of not having good Fruit to dispose of. We would suggest to our Orchardists, to plant out at once before the season is too far gone, some good varieties of Pears so as to gain a season in their bearing. There will not be a Pear to be had in our Market next Winter—all will find their way down to New York, yes, and even at any price.

Retail Prices in the Vegetable Market.

In our Vegetable Markets this week we have had an abundance of Asparagus, Green Peas, New Potatoes, and Rhubarb, Cucumbers we have also, but not of good stock or quality. If our Gardeners would but turn their attention to the growing of good Cucumbers, we think they would be well repaid for their trouble, at very little extra trouble would suffice to produce a crop the year round. Cauliflowers and Broccoli are fine and very abundant.

DAIRY—BUTTER, CHEESE, EGGS ETC.

(M. B. French & Co.)

Dairy produce is being sent into our Market very freely, which keeps the prices down—of course, the unusual fine season is the cause of it. The roads generally are in good condition, therefore, there is little or no impediment for the transportation to the various Markets.

Traveling.

STEAMSHIPS FOR

New York, Japan and China,

WILL BE DISPATCHED AS FOLLOWS

Leave Wharf corner First and Brannan streets, at 11 o'clock, A. M., of the following dates for PANAMA, connecting, via Panama Railroad, with one of the Company's splendid steamers from Aspinwall for New York:

On the 6th, 14th 22d and 30th of each month.

Steamer leaving San Francisco on the 6th touches at Manzanillo. All touch at Acapulco.

Departure of the 14th is expected to connect with the French Trans Atlantic Comp.'s steamer for St. Nazaire, and English steamer for South America. Through tickets can be obtained.

Departure of 14th is expected to connect with English steamer for Southhampton Australia and South America, and P. R. R. Co.'s steamer for Central America. Through tickets can be obtained.

The following steamships will be dispatched on dates as given below:

STEAMERS FOR FEBRUARY.

The following Steamships will be dispatched on dates as given below.

March 10th—GOLDEN CITY, Capt W. F. Lapidge, connecting with ALASKA, Capt. Gray.

March 18th—MONTANA, Capt. E. S. Farnsworth, connecting with RISING STAR, Capt. Connor.

March 30—COLORADO, Capt. W. H. Parker, connecting with HENRY CHAUNCEY, Capt. Maury.

Passengers berthed through. Baggage checked through—100 pounds allowed each adult.

An experienced Surgeon on board. Medicine and attendance free.

☞ These Steamers will positively sail at 11 o'clock. Passengers are requested to have their baggage on board before 10 o'clock, A. M.

Through tickets to Liverpool by the "Cunard," "Inman" and "National" Steamship Lines can be obtained at P. M. S. S. Co.'s office in San Francisco, where may also be obtained orders for passage from Liverpool or Southampton to San Francisco, either via New York or St. Thomas—if desired an amount of £10 to £20 will be advanced with the above orders. Holders of orders will be required to identify themselves to the Agents in England.

For Merchandise and Freight, for New York and way ports, apply to Messrs. WELLS, FARGO & CO.

☞ The Steamship GREAT REPUBLIC, Capt. S. Doane will be dispatched on Saturday, October 3rd, at 12 o'clock noon, from wharf corner of First and Brannan streets, for YOKOHAMA and HONGKONG, connecting with the steamship COSTA RICA, for SHANGHAE.

For passage and all other information, apply at the Pacific Mail Steamship Company's office, corner of Sacramento and Leidesdorff streets.

ed1 OLIVER ELDRIDGE, Agent.

California Steam Navigation Company

Departure daily from Broadway wharf, at 4 o'clock, P. M.

CARRYING UNITED STATES MAIL.

THE FAST AND SPLENDID STEAMERS

CHRYSOPOLIS and YOSEMITE

Will leave on alternate days for SACRAMENTO at 4 o'clock p. m., from Broadway wharf.

Steamer CHRYSOPOLIS, Chadwick, Master, will leave on Tuesdays, Thursdays and Saturdays. Steamer YOSEMITE, Poole, Master, will leave on Mondays, Wednesdays and Fridays.

Other steamers will also leave for STOCKTON every day at 4 o'clock, p. m. (Sundays excepted), from Broadway Wharf.

For Marysville and Intermediate Landings Every Day.

Steamer YOUNG AMERICA, Littleton, Master, and Steamer SWALLOW, Summers, Master, will leave Sacramento on alternate days, at 6 o'clock a. m

ONE TRIP A WEEK FOR COLUSA, RED BLUFF, AND INTERMEDIATE LANDINGS.

The steamers LARK and GEM will leave for the above named places on SATURDAYS, at 7 o'clock, a. m. from the Storeship, foot of K street, Sacramento.

For freight or passage by any of the above boats, apply on board, or at the Office of the Company, corner of Jackson and Front streets.

v17-13 J. WHITNEY, JR., President.

CENTRAL PACIFIC RAILROAD

ON AND AFTER THURSDAY, NOV. 5th, UNtil further notice, the Trains of the Central Pacific Railroad will run daily, Sundays excepted, as follows:

Going East.

Passenger Train will leave Sacramento at 6.30 A. M.; Colfax at 9.50 A. M.; Reno at 4.20 P. M.; Wardsworth at 6.30 P. M. Winnemucca at 3.30 A. M.; Argenta at 8.50 A. M.; and arrives at Elko at 1.40 P. M.

Going West.

Passenger Trains leave Elko at 4.10 A. M. Argenta at 9.05 A. M. Winnemucca at 2.30 P. M. Wadsworth at 12.05 P. M. Reno at 2.10 A. M. Colfax at 9.50 a. m. and arrives at Sacramento at 1.20 p. m.

Second Class Cars accompany Freight Trains, on which Passengers are conveyed at reduced rates.

The 6.30 A. M., passenger train connects at Junction with the cars for Marysville and all points of Northern California and Oregon.

At Auburn with Stages for Yankee Jims, Forest Hill, Michigan Bluffs, Coloma, Greenwood and Georgetown.

At Colfax with Stages for Grass Valley, Nevada, San Juan, Camptonville, Forest City, Downieville and Iowa Hill.

At Dutch Flat with stages for Little York, You Bet, Red Dog and Nevada.

At Reno with stages for Virginia City, Gold Hill, Silver City Dayton, Carson, Washoe City, and all parts in the State of Nevada.

And at Winnemucca with stages for Paradise Valley, Camp Scott, Camp McDermitt, Silver City, Owyhee, and all points in Idaho Territory.

At Argenta with Stages for Austin, and at Elko with Stages for White Pine, and Overland Stages for Salt Lake City and the Atlantic States.

C. CROCKER,
General Superintendent

To Whom it May Concern.

The undersigned having, for a period of over thirty years, devoted himself specially to the preparation of lubricating compounds; and having succeeded, both in this country and in Europe, in producing a chemical arrangement of materials which has not, up to this time, been either surpassed or equalled, is yet willing to concede (the field being open) that others—with an equal amount of labor, patience and skill—may supercede the article about to be referred to. In fact, other manufacturers have recently introduced a less costly substitute, with the announcement, "USE NONE BUT THE BEST," and other devices! Now, if any similar preparation before the public is really better than the H & L. AXLE GREASE, the writer desires to know it. And if there be not, he desires his numerous friends and patrons to know it also. And for this purpose he offers a challenge of ONE HUNDRED DOLLARS, or upwards, to any or all competitors who are willing to make the test. The loser to pay the amount over to any charitable institution which may be previously agreed on; and the decision to rest with any respectable teamster who, after an impartial trial, will be willing to make affidavit of the respective merits of each.

JOHN G. HUCKS,
(Of the firm of Hucks & Lambert.)
No. 708 Lombard street, North Beach.

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR AN *ORANGE PLANTATION*, Can obtain SUPERIOR SEED at the

FARMER OFFICE.

IMPORTANT TO MERCHANTS, FARMERS AND PLANTERS.

WE HAVE BEEN INFORMED THAT THE USUAL PRACTICE OF MERCHANTS, FARMERS AND PLANTERS in ordering their supplies of

Dr. McLane's Celebrated Vermifuge!

Has been to simply write or order Vermifuge. The consequence is, that instead of the genuine Dr. McLane's Vermifuge, they very frequently get one or other of the many worthless preparations called Vermifuges now before the public. We therefore beg leave to urge upon the Planter the propriety and importance of invariably writing the name in full, and to advise their factors or agents that they will not receive any other than the genuine DR. McLANE'S CELEBRATED VERMIFUGE, prepared by FLEMING BROTHERS, PITTSBURG, Pa.

We would also advise the same precaution in ordering DR. McLANE'S Celebrated LIVER PILLS. The great popularity of these Pills as a specific or cure for LIVER COMPLAINT, and all the Bilious Derangements so prevalent in the South and South West, has induced the venders of many worthless nostrums to claim for their preparations similar medicinal virtues. Be not deceived! DR. McLANE'S Celebrated LIVER PILLS are the original and only reliable remedy for Liver Complaints that has yet been discovered, and we urge the Planter and Merchant, as he values his own and the health of those depending on him, to be careful in ordering Dr. McLane's Vermifuge or Liver Pills, unless you are sure you are getting the genuine McLANE'S, prepared by

FLEMING BROTHERS, PITTSBURG,

DR. M. LANE'S CELEBRATED LIVER PILLS

FOR THE CURE OF

Hepatis or Liver Complaint, Dyspepsia, and Sick Headache.

In offering to the public DR McLANE'S CELEBRATED LIVER PILLS, as a remedy for the various BILIOUS COMPLAINTS, we presume no apology will be needed. The great prevalence of LIVER COMPLAINT and BILIOUS DISEASES OF ALL KINDS throughout the United States, and peculiarly in the South, where, in the majority of cases, the patient is not within the reach of a regular physician, some remedy should be provided, that would not in the least impair the constitution, and yet be safe. That such is the true character of DR McLANE'S LIVER PILLS, there can be no doubt. The great success which has invariably attended their use, will, we think, be sufficient to convince the most incredulous of our sincere wish that these Pills should be fairly and full tested, and stand or fall by the result when they have been so tested, and that the result has been in every respect favorable, we call thousands who have experienced their beneficial effects.

DR. McLANE'S LIVER PILLS, are not held forth or recommended, (like most of the nostrums of the day,) as universal cure-alls, but simply for LIVER COMPLAINTS, and those symptoms consequent on a deranged state of that organ.

DISEASES OF THE LIVER

The Liver is much more frequently the seat of disease than is generally supposed. The function it has to perform, and on the regular execution of which depends not only the general health of the body but also of the Stomach, Bowels, Brain, and the whole Nervous System, should be vast and vital importance to health. When the Liver is seriously diseased, it fact not only deranges the vital functions of the body, but exercises a powerful influence over the mind and its operation, which cannot be easily described. It has connection with other diseases, and manifests itself by so great a variety of symptoms, of a most deceptive nature that it misleads more physicians, even of great eminence, than any other vital organ. The intimate sympathy which exists between the Liver and the Brain, and the great dominion which I am persuaded it exercises over the passions of mankind, convince me that many unfortunate beings have committed acts of deep and serious crime, or become what fools term hypochondriacs, from the simple fact of a diseased state of the Liver. I am also convinced that more than one-half of the complaints which occur in this country, are to be considered as having their seat in a diseased state of the Liver. I will enumerate some of them:—Indigestion, Stoppage of the Bowels, Deranged State of the Bowels, Irritable and Vindicative feelings and Passions from trifling and inadequate causes of which we afterwards ashamed; last, though not least, more than three fourths of the diseases of mankind under the head of CONSUMPTION, have their seat in a diseased Liver. This is truly a frightful catalogue.

SYMPTOMS OF A DISEASED LIVER—Pain in the right side, under the edge of the ribs, which increases on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes pain is felt under the shoulder-blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels generally are costive, sometimes alternating with lax; the head is troubled with pain, accompanied with a dull sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful impression of having left undone something which ought to have been done. A slight dry cough is sometimes present. The patient complains of weariness and debility; he is easily startled; his feet is cold or burn; he complains of a prickly sensation of the skin; his spirits are low; although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts everybody. Several of the above symptoms attend the disease; but cases have occurred when few of them existed, and examination of the body after death has shown the Liver to have been extensively deranged.

AGUE AND FEVER—DR M. McLANE'S LIVER PILLS in cases of AGUE AND FEVER, when used in connection with Quinine, are productive of the same happy results. No better cathartic can be used preparatory to, or after the use of Quinine. We would advise all who are afflicted with this disease to give them a fair trial.

DIRECTIONS.—Take two or three pills, on going to bed, every second or third night. If they do not operate two or three times by next morning, take one or two more; but a slight breakfast should invariably be eaten. The Liver Pills may be used where purging is simply necessary. As an anti-bilious purgative they are equal to none, and in doses of two or three, they give astonishing relief in Sick Headache; also, in slight affections of the Stomach.

DR. McLANE'S American Worm Specific Vermifuge.

No diseases to which the human body is liable are better entitled to the attention of the philanthropist, in consequent on the irritation produced by WORMS in the Stomach and Bowels. When the sufferer's disease cause is frequently overlooked, and consequently the proper remedy is not applied. But when the patient, if the disease is not entirely neglected, it is still too frequently ascribed, in whole or in part, to other causes. It ought here to be particularly remarked, that although but few worms may exist in a child, however quiescent they may have been previously, no sooner is the constitution invaded by any of the many forms of diseases to which infancy is exposed, than it is fearfully augmented by their irritation. Hence it often happens that a disease otherwise easily managed by proper remedies, when aggravated by that cause, yields to treatment, udicious in other respects, but which entirely fails in consequence of worms being overlooked, even in cases of great violence, if a potent and prompt remedy be possessed, so that they could be expelled, loss of time, which is so precious in such cases, the disease might be attacked, by proper remedies, and cured with success.

SYMPTOMS WHICH CANNOT BE MISTAKEN.—The countenance is pale and leaden-colored, or occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; a livid circle runs along the lower eyelid, the nose is irritated, swells, and sometimes bleeds; swelling of the upper lip, occasional headache, with humming or throbbing of the ears; an unusual secretion of saliva, clean tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with sensation o the stomach, at others entirely gone; fleeting pains in the stomach; occasional nausea, violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequently with blood; belly swollen and hard; urin turbid; respiration occasionally difficult and accompanied with cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; irritable, but generally irritable, &c.

Whenever the above symptoms are found to exist, DR. McLANE'S VERMIFUGE MAY BE RELIED UPON TO EFFECT A CURE.

The universal success which has attended the administration of this preparation has been such as to warrant us in pledging ourselves to the public to RETURN THE MONEY in every instance where it proves ineffectual in providing the symptoms attending the sickness of the child or adult warrant the supposition of worms being present. In all cases, the medicine to be given in strict accordance with the directions.

We pledge ourselves to the public, that DR. McLANE'S VERMIFUGE DOES NOT CONTAIN MERCURY IN ANY FORM; and that it is an innocent preparation, and not capable of doing the slightest injury to the most tender infant.

DIRECTIONS.—Give a child, from two to ten years old, a teaspoonful in as much sweetened water in the morning, fasting; if it purges through the day, well; but if not, repeat it again in the evening, or a little more; under two, give less. To a full-grown person give two teaspoonfuls.

BEWARE OF COUNTERFEITS, AND ALL ARTICLES PURPORTING TO BE DR. McLANE'S. The great popularity of DR. McLANE'S GENUINE PREPARATIONS has induced unprincipled persons to attempt palming upon the public counterfeit and inferior articles, in consequence of which the proprietors are forced to adopt every possible guard against fraud. Purchasers will please pay attention to the following marks of genuineness:—1st. The External Wrapper is a fine, Steel Engraving, with the signature of C. F. McLANE, FLEMING BROS. 2d. The Directions are printed on Fine Paper, with a Water Mark as follows: McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS, FLEMING BROS., PITTSBURG. This Water Mark can be seen by holding up the paper to the light.—The LIVER PILLS have a red wax seal stamped on the lid of the box, in red wax.

Prepared only by FLEMING BROTHERS, PITTSBURGH, PENN

Sole Proprietors of Dr. McLANE'S Liver Pills and Vermifuge,

SOLD BY DEALERS EVERYWHERE.

The proprietor will forward per mail, post paid, to any part of the United States, one box of Liver Pills or Vermifuge on receipt of forty cents in Government Stamps.

EUROPEAN.

From our Special Correspondent.

[We are happy in introducing to our readers *Number One*, of a series of Letters, which we shall now receive regularly from Paris, giving to us all the most Important and Interesting facts connected with the interests of Agriculture, Horticulture and Floriculture.

This series of Letters will come from one of the best writers on these subjects, and the Letters will be written exclusively for the *California Farmer*.

We shall soon have Letters from our *Lady Correspondent* in London, and also from various other sources, from writers of the best talent, all prepared especially for this Journal, and which we trust, will be duly appreciated by our generous Patrons and Readers.]

LETTER NUMBER ONE.

PARIS, January, 29, 1669.

There is no country so advanced, that has not something yet to learn, and no nations agriculture but has something to teach. Great efforts are now required to solve that agricultural problem which includes all others—the best systems of cultivation, and it cannot be otherwise than instructive to be aware of what Europe is doing in this respect. My letter shall therefore be confined to the *actualities* of Continental farming in practice, to that which is useful, in science, to what is prudent. In all work, philosophers recommend method, and following Byron's plan—"my method is to begin with the beginning." Aware of the advantages of a "rotation" in farming, the agricultural system of each European nation, will be noted in turn. However Mr. Bismarck may deny to France, the premier rank in Europe in politics, he must concede her this position in practical and experimental agriculture.

France can never be a country of "monster farms." Since the Revolution of 1789, landed property, by the abolition of the law of primogeniture, has been extremely divided. The arable land is about 113,000,000 of acres, of which small proprietors own 69,000,000, medium 13,000,000, and owners 28,000,000. Not only by their number, but by territory, the small holders predominate. In the neighborhood of towns, land is most split up, almost into the cottier or allottment system. But never so small as to be ridiculous, as when this "minute division of the soil" is in question, the eldest member of a family either buys up, or rents the shares of the others, or a wealthy proprietor steps in as purchaser; the transfer of land being as easily negotiated as government stock. The climate of the Empire embraces the productions of the Temperate Zone in its fullest extent, which consequently are as varied, as they are rich. The cultivators are industrious in every rank, their condition comfortable rather than luxurious, and where badly off, are never positively in want. About twenty-five per cent of the general taxation of the country falls upon agriculture. The extended forests which cover so large a portion of the Empire are in the hands of the Government, being leased out to the highest bidder, who has power to sub-let, either for the timber, which must be cut "according to law," or for hunting. The two great "revolutions" in French farming have taken place within the last fifty years. The first was that in "rotation" of crops. An old three course was followed, consisting of the division of a farm into two portions, one being in meadow; the other was sub-divided into equal parts; one of these was under grain, the other fallow, that is, remained unproductive once in every two or three years. Thanks to progress, a root crop, generally potatoes, has superseded the fallow. A fine course rotation, comprising roots, clover, wheat and oats is the favorite at present. The second revolution, dating some thirty years back, has been in manuring, that is, the employment of artificial or chemical manures, as adjuncts or complements to that of the farm-yard. This subject will be treated upon bye and bye. As a general observation, French agriculturists are not book-farmers—they are on the whole, quick and ingenious, anxious for more light on their duties, liberal enough to change where improvement is safe, but rather inclined to look to their "parental" Government to undertake the risks and perils of innovation. Not that France is wanting in "philanthropic farmers," courageous to speculate, and patient to wait results. One notable example is that of Mathieu de Dombasté. For twelve years he endeavored to cultivate a barren spot regardless of expense—the high farming principle. He has avowed, he never could raise more than 33 bushels of wheat, and 17 tuns of beets per acre, and every year of the twelve, that his fancy farming continued, his books balanced with a loss.

Possibly no government does more to encourage agriculture than that of France, and no Monarch has surpassed the Emperor. He is a-go-ahead farmer himself—has founded out of his private fortune several model farms to test the best systems of culture, and to essay all new inventions; above all, to adapt his examples to the wants of the country, discarding all luxury, all that magnificent trifling which destroys the best intentions of well-disposed proprietors here, as elsewhere. He has two example farms at the gates of Paris nearly, nine in addition to a colony, in the desert of Gascony, eight in Champagne, three in Sologne, one on the granite slopes of Limousin, and one in Italy, near Bologna. He receives on the average four per cent on his capital. His cousin, the Princess Bacchioci, guards a hermit life on her model farm in the wilds of Bretagne. The Minister of Agriculture is voted every year, a respectable sum for his department, as also, for the execution of public works, more or less allied with rural interests—such as roads, railways, canals, etc. Sometimes Departments are selected every year, in which are held, in spring or summer, art, industrial, and agricultural exhibitions, with prizes for local competitors, as well as all-comers—so that in ten years, each Department has its subsidised little "World's Fair." Then there are governmental farms, fitted up with laboratories, where Science has but to cross the threshold to test its conclusions—there are agricultural schools of various categories, where pupils graduate and receive diplomas. Further, there is offered to each Department annually, a series of eight prizes of honor, varying from an object of art, valued at 200 francs along with a purse of 600 francs, up to a work of art, value for 500 francs, along with a purse of 2,000 francs, (with medals and smaller prizes for agents and farm bailiffs) for large and small proprietors, or co-proprietors, having in the opinion of the inspectors the best managed farms, etc. in their Department.

France has but lately terminated a great agricultural Inquiry, and the Commissioners have probed every grievance. The General Society of Agriculturists have still later sat upon a Report, in a Congress held in Paris. Passing over the consideration of matters purely local, the Society turned out a great deal of "sound corn." It recommends from 1870, a general, instead of local cattle shows, the first to be held in Paris, where prizes would be given, not only for cattle of pure breed, but for animals possessing special attention. It is proposed to elect the judges, three in number, by 'the universal suffrage" vote of the exhibitors. The same system will be applied to the annual show of implements—one prize only will be given in each class, and the entries limited to France. An International Implement Exhibition, however, is to be organized. The subject of agricultural education was largely entered into. The resolutions were in favor of founding additional State experimental farms—a Central College, an improvement in the pecuniary condition of the boarders at the Farm Schools, and the application of agriculture in school studies generally. It was not to be "professed" to children, they should only be trained to "*like*" it; girls should be instructed in the art, and a trial should be made of working school farms by giving the pupils a partnership in the profits.

In every industry in France almost, woman has her "Rights" in being permitted to work, and consequently she is to be found largely employed in agriculture, where alongside men, "the grey mare often turns out the better horse." Machines for abridging labor are finding their natural home, but home-manufactured implements are bad, clumsy, and dear. It is curious that so few English or American implement makers seek a foreign market. From the Olive land of Spain, across fair Italy, through the wilds of Bohemia, and to the steppes of Russia, but two American, and three English manufacturers' names were all I met with—and there is a market for the article, as the "cheap labor" question is every where pressing.

The scientific world may be said to be concentrating its attention on the comparative value of chemical manures, limited to the phosphates and nitrates, and the rotating of crops where analysis indicate sympathetic relations. Farm-yard manure has not fallen in estimation of course, but with phosphate of lime, nitrate of soda, and the salts of potash, halcyon days are in store for farmers. Some experiments at the Government schools are pending, which promise to be interesting. French capital is to be employed to work the veritable quarries of phosphate of lime in Spain; Prussia and Hungary are to supply the potash, as well as sea-niter, Peru the nitrates, and Coke manufactories the sulphate of ammonia.

Cold and tepid water baths for cattle, are creeping into favor as therapeutic agents in the treatment of inflammatory diseases. C. F.

(CONTINUED IN OUR NEXT.)

EARTHQUAKE.—A little before *six* P. M., about our *press time*, we had a small shaking up—but as it was but a small one, and only once repeated; this time but *few* were *scared* and none *hurt*. It shows however, that the *stomach below* is still out of order.

We are indebted to the Merchants' Reading Room Association for a liberal supply of Newspapers from the Sandwich Islands by the last arrivals, for which we tender thanks.

THE PERRY MOWER IN THE FIELD.

First Prize at the New England Agricultural Fair held at the City of New Haven, September, 1868.

THE PERRY MOWER.

We give this week the very fine Illustration above of the *Perry Mower*, which has excited a very great interest in the old States, and which, as will be seen by the *Reports of the Committee* of the New England Agricultural Society's Show, held at New Haven in September last, this Mower took the *Grand Prize* oser all others.

As California is bound to have the *very best Implements* of all kinds, we esteem it our duty to publish everything which will advance the FARMERS' interest.

OUR ILLUSTRATION.

It is probably within the remembrance of those who attended the Exhibition of the New England Agricultural Society at New Haven, in September last and read the full report of the proceedings which appeared in the *Ploughman* of the day, that the Committee on Class 10, No. 61 (Agricultural Implements), failed to make an award of premiums on Mowing Machines. This fact was incorporated in their report to the Society, the Trustees of which, at a subsequent meeting, referred the matter back to the Commitee for final and decisive action.

To this end, a meeting of the Committee was held at the Parker House in this city on Tuesday last, Col. Geo. W. Riddle, of Manchester, N. H., Chairman of the Committee, presided, and A. G. Hills, of North Wrentham, Massachusetts, was chosen Secretary.

The Mowing Machines were represented by their Inventors, Manufacturers or Agents, who participated in the proceedings of the meeting, which took a wide range, the largest liberty being allowed in the discussion.

The session of the Committee lasted about three hours, during which time remarks were offered by Mr. Barnard, representing the Buckeye Mower, Mr. Green, for the Clipper, Mr. Whittemore, for the Wood, Mr. Perry, for his Invention, and Messrs. Holcomb, Hubbard, Barrett, and Hills of the Committee.

At the close of the discussion, the Committee proceeded to ballot on a motion to make an award for the best Machine exhibited at the Fair at New Haven. A decisive result having been obtained, the following report was drawn up and unanimously signed by the Committee:

Herewith is the

REPORT OF THE COMMITTEE.

BOSTON, Dec. 1, 1868.

A meeting of the Committee of the New England Agricultural Society, appointed to make awards on Mowing Machines exhibited at New Haven in September last, was held at the Parker House in this city to-day, the Chairman, Col. Geo. W. Riddle, presiding, and A. G. Hills, acting as Secretary. A number of exhibitors were present and participated in the hearing. After a full discussion of the merits of the case, the Committee proceeded to ballot on the question of making an award of the First Premium of the Society, when it appeared that a majority of the Committee had voted in favor of awarding to the Ames Plow Company the first premium of the Society for the PERRY MOWER.

(Signed.) GEO. W. RIDDLE, A. G. HILLS, E. V. B. HOLCOMB, D. W. SHARES, O. HORACE HUBBARD CHARLES WILLIAMS, W. E. BARRETT.

Eastern Correspondence.

LETTERS FROM AN OLD CALIFORNIAN AT THE EAST.

NUMBER NINETY-EIGHT.

NEW YORK, February 20, 1869.

Editor California Farmer:—

OVERLAND MAIL—OPERA HOUSES.

I have been so disgusted with the uncertainty of the overland mail, that I have almost entirely suspended my California correspondence. I hope that the promise of a better state of things will be fulfilled. I have been amusing myself lately, in examining the new theatres which have been so recently opened. A conflagration like that which destroyed the Winter Garden, has generally no bright side, but in-as-much as we owe to it the most magnificent temple of the drama on the Continent, we must recollect it as a fortunate event. Booth's Theatre presents a most imposing appearance in the day-time, but when one approaches it at night, when it is literally dazzling to the eye of of the spectator, the effect is generally heightened. The entrance has been ornamented in the style of Raphael, and is entirely new as well as most attractive. The pavement alone is worth examining, for it is a model of real Venetian Mosiac, reduced in tiles. I had not secured seats, so I took my company into the dress-circle, where we had a fine view, not only of the stage, but of the whole building. It is not as brilliant to the eye at first as the grand Opera House, but it bears close examination and in the end pleases one better. The ceiling of the theatre has the appearance of an open cupola, surrounded by a balustrade, the medallion in the centre representing Apollo and the Muses; the spaces are ornamented with statues of Macbeth, Hamlet, Othello, and King Lear. The walls are decorated in the style of Raphael, and the effects of the coloring is admirable. The Proscenium is very beautiful, and differs wholly from anything I have ever seen. The chandeliers are artistic in design, and lights up the house even to a brilliancy. The finest live poem in the English language, Romeo and Juliet, was the entertainment for evening, and I need not say, how much we all enjoyed its representation. It was magnificently put upon the stage—the meeting of the retainers of the rival houses of Montague and Capulet in the great Square of Verona, was one of the finest spectacles I have ever witnessed. Edwin Booth's impersonation of Romeo is an original and a most natural piece of acting. It is criticised as too real and not poetical enough. This I would regard, if I were in Mr. Booth's place, as more of a compliment than otherwise. The garden scene was intensely life-like, and we were charmed with Mrs. McVickars' representation of Juliet. Edward Adams as Mercutio was excellent; we were sorry to see Benzolio give him his death wound. I wished ever so much during the play for Mrs. Judah, for the Nurse was wretchedly played, and particularly as I thought of Mrs. Judah's conception of the parts; even the ladies who accompanied me found fault with Miss Morant's reading, though they were disposed to be pleased with everything Edwin Booth has anything to do with, be it ever so remotely. Mark Smith as the Friar was good. The parting of Romeo and Juliet, Scene IV. Act III. was the finest part of the play.

Thinking people have witnessed the demoralization of the Drama with fear. Edwin Booth has shown them how easy it is to turn the tide. Fickle as the public of New York are, when Shakespeare is magnificently presented, he exercises the same royal sway over them as he has done of yore. The Drama is again triumphant, and this time Edwin Booth means that cultivated people shall have a place to enjoy it permanently.

If Edwin Booth has magnificently raised Tragedy on 23d street, Brougham has prepared a palace for Comedy in 24th street, next the Fifth Avenue Hotel. His theatre is small, but it is a perfect gem of a place. We spent a most agreeable evening in hearing his "Better late than never," and his "Dramatic review for 1868." The pieces were good, the scenery was handsome, the dresses were brilliant, and the acting was capital.

Pike's Opera House as your readers are probably aware, has been purchased by Mr. Jas. Fisk, Jr., and is now called the Grand Opera House, and justly so, for it holds its own, even when we are all charmed with Booth's theatre. Its lobbies indeed, are unsurpassed. We went to hear the charming Irma in "La Perichole." This is one of Offenbach's best productions, and we were much pleased with it, for it is not only splendidly mounted, but the caste throughout was excellent.

The new Tammany Theatre, we have not yet had an opportunity to see, but rumor says that it is crowded. At Wallack's, they are playing "Much ado about nothing," and the critics say it is admirably played. I promise myself the pleasure of seeing it next week. Trade is dull, times are hard; such is the constant cry, and yet it is astonishing to find the theatres all well filled nightly, and the new ones crowded daily. Is New York becoming a city of luxury? It is not difficult to predict, that, in a few years it will indeed be the rival of, as well as the Paris of the New World,

Agriculture.

THE OLD MAN DREAMS.

O, for one hour of youthful joy!
Give back my twentieth spring!
I'd rather laugh a bright-haired boy
Than reign a gray-beard king.

Off with the wrinkled spoils of age—
Away with learning's crown;
Tear out life's wisdom-written page,
And dash its trophies down.

One moment let my life-blood stream
From boyhood's fount of flame!
Give me one giddy, reeling dream
Of life all love and fame.

My listening angel heard the prayer,
And, calmly smiling, said,
"If I but touch thy silvered hair,
Thy hasty wish hath sped."

"But is there nothing in thy track
To bid thee fondly stay,
While the swift seasons hurry back
To find the wished for day?"

Ah, truest soul of womankind;
Without thee, what were life?
One bliss I cannot leave behind:
I,ll take—my—precious—wife!

The angel took a sapphire pen
And wrote in rainbow dew,
"The man would be a boy again,
And be a husband too!"

"And is there nothing yet unsaid
Before the change appears?
Remember, all their gifts are fled
With those dissolving years!"

Why, yes, for memory would recall
My fond paternal joys;
I could not bear to leave them all;
I'll take- my—girl—and—boys.

The smiling angel dropped his pen—
"Why this will never do;
The man would be a boy again,
And be a father too!"

And so I laughed—my laughter woke
The household with its noise—
And wrote my dream, when morning broke
To please the gray-haired boys.

O. W. Holmes.

CULTURE OF THE CRANBERRY.

As the raising of cranberries is receiving more attention from those who are interested in their culture, a few facts in regard to their growth, culture, etc., will be of service to all who wish to raise them for their own use or market. Success in raising cranberries is owing entirely to thorough preparation of the ground and subsequent culture.

THE SOIL BEST ADAPTED

Is low, moist land, suitably drained, so that the water will be twelve or fifteen inches under the surface.

As the plant draws its nourishment from air and water, it is not of consequence how poor the soil may be. Light soil, or that destitute of organic matter, is better for their growth; hence, if the ground is covered with much bog or peat, it would be of great service to remove the top of the ground to a compost heap, and cover the remaining soil with sand to the depth of three to five inches.

The sand tends to prevent the growth of weeds, wild grass, etc.; is easier cultivated, and keeps the ground loose around the plants.

If planted directly on muck or rich soil, they are apt to make too rank a growth, sometimes ten or twelve feet in length, and cover the ground over with a mat three or four inches thick; and as the fruit grows on the ends of the shoots, the rank growth throws out but few buds; but if sanded over, the shoots are of short growth, the plants become rooted, and throw out stronger fruit-buds.

They will grow on moderately damp soil, that can be plowed or cultivated, or in garden soil not too dry, and produce a fair crop on such land; but will not do well on dry sand or clay. Where the soil is partially dry, they can sometimes be covered with tan, sawdust, or any thing that retains moisture, spread on the top of the ground; they also grow well on the borders of streams and ditches.

OVERFLOWING

Is desirable, and I might say it is almost indispensable to do this late in the fall. It is non-essential as to the depth of water over them. It can be let off again from the 1st to the 10th of May. If it can be done, it is desirable to have the flow so regulated that it can be let off or on in the course of a few hours; so that, in case of drought or attack of the worm, it can be let on for a short time; it should be used also in the fall while gathering the fruit, for a frost may seriously injure it for market. In prospect of any danger, the water can be let on until it is past; or if it is desirable to keep the fruit over the winter, the berries can be left on the vines until spring, when they will be as fresh as if gathered in the fall.

THE VARIETIES.

There are three varieties—the cherry, bugle, and bell—generally cultivated. The large round *cherry* is a late, not prolific bearer, and does best on quite damp soil. The *bugle* is quite handsome, not as late as the cherry, and not as prolific as the *bell*, which is the most generally planted. It is early and prolific, and is the kind usually sold as Cape Cod cranberries. It also the kind sold by some dealers as upland; but there are none strictly so

PLANTING AND CULTURE.

When the ground is well prepared, lay it out as you would for planting cabbage, strawberry, or other plants, using a pointed stick or dibble to make a hole four or five inches deep, in which you place the plant, press the dirt around it, and the root and stem will soon start to grow. The remainder of the vines may be layered in the ground, leaving the shoots or stems above. The vines covered will take root and much sooner cover the ground. Another plan, adopted by many, is to take the vines up without roots, often six or eight feet in length, which they cut up and sow in drills, or lay the vine down and cover with dirt. In this way it will take from twelve to fourteen barrels of vines, to the acre.

The reason for this course is, that where vines are grown on rich muck or soil, they do not make roots, but all mat together, and the above is the only way they can be planted out; but where the ground is sanded, they grow more upright short vines with roots. These are the best to plant out, are packed close for transportation, and the only kind that can be forwarded by mail. They are tied in bundles of 100 each. Ten housand can be packed in a barrel, sufficient to plant an acre, two feet apart each way; but if the vine above ground is layered as proposed above, the two feet between each plant will be filled at once. Ten thousand plants per acre, if planted this distance apart, they can be cultivated with a horse hoe or cultivator to keep out the grass and weeds. After two or three years' cultivation they will take care of themselves. If wanted in small patches or in gardens, they can be set a foot apart and will cover the ground much sooner. They can be planted out at almost any season of the year—when the ground is not frozen, in the fall from September, at the North, until the ground freezes, or in the spring until July. At the South and West, if possible, they should be planted from October to January or February. If received too late for planting, the roots can be covered with dirt in a box and placed in a cellar, until they can be planted out. Where there is no overflow, I am satisfied that they can be planted out in early spring until July, as well as fall.

Every family can have their garden patch, and in dryish soil, grass, meadow muck, tan, or sawdust around the plant will be beneficial to retain moisture. They are highly ornamental in pots, the fruit hanging on the plant until the blossom appears for the next crop. They often bear a few berries the first year, and increase every year, coming into perfect bearing from five to eight years, averaging 100 to 150 bushels per acre—sometimes yielding as high as 300 bushels.

A point worthy of notice is, that cultivated fruit is less likely to be affected by drought than wild fruit.

THE SIMPLICITY OF TRUE GREATNESS.

"The more I see of the world, the more I am convinced that simplicity is not more the inevitable accompaniment of true genius that it is of true greatness. I never yet knew a truly great genius who did not possess a certain playful, almost childish, simplicity of character. True greatness never struts on stilts, or plays the king upon the stage. Conscious of its elevation above the rest of mankind, and knowing in what that elevation consists, it is happy to take its part in the common amusements and business of life. It is not afraid of being undervalued for its humility."

"Of this class was Chief Justice Marshall. In his hours of relaxation, he was as full of fun and as natural as a child. He entered into the spirit of athletic exercises with the ardor of youth; and at sixty odd years of age was one of the best quoit players in Virginia.

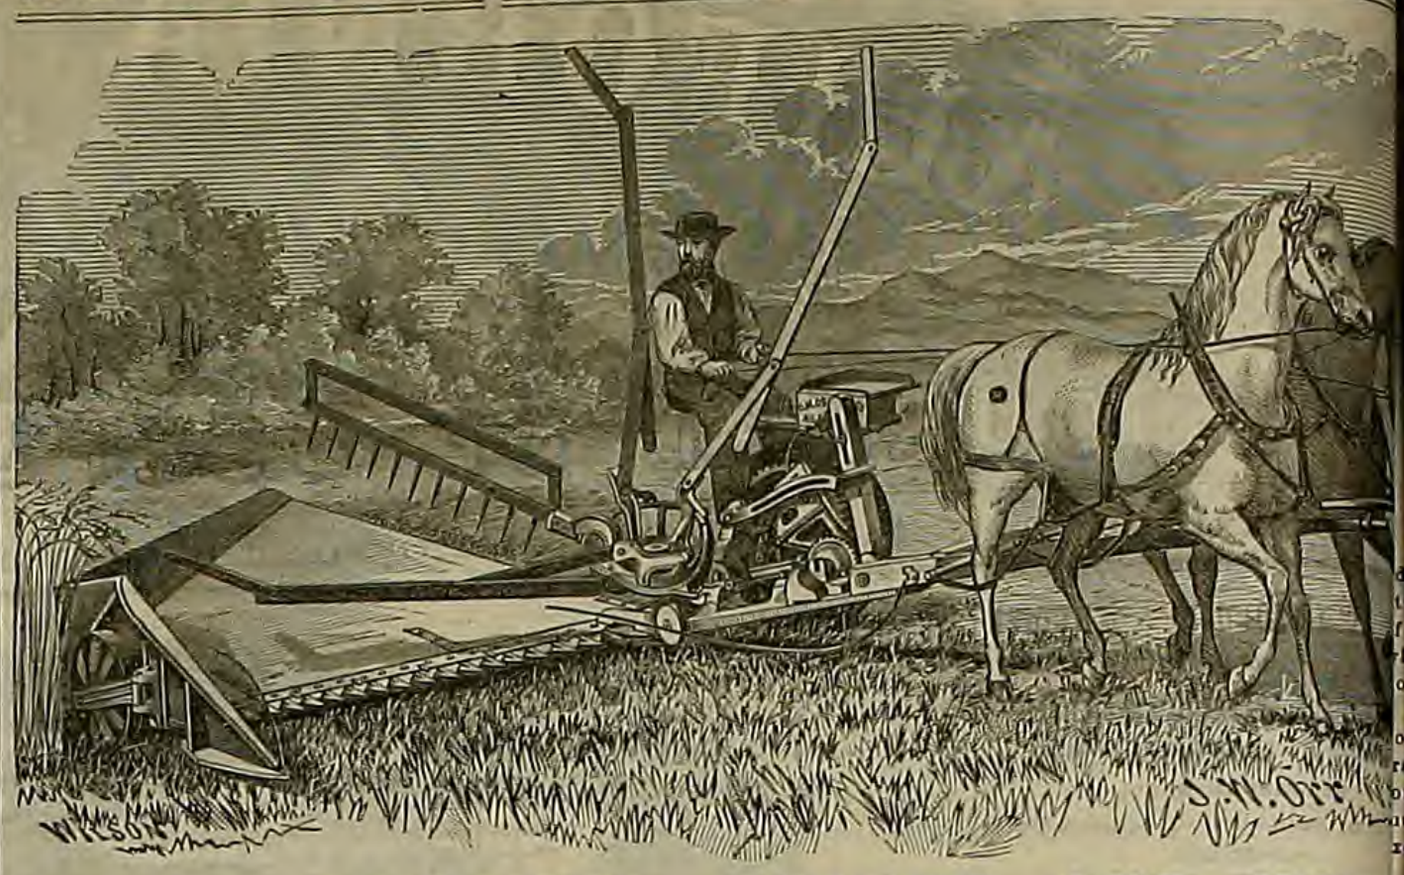
"I think it was during the summer of 1820 that I met him at Quoit Club near Richmond, where were collected at least half a dozen grave Judges and several distinguished persons of different professions, including Jarvis, the portrait painter, the prince of originals, past, present, and, I may venture to say, future.

"A match was made, and the Chief Justice threw off his coat, and fell to work with as much energy as he would have directed to the decision of a question of neutral rights, or the conflicting jurisdiction of the General and State Governments.

"I remember, in the course of the game, and when the parties were nearly a tie, that some dispute arose as to the quoit nearest the ring. The Chief Justice was chosen umpire between the quoit belonging to Jarvis and that of Billy Haxall. The Judge bent down on one knee and with a straw essayed the decision of this important decision of this important question, on which the fate of the game in a great measure depended. After nicely measuring, and biting off the end of the straw, 'Gentlemen,' said he, 'you will perceive this quoit would have it, but the rule of the game is to measure from the visible iron. Now that clod of dirt hides almost half an inch, but then he has a right to the nearest part of the ring, and here, you will perceive, is a splinter which belongs to and is part of the ring, as much as Virginia is a part of the Union. This is giving Mr. Haxall a great advantage, but notwithstanding, in my opinion, Jarvis has it by at least the sixteenth part of an inch, and so I deside, like a just judge, in my own favor.'"

"A man who is not afraid, whatever exaltation he may have reached, to let himself thus down to the level of his fellow men, must have that innate consciousness of genius which is in itself sufficient evidence of possession. Those who are afraid of mixing with their fellow creatures, are of the every day race of men whom chance has made notorious, and who are alike inhabitants of empty palaces that shut their windows for fear people may come near enough to detect the abject poverty within."

VALUE OF DEEP CULTIVATION.—The Commissioner of Agriculture says, that if our soil were cultivated one inch deeper, $150,000,000 would be added to the wealth of the country.



KIRBY'S COMBINED REAPER AND MOWE
WITH COMBINED SELF-RAKE AND REEL
TWO COMBINATIONS IN ONE MACHIN
This is the only TRULY COMBINED MACHINE in the world. While many machines PROFESS to be Combined, and some of them are very good others very good Reapers, there are none that Combine both qualities like the KIRBY, and work in either capacity as well as if designed for no other purpo
"MONITOR"
Self-Raking Attachment IS THE MOST PERFECT THING IN THAT LINE EVER INVENTED.
It is COMPLETELY SUCCESSFUL in any or all conditions of Grain, either Heavy, Light or LODGED, or in the heaviest Mustard; as over a Hundred the Pacific Coast, who are successfully using them this year, can testify.
The Kirby can cut the largest Mustard without any trouble, and rake it off also, if necessary.
We shall keep a large supply of EXTRAS of all kinds on hand.
The working of the "MONITOR" is so complete, that the closest scrutiny cannot discover that the team works any harder when it is taking off the bun In fact, it is easier for the team to run the KIRBY COMBINED REAPER with the "Monitor" Self-Rake on it, than it is to carry a man to rake off, and are left in much better shape for the binder; so much so, that many claim that it saves the work of one binder, to say nothing of the difference in scattering the
By a device lately invented, the size of the gavels can be regulated at the will of the driver, according as the grain stands heavy or light; it consists of a s operates on one of the ways of the Rake-arm, so that the Rake can be thrown and pass over the grain until a gavel of the right size is collected upon the then the Rake, of its own accord, will sweep it off.
This machine can be set to cut at any desired height from the ground, from two to eighteen inches, by merely changing two bolts, one in the grain-wheel in the axle plate, where the joint or independent action is obtained.
This machine never had an equal in heavy lodged grain or grass, as it is in such cutting that it shows its superiority to the best advantage.

New Strawberries, Raspberries, Grapes &c.
We have just received an invoice of NEW STRAWBERRIES, RASPBERRIES, BLACKBERRIES, &c., to which we call the special attention of all who desire the Newest and Choicest Vines and plants known. The following varieties received:
Blackberries---THE KITTATINY. WILSON'S EARLY.
Raspberries---DAVIDSON'S THORNLESS. DOOLITTLE BLACK CAP.
Strawberries—DR. NICAISE, nine to the pound. GOLDEN QUEEN, magnificent. GREEN PROLIFIC, rare.
New Grapes---TEN VARIETIES New Grapes.
As the amount of these new and rare things is limited, early orders only will secure them. Address

FARMER OFFICE

EARLY COODRICH POTATO.
Important to Market Gardeners and the Agricultural Public.
The Undersigned, having growing and tested the above Potato for two seasons, have no hesitation in pronouncing it far superior to any other grown on this coast, for an early Potato, and now offer it for sale. It is very early (from three to four weeks earlier than any other) good size, white skin, smooth eyes, white flesh, of superior table quality, and very productive.

Agents in San Francisco—GRIFFITH & ELLIS, No 225 Washington street, one door below Front; and G. F SILVESTER, No. 317 Washington street. 30-12.

TRUE'S
IMPROVED
POTATO PLANTER.

This is, undoubtedly, one of the most valuable Machines adapted to Agricultural purposes, ever introduced.
It Saves the Labor of 12 Men in Planting Time.
Makes its own furrow, cuts the potato in such sized slices as the farmer may prefer; drops these pieces with the most perfect regularity, and covers them perfectly, and does all this as fast as a horse can walk over any ground that can be plowed
No intelligent farmer can fail to see that an implement with which one man can, with the aid of a horse plant six acres of potatos in a day, is of inestimable value; because the days in which PLANTING can properly be done are very few, while he has all SUMMER and FALL in which to cultivate and dig.
This distinguishes the POTATO PLANTER from all other machines. It affords its aid "in the very nick of time," and gives leisure to its owner for attending to his other spring work, which would otherwise either overwork him or be left undone.
The undersigned have the sale of this Grand Labor-Saving Implement for the Pacific Coast.
We shall also sell "County Rights" for this Implement, and a good Mechanic can make a fortune with it
Particulars and Catalogues can be had at our office.

WALTHAM
WATCHE
The extensive use of these watches for years by Railway Conductors, Engineers, men, the most exacting of watch wearers, ly demonstrated the
STRENGTH, STEADINESS, DURABILITY AND ACCURACY
of the Waltham Watch. To satisfy the these respects, is to decide the question as value of these time keepers.
MORE THAN 400,000
of these watches are now speaking for them pockets of the people—a proof and a their superiority over all others.
THE SUPERIOR ORGANIZ
and great extent of the Company's Work enable them to produce watches at a pri der competition futile, and those who watch, merely pay from 25 to 50 per cent watches than is necessary.
WE ARE NOW SELL
Waltham Watches at less prices in gr the gold prices before the war. There is ufacture of any kind in the United State can be said.
THESE TIME PIE
combine every improvement that a long proved of real practical use. Having of nearly every invention in watchmaki in this country, or in Europe, only th adopted with severe testing by the most in our works, and long use on the part demonstrated to be essential to correct timekeeping.
Among the many improvements we m ize:
The invention and use of a
CENTRE PINION,
of peculiar construction, to prevent damage by the breakage of main springs, is only American Watch Company, who having b of all other contrivances, adopted Fogg's as being the best and faultless.
Hardened and Tempered Hair-S
now universally admitted by Watchmake best, are used in all grades of Waltham
ALL WALTHAM WATCH
have dust proof caps protecting the m dust and lessening the necessity of f necessary in other watches.
OUR NEW PATENT STEM WIN
or keyless watch, is already a decided great improvement on any stem-winding American Market, and by far the cheape quality now offered to the public.
TO CALIFORNIA
and others living in portions of the United watchmakers do not abound, watches mentioned improvements which tend to cleanliness, durability and convenience, valuable.
Every watch bearing the trade Waltham is guaranteed to be a reliable time-keeper,
To prevent imposition, buyers should mand a certificate of genuineness.
The trade supplied by Messrs. E. E. San Francisco, Cal., and generally for all respectable dealers.

Horticulture.

ABOUT SEEDS.

RESULTS OF THE USE OF LONG KEPT SEEDS.

The fact that old seeds yield weak plants is taken advantage of by the florist in producing new varieties. It is said that while the one-year-old seeds of Ten-weeks Stock yield single flowers, those which have been kept four years give mostly double flowers.

In case of melons, the experience of gardeners goes to show that seeds which have been kept several, even seven years, though less certain to come up, yield plants that give the greatest returns of fruit; while plantings of new seeds run excessively to vines.

UNRIPE SEEDS.

Experiments by Lucanus prove that seeds gathered while still unripe—when the kernel is soft and milky, or, in case of cereals, even before starch has formed, and when the juice of the kernel is like water in appearance—are nevertheless capable of germination, especially if they be allowed to dry in connection with the stem (after-ripening.) Such immature seeds, however, have less vigorous germinative power than those which are allowed to mature perfectly; when sown, many of them fail to come up, and those which do, yield comparatively weak plants at first and in poor soil give a poorer harvest than well-ripened seed. In rich soil, however, the plants which do appear from unripe seed, may, in time, become as vigorous as any.

According to Siegert, the sowing of unripe peas tends to produce earlier varieties. Liebig says: "The gardener is aware that the flat and shining seeds in the pot of the Stock Gillyflower will give tall plants with single flowers, while the shriveled seeds will furnish low plants with double flowers throughout."

DWARFED OR LIGHT SEEDS.

Dr. Muller, as well as Hellriegel, found that light grain sprouts quicker but yields weaker plants, and is not so sure of germinating as heavy grain.

VALUE OF SEED AS RELATED TO ITS DENSITY.

From a series of experiments made at the Royal Agricultural College at Cirencester, in 1863–4, Prof. Church concludes that the value of seed-wheat stands in a certain connection with its *specific gravity*. He found:

1. That seed-wheat of the greatest density produces the densest seed.

2. The seed-wheat of the greatest density yields the greatest amount of dressed corn.

3. The seed-wheat of medium density generally gives the largest number of ears, but the ears are poorer than those of the densest seed.

4. The seed-wheat of medium density generally produces the largest number of fruiting plants.

5. The seed-wheats which sink in water but float in a liquid having the specific gravity 1.247, are of very low value, yielding, on the average, but 34.4 lbs. of dressed grain for every 100 yielded by the densest seed.

The densest grains are not, according to Church, always the largest. The seeds he experimented with ranged from sp. gr. 1.354 to 1.401.

THE FLOWER GARDEN AND LAWN.—In all that relates to a flower garden or lawn, order and neatness are indispensable. At this season, special attention should be paid to these qualities. In making your arrangements for your pleasure grounds, allow abundance of room for the lawn. Of all arrangements for ornamental effect, a clean, smooth lawn possesses a beauty almost unequaled by even the most brilliant flowers and shrubs which are interspersed here and there. The lawn should have a dressing of good rich soil, or compost, before the middle of March, and grass seed should be sown during the first week of April, just before a rain. Sow the seeds over the ground, rake in with an iron rake, and roll immediately afterward when the ground is dry, for if wet, the soil and seeds will adhere to the roller. From a quarter to half an inch is not too thick to cover the lawn with compost.—*Horticulturist.*

LEWISIA REDIVIVIA.

This is a plant supposed to be found in California or on some portion of the Pacific coast, we think it is known in "Washington Territory," and also in British Columbia.

Dr Hooker of the Royal Botanic Gardens at Kew, London) says: Among the plants eaten by the Kootanier, Colville, and other tribes in that part of British Columbia and Washington Territory, is the beautiful Lewisia Rediviva, the roots are gathered in great quantities, and boiled or eaten like *Salep* or Arrow-root. In this state they are not unpleasant to the taste, slightly bitter, but are valued by the Indians as a nutritious food for carrying on long journeys, two or three ounces a day being sufficient for a man even though under great fatigue.

These Indians call it "*Spat Lum*" or "Pileem-and-lise-ne-mare," and look upon it as one of the great gifts of the "Supreme Master of life.

We desire to learn where this root can be found, and shall esteem it a great favor if those who shall read this article and know of its location, will be so kind as to address a letter upon the subject, to the Editor of the California Farmer.

—Don't imagine trouble; don't borrow it; don't die before your time. When God wants you to die, He will show you how to do it easy.

VALUABLE PLANTS FOR SALE.

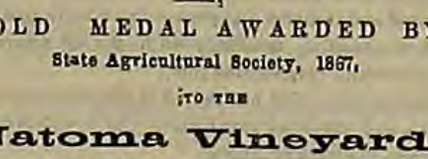
☛ Persons who are desirous of securing a few very choice and pretty specimens of rare PLANTS IN POTS can be suited at the gardens of the subscribers, where strong and HEALTHY PLANTS, of all kinds, can now be had in any quantity.

These plants and vines are of our own growing, and we have taken the greatest care to grow the best kinds, and to so cultivate as to make them hardy in their nature.

These plants have been raised in the open air, exposed to the sun and drying winds, so as to give them vigor, and when removed to other places, to gardens in the country, or to conservatories, or to parlor windows, for house cultivation—they will prove strong and healthy, and be sure to flourish and grow far better than plants that have been raised in green-houses and grown weak and tender.

We invite our Subscribers and Patrons, all who wish collections of CHOICE PLANTS, VINES and SHRUBS to call on us and see our collections, and we will offer them great inducements to purchase of us.

tf WARREN & CO., *Farmer Office.*



GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles, and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO., Farmer Office.

Choice Grape Cuttings.

VERY CHOICE GRAPE CUTTINGS.

Many kinds not to be had at any other place.

ALSO—Very strong 2 year old rooted vines, at a very low figure.

Apply at the FARMER OFFICE,

Or address Editor Farmer.

ORANGE SEED.

THOSE WHO WISH TO RAISE TREES FOR AN *ORANGE PLANTATION*,

Can obtain SUPERIOR SEED at the

IT DON'T SCRATCH YOU,

Or Tear Your Clothes.

DAVISON'S Thornless Black Cap Raspberry is the best, as it is hardy, productive, early, and sweet, and it is a pleasure to cultivate it. For origin, description, prices, testimonials, etc., address WARREN & Co., Farmer Office

Having been appointed Agent for the sale of this new and valuable Raspberry, and having received the history and particulars of its merit, we are now prepared to Book orders for the Plants, which will arrive here at an early season this Autumn.

We give the following testimonials of its excellence:

THORNLESS RASPBERRIES.—The Raspberry season has come, and now is the time to examine and take notes of the different varieties, which is the earliest, the most productive and the best.

The THORNLESS raspberry has excited much attention lately, especially on account of its freedom from thorns, so that the fruit can be picked without lacerating the most delicate skin, or tearing the clothes, and it has been said to be fully equal to the Doolittle black cap in every respect; the stalk even larger and stronger, the berry full as large and luscious, and the season four or five days earlier.

I have them now in full fruitage, and the bush is a joy to look at, so densely covered with its beautiful fruit, and I feel that the half its virtues have not been told; and I wish the opinions of others on the vine whilst it is in bearing; for which purpose I will invite all who feel an interest to call at my place at once and see it.

I picked the first ripe berries the 22d of June. The 27th I picked one pint from two hills. The 18th I picked some over a pint from the same hills, and they are still full of fruit, and are vines only one year old.

Vineland, N. Y., June 30th, 1868. JOHN GAGE

From the American Horticultural Annual, for 1868 page 102:

"DAVISON'S THORNLESS.—This has done very well the past season, and fully confirms our former good opinion of it. It is probably not quite so rampant, grower as the Doolittle or the Miami, but still it is a good grower and very prolific. Fruit is of quite large size, averaging about as shown in the figure; very sweet and several days earlier than the older varieties. It has no thorns upon the stems, as its name indicate, and in this respect, at least, it is a decided improvement."

These plants are direct from Mr. Joseph Sinton, of Angola, Erie Co., N. Y., and are PROPAGATED FROM TIPS, making good, stocky plants, and well-rooted.

From the Erie Dispatch, New York:

We were shown a day or two since some splendid specimens of what was a curiosity to us till then, the thornless black raspberry. They were brought into our office by Mr. John Dodge, of Harborcreek, who also showed us the bush on which they grew. In taste and quality they are far superior to the common black raspberry. They were raised by Joseph Sinton, of Angola, N. Y. The first plant of this kind sprank up in a garden in the town of Gowanda, N. Y., six or seven years ago, where it still remains, thrifty and large as ever, notwithstanding the numerous slips that have been cut from it.

Orders should be left at our office early to secure this new and valuable variety. WARREN & Co.

TYPE FOR SALE.

The Type which now prints the FARMER will be offered for sale, as we intend to print on NEW CALIFORNIA TYPE.

The quality of the Type can be seen by reading the FARMER. Any one wishing a good bargain can have one by calling at once at our office, or addressing EDITOR FARMER

SPECIAL NOTICE.

We must inform all persons who sends us *Advertisements* from other States, that they will not be inserted in this Journal unless *Paid for in advance*. We have several small *Bank Checks sent us*, which proved *worthless*, the names of the *Drawers* are placed on our *Black List*, and will be published unless soon redeemed.

PREMIUMS for 1869.

With a hope to enlist a new interest for our Journal and to give to those who co-operate with us a just recompense for their time and labor, we offer the following

Very Liberal Premiums

For the Year 1869,

THE THIRTY FIRST VOLUME,

—AND—

SIXTEENTH YEAR

OF THE

"California Farmer,"

We trust the following Premiums will induce those who desire to receive our Journal, and the accompanying New Year's Gifts, to extend to us their generous influence for the Extension of our Circulation, until every family in the Rural Districts shall have a copy of the

"CALIFORNIA FARMER."

TERMS OF SUBSCRIPTION:

(Payments in Gold or Silver, Always in Advance.)

By mail, one year,.....$5 00

" " six months,.....3 00

When payments are delayed six months,.....6 00

CLUBBING.

To clubs of five, (and extra copy), six for... 25 00

do twenty,..... 75 00

do fifty 175 00

Or, we will give as Premiums, as follows:

For every club of five, and $25, Agricultural Books valued at.....6 00

To every club of Ten, and $50, Agricultural Books valued at..... . . 15 00

For every club of Twenty, and $100, Agricultural Books valued at 30 00

For every club of Fifty, and $250, Agricultural Books valued at 75

Thus securing to a Farmer, or a Farmer's Club, the nucleus of a good Library—The Books to be at our lowest advertised Gold prices.

Every Farming District in our State could by co-operating with us secure a large and valuable Library, without any other cost save a little labor and co-operation to extend the FARMER'S circulation.

To any Lady who will secure us Ten subscribers, and $50, we will send Magazines or Floral Books to the value of $15 00

For Twenty subscribers, and $100, we will send Books and Magazines, or a Sewing Machine valued at 35 00

For a club of Forty, and $200, we will send a "Howe," or a "Florence" Sewing Machine valued at 65 00

Each and every Premium to be at regular Gold Prices, and the Premium to be selected by the winner.

We hope these offers will be so appreciated that we shall have the earnest co-operation of many friends, and to all who shall interest themselves, we shall be ready to fully remunerate their kindness.

Sample copies will be sent, when desired, to those who wish to canvass among their friends.

THE FIRST PREMIUM,

is now offered for sale to the Trade, or at Retail, in lot to suit purchasers at the

CALIFORNIA FARMER OFFICE.

Young Man Wanted.

We want a smart and active young man from 12 to 16 years of age, to attend to our Reading Room and Museum, Mailing Papers, etc.

None need apply who cannot bring the best testimonials of character and ability. Must be a good penman and quick at figures.

To such a young man an opportunity advancement will be given.

A young man whose parents or friends reside in the city would be preferred.

Apply at our office only between 4 and 6 P. M.

The California Farmer.

SAN FRANCISCO:

THURSDAY EVENING.....APRIL 1, 1869.

THE CALIFORNIA FARMER READING ROOM AND MUSEUM OF NATURAL HISTORY.

320 Clay Street—Marble Building—Up Stairs.

FARMERS' HEADQUARTERS—FREE TO ALL.

The Editorial Rooms and Museum of the FARMER OFFICE are always open, and an attendant ready to make a visit instructive to those who take an interest in the productions of our State. Samples of all production Grains, Grasses, Fruits, Models, Inventions, Minerals, and specimens in Natural History innumerable, are constantly being added.

FARMERS' READING ROOM.

Farmers and Mechanics, from the country, who visit San Francisco, should visit the Free Reading Room and Museum of the FARMER Office. Members of the Press and Strangers are particularly invited to avail themselves of these rooms. Newspapers from every State to which we have access by mails, as well as Foreign Newspapers, Periodicals, and Magazines, are upon file and on the tables for use; a Good Library of hundreds of volumes, with works illustrative of Agriculture, Horticulture, and Floriculture, works for reference upon all Sciences, with a Cabinet of of Minerals, Coins, and Curiosities of interest to the Naturalist, to which we invite all.

TERMS OF ADVERTISING:

The charges for advertising in the CALIFORNIA FARMER, payable in advance, is ONE DOLLAR for five lines or less of space, in Nonpareil type, for *one* insertion, and ten cents a line for any larger space. Each subsequent insertion half these rates. This, it is believed affords the cheapest and best medium of reaching the Agricultural community on this coast. As heretofore the right is reserved to reject any advertisement deemed objectionable.

SAMPLE COPIES.

☞ Those who receive a number of the FARMER with this paragraph marked, may understand that it is sent to them for their examination hoping it will meet their approval and induce them to subscribe, and ask their neighbors to do so. Send for Sample Papers and get up a club. Address

PUBLISHER CALIFORNIA FARMER,
San Francisco, Cal.

Editor's Chair,

[Here we shall hold our special weekly chat with our Readers and Correspondents, and here we shall call their attention to such articles in each issue of our *Journal*, to which we would direct their *special* attention.]

Rambles in the Country.—Stockton will be the theme of our pen in our next report of "Rambles." We visited several manufactories, and workshops, and met the Railroad folks, and gathered many important facts, which we are compelled to lay over till our next, by reason of the mass of letters and correspondence crowded in upon us by the long "Pent up Utica," the "Overland," which has given us a table full.

We take pleasure in calling attention to the very interesting Letter of our Valued Correspondent, M. A. S., which has been delayed by the tardy Overland. His many friends will again greet him with pleasure.

We give an interesting Letter from Carpenteria on Agriculture, which will be read with interest. Also other letters from our kind friends.

Mass. Hort. Society Reports.—We acknowledge the Annual Reports of this flourishing Society, from which we have published this week. The volume is full of interest to us, and we shall take pleasure to speak again from its pages. Many thanks for the volume.

Practical Floriculture.—We have received from Orange, Judd & Co., the popular Book Publishing House of books in this Science, "Henderson's Practical Floriculture."

This is a most excellent little book, a proper companion to the Author's book on Agriculture. Both these books should be in every Farmer's library.

We have numerous Catalogues and magazines, received by overland mail, and letters. These shall be duly acknowledged next week.

The California Medical Gazette.—This excellent Medical Journal comes to us replete with valuable communications from our best medical practitioners, and with able editorials of those who control its columns, together with the current literature of Medical Science. We again commend this work for the use of every family.

ADVERTISE IN SEASON.

A great number of advertisers neglect to advertise in due season, they are apt to wait until the very time comes when the article they have to sell is wanted by those who have delayed till the last moment of time, but wise ones have purchased early and have had the choice and selection of a large stock, and have secured to themselves the very best by taking "time by the forelock," and those late advertisers loose a large amount of trade by this delay.

Agricultural Implements, Trees, Seed, Plants, and all other goods should be advertised *months* in advance of the season, so that purchasers may be advised and thus look after their wants before the day of use and hurry comes.

Early advertisers will always find their gains largely increased by giving attention to this plan and particularly in everything appertaining to Agriculture and Horticulture.

Newspapers and handbills, however good they may be, can never take the place of advertising.

"Bread is the staff of life, and *Advertising* is the life of trade."

CAREFUL DIRECTIONS.

We would most particularly desire our correspondents to be very careful in sending their Letters, Orders and Remittance to us, as there are several firms of Warren & Co., and unless the address is very plainly marked mistakes will arise

All Letters, Orders, Parcels, &c, intended for this office should be addressed WARREN & CO.,
California Farmer Office

MASSACHUSETTS HORTICULTURAL SOCIETY

REPORT OF THE VISITING COMMITTEE.

The Report of this eminently successful and very influential Society at Boston, (the volume of Annual Reports of the Society just received) furnishes many very valuable and interesting facts, from the various Committees. These Reports, made in full detail, would be a most excellent guide to some of *our Societies here*, and would create a better interest and feeling in the cause, if they would take example from them.

We have selected some of the places visited by the above named Committee; one to the Forest Hills Cemetery, and one to "Hawthorn Grove," the splendid residence of the distinguished President of the American Pomological Society, whose services in the cause of Agriculture and Horticulture have won for him a high fame. We hope he will HONOR California with a visit when the Pacific Railroad shall be completed. He would be warmly greeted.

We also give a sketch of the Early Rose Potato, as seen at the grounds of W. C. Strong, Esq., on Nonantum Hill, Brighton and Newton.

We give much space to these Reports, as they furnish so much matter of importance to Horticulture and Agriculture.

WEBSTER BROTHERS, STOCKTON.

We made a flying trip to Stockton the present week, to learn of the success of the manufacturers, mechanics, and the source of all these, which in his great and wonderfully rich section of country, must depend upon, (the source of all prosperity) the Farmers of San Joaquin Valley.

Our first call was at the

HEADQUARTERS OF THE FARMERS.

We found the Pioneer Agricultural Warehouse of Mess. Webster Brothers, a scene of active life. There we met a great number of Farmers from various parts of this great farming region, and they all seemed joyous and happy at the grand prospects that bids fair to come upon our whole State. Mess. Webster Brothers are full of business; as much as twenty men and two teams could do, to get the implements ready as fast as they were called for and send them off.

A large number of Farmers were looking for the Harvesting Weapons, making ready for their great and wonderful Harvest, which all now admit will be the largest ever known, and beyond all calculation GREAT.

The *Perry Mower*, which is illustrated on our front page, is creating great excitement, as it is said to be the *Best* yet out, and coming as it does so finely heralded, makes it in great demand; as an evidence of this, *Ten Perry Mowers* were disposed of during the portion of the *one* day we were there; and others wanted, but could not be got ready.

The amount of business done by Webster Brothers at Stockton, which is immense daily, is only a proof of the vast amount of agricultural interests in that region.

We visited the New Warehouses just completed by this firm, and although their present Warehouse and Salesrooms occupies an immense space, they have been obliged to erect *two more*, to store their implements required for their increasing trade.

The new Warehouses are as follows: a large Brick Warehouse 45 feet wide, by 120 feet long, and spacious; also one of Wood, 50 by 100 feet. They have also a third for storage, of large size. This will give to our readers some idea of how many Implements the Farmers of the San Joaquin Valley require.

Mess. Webster Brothers aim to secure all the New and Improved Implements known, therefore their business has become of great magnitude, and by a very liberal system of dealing, they have secured the greater portion of all the trade of this region of country.

THE FLORENCE SEWING MACHINE.

Facts are strong arguments always, and when well established go to prove the value of any article offered for sale.

The great contest that has been going on for a long time relative to the *Popularity* and *Excellence* of the FLORENCE SEWING MACHINE, *now* with its new and valuable improvements, is fully attested by the following important Record, made of the Sales of the San Francisco Agency, by Samuel Hill, Esq., and sent East to the Home Department, showing the steady increase in the sales the last *Six Years*, taking only the *Month of January of each year*, as a sample month of the trade.

The sales in January,	1864	$19
" " " "	1865	29
" " " "	1866	34
" " " "	1867	57
" " " "	1868	77
" " " "	1869	112

This shows that this Machine has so rapidly increased in public favor that the *sixth year* was SIX TIMES the amount of the *first year*.

CRANBERRY CULTURE.

F. Trowbridge, Esq., the well known Nurseryman and Seedsman of Milford, Conn., who deals largely in Cranberry vines, and who is familiar with the culture of the Cranberry and its requirements, writes to the N. Y. Horticulturist the Essay which we give place in our colums this week, and to which we call the special attention of all who desire to cultivate this desirable fruit. There is no reason in the world why we should not grow the Cranberry very extensively in this State. We would urge upon all who have "tule land" that have been reclaimed, and overflowed lands, to consider this subject and read the Essay we publish this week. Cranberry Meadows can be made to produce more per one acre than *ten acres* of wheat or barley. Now is the time to purchase the plants. Burn off the of "tule" and your land is ready for planting, for the *fire* will burn the sod several inches deep, and thus thoroughly prepare the ground for the plow and the work will be well done.

Be sure you procure *Eastern* Cranberries, as they are the only varieties worth growing.

FOREST HILLS CEMETERY.

On Wednesday, September 9, by invitation of the Commissioners of Forest Hills Cemetery, the Committee visited that beautiful burial place. The Committee visited that beautiful burial place. The Commissioners and Superintendent very kindly met them, with carriages, at the depot, and took them through the grounds, affording every facility for a thorough examination. The whole area for burials is about one hundred and fifty-six acres; but other grounds for workmen, greenhouses, stables, etc., are also owned in connection with the Cemetery. Three new and substantial green houses, west of the entrance, are now nearly completed, with other propagating houses for the use of the place. These are of the most approved and enduring character, and are said to be models fit to study. The changes, which have been great during the past two years, strike you at once. The avenue, leading to the gate, has been expanded, and bounded on the east by a heavy stone wall, ornamented and lasting, quite in keeping with the gateway. The old wooden gatehouse has disappeared, and in its place is found a costly and extensive structure of Gothic style, of Roxbury stone, with Caledonian facings, unique and striking, after the design of C. W. Panter, architect. On either side of the main opening rises a solid tower and spire, with Gothic finial and ample side supports; and from tower to tower, above the arched entrance, runs a row of small Gothic arches and pillars, and an ornamental entablature, surmounted by a rising centre peak and finial. Conspicuous in front is the inscription,

"He that keepeth thee will not slumber."

On the hill top, west, now stands the superintendent's house, removed from below, improving the view. Here he is accessible and near to the new greenhouses and propagating houses, and to the offices and principal operations of the place. Passing through the gate, between the towers, the avenues diverge from a paved semi-circle, and directly on the right is seen a fine rosette of ribbon-planting, sombre, yet pleasing, having a centre of variegated maize, a ring of Coleus Verschaffeltii and Coleus Blumei, within a circle of Cinerarias, silvery and bright, set in a low bordering of moss and rock; while just across the avenue, the lively Gladioli, in grand assembly, challenged admiration, by contrast. The whole place was alive with flowers. Following the different avenues they were found to be in excellent condition, and generally bordered by turf or plants. The pond was clear, and neatly cared for, graced by several swans, and set in living green.

On Weigelea Path a modest marble monument to Thaddeus Clapp bears upon its face, in bold relief, a perfect model of "Clapp's Favorite" pear.

In another part of the ground, a large scroll of thin marble is carlessly thrown over a rough conglomerate rock, so light, so wavy and so white, that one could easily imagine that the veteran Editor, (whose name it bears) W. W. Clapp, had dropped at last his unstained paper on the stone, over which the ivy was growing lovingly.

One lot was noticed, on Weigelea Path, where, instead of a stone border, the periwinkle was planted and trimmed into perfect line vividly green, and contrasting favorably with the hammered stone around neighboring lots.

Consecration Hill has shared in the general progress, and exhibited excellent specimens of border flowers, double and single.

Near the pond, on a small triangle, some fine specimens of the trailing Lobelia bordering were seen. No plant surpasses this for unobtrusive beauty, and no other can be substituted for it. When planted (with the Myosotis for early filling, and to be removed as soon as the Lobelia blooms) the effect is always charming. At the lot of Mr. Harding, which was smoothly clipped, the modest Lobelia and Alyssum, with varieties of Coleus, produced a very pleasing effect. Much had been done everywhere; and many fine monuments and adornments were noticed, especially near the pond. These, with a good breadth of lawn and sunlight, and a glittering water view, prepared the observer for pleasurable sensations from the accessory flowers. Here was seen one of the longest, brightest and most admirable ribbons of Portulacas, double and single, which lacked only a proper background to charm the eye; but as it had been supported principally by Asters, which dying left vacancies and imperfections, the otherwise beautiful picture was unfinished. It was like a piece of new cloth on an old garment; a hint to planters which experience gives.

The Corporation have certainly shown the utmost liberality in the care of the grounds, and the proprietors of lots have been equally anxious to embellish the place. Many costly monuments have been added, and the general success has been very great. Your Committee have found much to approve and little to condemn: but they cannot close this notice without some mention of the lot of William Dwight, Esq., (on Consecration Avenue and Weigelea and Lily Paths.)

Here the characteristics of fine taste and exquisite feeling are manifested. Starting evidently without a thought of cost, with the sole intent to pay perpetual honor to the dead, without any bald display, and so to build that time should not impair, or frosts disturb the memorial to be reared, he selects a lot of large dimensions, backed by huge bowlders of brown conglomerate rock; and after securing well the boundaries, and smoothing the earth into lawn, he makes these bowlders the monuments of the lot. On the nearly perpendicular face of one—which has a slight projection, like a visor, near the top—a recess is cut, with sides so rough that no mark of chisel can be found. This recess is like the entrance to a tomb with massive doors; and fitting it closely a large memorial tablet of solid bronze is here inserted, highly ornamented and artistic, with two swords in the centre and wreaths of bay in high relief, and thereon, in lasting letters, are inscribed the names of his two patriot sons, who gave their lives for our country:

"Wilder Dwight, Lieut. 2d Reg. Mass. Volunteers, killed at the battle of Antietam."

"Howard Dwight, Assistant Adjutant General."

Over this rock, and coming down, as if to do homage to these names, were wild vines growing. All the surroundings were in perfect harmony, and the whole was exceedingly suggestive to the observing mind.

The Committee, in closing, would ackowledge their obligations to the Commissioners, and to Mr. Morton, for one of the most agreeable visits of the season, and recommend that a gratuity of Twenty Dollars be awarded to Forest Hills Cemetery for its marked improvement.'

Mount Auburn and Woodlawn Cemeteries have not been visited this year by your Committee in a body, but individual members report great improvements in them, and Woodlawn has lately added seventy-six acres to her territory.

COL WILDER'S GROUNDS.

After leaving Forest Hills your Committee accepted the invitation of our tried friend, Col. Marshall P. Wilder, to visit his place in Dorchester. As usual they did not leave him without gaining pleasure and profit. There they saw, probably the best border of the *Alternanthera amabilis* in the country. This beautiful border plant was first introduced by him into this section of the country, and through him its merits have chiefly become known. Here, too, one of the finest displays of Japan Lilies was seen. When, some years ago, he announced that he had successfully impregnated the *Lilium lancifolium* with L. *tigrinum*, this hybrid experiment was either doubted or regarded as a freak rather than a law of nature: but Col. Wilder exhibited to your Committee full pods of the same crossing, *this year;* and, what much surprised your Committee, a *perfectly successful* impregnation of the *Japan Lily* by the *Gloriosa superba!* The seeds did not vegetate till the second year, coming up, indeed, but growing very slowly.

All doubts, therefore, must give way to these established facts. There they saw, also, the original tree of the *Abby Wilder Camellia*, ten feet high, still in a condition to yield its blooms of beauty. While partaking of his hospitality and tasting his wines, a discussion arose as to the merits of the Ives' Seedling as a red wine grape, and it may not be amiss to add, that after careful trial and comparison, the Committee was unanimously of opinion that the Ives' Seedling was fairly entitled to all the praise bestowed upon it. The flavor is rich and fruity, and it compares well with the best European brands.

To Col. Wilder the Committee return their thanks for his kindness, and award to him a gratuity of Twenty Dollars for his successful experiments with lilies.

GROUNDS OF W. C. STRONG, ESQ

Here they were shown some very interesting experiments in the propagation of plants, and a field of four acres, covered with potato plants of active growth, from only *six pounds of the "Early Rose;"* purchased in March, at the cost of three dollars per pound. These had been produced from cuttings, started under glass and again cut, and started every fortnight and planted out, until the growth was very surprising. Opening two or three hills of those longest planted, two or three good tubers were found, with other small ones; and it was evident that a large yield would be obtained, if the weather should prove favorable for a few months. But unfortunately, northeast storms set in, and this crop, in common with many others, was struck by disease, and nearly all lost. Eighty-six bushels of good sized tubers, besides some bushels of very small ones, were measured as the product of six pounds of seed! (The details of this experiment are fully given by Mr. Strong, in the January number of Tilton's Journal of Horticulture.)

That the "Early Rose" is a free grower and good producer cannot be doubted. Dr. Wight of Dedham, with ordinary care, obtained sixty-four pounds, of fair sizes, from *one* pound of seed; and Mr. George Davenport of Dedham, *using guano with care*, raised twelve bushels from *two* pounds of seed. The public, therefore, may well be glad to welcome such a new comer!—*Mass. Hort. Reports.*

THE EARLY ROSE POTATO.

We find the following results and opinion of this famous Potato, given by the extensive Seed Grower, Gregory of Marblehead,

The Early Rose Potato is a seedling from the Garnet Chili, raised by Mr. Albert Breeze of Vermont. It was first brought into public notice last season, when it sold for three dollars per pound, and seventy-five dollars per bushel. I purchased about seventeen bushels of Mr. Breeze's neighbors at a cost of over eleven hundred dollars, cut them into single eyes and planted them in different soil and localities and raised a crop of about 750 bushels of sound potatoes. It proves to be the most productive of all early sorts, while in earliness it is a fortnight before the or any other kind and is equalled but by two or three kinds. The potatoes grow to a remarkably large size, and there are very few small ones. In color the Early Rose is of a faint red skin; the flesh is very white, while in quality it is very dry and well flavored. It is a very stocky grower and will bear very light seeding—from four to six bushels being ample for an acre. On good potato soil I find that this new variety is as free from rot as the Early Goodrich or Harrison. I append a few statements of results obtained by those who planted the Early Rose last season.

L. Bartlett, of Warner, N. H. grew 17½ lbs from six ounces of seed. S. C. Pattee, same place, obtained 64½ lbs from one pound.

At the late Annual Exibition of the Massachusetts Horticultural Society, a lot of 240 lbs that were grown from 13 ounces of seed was exhibited. A gentleman of Hortonville, Vermont, raised 100 lbs and six ounces, from six ounces of seed, the past season.

In my own experience, planting by the acre, I obtained nearly fifty bushels from one.

—Speak little, speak truth: Spend little, pay cash

Home Correspondence.

CARPENTERIA, SANTA BARBARA CO., CAL.
March 21, 1869.

EDITOR FARMER:—We have had a very heavy rain for the time of year, and Nature looks gay. It rained the most of the time for two days and nights, (the 16th and 17th) which was the most severe storm of the season, and much more than we anticipated at this time of year.

Farmers appear well pleased with their prospects, as the late rain will give them ample time for fitting the soil and planting their crops.

The main crop here is *corn and beans*. There will be much more land planted this year than ever before; not only to corn and beans, but barley and wheat.

I think the immigrant, or his teams need not go hungry next fall, as there must be plenty of hay and grain, and some to spare the traveler, which he could not find last fall at any price.

This part of the country is fast improving, building, fencing, planting orchards, etc., are progressing finely.

Land in this vicinity, very high, and but little for sale. Unimproved lands ranging from ten to fifty dollars per acre.

It is thought that the Almond will do better here than in any other part of the State. Many are planting and preparing to plant largely of the Almond, and English Walnut.

The Olive too, is receiving a great deal of attention and is thought will pay well for cultivation.

Messrs. Clough & Olmstead, near here, are planting a large Almond Orchard and Nursery. They appear very hopeful, and if prospered, they will soon be able to fill large orders for Almond trees of the best varieties.

I see some are still holding on to the last year's crop of beans and corn for a better price. The present price of beans *ought* to be satisfactory to any one; but the price of corn is not so flattering. Some sold their corn-crop in the fall for one to one and one-fourth cents per pound, in the ear, while others held on for *two* cents, as it *always* has been that by planting time. Planting time is now, near at hand, and corn is not two cents per pound.

I see some of the wheat-growers up country have failed in the same way, by not selling at threshing time, or as near after as practicable. I think some will soon learn that one cent a pound for corn in the ear, at harvest time, is a pretty good price.

I think there could be grain enough raised in this County to *bread* the State, and we have not a Flouring Mill; or even a Mill that can grind us a sack of good corn-meal. I know of two or three little cast-iron Mills, that can *crack* from two to eight hundred pounds of corn per day, at the price of fifty to seventy-five cents per hundred pounds. Why not have a good Mill that can grind our nice corn into meal, and keep enough for home consumption, and send the balance to *Oregon*, to buy flour with it if it is *necessary* to go there for it?

Now, our flour all comes from Oregon, and San Francisco, and when we have no corn-meal, that also comes from San Francisco, or we can crack our corn in a coffee-mill *at home*, and *save* the *toll*.

We need a *good* Mill, and it would soon find plenty to do and good pay.

Our climate is mild and salubrious. No freezing in winter, or scorching in Summer, and one of the healthiest in the State.

Respectfully,
O. N. C.

PROLIFIC COWS—GOODRICH POTATOES.

PLEASANT VALLEY, EL DORADO CO., CAL.,
March 8th, 1869.

EDITOR FARMER:—I will send you some of my Potatoes, in return for the papers you have sent me. Two years ago, I noticed that some of the Potato balls on the vines had been covered with earth, which had changed their round form to an irregular one, and on the main stem of the vine grew small Potatoes, something like bullets. I saved and replanted them again last spring, and raised some middling sized Potatoes. I will send you a sample of them.

In your *Farmer* of the 25th of February, appeared the following article:

"Mr. Thomas Anderson, of Gorrard, Kentucky, has a cow four years old in September last, that has given birth to five calves."

Has not the words "four" and "five" been misplaced, or did the cow have twins *twice?*

I have a cow, which my wife raised on skimed milk, I know to be four years old the first of next May, that has had her third calf on the 23d of February last, and they are all alive. I thought that pretty good, but Mr. Anderson's cow beats mine.

Your Obedient,
O. G.

REPLY.—The cow of Mr. Anderson, *had given four calves*, in that time, whether doublets or triplets it does not say; but only five calves up to that age.

Shall be glad to receive the potatoes; we know this variety is indeed most wonderful.—EDITOR FARMER.

American Watches.—The Waltham Watches are a great Institution, and the number made and sold and the great popularity they have now attained, is almost beyond the usual computation of figures. They have rapidly driven all others out of the market.

We have just received the little volume or sketch of the Manufactory at Waltham. It contains very interesting matter about *Waltham Watches* that would convince every reader that the Waltham Watch is the only thing that will make a man come to TAKE TIME.

CATTLE FEED.—From every source we have constant information of the excellence of Oil Cake Meal as feed. We have met hundreds of our Stock Men and Dairymen who have used this food, all who speak of its excellence above all other kinds of food, and cheaper too than any other food known.

Agricultural Implements. New Advertisements.

TO THE

FARMERS' OF CALIFORNIA.

It is of the HIGHEST IMPORTANCE for you to know who has the BEST and most IMPROVED HARVESTING MACHINES for 1869:

With the present indications arising from the Knowledge of Large Land Sales to Farmers, many of them new comers to our shores, and from the assurance we have of a Successful Planting Season, reason of abundant rains, we know that the acre-age will nearly if not quite double the amount of 1868, while the better system of tillage will fully double the crop in quantity.

WEBSTER BROTHERS'

PIONEER WAREHOUSE,

STOCKTON, SAN JOAQUIN COUNTY, CALIFORNIA,

Offer the present year the following

New and Improved Harvesters, viz:

The World-Renowned, 1st Premium, Gold Medal,

PERRY MOWER.

For Simplicity and effectiveness it is the *Ne Plus Ultra* of all Mowing Machines, working with great ease, almost noiseless, and with little or no friction, consequently with sure speed. It has invariably taken the 1st Premium, from the Exposition at Paris to all the State and County Fairs whenever exhibited.

THE BUCKEYE.

This is a well-known Standard Mower. So well known as not to require any special notice by us. We warrant it to be Superior to any other Mower now offered for sale in this State.

HEADERS--WITH NEW IMPROVEMENTS.

Our Headers combine all the latest and best Improvements known among the late inventions. Many of these Improvements belong exclusively to Webster Brothers. Our Headers, of different sizes, will cut from 10 to 24 feet. Draper's from 30 to 40 inches wide. The Gearings used are either the Double, or "Haine's Gearing," or the Single "Farmer's" Gearing. The Single-Geared Headers are recommended for their simplicity and the ease with which they can be kept in order. Price from $200 to $400.

HEADER WAGONS.

We have these Wagons so consstructed that after the Harvest Season is over, they can be used on the Farm for all the ordinary purposes of Farming. They will be sold at the low price of $125. Also Ordinary Header Wagons, from $40 to $90.

THRESHING MACHINES.

We have them with all the latest improvements. We would specially name the Steel Laid Cylinder, and Concave Teeth; a perfect *Self-Feeder* and *Self-Measurer*, is attached to each machine if desired, thus saving $300 in labor each season. These Threshing Machines will be the most perfect Implement ever yet produced to aid our Grain raisers. Price from $500 to $1000.

STEAM-ENGINES, HORSE-POWERS, AND IMPROVEMENTS.

These Powers combine several new and valuable improvements, not found in any other style of power save those sold by us.

BURT'S SELF-ADJUSTING HORSE-RAKE.

The above are the Principal Implements to which we wish to call the particular attention of the Grain Growers of our State.

We shall have also in addition to the above, one of the most Complete Assortments of

HARVESTING IMPLEMENTS

ever yet introduced on this coast.

We have also

Hardware and Garden Tools,

together with all kinds of

Garden Seeds.

WE SHALL SOON SEND CIRCULARS TO OUR PATRONS WITH FULL PARTICULARS.

Farmers, send to us, and buy only the NEW and IMPROVED MACHINERY, and not be induced by any *Sophistry* to buy *old* and *by-gone* Implements, but keep up with the "Progressive Spirit of the Age."

THE PHOTOSCOPIC TABLE COMPANY.

THE NEW INVENTION of this Company is known as ANTHROPHOTOSCOPIC, or "Photoscopic Table," designed to give a LIFE effect to every picture within the table.

THIS INVENTION enlarges and perfects all the outlines of a picture, Landscape or Photograph, and also gives the very finest lines of the most perfect Steel Engraving.

THE GRAND OBJECT OF THE INVENTION this wonderful table is to present a vast number of Pictures from 100 to 500, and thus give an opportunity to group FAMILIES entire; and also groups of chosen friends, collections of noted individuals, or series of landscapes, giving a grand Panorama of changable pictures, arranged to suit the wishes an desires of each owner of the table,

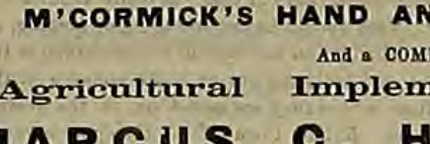
THESE INSTRUMENTS are made in the very best style so as to be a beautiful parlor ornament, one of the best in the parlor, made of our own beautiful native woods, and highly finished, and in price from $50 to $125.

Those who desire to PURCHASE can see one of the Tables by calling at the FARMER Office, or addressing

EDITOR FARMER. 32-1

Compare Prices.

THE MASON & HAMILTON ORGAN COMPANY, whose Organs are acknowledged to be the best, have this season introduced very important improvements and new styles of Organs, and have materially *reduced prices*. For Octave Organs, $50 each; Five Octave Double-Reed Organs, Five Stops, $125. *Every one having any idea of purchasing an Organ* should at least obtain one of their circulars (which will be sent free) and compare prices. Address the MASON & HAMLIN ORGAN CO., 596, Broadway, N. Y. or 154 Tremont Street, Boston. 1t.



GARDEN GROUNDS LAID OUT.

THOSE WHO WISH THEIR GARDEN GROUNDS renewed and replanted, or those who desire to have Grounds Designed and laid out upon Scientific principles, and with correct taste and skill, as

Adapted to this Climate,

can have this work done to their satisfaction by calling at this Office, where all the best works on Gardening can be found, and where the various Styles, both European and American, can be seen. Grounds of any extent, from

ONE THOUSAND ACRES,

to small Gardens, in our City, will be designed and laid out and the TREES, PLANTS, Shrubs and Vines, and Bulbs all supplied of the very best variety and reliable quality, and the work done to complete satisfaction, by calling at the Office of the California FARMER.

None but Educated men ever engaged in such work.

Address WARREN & CO.,
Farmer Office.

Choice Grape Cuttings.

VERY CHOICE GRAPE CUTTINGS

Many kinds not to be had at any other place.

ALSO—Very strong 2 year old rooted vines, at a very low figure.

Apply at the FARMER OFFICE,
Or address Editor Farmer.

OUR HOME INTERESTS.

APPRECIATING THE INJURIOUS EFFECTS that will inevitably result to the material interests of this State and of its citizens, by the PERMANENT withdrawal from circulation of nearly two millions of dollars annually (an existing fact), and the probability that unless checked this large sum of money will be increased each year until, in a very few years, it will amount to the enormous sum of TEN MILLION OF DOLLARS or more, PER ANNUM, to be sent East for investment in the purchase of Life Insurance, instead of being retained at homes to promote and foster BY ITS INVESTMENT HERE the commercial, mechanical, and agricultural interests of our State, a large number of the prominent business men of San Francisco resolved to provide a way, by means of which this GROWING EVIL could be checked, and the citizens of this and the other States of the Pacific Coast be given an opportunity to obtain insurance on their lives in a reliable HOME INSTITUTION, *whose capital and assets will not be impaired or injuriously affected by the change in values that will sooner or later occur by a return to specie payments in the other States of the Union.* Actuated solely by these motives, they organized and incorporated "THE CALIFORNIA MUTUAL LIFE INSURANCE COMPANY," of San Francisco, and they now look to the citizen of this State, who feel an interest in its progress, to second them in their efforts to check the evil complained of. This can only be accomplished by patronizing exclusively a Home Company.

It is believed that when our citizens fully realize the importance of the facts above stated, they will not require further argument to induce them to patronize

THE CALIFORNIA MUTUAL LIFE Insurance Company Of San Francisco.

All policies issued by this Company are, by the laws of California, EXEMPT FROM ATTACHMENT OR EXECUTION OF DEBTS, whether the policy be in favor of the *party assured*, or of *any other person*.

Policies are made non-forfeitable after two annual payments.

ALL PROFITS divided among the assured.

One half of the annual premium loaned to the assured at *any time* when desired.

Thirty days' grace allowed in the payment of renewal premiums.

This Company offers to those who have paid up their premiums in cash for two or more years, the advantage of giving notes for the whole amount of their annual premium, for a period *corresponding* to the time they have paid all cash; by merely giving their note, and paying the interest in advance.

Wm. R. WHEATON, General Agent.

AVERY PUMP WELL

COMPLETE FOR USE

THE TUBE WELL IS FOUND BY DRIVING prepared Iron Piping into the ground with a sledge. Although of comparatively recent invention. These Wells have won a world-wide reputation, and are proven to be superior to the ordinary dug well. All surface water, dirt etc. being excluded. The Tubing is coupled together in lengths of six or eight feet, as they are being driven into the earth. The valves are then dropped in and the pump screwed down upon the top.

Force and Light Pumps always on Hand.

For ease of working, durability and force, the AVERY PUMP has no superior. ☞ For circulars, etc., address Postoffice Box, 17. WHIG & DEWEY.

Office at 318, Pine street. 31-10.

Home Miscellany.

[For the California Farmer.]

SYRENS.

Sailing, sailing to the South—
On a Summer sea,
Only thee and me;
Kiss me sweet lips, on the mouth.

Ah, our sounding's now I know—
Isles of spice they be,
Looming on our lee;
Happy gales, blow softly, blow.

Hark! I hear the Lurley sing;
Sea-maid white and cold,
Combing curls of gold;
Ghosts of drowned men round her cling.

Syren, you may sing and float—
I am safe from you,
Eyes of mocking blue;
I've my true-love in my boat!

BETTINE.

GOING TO SLEEP.

BY EMILY HUNTINGTON MILLER.

Come hither, my baby, my darling,
My lily, my wonderful rose!
The white-bosomed flowers in the garden
Begin their soft petals to close;
The bees have gone home from their clover,
The swallows are under the eaves;
And, down in the orchard, the robin
Broods over her nest in the leaves.

Come, baby—my beauty, my darling!
Your eyes, they are heavy with sleep!
Your little red mouth has grown silent,
And scarcely its laughter can keep.
Lay off the white robe from your shoulders,
Unclasp the small shoes from your feet;
Oh, daintiest blossom of Eden,
I kiss you, my lily, my sweet!

Do you feel the cool wind coming softly,
And see the young moon in the sky?
The clouds sailing over the sunset,
The bats flitting silently by?
Do you hear how the cattle are lowing,
Along the green lane by the hill?
And the brook running over the pebbles,
With music that never is still?

Now, hush while I sing to you, baby,
A song of the angels above,
That come, on invisible pinions,
To watch o'er the children they love.
So, all through your beautiful dreaming,
The voice of your Mother shall creep;
Lest, bearing the harpings celestial,
Your soul should fly homeward in sleep.

LETTER FROM OUR LADY CORRESPONDENT.

JENNIE GREEN. CHAP. II.

THE CHURCH.

Slowly the day went as in happier times.

Jennie and Belle had many engagements. On Thursday, was in the house of one of the Deacons, sewing, singing, and talking over the events of the times, and taking critical notes; for they had their own paper, for which they kept up a gay cry.

And Emily Lee, one of their number plied a busy pen, from which came many a bright surprise never to be forgotten by them.

On Sunday, they met in the church. Jennie looked eagerly for the familiar faces that should be there, and sighed to find so many missing.

All were in mourning. Jennie watched the people as they entered. Mrs. Lee with her two daughters Emily and Marie came, and bright Rebecca Golden, wearing her pretty dress, with lovely Laura Lancaster, who was resplendent in pink.

The subject of the day could not have been listened to, had not the Southern heart politics been woven as it were into the almost every sentence of the Minister.

We may now return thanks to God that the time is past when the worshipping heart of a people is hurt by the discord of that sorrowful time.

At home again, and in their quiet rooms, Belle opened her Bible and read from the "Lamentations of Jeremiah;" and Jennie over whose face a smile of love rested like native sunlight—bowed her head in her Bible, over the rosebuds that had a story for her heart, since the day they were pressed till now.

Till they were called to meet a company of the good people of the village, and young girls. Bright Rebecca Golden and lovely Laura Lancaster, and Effie Bowles, Jennie Green, were perfect likenesses.

There would be a little effort to meet the interest and necessities of the times in a party at the residence of one of their old Church members, on the next evening, a Comedy at the Theater—the Theater that had won the good will of the people by its even, echo of their sentiments, and so had become the resort of many who were frequenters—if not members of the Church.

Jennie would lend them a hand! They were making black dresses for the daughters of the once wealthy Mrs. N., who was once the owner of broad lands and many slaves, whose fortune had melted; whose slaves had found their way to the army of the North. Jennie accepted the loving task. She was learning to take a part in the trials of the times.

And the glimmer of many a midnight lamp, attested to her industry.

BERTHA BAY.

"I don't admire ladies' cuffs," as the husband said when his wife boxed his ears.

MENS' LINEN—HOW TO MAKE; BUTTONS, &C.

[We take the following brief chapter about Shirts, and Shirt Buttons, from that excellent book "Leslie's Ladies' House Book," and hope it will be read with profit by those *Excellent Housewives* that have this kind of work done at home. We think if the "Buttons" could be made to *stay on* to this all important garment, it would save a great deal of sin that is daily committed now by those who are a *little* impatient at the *loss of a shirt button.*—ED. FARMER.]

A SHIRT OPEN AT THE BACK OF THE NECK.

If the shirts are for a man of ordinary size, and the linen is yard-wide, you may, in cutting out the body, (which should be a yard in length,) take a slip off the side for the wrist-bands, etc. Slit the back of the shirt, down from the neck, about half a yard deep. This slit must be hemmed; and at its termination a tuck is to be laid all the way down the remainder of the shirt-back. Cut a square piece out of the upper part of the fore-body, (about a quarter and a half-quarter deep, and the same in width,) for the purpose of admitting a full bosom piece. This square piece of linen will come into use for sleeve linings, shoulder-linings, etc. The bosom piece must be cut about three quarters wide, and a quarter and a half-quarter deep. It is to be set into the open square made for its reception in the fore-body; first laying it into three broad pleats of equal size, basting them down till you have fitted the bosom piece and cut out the neck to the proper size. Then close-stich the pleats all the way down by a drawn thread. Afterwards insert the bosom piece into its place, back-stitching and felling it down neatly, first basting it in. Dispose of the extra width of the fore-body (where it joins the lower part of the bosom piece) by laying small pleats, one at each corner, and two meeting in the centre. Insert into the top of each shoulder (where the collar is to go on) a neck-gusset, gathered a little at the upper edge. Line the tops of the shoulders with an under piece about half a finger broad.

Gather the back of the neck; having cut out the front, rounding it downwards. The neck, both before and behind, must have a binding made of a double piece of linen, about half a finger deep when doubled. This binding must be a straight band, and should have two buttons and button-holes behind, (one above another,) and directly in front a button to sustain the false collar with which these shirts are always worn.

The sleeves must be cut quite straight. A breadth of yard-wide linen will make a pair of sleeves. The sleeve-gussets may be a finger and a half square. Gather the sleeves at the shoulders and at the wrists. The wrist-bands must be of double linen, (not cut bias,) in depth about a finger. They should be cut spreading or fanning, so as to be wider on the back of the hand than at the wrist, and hollowed out or made concave at the bottom, where they are sewed on to the sleeve-gathers. Round them off at the upper corners, and finish them with a row of fine stitching, a very little distance from the edge. Put a button and button-hole to each.

No other buttons are now used for shirts than those of mother-of pearl.

ROSA.

Rosa, our kitchen maid, is eighteen, graceful and trim, and hardly less black than Jacob. She wears dangling ear-rings set with blue glass stones, and a bright pink frock which fits her as neatly as a French grisett's. She had only been with us a week or two when Sylvia came into the parlor where we were all sitting.

"What do you think Rosa wants to do?" she said, laughingly. "Actually she desires to come into the parlor and play for us. She says she can sing, and that she plays the organ in the colored Methodist Church."

We all cried out let her come in, and in a few minutes, quite radiant and self-conscious, Rosa tripped in to the piano. She struck a few fine rolling chords, and then began to sing. We all started in amazement. Pure and clear and full of melody, her voice soared like a lark's, and overflowed the room with its volume. We had expected to be amused, but we were dumb with astonishment.

Kate, whose delicate soul finds expression at the piano, but whose voice is hardly strong enough for vocal expression, flushed and trembled with delight as Rosa sang, and, when she ended, murmured with a sigh, almost of envy, "O, if I had a voice like that!"

Next day I questioned our black swan about her advantages for cultivation. Her father and mother, with their three daughters, had been slaves till 1863. They had a kind master, and were never sold apart. After becoming free, the parents had put the three girls in school, and now they could read and write, and her father had hired a piano, and all had learned to play a little. Rosa and her second sister "lived out," but the youngest, only eleven, was still in school.

"We shall make a teacher of my little sister," said Rosa, complacently, as she told me all this.

"But how did you learn to play and sing so well?" I asked.

"O, I took a few lessons, but I got it mostly by ear. But you ought to hear my next sister play and sing. She can sing splendid; I'm nothing alongside of her."

"But where do you get your style, Rosa? who taught you to sing in the way you do?"

"Well, I've listened to white folks' singing, and two or three times I've been to an opera, and heard ladies sing there. I bet you I listenrd close. And after that I could just imitate them, every motion."

It must have been true, for no uncultured voice could have executed a song as Rosa did.—*Atlantic Monthly.*

Virtue is like precious odors, most fragrant when they are increased or crushed; for prosperity doth best discover vice but adversity doth best discover virtue.

A WISE CREED.

The Mother of Goethe, the celebrated German poet, said of herself—"Order and quiet are my characteristics. I dispatch at once what I have to do, the most disagreeable always first. I always seek out what is good in people, and leave what is bad to Him who made mankind, and knows how to round off the angles."

The saying has in it the very best philosophy of life. Performing disagreeable tasks always first, and quickly, will take away more than half the unpleasantness the days contain. Hunting for what is good in those around us, will not fail to repay with blessings.

How much to be commended is the trait of character which Goethe's mother manifested in this expression. We can readily believe she was a sunny-hearted woman. Goethe himself bore testimony in this regard. "From my dear little mother," he wrote, "I derive my happy disposition and my love of story-telling." Her sunny-heartedness was due, in a great measure, to her wise creed of life and thought. It is erroneous to think that the natural disposition is wholly responsible for habits of doing and thinking. Natural dispositions may be overcome by steady persistence, and habits naturally enough formed may be broken up. We ought not to be willing slaves to our innate propensities. A creed like that cited may be our deliverer.

HOW HENRY WARD BEECHER WRITES HIS SERMONS.

"Well," said an eminent divine, "tell us how you get up your sermons."

Mr. Beecher replied that when he first commenced to preach, he wrote out a few of his sermons, until he had enough other writing to correct his style. Since then he has never written out a discourse in full. He has an idea all the week as to what subject he will treat on Sunday. Still there is no definite plan in his mind until the time arrives.

Usually, he does not touch pen to paper before Sunday morning or Sunday afternoon. Then he sometimes gets so many sermons under way that the one he intends to prepare is neglected until the first bell rings, whereupon he throws aside the incomplete work, and blocking out a discourse he hastens to the pulpit. Generally, he writes what would make a quarter of a sermon, embracing the leading points to be presented. In preparing a sermon he first "blocks it out," and lays the foundation with a part of the framework. At the proper place he cuts windows, through which the audience may see the beauties of the Gospel. The windows are designated by the letters "Ill," inclosed in a line thus (Ill), showing that an illustration is to come in at that particular point. None of the illustrations are ever written out beforehand or with the sermon, but they are given as they occur at the time when they are needed.

Often, when in the pulpit, he finds the windows in the wrong place. He always has a variety of new sermons on hand, to be used on special occasions. He said that in old times the housewife kept the batch of dough in the pantry, and when bread was required all she had to do was go to the tray and cut off enough for baking. So it is with his sermons. He never preaches the same one twice, though he frequently uses the same text, but it is always in a different manner.

In reply to the question as to whether he selected his text first, or the subject, applying such a text as would suit, he said that a text may be compared to a gate opening into the Lord's Garden; many ministers, instead of unlatching the gate and leading their hearers in to pluck the fruit and flowers, content themselves by getting upon it and swinging to and fro.

He always makes it a point to preach his best sermons on stormy days, for then those who are in attendance say to their friends, "You don't know how much you missed, by not being present, though it was a stormy day."

He well remembered the time when, on nearly every Sabbath during the winter it snowed or rained, "for it came near killing me." said he laughingly.

Some one inquired if he studied his prayers. "Never," said he; "I carry a feeling with me such as a mother would have for her children were they lost in a great forest. I feel that on every side my people are in danger, and that many of them are like babes, weak and helpless. My heart goes out in sorrow and in anxiety toward them, and at times I seem to carry all their burdens. I find that where one's heart is wrapped and twined around the hearts of others, it is not difficult to pray."

Another wanted to know if it would not be better for Mr. Beecher to travel about the country, that the people of various sections might be benefitted by his preaching.

"No," said he; "what would a stove in the Arctic regions be good for if it were carried from place to place? Besides, more people come to hear me than I could reach should I go after them. It is better for the United States to go through my church than for me to go through the United States. — *Ralph Meeker, in Packard's Monthly for March.*

ASPARAGUS.

Well! will you buy the *White* Asparagus that is absolutely *poisonous*, and of which you can only use *one-fourth* in weight of what you purchase, or will you buy the *natural esculent* that is green, tender, melting and rich, and of which you can eat seven-eights of the amount purchased; besides there is more nourishment and palatable food in *one pound* of the Green Asparagus than in *ten pounds* of the White.

—Hoops have been compared to obstinate persons, because they stand out about trifles.

—In the language of flowers—if you wish for "hearts ease," never look to "marry-gold."

—Agricultural Fairs, Farmers' pretty dau ghte

Miscellaneous.

Santa Clara College, S. J.

SANTA CLARA, CAL.

Conducted by the Fathers of the Society of Jesus.

24-3 REV. A. VARSI, S J. President.

THE CHURCH UNION.

This paper has been recently enlarged to mammoth proportions. *It is the Largest Religious Paper in the World.* Is the leading organ of the Union Movement, and opposes ritualism, close communion, exclusiveness and church caste. It is the only paper that publishes Henry Ward Beecher's Sermons which it does every week, just as they are delivered,—without qualification or correction by him. It advocates universal suffrage; a union of Christians at the polls; and the rights o labor, It has the best agricultural department of any paper in the world: publishes stories for the family, and for the destruction of social evils. Its editorial management is impersonal: its writers and editors are from every branch of the church, and from every grade of society. It has been aptly termed the freest organ of thought in the world,

Such a paper, offering premiums of Sewing Machines, Dictionaries, Appleton's Cyclopedia, Pianos, Organs for Churches, etc., makes one of the best papers for canvassers in the world.

Every Congregation may obtain a Communion Service, an Organ, a Melodeon, a Bible, or a Life Insurance Policy for its Pastor, or almost any other needful thing, by a club of subscribers.

The agency for the *Church Union* is the *California Farmer* Office, San Francisco, where subscriptions will be taken and copies furnished.

FARMER OFFICE.

Miscellany.

BROTHER JONATHAN'S LAMENT FOR SISTER CAROLINE.

BY O. W. HOLMES.

She has gone—she has left us in passion and pride—
Our stormy browed sister, so long at our side!
She has torn her own star from our firmament's glow,
And turned on her brother the face of a foe!

O, Caroline, Caroline, child of the sun,
We can never forget that our hearts have been one—
Our foreheads both sprinkled in liberty's name,
From the fountain of blood with the finger of flame!

You were always too ready to fire at a touch;
But we said, "she is hasty—she does not mean much."
We have scowled, when you uttered some turbulent threat;
But friendship still whispered, 'forgive and forget.'

Has our love all died out? Have its altars grown cold?
Has the curse come at last which the fathers foretold?
Then nature must teach us the strength of the chain
That her petulant children would sever in vain.

They may fight till the buzzards are gorged with their spoils,
Till the harvest grows black as it rots in the soil,
Till the wolves and the catamounts troop from their caves,
And the shark tracks the pirate, the lord of the waves.

In vain is the strife! When its fury is past,
Their fortunes must flow in one channel at last,
As the torrents that rush from the mountains of snow
Roll mingled in peace through the valleys below.

Our Union is river, lake, ocean, and sky;
Man breaks not the medal, when God cuts the die!
Though darkened with sulphur, though cloven with steel,
The blue arch will brighten, the water will heal.

O, Caroline, Caroline, child of the sun,
There are battles with Fate that can never be won!
The star-flowering banner must never be furled.
For its blossoms of light are the hope of the world.

Go, then, our rash sister! afar and aloof;
Run wild in the sunshine away from our roof;
But when your heart aches and your feet have grown sore,
Remember the path that leads to our door.

ABOUT NAPOLEON.

When Napoleon was about fourteen, he was conversing with a lady about Marshal Turenne, and extolling him to the skies.

"Yes, my friend," she answered, "he was a great man; but I should like him better if he had not burnt the Palatinate."

"What does that matter," he replied briskly, "if the burning was necessary to the success of his plans?"

1790. When at Auxonne, Napoleon and some subaltern officers were quartered at the house of a barber. Napoleon, as usual when off duty, shut himself in his room and devoted himself to study. The other young officers amused themselves by coquetting with the barber's pretty wife, who was much annoyed that her charms had no power to draw Napoleon from his studies. Afterwards, when in command of the army in Italy, Napoleon passed through Auxonne, on his way to Marengo. He stopped at the barber's door, and asked his former hostess if she remembered a young officer by the name of Bonaparte, who once quartered in her family.

"Indeed I do," she replied pettishly; "and a very disagreeable young man he was. He was always shut up in his room, and if he did walk out, he never condescended to speak to any one."

"Ah! my good woman!" Napoleon rejoined, "had I passed my time as you wished to have me I should not now have been in command of the army of Italy."

1794. During the seige of Toulon, one of the agents of the Convention ventured to criticise the position of a gun which Napoleon was superintending. "Do you," he tartly replied, "attend to your duty as national commisioners, and I will be answerable for mine with my head."

Napoleon's younger brother Louis visited him during this seige. They went together one morning to a place where a fruitless assault had been made, and two hundred Frenchmen were dead upon the ground. On beholding them, Napoleon exclaimed, "All those men have been needlessly sacrificed. Had intelligence commanded here, none of these lives need have been lost. Learn from this, my brother, how indispensable and imperatively necessary it is that those should possess knowledge who aspire to assume the command over others."

"General," said Bonaparte to Dugommier, as he raised the tri-colored flag over the crumbling walls of the rampart, "go and sleep. We have taken Toulon."

An officer, entering Napoleon's room, found, much to his astonishment, Napoleon dressed and studying.

"What!" exclaimed his friend, "are you not in bed yet?"

"In bed!" replied Napoleon. "I have finished my sleep, and already risen."

"What, so early!" the other replied.

"Yes," continued Napoleon, "so early. Two or three hours of sleep are enough for any man."

When Barras introduced Napoleon to the Convention as a fit man to be entrusted with the command, the President asked,

"Are you willing to undertake the defence of the Convention?"

"Yes," was the reply.

After a time the President continued—

"Are you aware of the magnitude of the undertaking?"

"Perfectly," replied Napoleon, fixing his eyes upon his questioner; "and I am in the habit of accomplishing that which I undertake."

1796. "Good God!" Napoleon said in Italy whilst residing at Montebello, "how rare men are., There are eighteen millions in Italy, and I have with difficulty found two, Dandolo and Melzi."

ADVANTAGES OF YEARS.—You are getting into years. Yes, but the years are getting into you—the ripe, rich years, the genial, mellow years, the the lusty, luscious years. One by one the crudities of your youth are falling off from you—the vanity, the egotism, the insultation, the bewilderment, the uncertainty. Nearer and nearer you are approaching yourself. You are consolidating your forces. You are becoming master of your situation. On the ruins of shattered plans you find your vantage ground. Your broken hopes, your thwarted purposes, your defeated aspirations, become a staff of strength by which you mount to sublimer heights. With self-possession and self-command of all things, the title deed of creation, forfeited, is reclaimed. The king has come to his own again. Earth and sea and sky pour out the largest of love. All the crowds pass down to lay its treasure at your feet.

A head properly constituted can accommodate itself to whatever pillows the vicissitudes of fortune may place under it.

Be always receiving or doing good. This will make your life comfortable, your death happy, and your account glorious.

Miscellaneous.

A PRINCELY RESIDENCE
IN THE COUNTRY
FOR SALE.

To any wealthy person who desires to retire from the drudgery of a business life in the city, and enter upon a newer and better and happier life in the country, a life, where by the cultivation of a higher taste and a nobler pursuit than that of mere merchandizing, he can still have plenty of business to occupy his mind and his leisure time, and at the same time secure to himself

A PRINCELY HOME.

And while enjoying this, can, if he so desires, add to his income yearly, by wisely using this home and gathering the products. Such a place can be had, already complete to the taste, and in one of the most healthy localities in our State.

This place is now offered for sale, only by reason of the absolute necessity of the present owner going abroad. Any person who is willing and desirious of investing *Forty or Fifty Thousand Dollars* in such a place—Beautiful in all its surroundings, and Fruitful as the very Garden of Eden, with all manner of luscious fruits, and where, with a judicious care and management, the entire cost of the place could be returned again in four years *by its productions*, can learn of the opportunity by applying to the Editor of the FARMER. No person need apply unless with the means to fulfill contract.

Real Estate, or other property, in San Francisco, at Gold Value, will be received in part payment, and *Statistical proof given* to show the real income annually of this rich and fertile spot.

Inquiries and letters addressed to this office will be promptly attended to. WARREN & CO.

AUZERAIS HOUSE,

HUCKS & LAMBERTS'
CELEBRATED PATENT
H.&L.
AXLE-GREASE

This Extraordinary Lubricating Compound

Is produced by a chemical combination of suitable oily substances, purified by distillation, and

EFFECTUALLY

Freed from the resinous or pitchy matter which attaches to all oils, more or less, in their natural or unrefined state. In operation, the PATENT GREASE works free from Comb, or Gum:

PREVENTS

Friction by keeping the heaviest bearings in a soft oily state to the last; and, as its consistency is not altered by exposure to the hottest sun or coldest frost, (its liquifying point being 200 degrees) it follows that, on axles which have a tendency to become hot from too heavy abrasion, etc., the anti-friction will adhere to an keep them cool, when other substances would run off and become dry; thus the evil known as

"Firing of Wheels,"

Is by its use effectually prevented.

The Proprietors will guarantee one application of their PATENT GREASE to carry the heaviest loaded team from 300 to 500 miles without requiring to be re-greased on the road.

☞ N. B.—We respectfully caution our friends to ask for HUCKS & LAMBERT'S AXLE-GREASE, as there are several spurious imitations in the market, and see that their trade mark,

H.&L.

upon the red cover of the packages

Railroad Lands.

CENTRAL PACIFIC RAILROAD,
LAND DEPARTMENT.

Sacramento, March 1st, 1867.

The following statement is made for the information of those who desire to purchase Lands from said Company:

1st. Congress has granted to the Company, all the alternate sections of the public lands designated by odd numbers, within a distance of 20 miles on each side of the railroad;—excepting lands to which a pre-emption or homestead claim had attached prior to the 12th of September, 1862, and excepting lands reserved by the United States as mineral.

2d. The Company has no interest in even sections. To constitute a valid pre-emption or homestead claim within the above exception, the party must have resided on the land prior to September 12th, 1862, and continuously since that time. He must also on that day have been over twenty-one years of age and be the head of a family and have filed his claim in the United States Land Office within the time required by law. If he has not these requisites, or has neglected to file, he will have to buy of the Railroad Company.

3d. All persons who desire to purchase lands from the Railroad Company, including settlers, pre-emptors, and other claimants, should make application to the Land Agent, B. B. Redding, at the Land Office of the Company, in Sacramento, either personally or by letter, describing the land by legal subdivisions. This application will be filed and the party will be allowed three months to complete the purchase, and during this time the land will not be sold to another without giving such applicant thirty days previous notice. If the purchase is not completed within three months, the land will be open to purchase by others.

4th. Persons who have valid pre-emption or homestead claims to any tract on an odd numbered section, can purchase the same from the Railroad Company at the Government price of $1.25 per acre in greenbacks, and upon the usual credit of five years if they so desire, by filing an abandonment of their claim in the U. S. Land Office, blanks for which will be furnished by the Land Agent of the Company. Such purchase from the Company has these advantages over a purchase from the Government: The party can leave the land if necessary—he can sell or mortgage it—he is saved the payment of lawyers' fees and expenses of witnesses to go to the Land Office to "prove up" his claim—he can get his title perfected in less time—and he can buy on credit at a low rate of interest.

5th. Actual occupants of lands belonging to the Company, will generally have a preference in the purchase at the regular price. No addition to the price is made where there are improvements on the land made by the settler. Where there are conflicting claimants who apply to purchase, an adjudication of their respective claims will be made by the Land Agent, upon due notice given to both parties.

6th. No lands are sold by the Company or the Government, until after they have been surveyed and the plats returned to the Land Office.

7th. The Company sells ordinary agricultural lands at $2 50 per acre, in gold (except sales to pre-emptors as above). Timber lands, lands in the immediate vicinity of the railroad, and tracts having special value above ordinary farming lands, will be sold at prices and on terms fixed by the Board of Directors.

8th. Persons desiring to do so can buy on a credit of five years by paying twenty per cent. of the price down, and interest annually in advance on the remainder at ten per cent. per annum. Thus a purchaser of one hundred and sixty acres at $2 50, which amounts to four hundred dollars, will pay twenty per cent., or eighty dollars, with interest on three hundred and twenty dollars, which is thirty-two dollars—in all one hundred and twelve dollars, paying each year thereafter thirty-two dollars interest, and the three hundred and twenty dollars at the end of five years. The three hundred and twenty dollars can be paid at any time within the five years, but not by installments, and the purchaser will then be immediately entitled to a deed

9th. Applications to purchase lands can be filed in the Land Office of the Company at any time after the same have been surveyed by the Government; but no applications will be acted upon until three months after the maps have been filed in the United States Land Office. Occupants of the railroad lands who desire to purchase should therefore be prompt in filing their applications in the office of the Company within this time. Blank applications will be furnished to all who desire to purchase. No sales will be made except by legal subdivisions according to Government surveys. Purchasers can buy as large an amount of land as they may wish.

10th. No sales are made by the Company until the land is listed over to it by United States Land Officers. Purchasers are thus assured that the title they obtain is perfect.

Produce Markets.

Wholesale Produce Report.

This represents the prices paid by the dealer to the producer on the wharf or landing places.

[Corrected Weekly, by EDITOR FARMER.]

SAN FRANCISCO, April 1

The most prosperous season for the Grain Crops all over our State, the unfavorable reports of markets in Europe, with the low price in the Eastern States, added to the fact of many severe losses to shippers of Grains, who are now receiving the quite unpleasant news added to the uncertainty of an immense harvest this year beyond all precedent, these combined facts must convince our Grain Growers that *low prices* must be at once submitted to in order to *force* off, if necessary the *very large* supplies now on hand and which is now being sent to market.

We are astonished at the presumption of any well informed person who shall for a moment think it possible for any other prospect than *low prices* on all Grains.

We have advices by last Mails from Europe and from all the leading Grain Markets of our country and we cannot see any other prospect. By advices from Rochester, N. Y., the Headquarters of the famous *Flouring Mills* of former days when the Flour from Rochester ruled the world, our last letters inform us that Wheat has been sold—the various kinds from $1 70, down to $1 30 per bushel and this in currency is equal to an average of $1 50 per bushel currency, or $1 12½ gold or, about 1½cts per pound. This would reduce it after deducting shipping expenses, to less than it is now selling here by a handsome margin.

We feel assured from the bad results of the "Hold On" policy, which was so injurious to our State, and the Grain Growers more particularly, that our Farmer *this* year will not be inclined to listen to, or believe those Journals that led them so widely astray last year; but they will meet the Market at the "Harvest"—whatever it may be and realize.

During the past week we have met several parties who have lost severely by the "Hold On" policy. They now see their error and will atone for it this year. See other remarks on editorial page.

Retail Prices in the Fruit Market.

Apples are the leading feature in this department. We are continually receiving supplies from Oregon, and to speak of them in bulk, they are anything but first-rate. We must admit that the transit, does in some measure injure them; nevertheless, they are not what they might be. We must grow sufficient in our own State, and varieties to suit the climate and season.

A few decent Pears come to hand occasionally. Of Pines, Bannanas and Oranges, the supply is fair.

Strawberries come steady to hand and are bringing $1 25 per pound.

Retail Prices in the Vegetable Market.

The most conspicuous features in our Vegetable Market this week, were fine samples of green Battersea Asparagus, and a few samples of the Early Goodrich Potatoes. The Goodrich, apparently is one of the earliest and most productive Potatoes in the Market. When cooked, its appearance on the table is far superior to any other, and its quality second to none. The greatest advantage to be derived from the Goodrich, is that, no matter how late they are planted, they produce fine and heavy crops.

The Early Rose will undoubtedly create great excitement in this State and be largely grown this season, even at the great cost of the seed now introduced.

As a rule the Asparagus sent to Market is of the pale, tough under-ground growth, which is more injurious than otherwise for the system. The more pure vegetable green there is about Asparagus better the connoisseurs are finding that out; therefore, our Gardeners would do well to plant the best, and cultivate it properly.

Green Peas are coming freely to hand, and maintain last week's prices.

FISH

(Tessmore and Hayes.)

Our dealer's stands have been more than well supplied during the week. Salmon, the prince of the scaly tribe, has been very plentiful, and can be had at the low price of eight cents per pound, which is something very uncommon at this period of the year. Turbut, always "brother in quality" to Salmon, is to be had at the unprecedented price of four to six cents per pound. What will our Eastern friends think of this?

Herrings are not to be caught "napping"—they do not trouble our shores much.
